INPUTS

WEATHER SUMMARY:

High pressure builds in over the fire with a slight increase in temperatures in decrease in RH. RH recovery overnight will be up to 65%. Recovery RH and smoke will clear after 1400 and allow more sunlight and wind to access the fuels, leading to increased burning conditions and spot potential.

DAY**_Max. Temperatures- 79°-89° Min. Humidity- 16 to 22% Winds- W 4-8 mph, *Gusts 15 mph*

NIGHT**_Min. Temperatures- 52°-62° Max. Humidity- 40 to 65% Winds- N 4-7 mph, NW by sunrise

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Fine Dead Fuel Moisture 4% in the sun; 6% shaded, and night, PIG 60-80%, ERCs >97th percentile
- Know where and when slope reversals are likely...*Intense, Up-Slope Runs Expected!*
- *Incomplete Firing, Fuel, and Wind conditions create Potential for RE-BURN!*
- Without wind, the fire will remain active and fuels/terrain driven, **possible slope reversal!**
- **Spot Fires will be less however will resist control efforts at the peak of the burn period**

SPECIFIC:

Flame Lengths- HEAD FIRE 5-10 ft. in Timber Understory, Up to 10-20 ft. in Shrub...Diminishing after midnight

Rate of Spread- HEAD FIRE 10-15 chains/hour in Timber Understory, Up to 40-60 chains/hour in Shrub...Slowing overnight

Spotting Distances- Up to 1/4 mile in Timber from group torching

Divisions RR/WY/Z: Spot fires will occur across the containment line as the fire backs into the Hayfork Creek drainage. Each dogleg in the creek presents an adverse wind profile where fire can escape though spotting. Wind eddies will occur in these areas along with complex wind profiles. Watch for slope reversal in DIV Z as the prevailing W slackens and the fire responds to fuels and slope. Evaluate re-burn potential.

Division U: Spot fires can occur up to 1/4 mile from the fire pushed by the prevailing WSW wind, expect continued northern spread from fuels and terrain.

Division K: Expect spotting, mostly uphill, northern spread will be checked by wind direction and drainages continuous to the Denny Rd. Slope reversal possible with fuel and terrain driven runs.

Division L: Flanks will fill in drainages under China Peak and Thurston Peak where fuels are continuous.

AIR OPERATIONS:

Expect poor smoke dispersion before the inversion "breaks" at 1400 hours. Earliest access to the fire by aircraft will be in the W divisions.

SAFETY

Spotting is possible. Ensure escape routes when suppressing spot fires. Anticipate aggressive and established burning conditions in areas pre-conditioned for re-burn.

DATE:9/11-9/12/2021TIME:0700–0700 Day/Night

Firefighter Fatigue/Driver Safety

With continued physically demanding operational periods, expect and predict fatigue of all crew members working in and around your division. Take the following steps to limit and address fatigue and driver safety:

1. Follow work/rest guidelines.
2. Take breaks as needed.
3. Rotate qualified drivers/operators.
4. Supervisors assess the fatigue levels of your crews during operational periods.
5. Ask/tell if you are physically unable to complete a task or assignment.
6. Front seat passengers should remain awake and maintain situational awareness while driving.

Heat Related Illness

Heat Stroke- A condition that occurs when the body becomes unable to control its temperature, and can cause death or permanent disability. Description of signs and symptoms include:

- Confusion, loss of coordination.
- Throbbing headaches.
- High body temperature.
- Seizures, coma.

Heat Exhaustion- The body's response to an excessive loss of water and salt, usually through sweating.

- Heavy sweating, extreme weakness or fatigue.
- Dizziness, nausea, vomiting, irritability.
- Fast, shallow breathing.
- Trouble concentrating, loss in coordination.

Heat Cramps- Affects workers who sweat a lot during strenuous activity. Sweating depletes the body's salt and moisture levels.

- Muscle cramps, pain, or spasms in the abdomen, arms or legs.

Personal Hygiene and Illness Prevention

With shared utilities such as sleeping quarters, restrooms and the chow hall, the chance of spreading illness and infection is a concern. Take the following steps to limit your exposure to illness or infection:

- Use handwashing stations routinely.
- Stay hydrated and well nourished.
- Get your rest, use hand sanitizer.
- Avoid contact with social surfaces (handrails, doorknobs) without washing hands after.
- Follow all CDC and Agency COVID 19 protocols.

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • Use warning lights when working on roads or traveling in smoke. • Drive at or below posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Are you seeing what we have predicted? • Conduct thorough assessments before starting work. • Ensure LCES is in place • Plan & communicate your exit strategy with your crew and adjacent resources. • Provide additional briefing for new resources and maintain communications. • Outflow winds from thunderstorms could negatively affect fire behavior.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure that all personnel are briefed and prepared for firing and holding operations. • Ensure that all ground and Ariel ignition plans are approved and signed by the IC prior to implementation
ALL	WILDLAND URBAN INTERFACE OPERATIONS	<ul style="list-style-type: none"> • Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. • Refer to IRPG Page 12-16 for WUI preparation, preplanning, and hazards. • Be active and engage in defense preparations & do not wait for the fire to arrive. • Beware of unknown chemicals when working near structures or garden plots. • Be decisive in tactical engagement. Know when to engage or not. • Establish management decision points, Safety Zones, TRA's, and Escape Routes.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Answer questions when asked by others. Ask for intel when you do not know the plan. • Ensure all personnel are familiar with the incident and IA communications plans.

COMP / CLAIMS

Elaine Downing COMP Unit Leader 928-486-5295 Elaine_Downing@firenet.gov

For federal employees associated with the Monument or Knob Fires, if you are injured, please contact the COMP UL for the Authorization for Treatment (CA-16). We can issue the form directly to the hospital or clinic, but we need full names and SSN for the required forms prior to being able to do that. The employee or supervisor should contact me as soon as possible or upon arrival at the hospital, whichever is convenient.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact me first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

Unserviceable items must be turned into COMP if you are unable to replace at Supply. If items are lost or damaged on the fire line, the fire suppression module must provide a copy of the module's standard inventory with the documentation of broken or unserviceable items.

Human Resources Message

In Remembrance of 9/11/2001

Today marks the 20th anniversary of the events of 9/11/2001. That day defined what it means to meet adversity and then overcome it. We recall, acts of heroism and we remember once again how ordinary human beings, living their ordinary lives, reacted with extraordinary heroism when – without warning and in an instant – they were thrown face-to-face with the most fundamental questions of human existence. Today, you are experiencing unprecedented times with COVID, National Civil Unrest, as well as the current state of affairs with our current fires. You are all hero's every day!
