TYPE OF FIRE: Wildfire

INPUTS

WEATHER SUMMARY:

Slight instability parks over the fire area again with some upper level moisture and cloud cover. Increase to RH especially overnight, and decreased wind. Smoke will clear after 1600 and allow more sunlight and wind to access the fuels, leading to increased burning conditions and spot potential.

DAY**_Max. Temperatures- 75°-85° Min. Humidity- 22 to 28% Winds- W 4-8 mph, **Gusts 15 mph**

NIGHT**_Min. Temperatures- 50°-60° Max. Humidity- 45 to 75% Winds- WNW 4-7 mph, N by sunrise

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Fine Dead Fuel Moisture 5% in the sun; 7% shaded, and night, PIG 50-70%, ERCs >97th percentile
- Know where and when slope reversals are likely...**Rapid, Intense, Up-Slope Runs Expected!**
- **Incomplete Firing, Fuel, and Wind conditions create Potential for RE-BURN!**
- Without wind, the fire will remain active and fuels/terrain driven, **possible slope reversal!**
- **Spot Fires will be less however will resist control efforts at the peak of the burn period**

SPECIFIC:

Flame Lengths- 5-10 ft. in Timber Understory, Up to 10-20 ft. in Shrub...Diminishing after midnight

Rate of Spread- 10-15 chains/hour in Timber Understory, Up to 40-60 chains/hour in Shrub...Slowing overnight

Spotting Distances- Up to 1/4 mile in Timber from group torching

Divisions RR/W/Y/Z: Spot fires will occur across the containment line as the fire backs into the Hayfork Creek drainage. Each dogleg in the creek presents an adverse wind profile where fire can escape through spotting. Wind eddies will occur in these areas along with complex wind profiles. Watch for slope reversal in DIV Z as the prevailing W slackens and the fire responds to fuels and slope.

Division U: Spot fires can occur up to 1/4 mile from the fire pushed by the prevailing W wind, expect continued northern spread from fuels and terrain.

Division K: Expect spotting mostly uphill, northern spread will be checked by wind direction.

Division L: Flanks will fill in drainages under China Peak and Thurston Peak where fuels are continuous.

AIR OPERATIONS:

Expect poor smoke dispersion before the inversion "breaks" at 1600 hours. Earliest access to the fire by aircraft will be in the W divisions.

SAFETY

Spotting is possible. Ensure escape routes when suppressing spot fires. Anticipate aggressive and established burning conditions when spot fires occur on sun-lit aspects.

Mission Analysis and Engagement

- What is the mission, what is the assignment?
- Are all hazards identified and made known?
- Is additional information needed?
- Lookouts – Communications – Escape Routes – Safety Zones
- Situational Awareness – Perception of the elements in the environment!
Comprehension of the situation and Projection of Future Status.

Be sure all elements of your safety plan are in place prior to engagement

Thunderstorm Safety, IRPG Page 21

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lie on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle metal hand tools or flammable materials in open containers.

Mitigate or Change Tactics When Faced With

- Indirect Fireline
- Compromised LCES
- Frontal Assault
- Change in wind speed and/or direction
- Re-burn Potential
- Predicted Lightning
- Lack of Communications
- Structural Protection
- Spotting Becomes Common
- Downhill Line Construction

INCIDENT RISK ANALYSIS

ICS (215A) DAY/NIGHT SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • Use warning lights when working on roads or traveling in smoke. • Drive at or below posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Are you seeing what we have predicted? • Conduct thorough assessments before starting work. • Ensure LCES is in place • Plan & communicate your exit strategy with your crew and adjacent resources. • Provide additional briefing for new resources and maintain communications. • Outflow winds from thunderstorms could negatively affect fire behavior.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each devise will be authorized to use firing equipment. • Ensure that all personnel are briefed and prepared for firing and holding operations. • Ensure that all ground and Ariel ignition plans are approved and signed by the IC prior to implementation
ALL	WILDLAND URBAN INTERFACE OPERATIONS	<ul style="list-style-type: none"> • Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. • Refer to IRPG Page 12-16 for WUI preparation, preplanning, and hazards. • Be active and engage in defense preparations & do not wait for the fire to arrive. • Beware of unknown chemicals when working near structures or garden plots. • Be decisive in tactical engagement. Know when to engage or not. • Establish management decision points, Safety Zones, TRA's, and Escape Routes.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Answer questions when asked by others. Ask for intel when you do not know the plan. • Ensure all personnel are familiar with the incident and IA communications plans.

The employee or supervisor should contact me as soon as possible or upon arrival at the hospital, whichever is convenient.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact me first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

Unserviceable items must be turned into COMP if you are unable to replace at Supply. If items are lost or damaged on the fire line, the fire suppression module must provide a copy of the module's standard inventory with the documentation of broken or unserviceable items.

Human Resource Message

Let's Talk about it!!!

How many of us know someone that has either died by suicide, attempted suicide or has lost someone to suicide??

There has always been a stigma around "Mental Health." Many of us have had feelings of depression, hopelessness and/or loss. We tend not to talk about it, or we blow it off because for the longest time we have been conditioned that these feelings show weakness.

LET'S CHANGE THAT THOUGHT!!!

How do we do that? It starts with you; it starts with me; it starts with one person at a time recognizing that we are not weak when we talk about our emotions. As a matter of fact, talking about our struggles, learning how to deal with those feelings, and learning how to move beyond them in a productive manner is actually one of the strongest things anyone can do. AND IT IS NOT EASY!!! Suicide does not discriminate, it does not see gender, color or age. We are all susceptible to emotions that we do not know how to process. Let's change the way we think about mental health. We can make a difference; one person, one action, one conversation at a time.
