OUTPUTS

FIRE BEHAVIOR

GENERAL:

- **Expect today's NW wind to once again challenge lines towards the east of the fire!**
- With ERC's remaining above the 90th percentile..., **Resistance to Control will be Very High!**
- Slope mimics wind...**Once Fire Transitions Uphill...Even Slightly... Expect Big Changes!**
- Has fire backed under your canopy for days?...**Reburn Potential is Real! Identify...Plan!**
- Strong winds expected....**Complex, Dissecting Terrain will Enhance this Erratic Effect!**
- Spotting comes in many forms...**Make a Plan for Lofted Material AND Rollout!**
- Topography is creating locally higher winds... **This Fire is Especially Sensitive to Wind!**
- Respect any tree torching... **Tight Crown Spacing will Support Crown Fire Runs!**

SPECIFIC:

All Divisions: *High Winds and Snags Don't Mix....Is Your Escape Route Clear!*****

Flame Lengths- 4 to 6 ft. in Grass, Up to 20 ft. in Brush...Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 40 chains/hour in Brush... Diminishing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Up to 80% at the peak of the burn period, Diminishing to <40% overnight

AIR OPERATIONS:

Sunrise: 06:22

Sunset: 20:06

Expect poor smoke dispersion before the inversion breaks by late in the morning. Mixing heights start out at less than 1000 feet; rise to 5,500 feet with daytime heating; then return to less than 1000 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating...**Strong Northwest Flow, Becoming Strong Northeast at Altitude!**

Stay Fire Focused But COVID Aware!

Incident Management Team Transition

- Sometimes called the 19th Watch Out Situation
- Take the time to understand the plan. Ensure all resources completely understand the assignment, the Communications Plan, and the Medical Plan.
- Supervisory positions have changed. Know who you are working for.
Briefings: Required every shift, for all personnel, for new assignments, and for changing conditions.

Planning for Medical Emergencies (see IRPG Page 2)

Prior to each operational period, Incident Commanders, supervisors, and all wildland firefighters need to ask and be able to answer the following three questions:

1. What are we going to do if someone gets hurt?
 - Are there personnel on your crew/division/fire that can provide medical support?
 - What type of equipment is available to treat and transport injured personnel?
2. How will we get them out of here?
 - Could you get an injured firefighter to a road or to a helispot?
 - How many personnel and what kind of equipment would you need to get an injured firefighter out?
3. How long will it take to get them to a hospital?
 - Where is the closest hospital?
 - Will you use air or ground transportation?
 - Could conditions change and affect the transportation timeline?

- Smoke/clouds/nightfall
- Fire behavior
- Mechanical failures

Risk Management Process: Implement the risk management process for all aspects of this ongoing event. The steps of the risk management process are:

1. **Situation Awareness**
2. **Hazard Assessment**
3. **Hazard Control**
4. **Decision Point**
5. **Evaluate**

(see page 1 of the 2018 IRPG)

Leadership:

Good operational leaders will:

- ◆ **TAKE CHARGE** of assigned resources.
- ◆ **MOTIVATE** firefighters with a "can-do safety attitude.
- ◆ **DEMONSTRATE INITIATIVE** by taking action in the absence of orders or direction.
- ◆ **COMMUNICATE** by giving specific instructions and taking feedback.
- ◆ **SUPERVISE** at the scene of action.

Media Access Law

Media – the California State Penal Code 409.5(D) allows for media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specific within the penal code. However, this does not include crime scenes, private property and the new media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the public information office if there are any issues.

Photographs and videos of the incident – Please refrain from posting incident related videos to your social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera may lose their situational awareness. When this happens, it could reflect poorly on all that are assigned to the incident.
