SAFETY MESSAGE

REDUCING RISK WHILE DRIVING

- Keep your seat belts on, Keep your eyes on the road, Keep your speed down.
- Drive defensively, anticipate traffic where you have poor sight lines.
- Expect to see locals and non-fire traffic on the roads traveling fast.
- In inclement weather, reduce speeds, check road systems for traction and braking with a small vehicle before allowing engines, water tenders, and heavier vehicles to proceed, especially on uphill and downhill sections of non-paved roads.
- Use headlights and warning lights when in poor visibility conditions.
- Watch for debris and road hazards where rolling material impacts roads.

ASK IF YOU DON'T KNOW!

MAJOR HAZARDS

<p>COMPLACENCY LONG DRIVE TIMES WILDLIFE</p>	<p>FIRE WEAKEND TREES POSION OAK FATIGUE</p>	<p>HEAVY EQUIPMENT RAIN AND ROAD CONDITIONS</p>
---	---	--

Be sure all elements of your safety plan are in place prior to engagement

Engagement following Rain

- Drive with caution watching for material that may have rolled onto the road surface.
- Prior to leaving the pavement, send in a scout to check roads for debris, traction, and braking conditions.
- Stage heavy equipment, engines, and crew hauls until safe passage is possible.
 - Watch for loose and rolling material while working on slopes.
- Keep risk commensurate with benefit, waiting another day until conditions improve may be best.

Fatigue = Lowered Situational Awareness

- PPE: Recognize that in low stress situations like mop up and repair, it is easy to over-look the importance of wearing appropriate PPE, including eye protection.
- Work Area: Familiarity with your work area can result in lowering awareness, especially as conditions change.
- Fatigue: Cumulative Fatigue is a condition that sneaks up on us. Ensure 2:1 work rest ratio, and proper nutrition and hydration.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Watch for rocks and wildlife on Highway 96. Especially from dusk to dawn. • Narrow, steep, unforgiving native surfaced roads within the fire area. • Drive defensively! Expect the unexpected around every curve. • Observe posted speed limits. Always use headlights. • Plan for slippery and muddy roads. Look out for new wash out areas or debris on roadways. Have trigger points set up for when precipitation starts for disengagement, moving to hard surfaced roads. Scout roads before accessing with larger vehicles.
ALL	WEATHER	<ul style="list-style-type: none"> • Dress in multiple layers. • Even though experiencing cold temperatures, ensure hydration. • Winds will enhance wind chill factor effecting resources in camp and on the fire. • Higher winds and rain predicted for the majority of the upcoming week. Have an extended plan to engage in operations.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Repeated assignments in the same area can lead to complacency. • A feeling of being satisfied with your safety may be a sign of complacency.
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Evaluate risk vs gain in operations. • Be especially alert around snags during wind events or changing wind direction. Establish trigger points. • Follow Hazard Tree Safety Guidelines (IRPG p. 22). • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Use all required PPE. Minimize exposure to personnel.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, rattlesnakes, bees, and plants. • Watch footing and hand placement around rocks. • Personal hygiene is #1 when it comes to Poison Oak Prevention.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> • Always be thinking "How are you going to move this patient to care". • Incorporate transportation times into your "tactical operational plan". • Don't rely on aircraft.
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> • Evaluate necessity to send personnel in areas with limited access. • Concentrate on your footing placement, take your time. • Ensure adequate spacing between crewmembers so they can react to dislodged debris. • Post lookouts to warn of rolling debris. SHOUT out to warn others.
ALL	CHIPPING OPERATIONS	<ul style="list-style-type: none"> • Ensure JHA is provided and signed by operator. • Only qualified personnel will feed chipper. Wear proper PPE.
ALL	MOP UP	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Use all required PPE, including eye protection. • Maintain proper spacing and overhead clearance. • Be alert for stump holes and root cavities. Watch for ash pits.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> • Utilize appropriate PPE and other equipment safety mechanisms. • Maintain safe working distances. Utilize observer or spotters. • Ensure the use of effective communication (radio, hand signals).
ALL	NON-FIRE PERSONNEL IN AREA	<ul style="list-style-type: none"> • Area known for high use of hunters and anglers. • Educate and advise public of fire area closure. • Use chain of command to request Law Enforcement if needed.
ALL	ATV/UTV USE	<ul style="list-style-type: none"> • Ensure equipment is inspected and safe to use. • Ensure operator is trained and certified to operate. • Ensure operator has proper PPE according to the Redbook/RMA.
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> • Maintain 6' foot distance whenever possible. Wear masks when appropriate. • Do frequent handwashing/sanitizing and disinfecting common surfaces. • Notify MEDL if any symptoms arise.

USDA Forest Service

All resources/personnel assigned (Federal, State, Local, Cooperator and Contract) to fires on the Six Rivers or Klamath National Forests are required to be tested for COVID-19 prior to check-in (both incoming and crew swaps) and prior to completing the Demob process.

Testing can be obtained at ICP at:

**Wilderness Medics Medical Trailer at
the Happy Camp ICP**

0630 - 2230 every day (but hours are flexible!)

Process:

- Proceed to testing location to have rapid Binax test done
 - Stage for 15 minutes for the results.
 - If the results are positive, a PCR test will be done.
 - Stage another 30 minutes.
- If these results are also positive further direction will be provided on isolation requirements.

For incoming resources or crew swaps, testing may be done en-route/at your convenience as long as the results are no longer than 72 hours old.

A core value of the Forest Service is safety. This testing availability is an additional step in safeguarding human life and protecting our most valuable resources. Our Code and Commitments include being trusted to "do right" by each other and the communities we serve.

Resource Advisor Message

Resource Advisors are Available in All Divisions

Our goal is to support the mission of repairing suppression activity impacts while minimizing resource damage to the extent practical. Communicate early and often with REAFs and Heritage Consultants in the field for cultural and natural resource concerns. Coordinate proposed plans with the Lead READ and Karuk Tribal Representative as soon as possible.

Cultural and Heritage Resources

Working closely with cultural specialists from the Karuk Tribe and local archaeologists is the best way to minimize impacts to cultural sites and to foster a good working relationship on and off the fire. The area in which the fire has burned is culturally and naturally significant, so please coordinate with REAFs and Heritage Consultants prior to initiating repairs.

Snags can have cultural significance, please limit falling ops to what is required for safety.

REAFs are using **red/white striped flagging for resource concerns**; ARCHs and Heritage Consultants are using **yellow/white striped flagging for cultural concerns**.

Wildlife Resources

Please be mindful of diminishing water levels at drafting sites. Likewise, utilize fish screens and the appropriate decontamination procedures for drafting. Wildlife often make use of large snags, please limit falling ops to what is required for safety. Please take responsibility for your trash and food while out on the fire line, and **DO NOT feed the bears!**

Do not disturb cultural resources

Invasive Weeds

Clean fire equipment at designated areas prior to arriving and leaving the incident. A weed wash station is set up at ICP. Clean the undercarriage, fender well, tires, radiator, and exterior of the vehicle. Inspect line gear, boots, and clothing and remove any seeds you find and dispose of in trash.

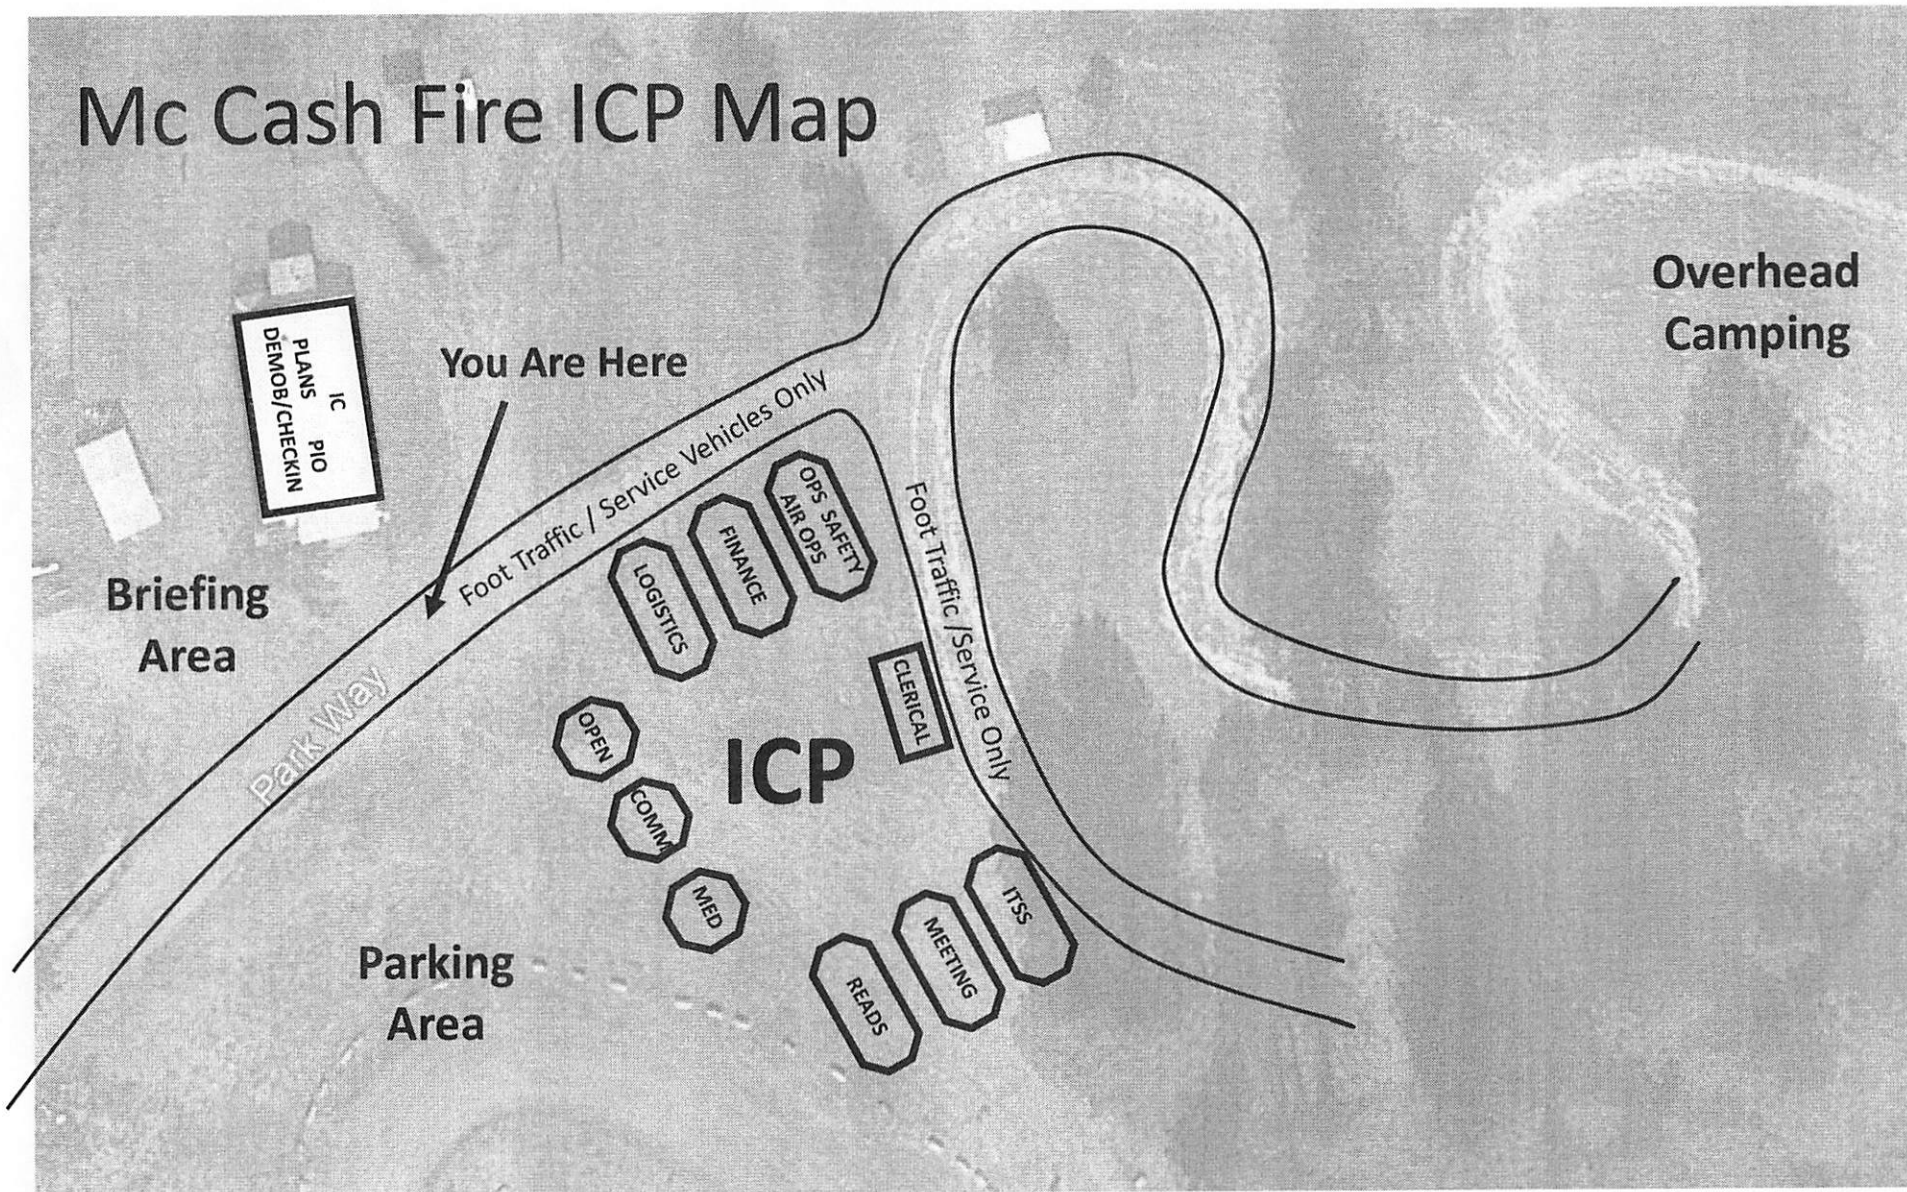

McCASH SUPPRESSION REPAIR FACT SHEET

See McCash Suppression Repair Plan for more detail on specific sites, repair requirements & specifications and Stage 2 repairs.

- **Heritage Sites** – No work will begin at known heritage resource sites prior to consultation with an archaeologist and the Karuk Tribal Representative.
- **Piles** – Pile slash for future burning, with piles constructed so that they consume. Cover piles with 5 mil plastic or two layers of waxed paper.
- **Dozer Lines** – All fire lines should have water bars and/or rolling dips if erosion is possible.
- **Hand Lines** – Trenched hand lines should be pulled back to the natural contour of the slope to reduce erosion.
- **Drop Points, Staging Areas, Safety Zones, Helispots** – Spread out berms, pile slash, pick up any trash.
- **Roads** – All roads used by fire personnel will be returned to their pre-existing condition. Grade roads, remove berms, clean & repair ditches and culverts, and chip slash so that drainage isn't impacted.
- **Water Sources** – Remove any dams or dikes, restore the natural contours of stream banks, clean any debris from culvert inlets at drafting sites, and clean or remove any soils impacted by fuel spills.
