Day

Max. Temperatures- 75°-90° Min. Humidity-14 to 24% Winds- ENE, then WNW to 10 mph, *Gusts to 25!*

Night

Min. Temperatures- 50°-60° Max. Humidity-35 to 80% Winds-Downslope 4 mph, ENE to 6 mph by sunrise

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Know where and when slope reversals are likely...*Rapid, Intense Up-Slope Runs Possible!*
- Smoke and haze can hide spot fires until well established.... *Lookouts will be Tested!*
- PIG values remain high...*With VERY Poor RH Recovery...Expect Receptive Fuels 24/7!*
- Fire movement is 24/7...*Identify, and Plan For, "The Next Big Change" in the Fire's Path!*
- Smoke hinders "Look Up, Look Down, Look Around".... *Compensate with ALL your Senses!*
- This fire remains fuels driven...*But Ventilation Dependent...Visibility Equates to Activity!*
- Expect drift smoke from regional fires to reduce your visibility....*AND Situational Awareness!*
- Respect any tree torching... *Tight Crown Spacing will Rapidly Support Crown Fire Runs!*

SPECIFIC:

- All Divisions: *All Sizes of Fuels are very DRY, very AVAILABLE, very RECEPTIVE...*

Flame Lengths- 2-6 ft. in Grass, Up to 30 ft. in Brush/Understory...Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 80 chains/hour in Brush...Slowing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Up to 80% at the peak of the burn period, Diminishing to <40% overnight

AIR OPERATIONS:

Sunrise: 06:36 Sunset: 19:44

Expect poor smoke dispersion before the inversion "breaks" by late morning. Look for poorer dispersion the further east you go. Mixing heights start out at less than 500 feet; rise to 7,500 feet with daytime heating; then return to less than 500 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating.

SAFETY

Are You on a Deceptively Quiet Area of this Large Fire? Are You in Relatively Light Fuels?

Fuels and Fire Behavior Advisory

Northern California

August 17, 2021 to August 31, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify throughout the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

Monument Incident– Safety Message

INCIDENT #CA-SHF-001187

DATE:9/1-9/2/2021 TIME:0700– 0700 Day/Night

General Safety Concerns:

- **Driving:** Thick smoke and narrow/dusty roads, others driving faster than we do. **HEADS UP!!!**
- **Risk versus benefit:** Don't get caught up in the moment! Always weigh the risks of tactical operations against the potential benefit. **Especially on steep slopes at night!**
- **Drought conditions:** Use all of the assessment tools; Heads up for fire behavior; Ensure **LCES** is in place; Take extra time to ensure it is safe to engage! Use extra caution all the time.
- **All trees can be dangerous.** They don't have to be leaning, dead, burned, or gnarly. Perform adequate assessments, minimize exposure and risk around all trees.
- **Line Construction:** Use all of the safety protocols concerning line construction. Watch the spacing, footing, and other firefighters below.

“SEE SOMETHING.....SAY SOMETHING!”

If you see a hazard or a dangerous situation developing,
tell your supervisor and those around you.

Learn From Today

- Give, and demand, a quality briefing...Every shift!
- Speak up, ask questions, listen and communicate!
- Plan ahead!
- Evaluate the day's activity at the end of shift (AAR).
- Adjust the plan, based on what you learn.

To Improve for Tomorrow!

Night Shift: Patrol with a Purpose!

- Obtain a clear briefing to understand the purpose and intent of the patrol.
- Coordinate all patrol activities with adjoining patrol resources.
- Maintain strict accountability of all resources.
- Always keep the purpose of the patrol in mind before engaging.
- Always assess risk versus gain when considering taking action during patrol activities.

COVID 19 UPDATE

The covid situation has changed radically in the last three weeks. While there was less of a need to mitigate in the first half of the summer, the Covid-19 delta variant is now infecting and causing serious illness among vaccinated and unvaccinated individuals with significantly increased rates of infection in the second half of August amongst the wildland fire fighting community.

Resources are being sidelined daily as a result of infections and exposures at a time when every single resource is critical and essential. The Monument Fire has lost several critically needed resources as a result of covid illness and exposure.

In Redding, there is a drive-thru testing facility that is available free of charge to all resources (agency, state, cooperators, AD, and contractor – ALL)

The testing process is very fast with average time at the center less than 15 minutes. Results are turned around in 30 minutes to 5 hours, depending on the kind of test; the only center in California that offers this quick of a turnaround.

Testing and learning if you have covid could prevent your coworkers, your crew, or other critical resources from becoming infected or sick.

Team 5 and the US Forest Service urge all resources to take advantage of this free and easy testing in order to help maximize our capacity to respond to the unprecedented fire season. When arriving or departing from the incident, or if there is a reason to test during the incident, please GO GET A TEST.
