# **OUTPUTS**

### FIRE BEHAVIOR

### **GENERAL:**

- Expect today's NW wind to once again challenge lines towards the east of the fire!
- With ERC's remaining above the 90<sup>th</sup> percentile..., Resistance to Control will be Very High!
- Slope mimics wind...Once Fire Transitions Uphill...Even Slightly... Expect Big Changes!
- This fire remains fuels driven... But Ventilation Dependent... Read Your Smoke Often!
- Strong winds expected....Complex, Dissecting Terrain will Enhance this Erratic Effect!
- Heavy fuels burning above, below or around you in steep terrain?... Make a Plan for Rollout!!
- Topography is creating locally higher winds... This Fire is Especially Sensitive to Wind!
- Reliably at 1700... Winds and Fire Behavior Increase... Upslope to Up Drainage!

### SPECIFIC:

All Divisions: \*\*\*Expect Fine Fuel Availability to Swing Largely Throughout the Day!\*\*\*

Flame Lengths-4 to 6 ft. in Grass, Up to 20 ft. in Brush...Diminishing after midnight

Rate of Spread-20 chains/hour in Grass, Up to 40 chains/hour in Brush... Diminishing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Up to 80% at the peak of the burn period, Diminishing to <30% overnight

# **AIR OPERATIONS:**

Sunrise: 06:20

Sunset: 20:09

Expect poor smoke dispersion before the inversion breaks by late in the moming. Mixing heights start out at less than 1000 feet; rise to 8,500 feet with daytime heating; then return to less than 1000 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating...... Strong Northwest Flow at Altitude!

# Firefighter Fatigue/Driver Safety

With continued physically demanding operational periods, expect and predict fatigue of all crew members working in and around your division. Take the following steps to limit and address fatigue and driver safety:

- 1. Follow work/rest guidelines.
- 2. Take breaks as needed.
- Rotate qualified drivers/operators.
- 4. Supervisors assess the fatigue levels of your crews during operational periods.
- 5. Ask/tell if you are physically unable to complete a task or assignment.
- 6. Front seat passengers should remain awake and maintain situational awareness while driving.

# **Heat Related Illness**

**Heat Stroke**- A condition that occurs when the body becomes unable to control its temperature, and can cause death or permanent disability. Description of signs and symptoms include:

- Confusion, loss of coordination.
- Throbbing headaches.
- · High body temperature.
- Seizures, coma.

Heat Exhaustion- The body's response to an excessive loss of water and salt, usually through sweating.

- · Heavy sweating, extreme weakness or fatigue.
- Dizziness, nausea, vomiting, irritability.
- · Fast, swallow breathing.
- Trouble concentrating, loss in coordination.

Heat Cramps- Affects workers who sweat a lot during strenuous activity. Sweating depletes the body's salt and moisture levels.

· Muscle cramps, pain, or spasms in the abdomen, arms or legs.

# Personal Hygiene and Illness Prevention

With shared utilities such as sleeping quarters, restrooms and the chow hall, the chance of spreading illness and infection is a concern. Take the following steps to limit your exposure to illness or infection:

- Use handwashing stations routinely.
- Stay hydrated and well nourished.
- Get your rest, use hand sanitizer.
- Avoid contact with social surfaces (handrails, doorknobs) without washing hands after.
- Follow all CDC and Agency COVID 19 protocols.

# How to Overcome Conflict between Two People

- Set ground rules. Ask all parties to treat each other with respect and to make an effort to listen and understand others' views.
- 2. Ask each participant to describe the conflict, including desired changes. Direct participants to use "I" statements, not "you" statements. They should focus on specific behaviors and problems rather than people.
- 3. Ask participants to restate what others have said.
- 4. Summarize the conflict based on what you have heard and obtain agreement from participants.

- <u>5.</u> Brainstorm solutions. Discuss all of the options in a positive manner.
- **<u>6.</u>** Rule out any options that participants agree are unworkable.
- <u>7.</u> Summarize all possible options for a solution.
- **8.** Make sure all parties agree on the next steps.
- Close the meeting by asking participants to COVID elbow bump and thank each other for working to resolve the conflict.

## Media Access Law

Media – the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident – Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.

Please email photo submissions to: 2021.monument@firenet.gov
