## NIGHT OPERATIONAL PERIOD

SUNDAY JUNE 27-28, 2021

2000-0600 HOURS

<b>INCIDENT OBJECTIVES</b>	1. INCIDENT NAME: Lava	2. DATE PREPARED: 6/27/2021	3. TIME PREPARED: 1000
4. OPERATIONAL PERIOD (DATE/TIME) Night shift			
Sunday June 27, 2021 – Monday June 28, 2021			
<p>5. OBJECTIVES FOR THE INCIDENT</p> <p><u>Operational Objectives</u> Provide for public and firefighter safety as the highest priority. Keep the fire: -East of the railroad tracks -South of 42N15 -North of Angel Valley Road</p> <p><u>Management Objectives</u> Utilize a combination of direct and indirect tactics to provide for responder safety while minimizing firefighter exposure. Notify agency partners and cooperators to ensure timely communication and coordination. Effectively manage cost by implementing strategies and tactics that have a high probability of success. Emphasize operational safety through the Risk Management Process while protecting cultural and resource values and minimizing suppression impacts on the landscape. Keep public informed with current and accurate fire information.</p>			
<p>6. WEATHER FOR THE PERIOD</p> <p>Hot and dry conditions will persist through Tuesday with very low afternoon humidities and moderate recoveries at night. In addition, south winds will increase over the burn areas Monday, possibly creating Red Flag conditions. The winds will diminish Monday evening.</p>			
<p>7. GENERAL SAFETY MESSAGE</p> <p>Review your Medical Evacuation Plan. Have a plan in place before engaging in the event of a medical emergency. Stay hydrated and pace yourself during this heat wave. Please continue to follow your agency COVID-19 mitigation guidance.</p>

# HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Lava

Operational Period: June 27-28, 2021 (1800-0600)

## **Steps to take when a serious injury occurs: Serious Injury Procedures**

Dealing with serious injuries on the fire line can add even more stress to our hectic work environment. In the event a fire line accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Contact your supervisor. Depending on the complexity of the fire, that could be your Crew Boss, Division Supervisor, Incident Commander, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide accurate, concise information on the following:
  - Number of people injured.
  - Type of injuries.
  - Severity of injuries (light, moderate, severe, life threatening).
  - Mechanism of injury.
  - Vital signs (pulse, respiration, level of consciousness, etc.).
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic. Provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, ensure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
