Monument South Zone Fire Weather Forecast

FORECAST NO: 6

PREDICTION FOR: Tue 0700 to Wed 0700

SHIFT DATE: August 24, 2021

FORECAST ISSUED: 2000 PDT August 23, 2021

NAME OF FIRE: Monument Fire

UNIT: SHF

Royce Fontenot SIGNED:

Incident Meteorologist

WEATHER DISCUSSION: Warming and drying conditions will continue today with dense smoke partially clearing in the afternoon hours over Branch 30. Winds will remain terrain driven in the lower elevations with generally westerly winds along the ridgetops. Expect stronger terrain driven winds in the late afternoon into the early evening. Winds will diminish overnight with moderate humidity recovery. Humidity values will begin to recover shortly after sunset in lower elevations and after midnight along ridgetops.

TUESDAY:

WEATHER:

Smoke in the morning partially clearing in the afternoon. Some afternoon clouds

along ridgetops.

MAX TEMPERATURES:

86-91°F full sunshine, 75-84°F elsewhere under smoke.

MIN HUMIDITY: 20 FT WINDS:

Ridges:

17-27%, highest values where heavy smoke lingers. E 4-6 mph becoming WSW to WNW 10-15 mph with gusts 20 mph by 1500.

Drainages:

E 2-5 mph becoming W/Up canyon 5-8 mph gusts 12-17 mph late afternoon.

Expect strongest valley gusts late afternoon along the Trinity River.

LAL:

CWR: HAINES INDEX:

MIXING HEIGHT:

800 ft AGL increasing to 8,500 ft AGL in the afternoon.

TRANSPORT WIND:

SW 10-15 mph.

TUESDAY NIGHT:

WEATHER:

Smoke, heavy at times with low visibility.

MIN TEMPERATURES:

50-60°F warmest in thermal belts above 2500 feet.

MAX HUMIDITY:

Valley 45-55%. Ridges 35-45%

20 FT WINDS:

Ridges:

WSW to WNW 10-15 mph with gusts to 20 mph becoming E 3-5 mph

0%

Drainages: LAL:

Evening upcanyon becoming downslope/down canyon 2 to 4 mph overnight.

CWR:

0%

HAINES INDEX:

2

MIXING HEIGHT:

8,000 ft AGL decreasing to 1000 ft AGL overnight.

TRANSPORT WIND:

SSW 10-15 mph.

Wednesday/Thursday Outlook: The warming trend will pause briefly on Wednesday with a slight cooling in temperatures, however the return to building heat will resume on Thursday, Humidity values will continue to diminish through Thursday. A generally seasonal wind pattern is expected through mid-week.

WEATHER SUMMARY

Areas of Smoke Possible Clearing See Incident Weather Forecast in IAP

FIRE BEHAVIOR:

GENERAL:

Fuels and Fire Behavior Advisory issued 07-17-2021

Topography is steep and rugged ranging from 2000' in the valleys and 6000' on higher peaks. Slope in many instances is 100%. This terrain promotes fire growth through roll out and slope reversal. Many of the drainages align with predominant wind patterns for the region. The Trinity River corridor is a major drainage that funnels wind primarily East and West. There are major bends in the river that will create eddy's and swirling winds.

Fuels in the fire area range from timber and timber understory in higher elevations, heavy brush in mid elevations and grass oak woodland in valley bottoms. Extreme Drought this year has stressed fuels to critical fuel moistures. 1000 hr fuels recorded July 15 were 7%, LFM in brush was 93%. The dryness of the fuels in the area are a major contributor to the Monument Fire's growth.

Fires in this area commonly have large growth periods of 1 to 2 days usually aided by windy conditions. Following the large growth periods there are usually several days of slowed growth due to heavy smoke inversions. This has been the scenario for the Monument Fire. August is generally hot and dry with long burn periods that extend well into the night.

SPECIFIC:

Branch 20

Smoldering and creeping interior of the line. Expect periodic clearing of smoke especially on upper ridges down the top 1/3rd of the slopes. Downslope winds over night and steep terrain will continue to threaten control lines from above. Fire weakened trees, stump holes and poor visibility from smoke will continue to be a challenge.

Branch 30

Low intensity backing fire will continue to creep into deep drainages. Higher elevations will periodically clear from smoke coverage. When the smoke clears, fire behavior will increase. The West end of Div RR will have upslope winds during the afternoon as well as West winds from the Hayfork Creek drainage. This will create battling winds at the ridge in Section 34.

South Zone Contingency

Be cautious operating equipment in critically dry fuels.

AIR OPERATION:

Smoke will continue to be a persistent feature over the fire.

SAFETY

Wind increases or changes direction... Aspect, time of day and position in relation to topographic features will influence your winds throughout the day. Take observations several times a shift and read your forecast to ensure that you are aware of your environment.

Fuels and Fire Behavior Advisory

Northern California

July 17, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify throughout the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are 4-6 weeks ahead of normal drying/curing rates.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this
 year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and
 spread rates in these areas. Early season extreme fire behavior has been observed in both light and
 heavy fuels. Anticipate increased spread rates, spotting, and active nighttime burning.
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. Anticipate higher resistance to control in all fuel types.
- Already this year, Northern California has experienced large fire activity and multiple team
 deployments. California will likely experience an extended fire season. It is important to be mindful of
 and manage fatigue for all resources. Everyone, every day, returns home safely.

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding
 normal expectations for this time of the year. Local briefings need to be thorough and highlight
 specific fire environment conditions. These include but are not limited to local weather
 forecasts, Pocket Cards, ERC's, live and dead fuel moistures.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

Monument Fire South Zone HEALTH AND SAFETY MESSAGE

INCIDENT: Monument – CA SHF-001187

DATE: August 24, 2021

TIME: 0700-0700

24 HOUR SAFETY EMPHASIS

Firing Operations-Driving and Traffic-Uniformed on Strategy/Tactics/Hazards

FIRING OPERATIONS and DEVICES

Watch Out

- Unfamiliar with the plan
- Unfamiliar with how firing devices operate/work
- Not paying attention to changing fire behavior/weather

Mitigation

- · Brief, Brief, Brief....Operations briefing, Division Break outs, and Tailgate Safety's. Tactical pauses as necessary
- Only trained personnel authorized to use devices
- Proper use of PPE
- Use of go/no checklists if appropriate

HAZZARD TREES

Watch Out

- Fire and wind damaged trees
- Cat Faced and widow makers
- · Weakened root system

Mitigation

- Look up, Look Down, Look All Around
- Flag and make proper notifications. Do not leave incomplete falling operations.
- Monitor when mopping up. Watch where you park
- Size up and mitigate concerns, work within your qualifications

UNINFORMED on STRATEGY-TACTICS-HAZARDS

Watch Out

- Communications not effective, more questions than answers, loss of accountability
- · Working in an area that you have not seen before
- · Changes in line supervision/lack of leader's intent

Mitigation

- Plan, Plan, and then plan some more, remember to have a Primary, Alternative, Contingency, and Emergency (PACE)
- Remain vigilant, use LCES, if you see something, say something through your chain of command
- · Expectations shall be given prior to assignment or engagement

REMAIN FIRE FOCUSED AND COVID-19 AWARE

7im Irwin IMT 5 SAFETY OFFICER

INCIDENT SAFETY ANALYSIS 215a

MONUMENT - Tuesday, August 24, 2021

| | | rucsuuy, August 24, 2021 |
|------------------------|---|--|
| 8. Location | 9. Hazard | 6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc) |
| Branch 20 Branch 30 | Firing Operations & Devices | Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed. |
| Branch 20 Branch 30 | Driving & Traffic | ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Keep clutter off dash and inside cab. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. |
| Branch 20 Branch 30 | Fatigue & Over Exertion | Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines. |
| Branch 20 Branch 30 | Communications | ∼ Maintain communication with aviation resources, and suppression organization. ∼ Ensure all know frequency and protocol for contacting resources. ∼ Utilize the ICS 205. ∼ Utilize human repeaters when working in dead spots. |
| Branch 20 Branch 30 | Uninformed on Strategy / Tactics / hazards | ~ Provide a detailed briefing for all personnel assigned to the incident. ~ Document briefings on unit log. ~ Use Risk Management Process in evaluating all assignments. ~ Explain leadership responsibilities and expectations from all personnel assigned to task. ~ Determine hazards, and mitigation protocol to limit exposure. ~ Develop and review 215a. ~ Discuss expected fire behavior, and plans for retreat. ~ Discuss weather, Escape Routes, Safety Zones. ~ Discuss communication plan including all tactical, aerial, and command frequencies. ~ Discuss Emergency Plan outlined in the ICS-206 Medical Plan. |
| Branch 20 Branch 30 | Night Operations | Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazard. |

Operations Scection Chief Jam Hudson

Safety Officer Tim Irwin

SAFETY COMMUNICATION HAZARD TREE / TREE MORTALITY AWARENESS

Standing dead trees (snags) and green trees remain a constant threat to responder safety. Due to extended drought conditions, there are millions of dead and dying trees in California, and many more that are stressed due to unhealthy forests or fire damage. The combination of epidemic levels of bark beetle infestations and years of drought conditions has created an extreme hazard throughout California. Conifer and Oak trees that have recently died are identified as "Red Trees". Once the

needles or leaves have fallen, the dead tree enters the "Gray Phase" where continued decay and decomposition may be occurring internally with few visual indicators of its extent.

Aside from over 9 million acres of standing dead trees that pose an extreme life safety hazard for firefighters and civilians, the hazard trees are everywhere we operate carrying out our mission. Educating and training our personnel on "Hazard Tree" awareness as well as the appropriate actions for identification and mitigation of safety concerns while working, training, and responding to ALL AREAS IS CRITICAL. Operating in a known tree mortality area brings awareness to responders, we need to ensure we are taking precautions in ALL areas.

- Personnel should identify the "Hazard Tree" or "Tree Mortality" locations in their local response areas, fire line assignments and the locations of active fuel reduction projects that they could possibly encounter.
- Recognize when responding to identified "Tree Mortality" areas and provide safety briefings to all responding resources.
- Incidents should be focused on responder safety and hazard tree considerations.
- ☐ Be prepared for extreme fire behavior and dangerous rates of spread:
 - Delay or withdraw until the fire can be engaged.
 - o Provide appropriate clearance for staged or parked vehicles.
- Recognize the potential for:
 - o Green trees falling without warning.
 - Ground fire rapidly reaching the crowns of large dead stands of trees
 - o Trees and limbs falling during air operations or windy conditions
 - With advancing decay of trees watch for bark slide, falling limbs or multiple trees falling together if they are in

contact with each other

Personnel performing work on fuel reduction projects in ALL areas, need to ensure applicable IIPP documents reflect the work being performed and are updated throughout the project's life span.

Lookout – When working around fire weakened, stressed or decaying trees

Communicate – Brief personnel when working near fire weakened or hazard tree areas

Escape Routes – May be compromised by falling trees

Safety Zones - Are identified and large enough for a "Hazard Tree" or "Tree Mortality" area

For Tree Mortality Area Responder Briefing Packets, click here

MEDICAL RESPONSE:

REMS 1 staged at Big Bar Ambulance 4 (Day) at Willow Creek

On this incident CALCORD is to be used as a local medical tactical channel if needed to communicate with non-incident resources. The command channel is the primary channel for all medical emergencies. CALCORD also may be used for A/G communications with non-incident aircraft. Resources assisting in South Zone division should continue to use regularly assigned tactical channels.

6. Control Operations/Work Assignments:

TASK: Hold existing containment lines from the AZ break to DP 30. Construct indirect line from DP 30 west along Pattison Ridge. Coordinate with Contingency Group.

PURPOSE: Minimize fire spread to the South and West while reducing impact to the infrastructure and other values at risk.

END STATE: Keep fire spread South and East of Pattison Ridge.

7. Special Instructions:

GINA TREESH, RESL

CS 204 WF (1/14)

- · Resources with (DS) after name work 24 hours, double shifts
- Contact Kent Collard Bar 717 for information concerning previous dozer lines north of his property.

\$ FINANCE MESSAGE \$

Please No Off Site Feeding Unless Approved by a Finance Section Chief.

CAL FIRE PERSONNEL

Make sure to create a paper FC-33 so we can update. If anyone has any CalCard travel receipts and meal/lodging sign in sheets, please get a copy to Finance.

LOCAL GOVERNMENT RESOURCES

Make sure you check in with TIME Unit for ABH or F-42 Paperwork.

ALL HIRED EQUIPMENT

Make sure you get your shift ticket filled out by your **<u>Division</u> <u>Group Supervisor or Supervisor.</u>**

ALL SUPERVISORS OF HIRED EQUIPMENT

Shift Tickets for hired equipment need to be signed and turned in to TIME daily. Ensure the shift ticket is filled out completely (including evaluation), accurately and legibly. **Example included in IAP.**

PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to the Comp/Claims Unit.

FINANCE MESSAGE

TIME UNIT

We are undergoing a new process to speed up Demob for Cal Fire - Hired Equipment. Financial payment documents for Cal Fire - Hired Equipment will be completed through E-Mail with DocuSign unless other arrangements have been made prior to Demob

When Demobing from the Incident, please bring the Time Unit the following information...

- EMAIL ADDRESS FOR REPRESENTATIVE WHO WILL SIGN DOCUMENTS
- NAME OF SIGNEE
- PHONE # FOR SIGNEE
- GOLDEN TICKETS

Hired Equipment Suppliers will meet with a Time Representative at Demob, who will assist with gathering all information to ensure proper payment of equipment

- *Electronic processing will allow for Faster Processing and Payment to Supplier's
- **Documents can be signed and completed with any Smart Device (Smart Phone, Tablet, Computer) and does NOT require an account with DocuSign to complete

Any Questions call 530-906-4892 or E-Mail imt5finance@gmail.com

MONUMENT NORTH FIRE Finance Process CA-SHF-001187

For resources hired out of state and have VIPR agreement scan QR code

IMPORTANT INFORMATION: If you are a Monument North Resource, i.e., you have a RO # four digits or less (E-489), and you are 'loaned' to the South Zone, please note SOUTH ZONE or Monument South Zone on your Shift Ticket / CTR.

Please send all documents to 2021.monument.finance@firenet.gov for all resources.

Email Subject Line: TIME/Resource Order No./ Resource Name/Position Code - Put

TIME, CTR, SHIFT TICKET in the subject line with your information

(Example: TIME/O-200/SBear/Safety)

Email all documents that pertain to your assignment:

| | Status |
|--------------------------------|--------------------------------|
| Incident Start Date: 7/30/2021 | Incident Start Time: 6:00 p.m. |
| Total acres: | Containment: |
| Cause: Lightning | Total Personnel: |

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy <a href="https://example.com/here/beauty-section/en-alpha-balance-section-new-media-balance-sect

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND - The Information Section will manage lost and found items for the incident.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.

TRAINING MESSAGE

TRAINERS

Remember to review the taskbooks with your trainees each day and set goals for operational periods.

TRAINEES

Always keep your taskbook secured.

If lost, you run the risk of losing credit for the tasks completed

DEMOBING

Prior to demobing please bring the following to Training:

➤ Taskbooks

If you have all your documents,

> Evaluations

it is not necessary to bring your

> ICS 225's

Trainer with you to Training

Got Questions?

Stop by the Training Trailer

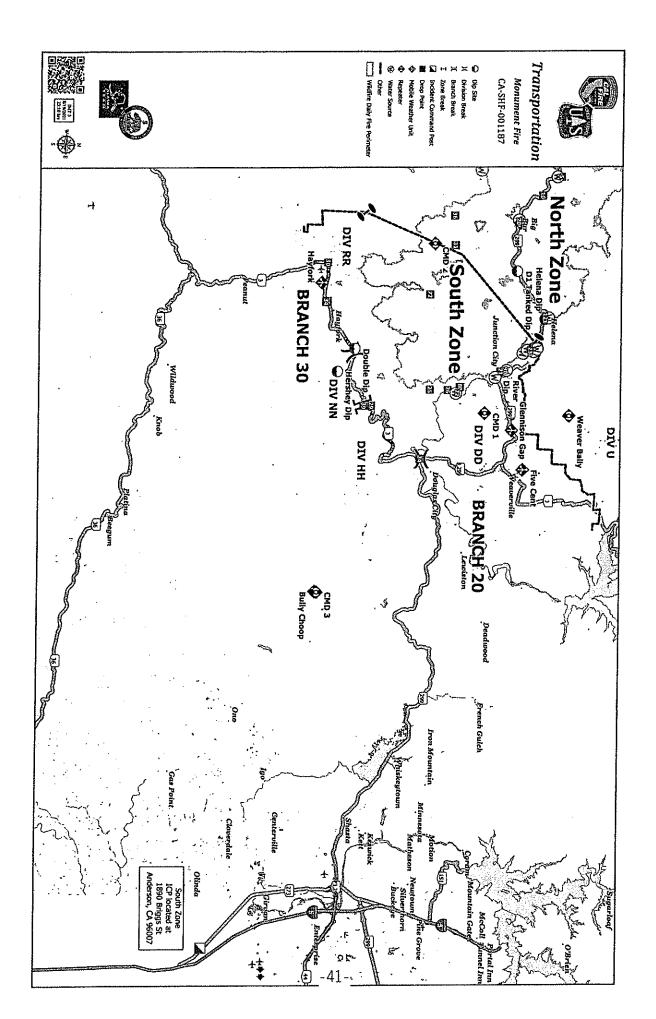

We are happy to answer all your questions.
