3. Objective(s):

Leader's Intent

Implement a full suppression strategy on the fires within the River Complex. Values at risk include human safety, communities, private timberlands, critical infrastructure, associated improvements, and wilderness resources. Apply tactics that offer the highest probability of success commensurate with resource availability.

Management Objectives

Provide for firefighter and public safety through hazard recognition and application of the risk management process.

Continue to provide timely information to all affected agency partners, cooperators, and to the public.

Coordinate suppression and repair activities with incident Resource Advisors to minimize impacts to wilderness, natural and cultural resources, and to work towards meeting suppression repair standards for turnover to local districts.

Reduce risk and limit exposure to infectious diseases by minimizing large group settings, reinforcing social distancing, wearing face coverings, and handwashing.

Control Objectives

Keep the Cronan Fire within existing control lines.

Keep the Haypress Fire within existing control lines.

Work towards meeting 100% completion of suppression repair guidelines.

TRAINEES:

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob. When as much work (as possible) has been completed in your PTB for this incident – Conduct the “close-out” process w the TNSP to save you time at DMOB

**** (THIS INCLUDES ASSIGNMENTS ENDING WITH TRANSITION) ****

Submit/Upload the following during the “exit interview”

If your trainer has left I need your new Trainer info Name/Home Unit/contact phone and email

You must submit copies from each trainer of the following:

- A completed and signed ICS 225 or 226 Performance Evaluation
 - A completed Exit Interview Form
 - A completed Task Book Evaluation

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fire line, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on fire lines.

Fire line slope %	Degrees	Maximum Distance Apart (feet)
1-5flat-3°.....	200
6-204-11°.....	125
21-4011-22°.....	60
41-6023-31°.....	40
>60	25

Waterbars should be at least two pulaskis (4-6 inches) wide and 12-24 inches high for handlines. For dozer lines, waterbars may be 2-3' high and the 5-6' across. They should survive the heaviest rain storm...think 6" rain in 36 hours.

RIVER COMPLEX SAFETY MESSAGE

Think Safe...Work Safe...Demob Safe

INCIDENT: River Complex

DATE: 10/13/2021 to 10/14/21

Major Hazards and Risks:

Driving

Hazard Trees

Extended Medical Extraction

Steep Terrain

Rolling Material

Rain and Cold Weather

Fatigue

Dehydration

Heavy Equipment

Animals on Roads

Air Operations

Narrative: Know who your supervisor is. Are you prepared for your travel home or to your next assignment? Your safety and well-being continue to be the highest priority. This is especially true with the cumulative effect of fatigue from long work days and multiple assignments this fire season.

Working with and around HEAVY EQUIPMENT

- Stay at least 100' in front of and 50' behind equipment or 2.5 times the timber height.
- No one but the operator should ride on the equipment.
- Never approach it until the operator sees you and signals you over and the blade or implements are lowered and idled down.
- Avoid walking under where the equipment is working.
- Ensure operator can see you at night. Use a headlamp and or glow stick.
- Establish visual and radio communication prior to engaging.
- Communicate all hazards to operator

Demob Safety Guidelines

- Ensure that you have enough rest to satisfy the 2-to-1 work/rest ratio.
- No driver will drive more than 10 hours (behind the wheel) within a duty-day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving time limitation of 10 hour days.
- A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift.
- If approved, identify your "Rest-Over-Night" location in advance. Check in regularly with your home unit and update your travel plans.
- If you are tired, please stop and take a short break.
- If there is a passenger, they should try and stay awake during the hours of darkness to increase the safety factor.
- Before departing, complete a vehicle "walk around".
- Ensure windshield is clean and floor is free of possible rolling materials.
- Please don't drive distracted....thanks.

USDA Forest Service

Free COVID-19 tests are available for
wildland fire personnel!!!

Not just for Forest Service personnel! Anyone associated with wildland fire work is welcome.

To get tested for free, go to the

**Klamath National Forest Headquarters (aka "Klamath
Supervisor's Office")**

**1711 South Main St, Yreka, CA 96097 - 6:30 AM to
8:30 PM every day!**

Please use the QR code to the right to register (either before or on-site) for the test administered by Emergency Response Logistics, Inc. That QR code will take you to a form.

In the interest of protecting each other and our families, we encourage testing early and often! Please contact testing.klamath1@gmail.com if you have questions or comments.

All USFS employees and non-USFS personnel assigned to fires in the Klamath NF area or passing through Yreka en route to or from fire assignments are encouraged to stop to be tested prior to reporting to the assignment or traveling to another site or home.

A core value of the Forest Service is safety. This testing availability is an additional step in safeguarding human life and protecting our most valuable resources. Our Code and Commitments include being trusted to "do right" by each other and the communities we serve.

Pacific Southwest Region
Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. And 2021 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Employee Assistance Program

Accessing the EAP – How to Get the Most out of the Service?

Employee Assistance Programs are designed to help employees during times of acute stress. Knowing what to ask for, and what to do if it isn't working is important too. Many people have struggled with the EAP and we are working to resolve issues. If you are denied services or something goes wrong, please reach out for help!

What to talk about at intake?

Be prepared to describe your situation, the specific stress you are experiencing, and the possible cause of that stress or mental health issue. If appropriate explain that you are a wildland firefighter and trauma informed care might be important. Ask for information to understand the services available and pick the right one for you. If this is not an acute issue the EAP will help you find the right type of resources and get you connected into the care you need.

While most regions and stations will begin their transition into the new contract, regions with current contracts will transition on a rolling basis once their current contracts end. Clients who call from these identified regions will be routed to their current EAP provider/contract plan.
