## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 002

TYPE OF FIRE: Wildfire

FIRE NAME: Monument Fire

OPERATIONAL PERIOD: 08/5/21 0700-0700

DATE ISSUED: August 4, 2021

TIME ISSUED: 20:00

UNIT: CA-SHF-001187

SIGNED: *Jeff Shelton*

Typed/printed: Jeff Shelton (LTAN)

### INPUTS

**WEATHER SUMMARY:** \*\*\* Unstable Air.. and a New Wind Direction \*\*\*

Seasonably warm and dry conditions are expected to persist. As a weather system passes to our north today, unstable air will transition the fire area. Winds will shift to the Northwest in the morning and increase in strength into the afternoon. Some stronger gusts will be possible up the Trinity River Valley into the early evening. Expect fair to good relative humidity recovery moving into Friday.

Max. Temperatures-75-83 degrees Min. Humidity- 20 to 30% Winds- NW to 12 mph/Gusts to 20 mph later  
Min. Temperatures- 56-63 degrees Max. Humidity- 65 to 75% Winds- NW to 10 mph, then N to 6 mph late

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

- Today's unstable air will counter the effect of cooler temperatures and slightly higher humidity!
- All fuel sizes are currently receptive and carrying fire. Expect, and plan for, frequent spotting!
- With ERC's remaining above the 90<sup>th</sup> percentile, resistance to control will be very high!
- Expect today's new wind direction to challenge fireline along the eastern portions of the fire!
- Large, dead fuels are intermixed with the grass and brush components. Plan for rollout!
- Hour by hour....Fire impacted trees are being continually weakened by fire, and wind loading.

##### SPECIFIC:

All Divisions: *Expect the morning inversion to rise to 10,000 feet by early by afternoon.*

Flame Lengths- 4 to 8 ft. in Grass, Up to 20 ft. in Brush...Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 40 chains/hour in Brush... Diminishing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Over 80% at the peak of the burn period, Diminishing to <40% overnight

##### AIR OPERATIONS:

Expect poor smoke dispersion before the inversion breaks by late in the morning. Mixing heights start out at 100-500 feet; rise to 10,000 feet with daytime heating; then return to 100-400 feet after sunset. Anticipate terrain induced turbulence in areas with complex terrain; especially during peak hours of afternoon heating.

### SAFETY

**Fire Moves Fastest Where You Move Slowest!**

**Plan For Surprisingly Rapid Growth from Spot Fires and Slope Reversals!**

## RISK MANAGEMENT

Use the following process to quickly assess risk for the situations you face throughout the day.

**Step 1** - Identify the hazards. Make this an ongoing, continuous process in your daily decision-making routine. Gather as much information as possible.

**Step 2** - Assess the risk levels. The probability and severity of an undesirable outcome linked to identified hazards = **RISK**.

**Step 3** - Analyze and select control or mitigation measures. **Limiting exposure is almost always an option.**

**Step 4** - Reassess risk level with controls in place (residual risk).

**Step 5** - Make your informed decision based on the residual risk. Ask the **risk vs. gain** question: is the benefit of the action I'm considering worth the risk?

**Step 6** - Monitor the situation

## RECOGNIZE THE SIGNS OF FATIGUE

The effects of fatigue can directly hinder our abilities to:

- Perform various tasks, maintain a positive and supportive attitude
- Maintain situational awareness and a high degree of alertness
- React appropriately in a timely manner and fashion
- Retain a sharp memory and recollection of information

## Mitigate or Change Tactics When Faced With

- Indirect Fireline
- Change of fuel characteristics
- Change in fire behavior
- Reburn Potential
- Lack of Communications With All Forces
- Downhill Line Construction
- Under slung Line
- Fatigued Crew

## Leadership is All About Character

Fire leaders set the example by exhibiting strong character. Character is based on values. It is the combination of actions and words that others appraise to determine if the leader can be trusted to do the right thing

- Know our values, review them frequently, and look for areas of improvement.
- Admitting when we are wrong.
- Taking time to reflect on our actions.
- Finding role models and asking them to be a mentor.
- Studying leaders and leadership, learning from their successes and mistakes.

## **Media Access Law**

Media - the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident - Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.
