4. OPERATIONAL PERIOD (DATE/TIME): 0700 9/30/2021 to 0700 10/1/2021

5. OBJECTIVES:

Leader's Intent

Implement a full suppression strategy on the fires within the River Complex. Values at risk include human safety, communities, private timberlands, critical infrastructure, associated improvements, and wilderness resources. Apply tactics that offer the highest probability of success commensurate with resource availability.

1.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information with the Monument fire and other local fires to provide timely and continuous information to all affected agency partners, cooperators, and to the public.
- Coordinate suppression and repair activities with incident Resource Advisors to minimize impacts to wilderness, natural and cultural resources.
- Reduce risk and limit exposure to infectious diseases by minimizing large group settings, reenforcing social distancing, wearing face coverings, and handwashing.

Control Objectives

- Keep the Cronan fire within existing control lines.
- To prevent the Haypress fire from spreading to private property, surrounding communities, and impacting values at risk, keep the fire:
 - South of Cecilville Road
 - West of Highway 3
 - North of Long Valley Road, and
 - o East of the 2020 Red Salmon fire footprint

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- The third round of precipitation which occurred over the fire on Sept. 27th is bringing relief to the dry fuel conditions
- The position of the fire's perimeter has it in a backing alignment with heat sources decreasing each day

Fire Danger Indices - IRPG Page 67

Energy Release Component (ERC): Yesterday - 67, Today - 70 Burning Index (BI): Yesterday - 58, Today - 62 Maximum Probability of ignition (PIG) 70%

SPECIFIC:

The warming pattern is drying the fuels and will bring a slow increase in activity across the fire throughout the week. Most of the heat will be isolated to stump holes and heavy surface fuels consuming within the interior of the perimeter. The River Complex is currently 198,564 acres. Within the current perimeter there are numerous unburned islands. Evaluate the remaining heat within your working area and the threat it poses to the control lines...act accordingly.

Branch V: Crews continue to do a great job securing and mopping up the hot areas in and around Minnehaha Ck in Div. O. Roll-out will be the main problem on the steep slopes so continue to post lookouts and patrol these areas through the peak of the burn period. The fuel continuity is more broken as the perimeter progresses north into Div. N. Keep up the good work securing the pieces of heat which have the most potential.

Branch X: Smokes will continue to increase throughout the week. The north end of the fire in Div. M, north of Craggy Peak, is exposed to the now predominant northerly winds. Where safe to do so, seek and destroy these smokes above Callahan.

AIR OPERATIONS:

Sunrise 0706, Last Light 1924

Another day of clear conditions for air operations to support ground resources for the entire operational period if needed.

SAFETY

Heat signatures are diminishing each day. Utilize risk-based decision making when evaluating which remaining hot areas pose a threat and need to be lined and/or mopped up and which ones can be monitored.

River Complex - Safety Message

Life First, Everyone Goes Home

INCIDENT #CA-KNF-006385

DATE:09-30-21

Major Hazards

- Driving
- Complacency
- Working in steep terrain
- Hazard Trees
- Heavy Equipment
- Rolling Materials
- Fatigue
- Animals on Roads

Leadership is defined as the act of influencing people in order to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

YOU - the leader, who is ultimately responsible for all action and results. YOUR PEOPLE - those that you are responsible for.

SITUATION - comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.

CONSEQUENCES - the short and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as a situation changes.

Stay Focused

We are all almost to the finish line and now your mind starts to wander. The problem with that is it increases your chance of injury or a driving accident. So please do your best to focus on your job and task for the day. Give clear instructions and make sure they are understood. Know who you work for and understand the assignment. Changes often bring confusion and hasty actions. By taking the time to ask questions to get a complete understanding you will help ensure the safety of all involved. Watch out for each others safety at all times and never let your guard down, in any environment.
