INCIDENT Weather Forecast

FORECAST NO: 16

PREDICTION FOR: Thu 0600 - Thu 1800

SHIFT DATE: July 22-23, 2021

FORECAST ISSUED: 1800, July 21, 2021

NAME OF FIRE: Beckwourth Complex

UNIT: Plumas National Forest

Incident Meteorologist: Lamont Bain

Red Flag conditions through this evening

<u>WEATHER DISCUSSION:</u> After humidity recovery in the 20 to 30 percent range another windy day is on tap for Thursday. <u>A critical fire weather threat with Red Flag conditions</u> is expected to unfold today and this afternoon with morning terrain driven winds becoming southwesterly and westerly through the afternoon and increasing in speed. Confidence remains high that sustained winds of 20 to 25 mph with gusts to near 35 mph are reasonable. The greatest gusts are expected along the higher terrain with subdued wind speeds in sheltered regions. Afternoon humidity will fall down into the single digits with values as low as 8-10 percent.

WEATHER FORECAST for Thursday:

Weather obs around fire area

WEATHER: A few clouds, but shading due to smoke and haze mainly at ICP, Div N and I. LAL: 1

TEMPERATURES: Valleys/Lower Slopes: 84-94° Mid-Slopes/Ridges: 76-86°

MIN HUMIDITY: 8-15% HAINES INDEX: 5

20 FT WINDS:

RIDGETOP - Southwest to west-southwest winds 15-20 mph increasing to 20-25 mph by the afternoon hours. Gusts to around 35 mph.

SLOPE/VALLEY - Upslope/upvalley 3-8 mph in the morning, becoming southwest to west 10-17 mph

with gusts near 25 mph in the afternoon. Variable wind directions in drainages

and sheltered areas.

STABILITY/INVERSION: Shallow inversion, lifting by 9-11 AM. Mixing heights around 9,000 feet.

WEATHER FORECAST for Thursday NIGHT:

WEATHER: Mostly clear, patchy smoke/haze. LAL: 1.

TEMPERATURES: Valleys/Lower Slopes: 50-55° Mid-Slopes/Ridges: 55-60° **MAX HUMIDITY:** Valleys/Lower Slopes: 20-30% Mid-Slopes/Ridges: 25-35%

20 FT WINDS:

RIDGETOP - West-southwest winds 15-20 mph with gusts to around 25 mph in the early evening, gradually decreasing after. Downslope/downvalley flow around 3-8 mph by 11 PM.

SLOPE/VALLEY - West-southwest 10-15 mph with gusts to 20 mph in the evening quickly becoming downslope/downvalley 1-6 mph around 11 PM.

STABILITY/INVERSION: Becoming more stable overnight with inversion developing around 10-11 PM.

<u>OUTLOOK for Friday through Monday:</u> Wind speeds will diminish this weekend with more daily terrain driven wind directions. Portions of Branch VII will experience more upslope/northerly flow with speeds between 5 and 10 mph with 15-20 mph gusts. Branch I will remain in a westerly to west-northwest flow regime with speeds of 10 to 15 mph. A gust to 20-25 mph will be possible. Afternoon RH will fall to near 10% on Friday with min RH closer to 15% Sat/Sun. Overnight recovery will remain poor, with values between 25 and 35 percent.

WEATHER SUMMARY:

Red Flag for dry fuels and windy conditions today

Temperature: 76-94 daytime, RH: 8-15% daytime, 20-30% overnight

Ridge-top Winds: SW 15-20 increasing to 20-25, gusts to 35 mph by afternoon

Valley/Slope Winds: Terrain Driven 3-8 mph, SW 8-15 by afternoon. Overnight WSW 10-15 mph decreasing to 1-6 mph in

the night. Inversion mixing out of the valleys 9-11 am and then developing again around 10PM.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The ERCs continued to set records due to warmer and drier conditions. 1000 hr fuel moisture is less than 7%. Live fuels remain critical for most species and are available to burn. The fire has the potential to burn up to 3-4 miles in the direction of spread when aligned with wind. Plume domination is unlikely with an escape since it will be mostly wind driven. With the breezier conditions, a pyrocumulus will be unlikely to form. Fuels remain exceptionally receptive to spotting. The burn period will begin after 0900 hours in the protected drainages, but in exposed areas expect the burn period to start with shift change.

Probability of ignition will run about 80-100% depending on aspect and shading. As the weather clears the PIG will approach 100% with receptive fuels in full sun.

SPECIFIC:

West Side Divisions: These divisions will experience potentially the most adverse winds depending on the shape of the country. Where the line makes a dog-leg to the east, just above Ramelli Creek, will be a focal point of the SW wind pressure and spot potential. Incomplete burning, burned-through retardant, and on-going mop-up operations continue to have vulnerabilities at this location. Escape in this area will result in high flame lengths and substantial rates of spread with spotting up to 1 mile. The heavy fuel loading and lack of fire history will make direct attack efforts difficult.

All other Divisions: These divisions will experience mostly favorable winds. Complete burns with good consumption in most divisions have reduced threats to the line. Consumption in green islands will accelerate as very dry and windy conditions continue; however, IR scans have these well within the burn. Securing and moping up the rest of the perimeter has eliminated significant threats to the remainder of the fire area.

AIR OPERATIONS:

Air operations will have somewhat smoky skies with no expected operational limits on timing of missions unless smoke from the Dixie Fire obscures visibility.

SAFETY

Watch for stump holes, smoldering ground fuels and other hazards during mop-up operations. Plan to be a part of IA and understand potential fire behavior if starts occur outside the current perimeter, especially in different fuel types.

Fuels Advisory

PNF Pocket Card East

PNF Pocket Card Central (Dixie Fire)

Beckwourth Complex- Safety Message

INCIDENT #CA-PNF-001064

DATE: 07-22-21 TIME: 0600-1800 Day Shift

Make a Safety Difference "Avoid Complacency"

- As a supervisor, provide constant and relentless oversight.
- Stay focused on the task at hand, all the time!
- Come up with a safer way to perform a risky assignment.
- Discuss situations that might cause a nearmiss.
- Never tolerate "Hey, watch this!"
- Discuss the effects of fatigue and how to mitigate the effects of fatigue.
- While in the fire zone, wear your hardhatwhen you leave the vehicle.
- · Have a purpose in what you do.

Keep Your Head in the Game!

Covid-19

- Be Smart! Stay Apart! Maintain CDC social distancing guidelines when feasible
- Practice good hygiene. Wash hands often and avoid touching your face
- Cover your nose and mouth with a facial covering and cough into your elbow if needed
- Monitor your health. If you have fever, shortness of breath, coughing, sneezing or any other Covid-19 related symptom, tell a supervisor and maintain physical distancing

High Winds Predicted!

Unstable snags may fall during periods of gusty winds. Trees that have compromised root systems due to fire, may fall without warning.

Watch where you park your trucks. Remember to look up for hazard trees and widow makers!

Gusty winds may present challenges when driving large vehicles. Keep both hands on the wheel.

INCIDENT RISK ANALYSIS

BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time. Fallers mustbe qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	TRAFFIC HAZARDS AND DRIVING	 Roads closed because of the fire are beginning to reopen. Beware of increase residential and public traffic. Travelers on Highway 395 often exceed the posted speed limit. Take extra precaution when entering or exiting the Highway. During high fire activity, expect drivers to pull over or drive through the area slower. Practice "Defensive Driving" techniques. Maintain high visibility when in the operational area, use warning lights when working on roads or traveling in smoke. Best practice is to follow California DOT standard with high vis vest where appropriate Many roads are narrow and mid-slope, with soft shoulders. Allow heavyvehicle to pass on uphill side. Use spotters when backing or turning around. 5mph speed limit in and around ICP, keep your speed down in all areas. Drive at or below posted speed limits Use warning lights when working on roads or traveling in smoke. Use chock blocks, turn wheels into hill.
ALL -	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES. Utilize favorable locations when constructing control features; IE lighter fuels, natural or existing barriers and ridgelines
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	FIRE BEHAVIOR	Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & communicate your exit strategy with your crew and adjacent resources Provide additional briefing for new resources and maintain communications.
ALL	NIGHT OPERATIONS	 Have a purpose for where you drive and what you do. Don't rush into assignments. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel when you do not know the plan. Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HEAT RELATED ILLNESS	 Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Key to success in the WUI is preparation and preplanning. Be active and engage in defense preparations & do not wait for the fire to arrive. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, TRA's, and Escape Routes.
	INCIDENT NAME:	OPERATIONAL PERIOD: 0600 – 1800

BECKWOURTH COMPLEX

JULY 22, 2021

Date/Time Prepared: 07/21/2021 - 1300

Leaders.

We have had a significant uptick in COVID cases in Region 5 in the last week, specifically related to fire incidents. On Saturday alone, we had cases from 5 forests which directly affect our firefighting capacity. Safety is one of our core values, and right now our ability to keep our employees safe is being threatened by this virus, especially in light of the Delta variant.

We know the most effective tool for preventing the virus from spreading—while still meeting our firefighting mission—is to increase vaccination rates among our workforce. We have been vaccinating employees in camp, at our offices, and encouraging modules of employees to get vaccinated together. We are looking at additional ways to incentivize vaccinations. It is not progressing fast enough.

The second-best measure to limit spread is through social distancing and wearing masks. To date, only a few personnel have been wearing masks, there are more in-person meetings, and there is an increase in the use of indoor spaces compared to last year. Frankly, it has felt like many of our mitigations from last year have simply faded away.

Based on the rise in cases and number of people impacted, we need to take decisive action. <u>Effective today</u>, the following expectations need to be carried out by all leaders in Region 5:

- 1. Masks are required for any employee working on a fire, regardless of vaccination status.
 - a. This includes firefighters, support personnel, BAER Teams, aviation assets, and dispatch centers. Everyone.
 - b. Anyone working directly or indirectly to support a fire must follow this guidance.
 - c. Exceptions remain for the following activities: eating/drinking, arduous duty, critical communication, and alone in a vehicle or enclosed room. Masks must be worn in interim periods where these exceptions do not apply (e.g., when not speaking during critical communications).
- 2. Camp protocols need to mitigate for COVID:
 - a. Briefings should be outdoors, if practical, and limited to as few personnel as possible.
 - b. Modules need to be kept apart, as much as possible (including during meals, one module per sleeper trailer, etc.).
 - c. Food service and other camp needs must have COVID mitigations, including masking.
- 3. Forests with fire incidents should consider mask requirements for anyone entering our facilities, given the intermixing with fire personnel. Needs vary by forest, but we encourage you to err on the side of caution in the protection of all employees.

We do not have the luxury of halting all travel and completely eliminating the intermixing of employees from different units, therefore we must continue to utilize our world class employees to fight these fires wherever they occur. I wish these measures were not needed, but I feel waiting any longer to implement them would put the safety of our employees and the communities we serve at an unacceptable level of risk.

Thank you for your leadership on this important matter. Reach out if you have questions or concerns.

Randy Moore Regional Forester Forest Service Pacific Southwest Region

COVID-19 Plan

To reduce the spread of COVID 19 within the Diamond Base Camp the following mitigations have been implemented:

- Masks must be worn in all areas where 6 ft or more social distancing cannot be maintained, such as briefing time and when waiting in line for meals and showers.
- To reduce the number of potential exposures within the camp, when possible crews will send a few individuals to pick up meals for the entire crew.
- All fire personnel will use the following screening tool daily to assess for symptoms of COVID-19.

Wildland Fire COVID-19 Screening Tool

Today or in the past 24 hours, have you had any of the following symptom*?

Symptom

Cough more than expected?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside your normal for firefighting?

Sore throat?

New loss of taste or smell?

Fatigue, outside your normal for firefighting?

Headache, outside your normal for firefighting?

Congestion or runny nose, outside your normal for firefighting?

Nausea or vomiting

Diarrhea

* Take temperature with no-touch thermometer, if available *

If you have answered "YES" to any of the questions above, see Frontline Medical Unit for evaluation and notify the Medical Unit as soon as possible.

Vaccinations

If you are interested in getting a vaccination while in camp contact one of the three COVID Advisor. For rapid testing during demob see Frontline Medical.

COVID Advisor Info: Francisco Rico (530) 913 6931; Allison Sanger (530) 218-7794; and Chris Low (530) 927-8029

Human Resource Message

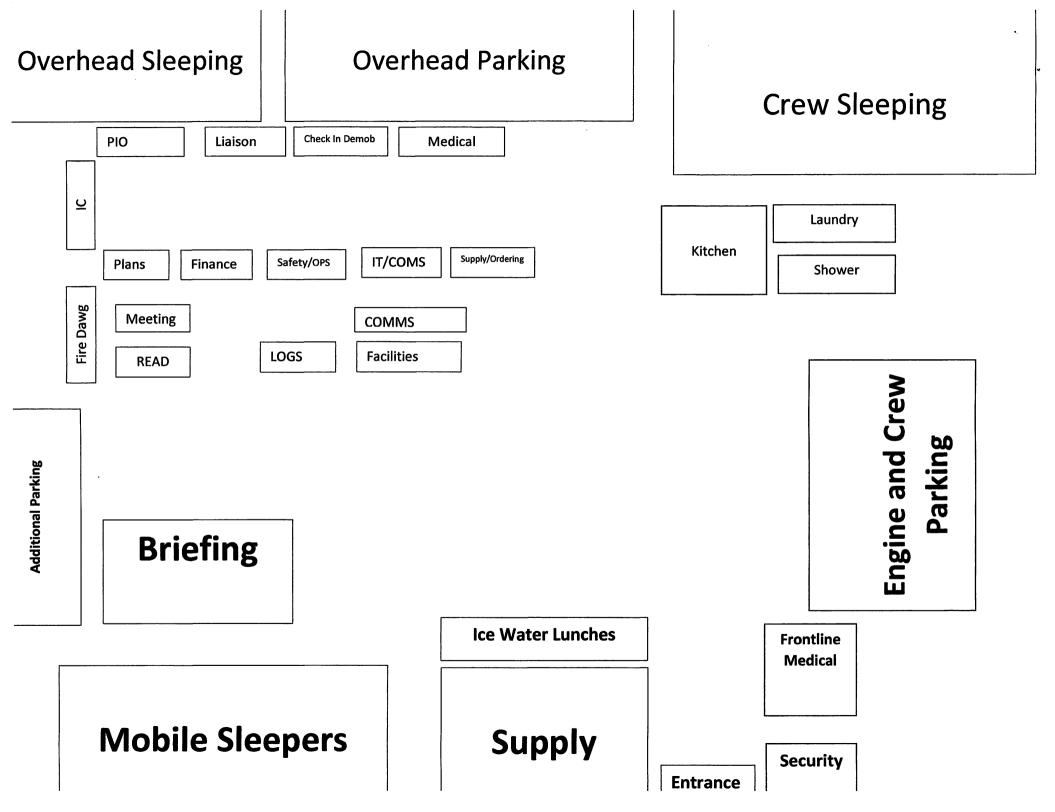

Transition

Transition is the process or a period of change from one state to another. This fire behavior and growth has transitioned across the landscape. As Team 5 transitions the Type 3 organization, there will be some fluid changes. Embrace the changes, ideas, and actions of others, as we all are looking towards the same goals. Please focus on the good work of those around you. Do your part to include everyone coming in by providing your knowledge and experience in this environment.

Andrea Cabida HRSP- 707-330-9939; andrea.cabida@usda.gov; Please call, text or email me anytime.

Training Specialist Message

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

To assure proper documentation for your assignment:

- 1. Scan the QR Code
- 2. Complete the Trainee Registration Form

This is the link to sign up.

At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form.

- 2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.
- 3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's signed by both the Trainer and Trainee. Take a picture/ copy of the ICS 225 and send it to TNSPEP@gmail.com

The Training Specialist will send the training documents to the email address you provided.

For training related questions, call/text Emil Picchi (TNSP) at 650-520-5102 or email -TNSPEP@gmail.com

8. MEDICAL EMERGENCY PROCEDURES

"RED IWI" MEDICAL-EMERGENCY PLAN:

38°33.32'N, 121°27.35'W

- Contact Communications on Command and declare you have a RED IWI
- Following the 8-Line on the back of the IAP or page 118 of the 2018 IRPG
- Tell them Who you are, Where you are at, What you have, and What you need.
- Update Communications once the patient has been transported.
- Close the loop with MEDL at the end of shift.

"Yellow or Green" NON-EMERGENCY MEDICAL PLAN:

- Contact Division / Communications and declare you have a "Non-Emergency Medical."
- Complete the 8-line if needed and turn it in to the medical unit at the end of the shift.

9.	PREPARED BY
	MEDL – Jeff Carlo

10. REVIEWED BY SOF1- Dave Welch

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity o	Severity of Emergency □ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented								
Α	AND YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if nec Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.								
Transport Priority (priority 1, 2, 3)		□GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.							
	njury or Illness & sm of Injury				y of Injury or Illness s, Struck by Falling Tree)				
	rt Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other					
Patient	Location			Descriptive Location & Lat. / Long. (WGS84)					
Incide	nt Name				Name + "Medical" Meadow Medical)				
On-Scene Inci	dent Commander			Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)					
Crew Patient Care Name of Care Prov (Ex: EMT Smith									
3. INITIAL PAT	ENT ASSESSMENT: C	omplete this section for each patie	ent as applicable (start with the mos	st severe patient)					
Agency Affiliation	n: (NO PATIENT NAME	S) Federal	Contractor	Local Govern	ment				
Patient Assessm	ent: Age:	Weight:	Chief Complaint:						
(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:									
Treatment:									
4. TRANSPORT	PLAN:								
Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:									
5. ADDITIONAL	RESOURCES / EQUIP	MENT NEEDS:							
			rauma Bag - IV/Fluid(s) - Splir		tter - HAZMAT - Extrication				
6. COMMUNICA	TIONS: Identify State	Air/Ground EMS Frequence	cies and Hospital Contacts						
Function	Channel Name/Number	er Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *				
COMMAND									
AIR-TO-GRND									
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.									
8. ADDITIONAL	. INFORMATION: Updat	es/Changes, etc.							

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act

*** Follow up with MEDL upon return to ICP ***
