# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: Wildland Fire
FIRE NAME: Monument	OPERATIONAL PERIOD: 24hr 08-31-2021
DATE ISSUED: 08-30-2021	TIME ISSUED: 2100
UNIT: SHU	SIGNED:  Troy Velin - FBAN

## INPUTS

### WEATHER SUMMARY

See Incident Weather Forecast in IAP

### FIRE BEHAVIOR:

**GENERAL:** *\*Fuels and Fire Behavior Advisory issued 07-17-2021\**

Topography is steep and rugged ranging from 2000' in the valleys and 6000' on higher peaks. Slope in many instances is 100%. This terrain promotes fire growth through roll out and slope reversal. Many of the drainages align with predominant wind patterns for the region. The Trinity River corridor is a major drainage that funnels wind primarily East and West. There are major bends in the river that will create eddy's and swirling winds.

Fuels in the fire area range from timber and timber understory in higher elevations, heavy brush in mid elevations and grass oak woodland in valley bottoms. Extreme Drought this year has stressed fuels to critical fuel moistures. 1000 hr fuels recorded July 15 were 7%, LFM in brush is now at 80%. The dryness of the fuels in the area are a major contributor to the Monument Fire's growth.

Fires in this area commonly have large growth periods of 1 to 2 days usually aided by windy conditions. Following the large growth periods there are usually several days of slowed growth due to heavy smoke inversions. This has been the scenario for the Monument Fire. September is generally hot and dry during the day and we begin to see more temperate overnight conditions.

### SPECIFIC:

#### Branch 20

Smoldering fire interior of the line. Monitor for roll out.

#### Branch 30

**DIV NN** – Minimal fire behavior under smoke inversion. Monitor Little Barker Creek for fire in the bottom to move up through the drainage with normal upslope winds. Fuels are light within the drainage, but movement is still possible.

**DIV RR** – In the Little Creek drainage fire along the Sims Gap Ridge in Sections 20, 21 and 29 will back into the drainage from the west. Monitor for rollout and eventual runs back up slope to the ridge. Short high intensity runs will be possible when this happens. As firing continues down the 50 rd ridge towards Hyampom rd expect the mouth of the drainage to pickup some of the Westerly influence and you will see parallel winds with that ridge. Winds aloft will continue to be an avenue for ember to land in the green on the lee side of that ridge system.

#### South Zone Contingency

Be cautious operating equipment in critically dry fuels.

### AIR OPERATION:

Smoke is expected to be over most of the fire area today. Best chance for clearing is DIV RR

### SAFETY

The smoke inversion cleared considerably yesterday. As it did, fire behavior increased dramatically in a short space of time. Expect this to happen again today. Clearing beginning by lunch.

# Fuels and Fire Behavior Advisory

## Northern California

July 17, 2021

**Subject:** Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

**Discussion:** Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

**Difference from normal conditions:** Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify throughout the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are 4-6 weeks ahead of normal drying/curing rates.

### Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97<sup>th</sup> percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**

### Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

**Area of Concern:** Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident.

**MAIL SERVICE** – The Information Section can assist you with sending and receiving mail.
