# **INCIDENT OBJECTIVES (ICS 202)**

INOIDL	-IAI ODOL	CHAES (IC	JO 202)								
1. Incident Name:	2. Operational Pe	eriod: Date Fr	om: 7/21/2021	Date To:	7/21/2021						
Beckwourth Complex		Time Fr	om: 0600	Time To:	1800						
3. Objective(s):											
<u>Leaders Intent</u>											
An aggressive full suppression strategy will be implered residences, critical infrastructure and surrounding constage 1 fire suppression repair will be completed at	ommunities through	ckwourth Complex. In the application of v	Efforts will be made vell-planned tactical	to minimize i responses.	impacts to Only critical						
Management Objectives											
Ensure that strategies and tactics provide for fire principles.	fighter and public s	afety through the ap	plication of sound ris	sk managem	ent						
- Minimize the threat to private property, communit	ies, businesses an	d critical infrastructu	re.								
- Establish and strengthen cooperator, partner, and	d stakeholder relati	onships.									
- Follow identified standard procedures to minimize the spread of COVID-19.											
<ul> <li>Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.</li> </ul>											
Control Objectives											
- Keep the fire north of Highway 70 to minimize the	e impacts on comm	erce and travel alor	g the Highway 70 co	orridor.							
- Keep the fire south and west of 395 with an empl	n										
SOMEON (★ 1450000-17500-165000-17500-16500-16500-16500-16500-16500-16500-16500-16500-16500-16500-16500-16500-1			**************************************		•						
- Keep the fire east of Beckwourth Milford Road to	protect the commi	inity of Portola, graz	ing allotments, and i	ecreational	values.						
General Situational Awareness:											
Steep and rugged terrain, critically dry and recep	tive fuel beds, activ	e area for fire histor	y and drought stress	sed trees.							
In the COVID 10 and increased high description	l-t'										
In the COVID-19 environment, high density popu				xt yourself, y	our family						
and to ensure all employees return home safely,	make sure to pract	ice social distancing									
Enhanced hygiene (especially handwashing), PF	E & monitoring pra	actices help limit the	infection rate of first	responders.

#### INCIDENT Weather Forecast

FORECAST NO: 15

PREDICTION FOR: Wed 0600 - Wed 1800

**SHIFT DATE:** July 21-22, 2021

FORECAST ISSUED: 1900, July 20, 2021

NAME OF FIRE: Beckwourth Complex

**UNIT:** Plumas National Forest

Incident Meteorologist: Lamont Bain

#### **WEATHER DISCUSSION:**

Rain/storm-free conditions are forecast over the next several days. Temperatures will moderate into the 80s and 90s with minimum relative humidity values falling down to and below 10%. Overnight humidity recovery is expected to range between 25 and 35 percent. Southwest to west-southwest winds of 15 to 25 MPH are forecast with gusts to near 35 mph likely along the ridges. Otherwise, increased shading is expected along US HWY 395, especially in the afternoon hours due to smoke from the Dixie Fire.

#### WEATHER FORECAST for Wednesday:

Weather obs around fire area

vocation obe areatia ine area

WEATHER: A few clouds, but shading due to smoke and haze. LAL: 1

TEMPERATURES: Valleys/Lower Slopes: 85-95° Mid-Slopes/Ridges: 77-87°

HUMIDITY: 8-18% HAINES INDEX: 5

20 FT WINDS:

RIDGETOP - Southwest 15-20 mph increasing to 20-25 mph by afternoon. Gusts to around 35 mph. SLOPE/VALLEY - Upslope/upvalley 3-8 mph in the morning, becoming southwest to west 10-17 mph

with gusts near 25 mph in the afternoon. Variable wind directions in drainages

and sheltered areas.

STABILITY/INVERSION: Shallow inversion, lifting by 9-11 AM. Mixing heights around 9,000 feet.

#### WEATHER FORECAST for Wednesday NIGHT:

WEATHER: Mostly clear, patchy smoke/haze. LAL: 1.

**TEMPERATURES:** Valleys/Lower Slopes: 55-60° Mid-Slopes/Ridges: 60-65°

(Warmest along mid-slopes in thermal belt)

**HUMIDITY:** Valleys/Lower Slopes: 25-35% Mid-Slopes/Ridges: 25-30%

(Lowest along mid-slopes in thermal belt)

20 FT WINDS:

RIDGETOP - Southwest 15-25 mph with gusts to around 30 mph in the early evening, gradually

decreasing after sunset to southwest 10-15 mph.

SLOPE/VALLEY - West southwest 10-15 mph with gusts to 20 mph in the evening becoming

downslope/downvalley 1-6 mph around 9-10 PM.

STABILITY/INVERSION: Becoming more stable overnight with inversion developing around 9-10 PM.

<u>OUTLOOK for Thursday through Saturday:</u> The wetting rain potential will remain near zero. Afternoon humidity will fall into the single digits and teens. These values will trend upward toward the weekend. Humidity recovery will also trend upward, but remain poor with values in the twenties and thirties. Terrain driven winds under 10 mph are expected during the overnight and morning hours before southwest to west winds between 10 and 20 mph dominate during the afternoon and evening hours. Increased shading due to cloud cover is forecast this weekend.

#### 

#### **INPUTS**

#### **WEATHER SUMMARY:**

#### #Stronger winds along with warm and dry conditions for today#

Temperature: 77-95 daytime, 55-65 overnight, RH: **8-18%** daytime, 20-30% overnight Ridge-top Winds: SW 15-20 increasing to 20-25, gusts to 30 mph by afternoon

Valley/Slope Winds: Terrain Driven 2-6 mph, SW 8-15 by afternoon. Overnight WNW 7-14 mph decreasing to 1-6 mph in

the night.

#### **OUTPUTS**

#### **FIRE BEHAVIOR**

#### **GENERAL:**

The ERCs continued to set record levels due to warmer and drier conditions. 1000 hr fuel moisture is 7%. Live fuels remain critical for most species and are available to burn. The fire has the potential to burn up to 3-4 miles in the direction of spread when aligned with wind. Plume domination is unlikely with an escape since it will be mostly wind driven. With the breezier conditions a pyrocumulus will be unlikely to form. Fuels remain exceptionally receptive to spotting. The burn period will begin after 1000 hours in the protected drainages, but in exposed areas expect the burn period to start with shift change.

Probability of ignition will run about 80-100% depending on aspect and shading. As the weather clears the PIG will approach 100% with receptive fuels in full sun.

#### SPECIFIC:

West Side Divisions: These divisions will experience potentially the most adverse winds. Where the line makes a dog-leg to the east, just above Ramelli Creek, will be a focal point of the SW wind pressure and spot potential. Incomplete burning, burned-through retardant, and on-going mop-up operations continue to have vulnerabilities at this location. Escape in this area will result in high flame lengths and substantial rates of spread with spotting up to ½ mile. The heavy fuel loading and lack of fire history will make direct attack efforts difficult.

**All other Divisions:** These divisions will experience mostly favorable winds. Complete burns with good consumption in most divisions have reduced threats to the line. Securing and moping up the rest of the perimeter has eliminated significant threats to the remainder of the fire area.

#### **AIR OPERATIONS:**

Air operations will have somewhat cloudy skies with no expected operational limits on timing of missions unless smoke from the Dixie Fire obscures visibility.

#### SAFETY

Watch for stump holes, smoldering ground fuels and other hazards during mop-up operations. Plan to be a part of IA and understand potential fire behavior if starts occur outside the current perimeter, especially in different fuel types.

#### **Fuels Advisory**

#### **PNF Pocket Card East**

# **Beckwourth Complex- Safety Message**

INCIDENT #CA-PNF-001064

DATE: 07-21-21 TIME: 0600-1800 Day Shift

#### Major Hazards and Risks

<u>DRIVING</u> – Drive defensively while leaving the camp due to local morning commutes. Use passenger as a lookout, navigator, and backing guide. Obey posted speed limits. Use headlights and seatbelts. Slow your speed down to 10 MPH while driving in smoke or dusty road conditions and use red lights/strobes for visibility. When meeting oncoming vehicles, slow down when passing. Keep your windows clean.

<u>ENVIRONMENTAL HAZARDS</u> – Watch out, stay away from bears in the area. Do not feed the wildlife. Be aware of poisonous plants and insects. Use insect repellent for ticks.

<u>FIRE BEHAVIOR</u> – Maintain situational awareness, follow 10 Standard Orders, recognize / mitigate the 18 Watch Out Situations, and apply LCES. Know the fire weather forecast. Monitor conditions.

<u>COMMUNICATIONS</u> – Make sure your radio is programmed correctly. Check the Divisional Assignments page for your correct operational channel.

#### Conduct Tailgate Safety Briefings / Briefing Checklist Inside Back Cover of I.R.P.G.

\*\*\*Lightning safety 30/30 rule: If the time between when you see the flash and hear the thunder is 30 seconds or less, the lightning is close enough to hit you. If you haven't already, seek shelter immediately. Wait inside until 30 minutes have passed since the last flash of lightning.

#### Covid-19

- Be Smart! Stay Apart! Maintain CDC social distancing guidelines when feasible
- Practice good hygiene. Wash hands often and avoid touching your face
- Cover your nose and mouth with a facial covering and cough into your elbow if needed
- Monitor your health. If you have fever, shortness of breath, coughing, sneezing or any other Covid-19 related symptom, tell a supervisor and maintain physical distancing

#### Proper Hydration

Remember to drink plenty of water each day. Everyone needs between 9 and 13 eight ounce cups of water each day to stay hydrated. Carry water in the field with you at all times. Clean your coolers with a 10:1 water to bleach mixture every couple of days to keep them free of bacterial growth.

#### ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	HAZARD / DANGER TREES	<ul> <li>Follow Hazard Tree Safety Guidelines (IRPG p.22.)</li> <li>Limit number of personnel around snags and their exposure time.</li> <li>Fallers mustbe qualified for the trees being felled.</li> <li>Be alert around hazard trees during wind events, even green trees.</li> <li>The hazard zone extends a minimum of 2½ tree lengths.</li> <li>Avoid parking vehicles or taking breaks under or near hazard trees.</li> </ul>
ALL	TRAFFIC HAZARDS AND DRIVING	<ul> <li>Travelers on Highway 395 often exceed the posted speed limit. Take extra precaution when entering or exiting the Highway.</li> <li>During high fire activity, expect drivers to pull over or drive through the area slower. Practice "Defensive Driving" techniques.</li> <li>Maintain high visibility when in the operational area, use warning lights when working on roads or traveling in smoke. Best practice is to follow California DOT standard with high vis vest where appropriate</li> <li>Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around.</li> <li>5mph speed limit in and around ICP, keep your speed down in all areas. Drive at or below posted speed limits</li> <li>Use warning lights when working on roads or traveling in smoke.</li> <li>Use chock blocks, turn wheels into hill.</li> <li>Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.</li> </ul>
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul> <li>Maintain 8'-10' spacing when working &amp; walking.</li> <li>Do not work above any personnel.</li> <li>Evaluate necessity to send personnel in areas with limited access.</li> </ul>
ALL	INDIRECT LINE CONSTRUCTION	<ul> <li>Establish and maintain LCES.</li> <li>Utilize favorable locations when constructing control features; IE lighter fuels, natural or existing barriers and ridgelines</li> </ul>
ALL	AIR OPERATIONS	Follow "Aviation Watch-Out Situations" on page 46, IRPG.     Do not plan on air resources for tactical support or medical transportation.     Refer to page 58, IRPG for directing bucket drops.     Ensure positive communication with all air resources.
ALL	FIRE BEHAVIOR	Are you seeing what we have predicted?     Conduct thorough assessments before starting work.     Ensure LCES is in place.     Plan & communicate your exit strategy with your crew and adjacent resources.     Provide additional briefing for new resources and maintain communications.
ALL	NIGHT OPERATIONS	<ul> <li>Have a purpose for where you drive and what you do. Don't rush into assignments.</li> <li>Use caution where you park or stage, especially in steep timbered areas.</li> <li>Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area.</li> <li>Increase SA by trying to see the work area during daylight hours.</li> <li>Use glow sticks to mark hazards, and ensure personnel have headlamps.</li> </ul>
ALL	COMMUNICATIONS	Share your Situational Awareness (hazards, changes, etc.) to those who also have a need.     Answer questions when asked by others. Ask for intel when you do not know the plan.     Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HEAT RELATED ILLNESS	<ul> <li>Drink 2 to 1 water to sports drinks.</li> <li>Take frequent breaks, minimum of 10 minutes every hour.</li> <li>Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.</li> </ul>
ALL	WILDLAND URBAN INTERFACE OPERATIONS	Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives.     Key to success in the WUI is preparation and preplanning.     Be active and engage in defense preparations & do not wait for the fire to arrive.     Be decisive in tactical engagement. Know when to engage or not.     Establish management decision points, Safety Zones, TRA's, and Escape Routes.
BEC	INCIDENT NAME:  KWOURTH COMPLEX	OPERATIONAL PERIOD: 0600 – 1800  JULY 21, 2021  Date/Time Prepared: 07/20/2021 – 1300

Leaders,

We have had a significant uptick in COVID cases in Region 5 in the last week, specifically related to fire incidents. On Saturday alone, we had cases from 5 forests which directly affect our firefighting capacity. Safety is one of our core values, and right now our ability to keep our employees safe is being threatened by this virus, especially in light of the Delta variant.

We know the most effective tool for preventing the virus from spreading—while still meeting our firefighting mission—is to increase vaccination rates among our workforce. We have been vaccinating employees in camp, at our offices, and encouraging modules of employees to get vaccinated together. We are looking at additional ways to incentivize vaccinations. It is not progressing fast enough.

The second-best measure to limit spread is through social distancing and wearing masks. To date, only a few personnel have been wearing masks, there are more in-person meetings, and there is an increase in the use of indoor spaces compared to last year. Frankly, it has felt like many of our mitigations from last year have simply faded away.

Based on the rise in cases and number of people impacted, we need to take decisive action. Effective today, the following expectations need to be carried out by all leaders in Region 5:

- 1. Masks are required for any employee working on a fire, regardless of vaccination status.
  - a. This includes firefighters, support personnel, BAER Teams, aviation assets, and dispatch centers. <u>Everyone</u>.
  - b. Anyone working directly or indirectly to support a fire must follow this guidance.
  - c. Exceptions remain for the following activities: eating/drinking, arduous duty, critical communication, and alone in a vehicle or enclosed room. Masks must be worn in interim periods where these exceptions do not apply (e.g., when not speaking during critical communications).
- 2. Camp protocols need to mitigate for COVID:
  - a. Briefings should be outdoors, if practical, and limited to as few personnel as possible.
  - b. Modules need to be kept apart, as much as possible (including during meals, one module per sleeper trailer, etc.).
  - c. Food service and other camp needs must have COVID mitigations, including masking.
- Forests with fire incidents should consider mask requirements for anyone entering our facilities, given the intermixing with fire personnel. Needs vary by forest, but we encourage you to err on the side of caution in the protection of all employees.

We do not have the luxury of halting all travel and completely eliminating the intermixing of employees from different units, therefore we must continue to utilize our world class employees to fight these fires wherever they occur. I wish these measures were not needed, but I feel waiting any longer to implement them would put the safety of our employees and the communities we serve at an unacceptable level of risk.

Thank you for your leadership on this important matter. Reach out if you have questions or concerns.

Randy Moore Regional Forester Forest Service Pacific Southwest Region

#### COVID-19 Plan

To reduce the spread of COVID 19 within the Diamond Base Camp the following mitigations have been implemented:

- Masks must be worn in all areas where 6 ft or more social distancing cannot be maintained, such as briefing time and when waiting in line for meals and showers.
- To reduce the number of potential exposures within the camp, when possible crews will send a few individuals to pick up meals for the entire crew.
- All fire personnel will use the following screening tool daily to assess for symptoms of COVID-19.

#### Wildland Fire COVID-19 Screening Tool

Today or in the past 24 hours, have you had any of the following symptom\*?

Symptom

Cough more than expected?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside your normal for firefighting?

Sore throat?

New loss of taste or smell?

Fatigue, outside your normal for firefighting?

Headache, outside your normal for firefighting?

Congestion or runny nose, outside your normal for firefighting?

Nausea or vomiting

Diarrhea

\* Take temperature with no-touch thermometer, if available \*

If you have answered "YES" to any of the questions above, see Frontline Medical Unit for evaluation and notify the Medical Unit as soon as possible.

#### **Vaccinations**

If you are interested in getting a vaccination while in camp contact one of the three COVID Advisor. For rapid testing during demob see Frontline Medical.

COVID Advisor Info: Francisco Rico (530) 913 6931; Allison Sanger (530) 218-7794; and Chris Low (530) 927-8029

# **FINANCE MESSAGE**

Finance is now accepting electronic submission of CTR's and Shift Tickets via email

Scan & Email your signed documents to:

\*\*NOTE: YOUR DOCUMENTATION MUST BE AN ATTACHMENT, AND NOT EMBEDDED IN BODY OF THE EMAIL\*\*

Install PDF Scanner app below by scanning QR with phone camera

Android

Set subject line to <u>TIME</u> when sending email

iPhone/IOS

Be sure to check in with Finance as close to when you arrive as possible!

\*Stay safe out there\*

#### Human Resource Message

# Respect

The definition of respect is a feeling of deep admiration for someone or something elicited by their abilites, qualities, or achievments. It can also mean due regard for the feelings, wishes, rights, or traditions of others.

As we look at the accomplishments we have made, we have to respect those that are here working side by side with us to accomplish the mission. We have people from mulitple agencies, federal, city, state, local, contractors, from multiple states and other countries. We all have the same goals.

Thank you for all acknowledging others contributions, working hard, and respecting eachother.

Repect your efforts, respect yourself. Self-respect leads to self-discipline. When you have both firmly under your belt, that's real power. ~ Clint Eastwood

Follow the 3 RES- RESpect for others. RESpect for yourself. RESponsibility for all your actions. ~ Dalai Lama

Andrea Cabida- HRSP- 707-330-9939; <u>andrea.cabida@usda.gov</u>; Ben Wexler- HRSP(t)- 707-980-2780; <u>Benjamin.wexler@usda.gov</u> We are located between Lassen High School and Diamond Camp. Call, text, or email. We can come to you.

PACKAGE PICK-UP (MUST HAVE YOUR E/O NUMBER ON LABEL)

Beckwourth Fire Camp

2634 Beckwourth-Calpine Road

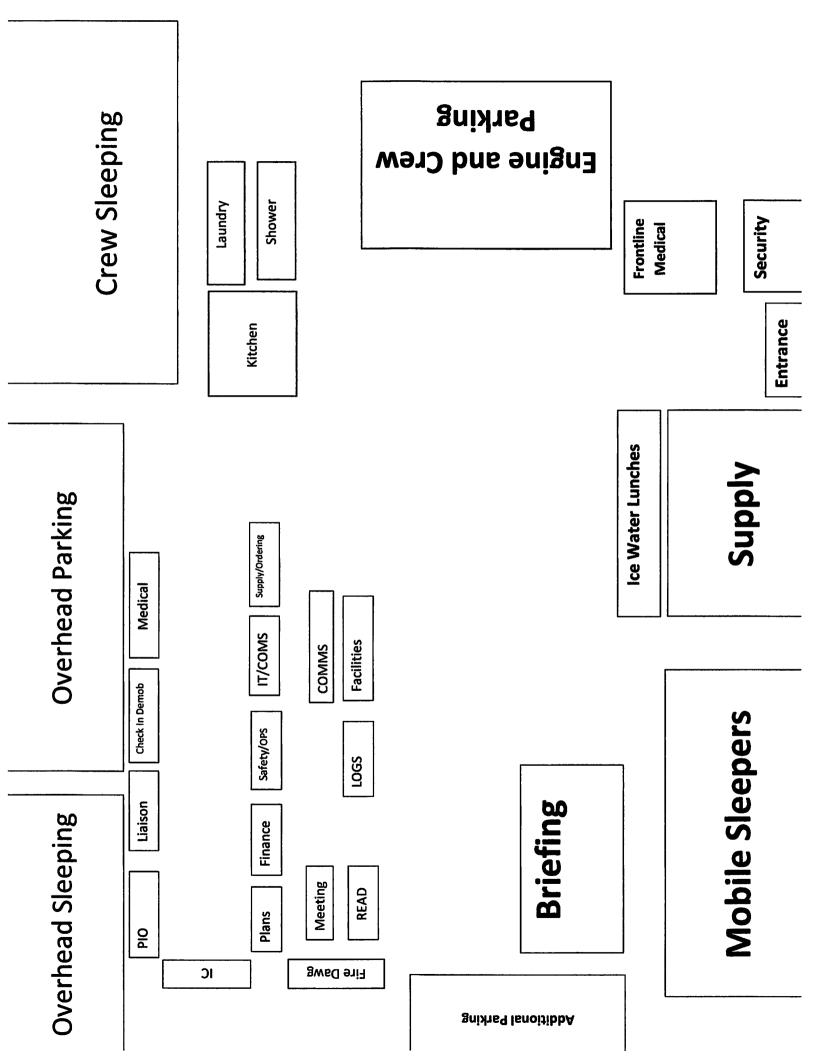

Beckwourth, CA. 96129

#### Media Access Law

Media – the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident - Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.

Please email photo submissions to: 2021.beckwourthcomplex@firenet.gov

# **Training Specialist Message**

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

#### To assure proper documentation for your assignment:

- 1. Scan the QR Code
- 2. Complete the Trainee Registration Form

This is the link to sign up.

#### At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form.

- 2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.
- 3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's signed by both the Trainer and Trainee. Take a picture/ copy of the ICS 225 and send it to <a href="mailto:TNSPEP@gmail.com">TNSPEP@gmail.com</a>

The Training Specialist will send the training documents to the email address you provided.

For training related questions, call/text Emil Picchi (TNSP) at 650-520-5102 or email <a href="https://example.com">-TNSPEP@gmail.com</a>

8. MEDICAL EMERGENCY PROCEDURES

#### "RED IWI" MEDICAL-EMERGENCY PLAN:

38°33.32'N, 121°27.35'W

- Contact Communications on Command and declare you have a RED IWI
- Following the 8-Line on the back of the IAP or page 118 of the 2018 IRPG
- Tell them Who you are, Where you are at, What you have, and What you need.
- Update Communications once the patient has been transported.
- Close the loop with MEDL at the end of shift.

#### "Yellow or Green" NON-EMERGENCY **MEDICAL PLAN:**

Contact Division / Communications and declare you have a "Non-Emergency Medical."

Complete the 8-line if needed and turn it in to the medical unit at the end of the shift.

9. PREPARED BY MEDL - Jeff Carlon

Center

10. REVIEWED BY SOF1- Dave Welch

#### Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

#### 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

				,				
Severity of Emergency    RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE   Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.								
A	AND	□YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.  Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.
