0700-1900 hrs and 1900-0700 hrs

Monday

INCIDENT OBJECTIVES (ICS 202)	1. RIVER COMPLEX	9/12/2021	3. TIME: 1800
-------------------------------	------------------	-----------	------------------

4. OPERATIONAL PERIOD (DATE/TIME): 9/13/2021 to 9/14/2021, Day 0700-1900 / Night 1900-0700

5. OBJECTIVES:

**Strategic Framework**

Implement a full suppression strategy on the fires within the River Complex. Values at risk include human safety, communities, private timberlands, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

**Leaders Intent**

Provide the highest level of customer service to all involved with or impacted by the River Complex. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

**Management Objectives**

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information with Monument fire and other local fires to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident Resource Advisors to minimize impacts to wilderness, natural and cultural resources.

**Control Objectives**

Keep the Cronan fire within existing control lines.

To prevent the Haypress fire from spreading to private property, surrounding communities, and impacting values at risk, keep the fire:

- South of Cecilville Road.
- West of the Hwy 3.
- North of Long Valley Road.
- East of the 2020 Red Salmon fire footprint.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 40	TYPE OF FIRE: Wildfire
FIRE NAME: River Complex	OPERATIONAL PERIOD: September 13, 2021 24hr
DATE ISSUED: 9/12/21	TIME ISSUED: 2000
UNIT: CA-KNF, CA-SHF	SIGNED:  Typed/printed: Dennis Burns/s/ Dave Duran (T)/s/

## INPUTS

### WEATHER SUMMARY: \*\*\*Weak Thermal Trough will increase speed and amount of drying\*\*\*

- Warmer temps 80-90. Warming and Drying increasing, low RH 15-30%. North Westerly/Northerly flow, 7-10 gusts to 15 on ridge tops. Upslopes in the afternoon 3-6 mph.
- For Tonight: Clear skies. Humidity recovery 40-60%, trending lower. West Winds becoming downslope/down valley after 2100 at 3-6 mph. North East flow 7-10 gusts 15 on the ridgetops.

\*\*See Fire Weather Forecast for today's weather details\*\*

**FUELS SUMMARY:** Dense mixed conifer, old-growth timber, heavy dead/down, mixed ground fuels. Fuel models best represented by TL8, TU3, TU5, SH7, and GS2.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL: \*\*\*Fuels advisory active for Northern California\*\*\*

- Critically low Live & Dead fuel moistures. All fuels are available and receptive to burn.
- Fire behavior will increase as smoke clears and will become more active later in the day.
- Heavy dead fuels/timber-litter/light-flashy fuels are highly receptive to spotting and active growth in all directions.

ERC's values for the fire area are near or exceeding the 97<sup>th</sup> percentile. Probability of ignition 80% in the afternoon.

#### SPECIFIC:

**Branch X:** Fire will continue to progress to the North and East. Spread rates will be moderate, heavy fuels will produce intense heat. Single and group tree torching is probable as we dry out in the afternoon. Expect rapid rates of spread when fire aligns with slope. Pockets of heavy dead and down will hold heat for long periods and produce intense heat. Structure threat exists in the Callahan area.

**Branch V:** Fire is mostly in a backing and flanking alignment and will continue to spread to the South and East. Spread rates will be slow to moderate. Single and group tree torching is probable as we dry out in the afternoon. Expect rapid rates of spread when fire aligns with slope. Structure threat to the Coffee Creek area still exists. Many natural barriers to fire spread exist throughout the branch, however, do not let your guard down as all fuels will encourage continued fire growth. \*\*\*DIV N, fire will continue to back into Minnehaha Creek\*\*\*

**Cronan Fire:** Existing containment lines are expected to hold. Patrol and mop-up is necessary to mitigate spotting outside the line.

**All Areas:** Spotting from rollout and torching will continue to be problematic. Slope-reversals are probable from any fire burning in drainage bottoms. Mop-up is extensive. Smoke will continue to limit aircraft operations. Fire activity will moderate when it reaches the Red Salmon burn scar.

**AIR OPERATIONS:** Smoke will impact visibility and effect aircraft availability.

## SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas.
- Unburned fuel between you and the fire.

# Fuels and Fire Behavior Advisory

## Northern California

September 1, 2021 to September 15, 2021

**Subject:** Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

**Discussion:** Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Events with wind have led to extreme rates of spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

**Difference from normal conditions:** Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify throughout the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

### Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97<sup>th</sup> percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**

### Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

**Area of Concern:** Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

## River Complex

OPERATIONAL PERIOD: 9/13-14 0700-0700

### MAJOR HAZARDS:

- Snags/Hazard Trees
- Air Operations
- Driving
- Steep terrain/rolling rocks & debris
- Mop-up
- Heavy Equipment Operations

### NARRATIVE:

## Complacency

Doing the same job/task day after day it is easy to drop your guard. It is easy to become **complacent** under these circumstances. **That is when accidents are more likely to occur.** Consider these items to help avoid this trap:

- ✓ Accidents occur when we start **taking things for granted**. This is the time in the fire season when accidents resulting from complacency are most likely to occur.
- ✓ One of the standard fire orders stresses the importance of **staying alert**. Complacency and staying alert are not compatible.
- ✓ The **hazards haven't gone** away so we need to stay focused on them.
- ✓ It only takes a **second of complacency** for an accident to occur.
- ✓ Watch for **fatigue** and **stay focused** on the task at hand.
- ✓ The **drive back to ICP and Spike** can be time when we drop our guard. Don't become a complacent driver and drop yours. The vehicle around the next corner could ruin your day.
- ✓ Exhibit **fireline leadership** if you notice your crew or coworkers are developing a complacent attitude. Challenge them to re-focus and stay engaged. Be accountable for your own complacent attitude and change it if it occurs.
- ✓ Many **tragedies** have occurred in the mop-up stage.

**STAY ALERT AND STAY ALIVE!!**

**SAFETY OFFICERS:** Paul Leusch SOF1; Ron Bertsch SOF1

## COVID-19 Safety Message

### COVID-19 Best Practices/ Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings, hand washing, and practicing module of one concepts.

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms:

- Cough
- Fever
- Shortness of breath
- Chills
- Headache
- Nausea/ Vomiting
- Diarrhea
- Body ache/ Fatigue
- Outside of normal firefighting
- Sore throat
- Loss of taste or smell

**If you answered Yes to any of the above, report it to your supervisor immediately, self-isolate away from other people until given direction. Call the COVID Hotline at (562) 252-2168.**

Do your part to minimize your risk of exposure and limit the spread of COVID-19.

- Respect other's personal space of at least 6-feet of distance to limit the spread of pathogens
- Wash your hands routinely
- Do not shake hands or hug other people
- Cough or sneeze into your elbow rather than your hands
- Avoid touching your face as much as possible
- Wear a face covering when in public/ vehicle "set the example"

**\*\* Document on your 214 all close contacts with anyone outside of your module for potential contact tracing (Daily Activity Log).\*\***

## Human Resource Message September 13, 2021

### The Importance of Teamwork

Teamwork is cooperation between those working on a task, and is commonly understood to be the cooperation and willingness of a group of individuals to work together to achieve a set goal with best practices.

Teamwork is important because you and your fellow coworkers are there for one purpose - to carry out the goal(s) of the organization, which cannot be completed alone.

To be a good team member you should:

- Believe in each other.
- Trust your teammates.
- Be responsible...make your team proud!
- Share knowledge; two people know more than one person.
- Recognize each person has different qualities that can complete and complement other people.
- Understand working in a team can motivate people to do more.
