## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

- This fire remains fuels driven...***But Ventilation Dependent...Read Your Smoke Often!***
- Fine Dead Fuel Moisture 3-6%! PIG up to 90%! ***REVIEW ATTACHED FUELS ADVISORY!***
- Intense heat remains along the entire perimeter. ***Respect all alignments of slope and wind!***
- Unshaded PIG remains at 90%...Smoke Shaded 60%...***Expect a Back-and-Forth Dancel***
- If you can breathe better, so can the fire...***Improved Visibility=Inversion Breach=Big Runs!***
- Expect drift smoke from regional fires to affect your visibility....***AND*** situational awareness!

#### SPECIFIC:

All Divisions: \*\*\****Fuels and Fire Behavior Advisory- Posted for Northern California***\*\*\*

Flame Lengths- 4 to 8 ft. in Grass, Up to 20 ft. in Brush...Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 40 chains/hour in Brush... Diminishing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Over 90% at the peak of the burn period, Diminishing to <40% overnight

#### AIR OPERATIONS:

Sunrise: 06:14 Sunset: 20:17

Expect poor smoke dispersion before the inversion breaks by late in the morning. Mixing heights start out at less than 400 feet; rise to 9,000 feet with daytime heating; then return to less than 400 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating.

# Fuels and Fire Behavior Advisory

## Northern California

August 2, 2021 to August 16, 2021

**Subject:** Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

**Discussion:** Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

**Difference from normal conditions:** Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify through out the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

### Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97<sup>th</sup> percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**

### Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

**Area of Concern:** Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

INCIDENT #CA-SHF-001187

DATE:8/9 to 8/10/21 TIME:0700-0700 Day/Night

## Common Denominators of Fire Behavior on Tragedy Fires

- On relatively small fires or deceptively quiet areas of a large fire.
- In relatively light fuels, such as grass, herbs, and light brush,
- When there is an unexpected shift in wind direction, or in wind speed.
- When fire responds to topographic conditions and runs uphill.

Alignment of topography and wind during the burning period should be considered a trigger point to re-evaluate tactics.

## Fatigue/Smoke Effects

- Be alert for signs of fatigue and take breaks as necessary.
- Maintain 2:1 work/rest ratio.
- Monitor incoming resources for level of fatigue.
- Allow for extended rest periods if needed.
- Avoid working in heavy inversions for prolonged periods if possible. Take occasional breaks in clear air to mitigate build-up of CO, and CO<sub>2</sub>.
- “Over hydrate” to assist in flushing smoke particulates from your system.

## WUI Tactical Challenges and Hazards

- Propane tanks that could B.L.E.V.E.
- Powerlines and underground utilities.
- Narrow roads, unknown bridge weight limits.
- Limited water sources.
- Property owners remaining on-site, or evacuations, which may cause panic.
- Smoke byproducts often laced with chemical compounds not found in pure wildland smoke.
- Unknown chemicals or pesticides, like Carbofuran, near residences or garden plots.

## Human Resource Message

### Thought for the Day **FIRE**

- Fatigue..... Be aware of fatigue having a negative impact on your conduct and speech
- Integrity..... Integrity and Honesty are vital on a fire. If you mess up, fess up, whatever you did can most likely be fixed if you report it as soon as you are aware of it.
- Respect..... Treat others as you would like to be treated
- Example..... Set an example. Realize you influence others around you, therefore, always conduct yourself in a professional and competent manner, but still have fun!

Armando Vargas has also arrived on the incident. He is the HRSP Trainee for this assignment. We will be located at the Weaverville Camp, last row of trailers on the end. Please feel free to call, text, email or just come by if you need to chat.

### **Media Access Law**

Media – the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident – Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.

Please email photo submissions to: [2021.monument@firenet.gov](mailto:2021.monument@firenet.gov)
