fire behavior

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels
Fuel models best represented by TL8, TU5, SH7, and GS2.

OUTPUTS

FIRE BEHAVIOR

GENERAL: **Fuels and Fire Behavior Advisory Issued for northern California**

- Critically low Live & Dead fuel moistures. 1000-hr. dead fuel moisture below 10% and live fuels way below 100%.
- Topography is very steep and rugged. Elevations from 3000' - 7500' with slopes over 100% (45°) in many places.
- Fire behavior will increase as inversions lift around and will become much more active later in the day
- Heavy dead fuels/timber litter/light flashy fuels are highly receptive to spotting and active growth in all directions

SPECIFIC:

Westerly winds will increase fire behavior on west facing slopes exposed to the winds, particularly on ridges. Fire will continue to back and slope-reverse in many areas that are actively spreading. Slope-reversals in fire spread will trigger significant growth. Moderate backing and flanking rates of spread with high intensity burning. Rapid rates of spread when fire is aligned with slope, available fuels and/or wind. Heavy smoke at lower elevations will limit fire behavior. Fire activity will remain active at night in heavy dead fuels and timber litter. Some areas will be more active at night due to heat insulation and loss of wind influence. Roll-out will be a problem during the day and night.

--Probability of Ignition up to 90% in most areas during the day-- --ERCs above 97th percentile--

Haypress Fire: Moderate to high potential for fire to get established and grow to the west and south in Sugar Pine Creek that will bring the fire closer to the Coffee Creek community homes. High intensity burning, short range spotting, backing and flanking at moderate rates of spread with rapid upslope runs when slope-reversals occur. Continued spread to the east and south at moderate rates of spread. Fire likely to back into the Cecilville Rd. in DIV-L. Active fire growth to the south on DIV-S/T. The Parker spot will remain active and grow to the north in uncontained firelines.

Summer Fire: Areas of intense heat in DIV-U will continue to actively back and roll-out towards the Cecilville road at moderate rates of spread. Fire is established in Plummer creek, if fire crosses Plummer Creek it will make rapid uphill runs towards the west. DIV-S/T have many areas of intense heat that will continue to spread to the south at moderate to rapid rates of spread. Slope-reversal uphill runs will occur.

Cronan Fires: Unburned islands will continue to smolder in isolated pockets of intense heat. Scattered smoldering within containment lines will continue.

AIR OPERATIONS:

Smoke from these fires and other fires in the region will continue to limit the use of aircraft until smoke clears

SAFETY

Many areas that have been quiet in the past few days have the potential to flare-up, rapidly grow and spot. Don't underestimate and don't be surprised by fire behavior... Maintain high Situational Awareness & Intelligence.

CIIMT 13 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

Human Resource Message

You're Wrong, I'm Right!

For a lot of us here on the River Complex, this is our third, fourth or more, assignment this season and fire fatigue, along with COVID mitigation fatigue, might be starting to wear on you. With the hard work and the long hours everyone has been putting in, it is easy to get on edge and on the edge with each other, especially when we have a difference of opinion on the need to be vaccinated or how we feel the Biden Administration is doing.

There are many of us who enjoy a robust debate on everything political, however, there is a time and place for it. In the environment we find ourselves in, this is not the time and place to have those controversial debates – are we really going to change the other person's opinion? Let's guard against letting our strong political/vaccine beliefs from affecting our unit cohesion.

If we find ourselves getting on edge or heated with someone on the incident, recognize when our temperature gauge is reaching a critical point and take a 15-minute cooldown before we do or say something that's out of character and against IMT 13's, Code of Conduct.
