Very low humidity will occur with single digit readings. Local light downslope (northerly) winds in the morning will become upslope in the afternoon. A general south wind will develop during the afternoon bringing breezy to gusty conditions, especially along the I-5/Sacramento River drainage. No relief at night with mild overnight lows and poor humidity recovery.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 8	TYPE OF FIRE: Wildfire
FIRE NAME: SALT	OPERATIONAL PERIOD: July 10, 2021 24hr
DATE ISSUED: 7/9/21	TIME ISSUED: 2000
UNIT: CA-SHF	SIGNED:  (T)

INPUTS

WEATHER SUMMARY: Continued Hot and Dry

Temps: Day 98-112 Night 70-80

RH: Day 7-15% Night 25-35%

Winds: Day Ridges SW 5-10 gusts to 15mph Night Variable up to 5mph Nighttime transport winds N to 4mph after 2400.

OUTPUTS

FIRE BEHAVIOR

GENERAL: No forward progression expected. Expect mainly smoldering and creeping with some interior pockets burning out actively both day and night. Fire whirls are probable at intersecting drainages and when the winds transition from upslope to down slope. Make sure lookouts have a good view of the fire.

With the dry fuels, keep an eye out for torching trees near the lines for potential sources of spotting.

1000hr fuels are at 4%FM and are receptive to spots.

Probability of Ignition will be 90-100%

SPECIFIC:

Branch I: No forward fire progression, expected on the Branch. If fire, becomes established over the line, expect rapid rates of spread in grass fuels aligned with slope. The heavy dead and down pockets of fuels will hold heat for long periods and produce intense heat. Expect creeping and occasional flare-ups at the DIV A/M break.

Branch V: No forward fire progression is expected. Mop-up will be extensive in areas where heavy fuels continue to burn out. Snags will continue to be a safety hazard.

IA: Any starts along the I-5 corridor will exhibit problematic fire behavior. This means rapid rates of spread, torching and spotting. Fixed wing aircraft may not be effective in areas with a tight timber canopy.

AIR OPERATIONS: Minimal impacts from smoke over the whole fire.

SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Burning Snags have come down across the 34N17 road in multiple places expect this to continue.
- There is a strong potential for reburn as there is continuous brush fields where the canopy is intact with heavier fuels burning under it.

SAFETY MESSAGE

SITUATIONAL AWARENESS:

Look at your area with a fresh set of eyes. Be mindful about what you are doing and Why you are doing it. Don't allow yourself to become complacent because the fire has not been active in your area. Whether it is vehicle or equipment use, mop-up or rehab; ask yourself "Are my actions achieving the Incident Objectives?" If not re-evaluate your plan. Remember that the #1 priority is the safety of firefighters and the public. Keep an eye on other personnel; it is **EVERYONE'S** responsibility to stop an unsafe act.

---	---	---

Be sure all elements of your safety plan are in place prior to engagement

MY SAFETY

An important aspect of risk management is an individual's responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety.

- Remain fit for duty.
 - Utilize personal protective equipment.
 - Follow safe work practices.
 - Ensure instructions are clearly understood.
 - Maintain situational awareness at all times.
- Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

Night Operations Hazards

Your ability to maintain your situational awareness at night is compromised by your inability to see hazards and other visual indicators in your work area.

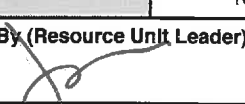

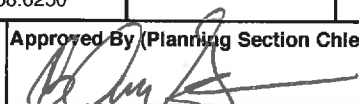

Other challenges faced during night operations:

- Ability to maintain your orientation
- Difficulty seeing hazards beyond your headlamp
- Difficulty estimating distances
- Inability to use landmarks as reference
- Blowing smoke can increase visual difficulties
- Logistical support is limited

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Human Resource Message

Check your Temperature Gauge

Unless you live in Death Valley or the Sahara Desert, you're not used to this sweltering heat. For a lot of people, when the temperature gets this unbearable, we start to lose patience and get a little short with people.

During those times when our internal temperature starts reaching its boiling point and we begin to get irritated, let's recognize where we're at and take a 15-minute (or longer) cooldown, before we do something that might have unintentional consequences.
