OUTPUTS

FIRE BEHAVIOR

GENERAL:

- **Expect today's NW wind to once again challenge lines towards the east of the fire!**
- **With ERC's remaining above the 90th percentile..., Resistance to Control will be Very High!**
- **Slope mimics wind...Once Fire Transitions Uphill...Even Slightly... Expect Big Changes!**
- **Has fire backed under your canopy for days?....Reburn Potential is Real! Identify...Plan!**
- **Strong winds expected...Complex, Dissecting Terrain will Enhance this Erratic Effect!**
- **Spotting comes in many forms...Make a Plan for Lofted Material AND Rollout!!**
- **Topography is creating locally higher winds...This Fire is Especially Sensitive to Wind!**
- **Reliably at 1700...Winds and Fire Behavior Increase...Upslope to Up Drainage!**

SPECIFIC:

All Divisions: *High Winds and Snags Don't Mix....Is Your Escape Route Clear!*****

Flame Lengths- 4 to 6 ft. in Grass, Up to 20 ft. in Brush...Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 40 chains/hour in Brush... Diminishing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Up to 80% at the peak of the burn period, Diminishing to <40% overnight

AIR OPERATIONS:

Sunrise: 06:21

Sunset: 20:08

Expect poor smoke dispersion before the inversion breaks by late in the morning. Mixing heights start out at less than 1000 feet; rise to 5,500 feet with daytime heating; then return to less than 1000 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating..... **Strong Northwest Flow at Altitude!**

SAFETY

Fire Moves Fastest Where You Move Slowest....Plan Ahead!

Expect Areas Where Wind and Terrain Align to Produce Surprisingly Rapid Rates of Spread!

Monument Incident– Safety Message

INCIDENT #CA-SHF-001187

DATE:8/16-8/17/2021 TIME: 0700-0700 Day/Night Shift

Act Deliberately, Not Urgently

- When committing personnel to a fire, have a plan. Ensure that your plans are clearly communicated and that everyone clearly understands your intent and the hazards that are associated with your plan.
- Do not be afraid to say no. Refer to page 19 in the I.R.P.G. for guidelines on properly refusing risk. Do not act beyond the limits of your training or ability.
- Ensure that escape routes and safety zones are clearly defined and made known to all fire fighters. Post lookouts and ensure that you know what radio frequency you will be using for tactics and command. Make sure LCES is in place prior to taking action.
- Review the "8-Line," Incident within and Incident plan in your IAP. Spend time during breakout briefings discussing possible scenarios involving an incident within an incident. Know who that on-scene IC will be.

Fire Fighter Fatigue: Please continue to get enough rest. Take plenty of breaks and please continue to stay hydrated by drinking plenty of water. Ensure that all fire fighters meet the 2:1 work to rest ratio. Watch out for signs of fatigue in other fire fighters around you.

Snags/Hazard Trees: Maintain situational awareness and point out snags to others. Snags continue to fall in the burned area and near the fire line. Ensure that everyone is aware of the presence of snags and widow makers. Do not park vehicles under them. Use flagging tape to keep others out of the area.

Covid-19

- Be Smart! Stay Apart! Maintain CDC social distancing guidelines when feasible
- Practice good hygiene. Wash hands often and avoid touching your face
- Cover your nose and mouth with a facial covering and cough into your elbow if needed
- Monitor your health. If you have fever, shortness of breath, coughing, sneezing or any other Covid-19 related symptom, tell a supervisor and maintain physical distancing

Check your Temperature Gauge

For a lot of you here on the Monument, you are reaching the completion of your assignment and fire fatigue, along with COVID, and troubles sleeping may be starting to wear on you. With the hard work and the long hours, you've been putting in, it is easy to get on edge and "on the edge" with each other. Let's guard against that by recognizing when our temperature gauge is reaching a critical point and take a 15-minute cooldown before we do something that's out of character that might have lingering repercussions.

Reminder!

Please stop by the HRSP Trailer to fill out your free postcard. Just stop by fill them out, we will stamp them, and mail them out for **FREE!** We will also have postcards with us at the briefings each day.

Feel free to call/text or come by any time if you have questions, concerns, or just want to chat.

Media Access Law

Media – the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident – Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.
