| OPERATIONAL PERIOD (DATE/TI 8/07-08/2022, 0700-0700 | ME) | | | | | | | |
| 5. GENERAL CONTROL OBJECTIVES | | | | | | | | |
| Strategic Framework | | | | | | | | |
| Implement a full suppression strategy on the McKinney Fire. Values at risk include human safety, private timberlands, communities, critical infrastructure and associated improvements. Apply tactics that offer the highest probability of success. <u>Leaders Intent</u> | | | | | | | | |
| Provide the highest level of customer service to all involved with or impacted by the McKinney Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding: | | | | | | | | |
| Personal safety and the safety of others, including driving slowly and defensively. Manage fatigue by taking breaks and maintaining work/rest cycles. Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines. Professional behavior, conduct, and timely/effective communication. | | | | | | | | |
| Management Objectives | | | | | | | | |
| Provide for firefighter and public safety through hazard recognition and application of the risk management process. Coordinate all public information with CAL FIRE and CIIMT 10 to provide timely and continuous information to affected agency partners, cooperators, and to the public. Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources. Provide initial attack capability for the Klamath National Forest on the Oak Knoll and Scott River Ranger Districts. | | | | | | | | |
| | Co | ntrol Objectives | | | | | | |
| To limit fire growth and to prevent the fire fro | m spreading to | private property, sur | rounding communities an | d values at ris | k. | | | |

Fire Weather Forecast

Sunday AUG 7, 2022

FORECAST NO: PREDICTION FOR: ISSUED:

6 Sunday/Aug 7, 2022 2000, Aug 6, 2022 NAME OF FIRE:

Incident Meteorologist:

UNIT:

McKINNEY/ALEX/YETI

Klamath N.F. Tom Wright

*** RED FLAG WARNING IN EFFECT THROUGH MONDAY FOR RH AND WIND ***

DISCUSSION: A very unstable environment will be in place today, along with hotter and drier conditions. Afternoon south to southwest winds gusting up to 20 mph. These weather conditions may promote plume dominated fire should other factors align.

SUNDAY: RED FLAG WARNING IN EFFECT FOR RH AND WIND

- WEATHER: Mostly sunny. Hotter, drier, very unstable, and breezy afternoon winds.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-7 mph.
 Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then south-southwest 5-10 mph with gusts to 25 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MAX TEMPERATURES: 97-107 bottom and clear areas, 87-97 top and smoked in areas.
- MIN RH: 8-13% bottom and clear areas, 15-20% top and smoked in areas.
- INVERSION: Moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1500. Smoke inversion
 unlikely to mix out in smoked in areas.

SUNDAY NIGHT:

- WEATHER: Dry and mostly clear.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: south
 to southeast 4-9 mph through 2200 then south to southeast 2-4 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MIN TEMPERATURES: 56-61 bottom, 61-65 top.
- MAX RH: 30-40% top, 45-55% bottom.
- INVERSION: Weak developing near mid-slope.

MONDAY: RED FLAG WARNING IN EFFECT FOR RH AND WIND

- WEATHER: Mostly sunny. Hot, dry, very unstable, and breezy afternoon winds.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-7 mph.
 Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then south-southwest 6-10 mph with gusts to 30 mph.
- CHANCE OF WETTING RAIN: 10%.
- RAIN AMOUNTS:0.10-0.25"
- MAX TEMPERATURES: 95-105 bottom and clear areas, 85-95 top and smoked in areas.
- MIN RH: 8-13% bottom and clear areas, 15-20% top and smoked in areas.
- INVERSION: Weak mid-slope inversion mixes out by 1500. Smoke inversion may mix out in smoked in areas due to gusty
 afternoon winds.

Extended outlook: Tuesday: Mostly sunny, hot, dry and breezy, slight chance thunderstorm. Highs 85-102. Minimum humidity: 14-24%. Winds south-southwest 5-15 mph with gusts to 30 mph. Wednesday through Friday: Hot, slight chance thunderstorms. Breezy. Highs 82-102. Minimum humidity: 14-24%. Winds west-northwest to north-northwest 5-10 mph with gusts to 15 mph.

FORECAST NUMBER: 7 FORECAST NUMBER: 7 FIRE NAME: McKinney Fire DATE ISSUED: 8/6/22 UNIT: CA-KNF FIRE BEHAVIOR FORECAST TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: August 7, 2022 24hr TIME ISSUED: 2000 SIGNED: ___John W. Kern______

INPUTS

WEATHER SUMMARY: Hotter and Dry, with increased winds in afternoon

Temps: Day Valley 97-107; Day Ridges 87-97
RH: Day Valley 8-13% Day Ridges 15-20%
Winds: Day Ridges SSW 5-10 Gusts to 25 mph
Night Valley 56-61; Night Ridges 61-65
Night Valley 45-55%; Night Ridges 30-40%
Night Ridges S-SE 4-9 becoming S to SE 2-4 mph

LAL 2

OUTPUTS

FIRE BEHAVIOR

GENERAL: RED FLAG WARNING - TODAY - for strong winds and low RH.

Conditions are warmer and drier today with more wind: Expect another day of active fire. With southerly winds most of the south side divisions will see pushes towards the black. Divisions along the east and west and north sides will need to be very aware of these stronger winds, and drier conditions. Div. Q will need to monitor closely their north side especially. Areas of north/south drainages will funnel winds. South facing slopes will have strong up slope winds. Short duration intense head fire runs are very possible. Fire whirls are probable at intersecting drainages and when the winds transition from upslope to downslope. Make sure lookouts have a good view of the fire, especially since the smoke may limit visibility early in the day.

With these dry fuels, spotting will be problematic and should be short range (100-300ft) for the most part and from rollout. Spots from several torching trees on a ridgetop can spot 0.4 miles. The Probability of Ignition is 90%

Expect single and group tree torching and sustained short duration crown runs where slope and winds align.

At night, expect the fire to remain active until about 0300 to 0400 hrs with fair to poor RH recovery.

SPECIFIC:

Branch I: Portions of Tango still have heat, and present and opportunity for fire to move uncontrolled. Rollout will challenge containment lines. There are multiple green islands near the line, if they begin to actively burn expect spot fires over established lines. Much of the branch did not burn cleanly so there is a possibility of reburn where shrubs were scorched but not consumed along the fire's edge.

Branch V: Minimal to moderate forward fire progression is expected (8-20 ch/hr with 3-6 feet of flame length in timber litter with understory in backing fire). Watch for slope reversals as the fire reaches drainage bottoms. At night winds may switch from upslope to downslope and change fire intensity. Expect islands near the line to burn out and there is a potential for reburn; either of which will challenge existing lines.

Branch X: Main fire progression will be towards Scott Bar and down the Hwy 96 corridor. Rollout will continue to be problematic and challenge any established lines. Skies will likely be clear and if a plume develops, spotting distances will increase, and the river and highway may be challenged. There are many areas on this Branch with north/south running drainages where south winds may be funneled. Head fires could see (8-40 ch/hr with 5-15 feet of flame length in timber litter with understory and in shrub fuels).

Branch XX: Expect any escapes to push to the NE. North of the river there is a combination of grass fuels and heavy dead and down component from the 2014 Beaver Fire that will make the fire more resistant to control. Watch for various slope and wind alignment on the Div P and the Smokey Fire (Div Q).

IA: With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with the potential for crown runs where dense canopies are present.

AIR OPERATIONS: Smoke will limit air operations or until the inversion mixes out about 1500.

SAFETY

Be sure to brief all personnel of the Red Flag Warning and what that means. Have Lookouts posted in places where they can see fuels and fire below crews, even in smoky conditions.

McKinney Fire - Safety Message

INCIDENT: McKinney Fire DATE: 08-07-08-22 TIME: **0700 – 0700**

Leader's Intent

Leader's intent is a clear, concise statement about what your firefighters must do to succeed in their assignment. It delineates three essential components:

- Task: What is the objective or goal of the assignment?
- Purpose: Why does the assignment need to be carried out?
- End State: How the situation should look when the assignment is successfully completed?

When firefighters understand the leader's intent, they can adapt plans and exercise initiative to accomplish the objective as the situation on the fire ground changes. Be sure and communicate leader's intent in all of your briefings, and instructions.

Fatigue/Smoke Effects

- · Be alert for signs of fatigue and take breaks as necessary.
- Maintain 2:1 work/rest ratio.
- Monitor incoming resources for level of fatigue.
- · Allow for extended rest periods if needed.
- Avoid working in heavy inversions for prolonged periods if possible. Take occasional breaks in clear air to mitigate build up of CO, and CO2.
- "Over hydrate" to assist in flushing smoke particulates from your system.

Driving

- When driving keep speed at or below the posted speed limit and your headlights on.
- Stay as far to the right of the road as is safely possible.
- During shift change keep your speed at or below the posted speed limit.
- Watch for and anticipate civilian traffic.
- Always fasten your seat belt before the vehicle is set into motion.
- Don't tail gate.
- Slow down, slow down, and slow down.

Understand your mission, ask questions!

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

INCIDENT RISK ANALYSIS (ICS 215a)

| DIV | HAZARDOUS ACTIONS / COI | |
|-------|--|--|
| ALL | FIRE WEATHER/FIRE BEHAV | 100-HOUR FUELS BELOW 4% ERC'S 97 th PERCENTILE RED FLAG WARNING IN AFFECT FOR ABUNDANT LIGHTNING WITH DRY RECEPTIVE FUEL BEDS. Monitor current weather conditions and forecasts. Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. |
| ALL | DRIVING HAZARDS | WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. |
| ALL | POINT PROTECTION | Ensure LCES is in place Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone Set trigger points to disengage and allow adequate time to relocate. Look for propane tanks and other hazardous materials |
| ALL | EXTREMELY STEEP TERRAI ROLLING MATERIAL | Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around Frequently. |
| ALL | HAZARD TREES | Follow Hazard Tree Safety Guidelines (IRPG p. 22). Be especially alert around snags during wind events or changing wir direction. Check for hazard trees & "widow-makers" in sleeping areas. |
| ALL | SAFETY ZONES | Follow safety zone guidelines (IRPG p. 6) Carefully evaluate burned areas before designation as safety zones to spotty burning in numerous areas. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner. |
| ALL | NIGHT OPERATIONS | Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered area Increase SA by trying to see the work areas during daylight hours |
| ALL | INFECTIOUS DISEASE | Maintain 6' foot distance whenever possible. Wear masks when appropriate. Do frequent handwashing/sanitizing and disinfecting common surface. Notify MEDL if any symptoms arise. |
| ALL | HEAVY EQUIPMENT/DOZERS | Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotter. Avoid moving parts Ensure the use of effective communication (radio, hand signals). Identify hazards. |
| ALL | INDIRECT LINE CONSTRUCT | |
| ALL | LIGHT FLASHY FUELS/ SPOT | |
| ALL | HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATION | Drink 2: 1 water to sports drinks. |

Keep fire from moving west by using direct and indirect line with tactical firing operations to protect structures and industrial timberlands in Mill Creek. Continue structure protection in Mill Creek. Complete and secure dozer line from Upper Columbine to Mill Creek RD. Secure all direct lines. Continue contingency dozer line from Baldy Lookout to the West. Initiate tactical firing as needed to contain fire to indirect lines.

7. Special Instructions:

SOF2 Rob Hickok, SOF2 Damon McRae (928-651-4480), SOFR Troy Maguire, and SOFR(t) Matthew Hutchinson will be covering all divisions in Branch X.

REMS 2 will be covering all divisions in Branch X.

READs will check in and out with DIVS.

Keep fire from moving west by using direct and indirect line with tactical firing operations to protect structures and industrial timberlands. Hold, secure, and mop up indirect dozer line in Lime Gulch.

Develop contingency structure plan for structures west of DP40. Initiate tactical firing as needed to contain fire to indirect lines.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Communications/Dispatch:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
 - Communication contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (Medical Emergencies Only).

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI).
- Division Supervisor to contact Communications/dispatch:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
 - Communications contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (For medical related incidents only).

IN-CAMP – 24 HOUR MEDICAL

- Contact 911 and Medical Unit (747) 444-8149 with:
 - Patient Complaint, Condition and Location

9. PREPARED BY Jake Long (MEDL-T) 10. REVIEWED BY

Safety Officer

ICS 206

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

| Gevenly C | of Emergency | Ex: Unconscious, difficulty bre | limb threatening injury or il eathing, bleeding severely, $2^{\circ} - 3^{\circ}$ | o burns more than 4 palm sizes | s, heat stroke, disonented. |
|---|---|---|---|---|---|
| 1 | AND 🗆 | /ELLOW / PRIORITY 2 Ser | rious Injury or illness. Evac to walk, 2° – 3° burns not more to | cuation may be DELAYED | if necessary. |

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available at the **Montague Elementary School location** (430 E. Prather St.) from **Adventure Medics, hours -0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals but testing is also available to anyone with COVID exposure concerns.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

McKinney Incident COVID Advisor – Robin Wall, (530) 410-1721
Prepared by COVID Advisor: Bill Sanders, (530) 721-3865

Human Resource Message

Mutual Respect

 Mutual Respect is your responsibility to treat people with dignity and respect, it is also your right to receive the same treatment.

Some things to remember while on this incident:

- Be kind and considerate to everyone on camp. Interact with all your colleagues with courtesy, politeness, and kindness. Even co-workers who don't particularly like each other can be civil and respectful, even a simple "Good morning" goes a long way.
- Lastly, lets ensure that we are treating our camp support teams, i.e., CCC's, food service, sanitation etc., with the courtesy and respect that they deserve.
 They, as well as everyone else are working tirelessly to ensure that you have the adequate support that you need so we all can accomplish our mission objectives.

• If you have any issues feel free to call/text or come by anytime between 0530 and 2200.

HRSP Location: Yreka High School Rm. 8 (HRSP Placard located outside of the room).

HRSP: Ryan Voelkl, 530-457-7276, ryan.voelkl@usda.gov.

HRSP-T: Armando Vargas, 707-980-2864, armando.vargas@usda.gov.

Training Specialist Message

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

To assure proper documentation for your assignment:

- 1. Scan the QR Code
- 2. Complete the Trainee Registration Form

This is the link to sign up -

At the end of your assignment:

1. **Trainee**: Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. **Trainer**: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

The Five-D System for Effective Fireline Waterbars

Michael J. Furniss USDA Forest Service Pacific Northwest Research Station Corvallis, Oregon

To make effective waterbars on firelines, just remember the 5-D System. The five **D**'s are: **Distance**, **Diagonal**, **Divert**, **Discharge**, and **Dissipate**.

Most forest values depend on healthy soils; clean water, streams full of fish, diverse wildlife habitats, productive timberlands, beautiful places, and so on. Firefighters strive to protect our soils by suppressing the wildfires that can damage them.

Methods used to fight fires, especially firelines, can cause erosion and soil degradation, and need to be treated to properly maintain forest values. Fireline surfaces usually cause runoff during heavy rainfall and snowmelt. Without waterbars, excessive runoff will concentrate and cause rills and gullies to form. Effective waterbars can prevent this from happening.

Distance: To be effective, waterbars must break up drainage areas and runoff on the fireline so that there's not enough erosive energy available in runoff to erode the soil. To ensure that excess runoff cannot accumulate, waterbars must be placed the proper distance apart, based on the slope of the fireline. This breaks up the area that accumulates runoff, keeping it small enough to prevent damage. Erosion potential depends on slope and a table is provided on the next page that gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: After deciding where you will put each waterbar, the next decision is how to build them. An important principle in working with flowing water is: don't bully the flow, lead it. Waterbars built directly across a fireline oppose the water's energy and tend to fail. Waterbars built diagonal to the fireline lead the water off and work much better. A diagonal waterbar has a gentle slope along its base that leads the water off. A simple rule is to add 5 to the slope of the road, in percent, and build the waterbar at that many degrees from perpendicular. Or simpler yet, just build them at 30 degrees off perpendicular (see the illustration on the next page).

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be sufficiently deep to handle all the flow for as long as it's needed. Excavation is much more effective than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

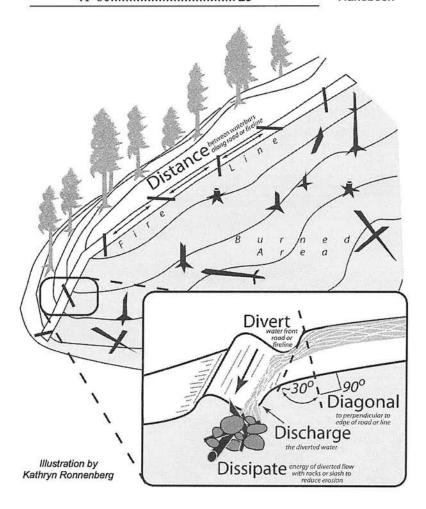

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam – it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet, or fudging a bit on distance to take advantage of natural features that will dissipate the water's erosive energy.

So remember, when locating and building waterbars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable.

| Fireline slope | Maximum Distance Apart |
|----------------|------------------------|
| % | (feet) |
| 1-6 | 300 |
| 7-9 | 200 |
| 10-14 | 150 |
| 15-20 | 90 |
| 21-40 | 50 |
| 41-60 | 25 |

Recommended spacing for waterbars on firelines.
Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook"

RE: McKINNEY Incident Fire Suppression Repair

Fire Suppression Repair with the State Direct Protection Area will occur on dozer lines, handlines roads, and other areas utilized by fire suppression resources. The purpose of the repair is to mitigate possible adverse effects to resources resulting from fire suppression activities.

Dozerlines

Approximately 75% of the fire perimeter and contingency line is dozerline. Dozerline constructed on this incident varies between single blade width to five blade widths (approximately 12-50 feet). The following measures shall be implemented for constructed dozerline:

- 1) Berms and push-piles shall be spread to the extent feasible. This is generally accomplished by back-blading with a tractor or with an excavator. Debris piled against standing timber shall be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots/staging areas and safety zones, remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water if necessary.
- 2) Waterbreaks shall be installed at a spacing which corresponds to a moderate erosion hazard rating in the California Forest Practice Rules. Maximum spacing shall be as follows:

| Line Gradient | Maximum Waterbreak Spacing |
|---------------|----------------------------|
| 0-10% | 200 Feet |
| 11-25% | 150 Feet |
| 26-50% | 100 Feet |
| >50% | 75 Feet |

NOTE: The preceding waterbreak spacing information is a general guide for maximum spacing, actual location of waterbreaks should be tailored to the topography and placement should be suited to the best dispersal of water flow.

3) Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 10 inches from the bottom of the cut to the top of the berm. Where possible

CONSERVATION IS WISE-KEEP CALIFORNIA GREEN AND GOLDEN

DI EASE DEMEMBED TO COMPEDIE EMPROY FOR THE AND IMPORTATION UNIFFER BY VOLD BOWERS AT MUNICIPACE

the discharge from the waterbreaks shall be directed into vegetated areas to minimize erosive forces.

Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with handtools.

Where dozerline has crossed watercourses, the channel of the watercourse will be cleared of soil and debris to re-establish the watercourse channel.

Hand Constructed Fireline

- 1) Hand constructed fireline shall have water breaks installed with hand tools. The waterbreaks shall be approximately 10 inches in depth from the bottom of the cut area to the top of the berm. Waterbreaks shall be angled at least 45 degrees to the fireline. The interval between waterbreaks shall be approximately 50 feet with closer spacing as needed on steep pitches. No waterbreaks shall be required where the fireline traverses a side hill, however if the line is cup trenched the berm shall be breeched periodically to prevent channelization of runoff.
- 2) Where hand constructed fireline crosses a watercourse, any soil material deposited in the channel shall be removed and placed in a location where it will not wash back into the watercourse. Waterbreaks shall be installed on the approaches to the crossing to prevent sediment from eroding from the fireline into the watercourse.

Fire Roads

- Roads used in fire suppression activities shall be left in at least as good a condition as they
 were found. Gravel and soil surface roads shall be watered to prevent excessive dust
 formation. Where suppression activities have damaged or rendered road drainage facilities
 non-functional, waterbreaks or drivable drainage dips shall be installed for drainage.
- Where suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.

Archaeological Resources

If any sites are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.

If you have any questions, please contact Forester I, Peter Feller at 530-841-3219.

Peter Feller Forester I

RPF #2574

Fire Friendly Finance Message

Finance is available 6am-10pm daily

Yreka High School Rm 16

Team 2 Finance will accept electronic submission of documents, or paper copies.

Please do not do both. Physical copies may be dropped off in the labeled boxes outside of classroom 16 at Yreka High School. Electronic copies may be emailed to 2022.mckinney.finance@firenet.gov (We created a QR code below that will take you directly to the email)

"Genius Scan" and "Cam Scan" are free apps you can download and utilize to send in copies. They scan as a clear PDF. Please do not take pictures of documents straight from your phone. They are not as clear or readable as the above named applications.

WHEN EMAILING PLEASE USE THE FOLLOWING SUBJECT LINES

*******Personnel- Write TIME in the Subject Line*********

******Equipment/COOP/CCC's – Write PROC in the subject line******

****Only FEDERAL Contracted Resources and Federal Personnel should send information to us. CAL FIRE Contracted Resources DO NOT follow the above instructions. You will need to contact CAL Fire Finance for further instructions.***

DEMOB- Is in person only- No virtual demobs- Please bring your shift ticket books or CTR's in case we are missing something. Only 1 person per demob (CRWB or Strike Team Leaders). To expedite the demob process, put a remark in your CTR with your demob date so we can prepare your draft OF-288 before you come.

Thanks for what you do, and be safe,

Team 2 Finance
