-------------------------------	------------------	-----------	------------------

4. OPERATIONAL PERIOD (DATE/TIME): 9/20/2021 to 9/21/2021, Day 0700-1900 / Night 1900-0700

5. OBJECTIVES:

Strategic Framework

Implement a full suppression strategy on the fires within the River Complex. Values at risk include human safety, communities, private timberlands, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the River Complex. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information with Monument fire and other local fires to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident Resource Advisors to minimize impacts to wilderness, natural and cultural resources.

Control Objectives

Keep the Cronan fire within existing control lines.

To prevent the Haypress fire from spreading to private property, surrounding communities, and impacting values at risk, keep the fire:

- South of Cecilville Road.
- West of the Hwy 3.
- North of Long Valley Road.
- East of the 2020 Red Salmon fire footprint.

INPUTS

WEATHER SUMMARY: ***Warming and drying begins today, Northeast wind, RH <25%***

- Today Temps 68-78 RH 18-25%. Wind, NE 10-12 gusts to 20 on the ridges, Light downslope in the morning becoming NE 6-10 in the afternoon.
- Tonight Temps 43-55 RH 30-40% Wind E 10mph with gusts to 18 on the ridges, Downslope/Valley 5-8 below the ridge.

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy dead/down, mixed ground fuels. Fuel models best represented by 10, TL8, TU5, SH7, and GS2.

OUTPUTS

FIRE BEHAVIOR

GENERAL: ***Fuels advisory active for Northern California***

- Critically low Live & Dead fuel moistures. 100 and 1,000hr and Live Fuels remain dry.
- Fire behavior will be significantly moderated due to yesterdays' rain.
- Heavy dead fuels/timber-litter/light-flashy fuels are highly receptive and will continue to burn out.

ERC rebounding quickly, currently 69. Probability of ignition 70-80% in the afternoon.

SPECIFIC:

Branch X: Fire will begin to spread South. Expect slow rates of spread but be ready for an increase in rate of spread with the forecasted wind direction. Increased surface fire activity with 1-2 ft FL's. Chance for isolated single tree torching. Heavy fuels will produce intense heat. Pockets of heavy dead and down will hold heat for long periods and produce intense heat. Any spotting will be short range and mostly from rollout. Structure threat exists in the Callahan area. Tonight, expect longer burning periods as RH recovery will be poor. ***Little Mill Creek Drainage is aligned with the forecasted NE wind***

Branch V: The fire remains in a backing and flanking alignment. Expect slow rates of spread. Increased surface fire activity with 1-2 ft FL's. Chance for isolated torching. Any spotting will be short range and mostly from rollout. Structure threat to the Coffee Creek area still exists. Structure threat exists in the Eagle Creek Loop area. Many natural barriers to fire spread exist throughout the Branch, however, don't let your guard down the fire will continue to creep through any available fuel. Tonight, expect longer burning periods as RH recovery will be poor.

Cronan Fire: No fire progression expected.

All Areas: Spotting from rollout will continue to be problematic. Slope-reversals are probable from any fire burning in drainage bottoms. Mop-up is extensive. Smoke will continue to limit aircraft operations. Fire activity will moderate when it reaches the Red Salmon burn scar.

AIR OPERATIONS: Smoke will impact visibility and effect aircraft availability.

SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas.
- Unburned fuel between you and the fire.

Fuels and Fire Behavior Advisory

Northern California

September 16, 2021, to September 30, 2021

Subject: Potential for extreme fire behavior due to continued critically low live and dead fuel moistures. Very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, periods of excessive heat have caused elevated to record fire danger rating values across much of northern California. Anticipated moisture could temporarily reduce some threat across the far north PSAs.

Discussion: Fires burning in northern California continue to exhibit extreme fire growth due to critical fuel conditions. Rapid fire spread can be fuels driven. Wind events have led to extreme rates of spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Extreme to Exceptional levels of drought conditions continue to exist across much of Northern California. The drought is expected to persist or intensify through the rest of fire season. Deficient rainfall and snowpack with early melt off, coupled with periods of extreme heat has resulted in fuels that are critically dry, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year. Recent scattered rain has reduced some ERC values, but fuels are rebounding quickly. Extreme fire behavior has been observed in all fuel types and both live and dead fuels. **Continue to anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of extreme levels of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. 1000-hour fuel moistures continue to trend at record low levels in many areas. Live fuel moistures in grasses, shrubs, and trees, remain at critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier, spread faster and burn hotter. Reports of blistered paint on vehicles have been surprisingly frequent so far this year. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. Aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Northern California continues to experience large fire activity and multiple team deployments and will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**
- The frequency of North to Northeast offshore wind events increases from mid-September into the fall. These strong winds are often accompanied by very low RHs and will pose an increased hazard when combined with this year's critically dry fuels conditions. **Watch for change.**

Mitigation Measures:

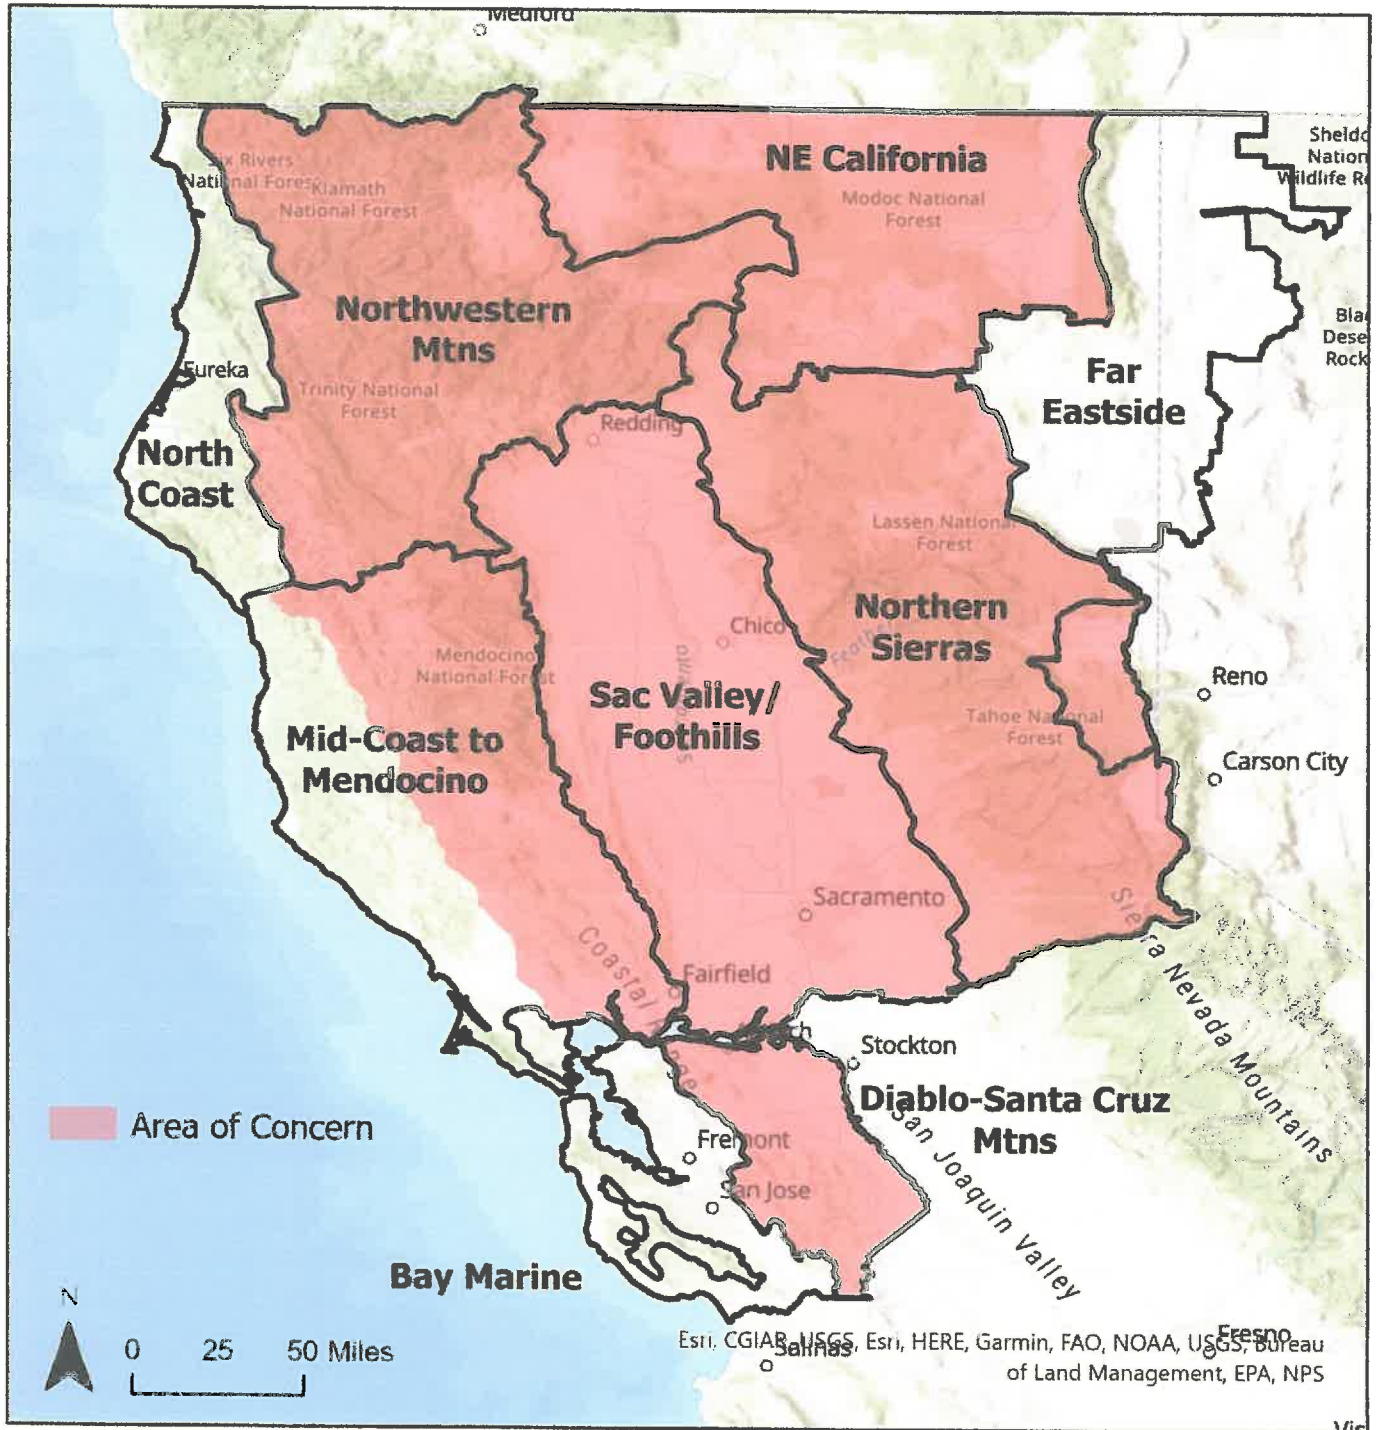

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, PocketCards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the northeastern portion of Far Eastside.

Safety Message

Operational Period: 9/20/21 to 9/21/21 0700-0700

Human Factor Barriers to Situational Awareness

1. Low Experience Level with Local Factors (*Unfamiliar with the area or Org. Structure*)
2. Distraction from Primary Task. (*Radio Traffic, Conflict, IWI, Collateral Duties, Prev. errors*)
3. Hazardous Attitudes (*Invulnerable, Impulsive, Macho, Complacent, Resigned, Groupthink*).
4. Stress Reaction (*Tunnel Vision, Mission Fixation, Escalation of Commitment*).
5. Fatigue (*Dehydration, Carbon Monoxide, Heat Stress, Poor Fitness Level, Lack of Sleep*).

Failure to recognize these barriers can lead us to:

- Underestimate hazards and use inadequate safety measures.
- Fail to notice changing conditions and/or adjust tactics accordingly.

Common Denominators of Fire Behavior On Tragedy Fires

- Most incidents happen on smaller fires or on Isolated portions of larger fires.
- Most fires are innocent in appearance before the “flare-ups” or “blow-ups”. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels.
- Fires run uphill surprisingly fast in chimneys, gullies, chutes and on steep slopes.

Planning for Safety

Have multiple plans and make them known

- **P – Primary Plan (Offense)**
Focused on firefighter safety and mission objectives
- **A – Alternate Plan (Offense)**
A fall back plan that closely supports the primary plan
- **C- Contingency Plan (Defense)**
Entirely focused on firefighter safety
- **E – Emergency Plan (Defense)**
Entirely focused on individual firefighter survival

CAMP REMINDERS

It's getting late in the season and time for a reminder of a few camp rules and a few common courtesies. Whatever you do, please be courteous to everyone around you!

Quiet Time 2200 - 0600

Please be as quiet as possible anywhere near all sleeping areas. No conversations, loud music, don't let the porta potty door slam, etc.

shhhh...

**Drugs, alcohol
and weapons
are prohibited
on the incident.**

PICK UP YOUR TRASH!

Please take care of your trash in your sleep and work areas, including in shared vehicles. This is your responsibility, not the camp crew's.

All individuals on fire assignments are expected to refrain from drinking after hours to ensure they report for duty ready, willing, and able to safely complete their duties on their next shift.

Recycle!

It is now policy that fire camps will recycle as much as possible.

Don't waste food

Place unwanted food in the labeled boxes to help local people and animals in need.
