WEATHER SUMMARY:

*** Smokey, Warm and Dry....Again***

Morning smoke. Partial clearing at times across Branch 40 late morning with increased ventilation. Smoke will drift back eastward in the afternoon as upcanyon flow develops. Low daytime humidity continues under terrain influenced winds.

Day

Max.Temperatures- 80°-89° Min. Humidity-14 to 26% Winds- ESE, then WNW to 10 mph, Gusts 15-20 mph!

Night

Min.Temperatures- 50°-60° Max. Humidity-35 to 80% Winds-Downslope 4 mph, ENE to 10 mph by sunrise

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Know where and when slope reversals are likely... Rapid, Intense Up-Slope Runs Possible!
- Smoke and haze can hide spot fires until well established.... Lookouts will be Tested!
- PIG values remain high...With <u>VERY</u> Poor RH Recovery...Expect Receptive Fuels 24/7!
- Fire movement is 24/7...Identify, and Plan For, "The Next Big Change" in the Fire's Path!
- Smoke hinders "Look Up, Look Down, Look Around".... Compensate with ALL your Senses!
- This fire remains fuels driven...But Ventilation Dependent...Visibility Equates to Activity!
- Expect drift smoke from regional fires to reduce your visibility....AND Situational Awareness!
- Respect any tree torching... Tight Crown Spacing will Rapidly Support Crown Fire Runs!

SPECIFIC:

• All Divisions: All Sizes of Fuels are very DRY, very AVAILABLE, very RECEPTIVE...

Flame Lengths- 2-6 ft. in Grass, Up to 30 ft. in Brush/Understory...Diminishing after midnight

Rate of Spread- 20 chains/hour in Grass, Up to 80 chains/hour in Brush...Slowing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- Up to 80% at the peak of the burn period, Diminishing to <40% overnight

AIR OPERATIONS:

Sunrise: 06:37

Sunset: 19:42

Expect poor smoke dispersion before the inversion "breaks" by late morning. Look for poorer dispersion the further east you go. Mixing heights start out at less than 500 feet; rise to 8,000 feet with daytime heating; then return to less than 500 feet after sunset. Anticipate terrain induced turbulence in the Trinity River corridor, especially during peak hours of afternoon heating.

SAFETY

Common Denominators of Fire Behavior on Tragedy Fires, (IRPG Page 5) Currently in Play.......

- On Relatively Small Fires or <u>Deceptively Quiet Areas of Large Fires!</u>
- When Fire Responds to Topographic Conditions and Runs Uphill!

INCIDENT # CA-SHF-001187

DATE: 9/2-9/3/2021 TIME: 0700-0700 Day/Night

Situational Awareness:

Start the shift with a briefing and re-brief during the shift as the job changes. Use all the assessment guides to develop and maintain Situational Awareness. Constantly re-evaluate your situation throughout the shift. Use the time tested process of "Looking Up, Down, and All Around", and the other assessment materials from the Incident Response Pocket Guide.

Recognize the signs of Fatigue

The effects of fatigue can directly hinder our abilities to:

- Perform various tasks
- Maintain situational awareness and a high degree of alertness
- React appropriately in a timely manner and fashion
- Retain a sharp memory and recollection of information
- Efficiently process information and make sound decisions
- Maintain a positive and supportive attitude

Driving

FIRE FIGHTING WILL ALWAYS BE PANGEROUS AS LONG AS YOU HAVE TO PRIVE TO FIRES.

Individual Accountability

- Know where ALL of your resources are at ALL times.
- When sharing resources, ensure accountability is maintained.
- Review radio procedures with resources,
 and ensure all radios are properly cloned.
- Check in all assigned resources as they arrive under your supervision.
- Ensure ALL personnel check out at the end of each shift.

ICS (215A) DAY/NIGHT SHIFT

	INCIDENT RISK ANALYSIS	ICS (215A) DAY/NIGHT SHIFT
BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	 Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicl to pass on uphill side. Use spotters when backing or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued an complacent. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications. Outflow winds from thunderstorms could negatively affect fire behavior.
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	 Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Refer to IRPG Page 12-16 for WUI preparation, preplanning, and hazards. Be active and engage in defense preparations & do not wait for the fire to arrive. Beware of unknown chemicals when working near structures or garden plots. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, TRA's, and Escape Routes.
ALL	FIRING OPERATIONS	 Only personnel trained in the use of each devise will be authorized to use firing equipment. Human Resource Message

HARASSMENT FREE WORKPLACE POLICY

The Forest Service strives for a harassment-free work environment where people treat on another with respect. Managers, supervisors, and all employees, as well as our contractors, cooperators and volunteers have the primary responsibility for creating and sustaining this harassment-free environment.

All employees, contractor personnel, and visitors must take personal responsibility for maintaining conduct that is professional and supportive. There is a zero tolerance for harassment based on race, national origin, religion, age, mental or physical disability, color, sex, or any other nonmerit factors.

Managers and supervisors must take immediate action to stop harassment (or any other inappropriate behavior), to protect the people targeted and to take all reasonable steps to ensure that no further harassment or retaliation occurs. Employees who witness harassment should report it to the proper authority.

<u>WHAT HARASSMENT IS:</u> Harassment is coercive or repeated, unsolicited, and unwelcome verbal comments, gestures or physical contacts and includes retaliation for confronting or reporting harassment. Some examples include but are not limited to the following: unwelcome touching, inappropriate references to body parts, derogatory or demeaning comments, jokes, or personal question, sexual innuendoes, inappropriate comments, or other verbal abuse.

Individuals who believe they are being harassed or retaliated against should exercise any one or more of the following options as soon as possible: Tell the harasser to stop the offensive conduct; and/or Tell a manager or supervisor about the conduct; and/or any other individual you trust who would act. In addition, you may seek help from the Human Resource Specialist on the incident.

Please let me know if we can be of assistance. We are traveling between camps. Andrea Cabida -HRSP <u>707-330-9939 or by email at: andrea.cabida@usda.gov.</u> Ben Wexler-HRSP(t)- 707-980-2780 or <u>Benjamin.wexler@usda.gov</u>
Autumn Lucas- HRSP(t)- 505-382-1443 or <u>autumn.lucas@usda.gov</u>

Although practicing social distancing, we will arrange an in-person meeting to discuss any concerns.
