Fire Weather Forecast

WEDNESDAY AUG 3, 2022

FORECAST NO: 2
 PREDICTION FOR: Wednesday/Aug 3, 2022
 ISSUED: 2000, Aug 2, 2022

NAME OF FIRE: McKINNEY/YETI COMPLEX
 UNIT: Klamath N.F.
 Incident Meteorologist: Tom Wright

*** THUNDERSTORMS STILL POSSIBLE. WARMER AND DRIER WITH GUSTY WEST WINDS ***

DISCUSSION: The upper level system that brought all the high humidity and thunderstorm activity will drift away from the fires today, and this will result in warmer and drier conditions. However, there will be enough moisture and instability left that an afternoon thunderstorm cannot be ruled out. It will also be a little breezier today than we've seen lately with west winds gusting up to 18 mph during the afternoon. Much hotter and drier weather is expected for the rest of the week into next weekend.

WEDNESDAY: AFTERNOON THUNDERSTORMS POSSIBLE.

- **WEATHER:** Partly sunny with a slight chance of showers and thunderstorms in the afternoon.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then variable 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: East 3-6 mph through 1200 then west 6-12 mph with gusts to 18 mph. Gusty erratic outflow winds to 30 mph possible near any thunderstorms.
- **CHANCE OF WETTING RAIN:** 10%.
- **RAIN AMOUNTS:** 0.10-0.25" in storm cores.
- **MAX TEMPERATURES:** 90-95 bottom and clear areas, 80-85 top and smoked in areas.
- **MIN RH:** 15-20% bottom and clear areas, 20-30% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion mixes out by 1400. Stronger inversion in heavy smoke unlikely to mix out.

WEDNESDAY NIGHT: POORER RECOVERIES.

- **WEATHER:** Mostly clear.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: West 5-10 mph through 2200 then variable 2-5 mph.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MIN TEMPERATURES:** 55-60 bottom, 60-65 top.
- **MAX RH:** 30-40%, 45-50% bottom.
- **INVERSION:** Moderate developing near mid-slope. Secondary inversion at 5,000 feet.

THURSDAY: HOTTER AND DRIER. BREEZY WEST WINDS AFTER NOON.

- **WEATHER:** Mostly sunny. Hotter and drier.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then variable 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: East 3-6 mph through 1200 then west-northwest 6-12 mph with gusts to 18 mph.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MAX TEMPERATURES:** 93-98 bottom and clear areas, 82-87 top and smoked in areas.
- **MIN RH:** 13-18% bottom and clear areas, 18-23% top, 23-30% smoked in areas.
- **INVERSION:** Moderate mid-slope inversion and secondary inversion mixes out by 1500. Smoke inversion unlikely to mix out in smoked in areas.

Extended outlook: Friday through Sunday: Mostly sunny, hot, dry, and breezy. Highs 95-105. Minimum humidity: 10-20%. Diurnal winds west-northwest 5-15 mph with gusts to 20 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL: With the warmer and drier conditions, expect the fire to become more active. The fire continues to be in backing and flanking alignment. As the smoke inversion lifts out and you start to see majority blue skies expect an increase in fire intensity. Expect active backing and flanking movement. Short duration intense head fire runs are possible as the main fire backs into drainage bottoms and aligns with slopes. Fire whirls are probable at intersecting drainages and when the winds transition from upslope to down slope. Make sure lookouts have a good view of the fire, especially since the smoke will limit visibility.

At night, expect the fire to remain active until about 0300 to 0400hrs.

With the dry fuels spotting will be problematic and should be short range (100-300ft) and from rollout.

1000hr fuels are at 6-8%FM and are receptive to spots

Probability of Ignition will be 80-90%

Expect single and group tree torching and sustained short duration crown runs where slope and winds align.

SPECIFIC:

Branch I: Expect mainly active backing and flanking fire. As the fire progresses east, road systems will help check fire spread. Rollout will challenge containment lines. There are multiple green islands near the line if they begin to actively burn expect spot fires over established lines.

Branch IV: The fire will continue to actively back to the south. Watch for slope reversals as the fire reaches drainage bottoms. As the wind transitions at night, the potential for head fire runs will increase. Areas around Baldy Gap did not burn clean, expect islands near the line to burn out and the potential for reburn either of which will challenge existing lines.

Branch X: Main fire progression will be towards Scott Bar and down the Hwy 96 corridor. Rollout will continue to be problematic and challenge any established lines. If skies clear and a plume develops, spotting distances will increase, and the river and highway will be compromised. Little to no rain on the branch clouds and smoke will continue to moderate fire behavior.

For all branches, if thunderstorms do develop expect strong out flow winds and erratic fire spread.

AIR OPERATIONS: Smoke will limit air operations unless or until the inversion mixes out.

SAFETY

Make sure Lookouts are posted in places where they can identify potential spotting.

Don't, become complacent with the recent moisture. Fuels, are critically dry and will respond rapidly to direct sunlight.

Operation Period: 8/3 to 8/4 Shift: 0700-0700

Emphasis on Communications

Communication Responsibilities

- **Briefings – All resources require briefings, use the briefing checklist in the IRPG**
- **Debrief Actions – Conduct AAR’s to identify lessons learned**
- **Communicate Hazards to others**
- **Acknowledge Messages**
- **Ask if you do not know – Ask questions in unfamiliar situations**

MAJOR HAZARDS AND RISKS

STEEP TERRAIN COMMUNICATIONS SPOT FIRES	DEHYDRATION DRIVING HAZARD TREES	HEAVY EQUIPMENT POISON OAK ROLLING MATERIAL
---	--	---

Be sure all elements of your safety plan are in place prior to engagement

Driving & Fatigue

- Make sure you are getting your rest when you can! Stick to work/rest guidelines.
- Fatigue can cause us to mentally stray from the driving task.
- It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble.
- Make sure you recognize when you are too tired to drive!
- Don't tough it out and put yourself and your passengers at risk!
- Slow down, take breaks, and talk to your passengers. If possible, keep an alert passenger in the front seat next to you. Know your limits.

THUNDERSTORM SAFETY

Follow the 30/30 rule: If you see lightning and hear thunderclaps follow in less than 30 seconds, take storm precautions.

1. Take shelter in vehicle or building if possible.
2. If outdoors, find low spot away from tall trees, wire fences, and utility lines.
3. If in open country, crouch low, with feet together, minimizing contact with the ground.
4. Don't group together.
5. Stay away from ridgetops, wide open areas, or near ledges or rock outcroppings.
6. Follow the thunderstorm safety guidelines on page 17 of the IRPG.

COVID-19 PREVENTION INFORMATION

MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available at the **Montague Elementary School location** (430 E. Prather St.) from **Adventure Medics, hours -0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals but testing is also available to anyone with COVID exposure concerns.

Federal employees enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees when the Community Levels are Medium or High.**

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

COVID-19 COMMUNITY LEVEL	MASKING DIRECTION (Federal Wildfire Incidents and within Federal Facilities)
HIGH	Individuals are required to wear masks around others while indoors, while sharing a vehicle, or when social distancing cannot be maintained.
MEDIUM and LOW	Individuals are not required to wear masks.

Community Levels are updated weekly by CDC and give direction for a Sun-Sat operation period.
