OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Identify the "Next Big Change"...***Fuel, Weather, Slope ...Plan, Plan Again, then Engage!***
- Closed canopies can impede your awareness of actual fire behavior...***Engage with Caution!!***
- With a "PIG" of 100%, All lightning is an ignition source....***Any new start will grow quickly!***
- Intense heat remains along the entire perimeter. ***Respect all alignments of slope and wind!***
- Expect terrain and weather winds to battle for dominance... ***Plan for multiple directions!!***
- ***Steep terrain will foster rollout...***heavy fuels are weak from deep seated fire..... and wind.
- ***ALL*** fuel size classes are..... very ***DRY***..... very ***AVAILABLE***..... very ***RECEPTIVE***...

SPECIFIC:

All Divisions: ******Fuels and Fire Behavior Advisory- Posted for Northern California******

Flame Lengths- 4 to 8 ft. in Grass, Up to 20 ft. in Brush... Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 40 chains/hour in Brush... Diminishing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Up to 100% at the peak of the burn period, Diminishing to <40% overnight

AIR OPERATIONS:

Sunrise: 06:17 Sunset: 20:13

Expect poor smoke dispersion before the inversion breaks by late in the morning. Mixing heights start out at less than 400 feet; rise to 9,000 feet with daytime heating; then return to less than 400 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating, and in the vicinity of any building, mature, or dissipating thunderstorm .

SAFETY

Thunderstorms can....

- ***Wind-Test your Fireline through Outflow Winds.....***
- ***Cause Fire Weakened Trees to Fail.....***
- ***Loosen Fire Impacted Soils into Rollout.....***

Mission Analysis and Engagement

- What is the mission, what is the assignment?
- Are all hazards identified and made known?
- Is additional information needed?
- Lookouts – Communications – Escape Routes – Safety Zones
- Situational Awareness – Perception of the elements in the environment!
Comprehension of the situation and Projection of Future Status.

Be sure all elements of your safety plan are in place prior to engagement

Thunderstorm Safety, IRPG Page 21

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lie on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize you contact with the ground.
- Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle metal hand tools or flammable materials in open containers.

Mitigate or Change Tactics When Faced With

- Indirect Fireline
- Compromised LCES
- Frontal Assault
- Change in wind speed and/or direction
- Re-burn Potential
- Predicted Lightning
- Lack of Communications
- Structural Protection
- Spotting Becomes Common
- Downhill Line Construction

INCIDENT RISK ANALYSIS

ICS (215A) DAY/NIGHT SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications. Outflow winds from thunderstorms could negatively affect fire behavior.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	<ul style="list-style-type: none"> Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Refer to IRPG Page 12-16 for WUI preparation, preplanning, and hazards. Be active and engage in defense preparations & do not wait for the fire to arrive. Beware of unknown chemicals when working near structures or garden plots. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, TRA's, and Escape Routes.
ALL	ACCOUNTABILITY	<ul style="list-style-type: none"> Know where your troops are at all times. Know the plan, brief the plan, and implement the plan. Ensure you have communications with adjoining forces, and be sure they know the plan. Check in and out when traveling through Branches and Divisions. If you see someone that looks out of place, stop, and ask what they're doing As fire conditions escalate and your chasing spots, don't over commit. Back off, regroup, and re-engage.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel when you do not know the plan. Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels, and gentler topography when possible. Utilize natural or existing barriers.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.

Media Access Law

Media – the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident – Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.
