# Fire Weather Forecast

## Monday AUG 8, 2022

<b>FORECAST NO:</b>	7	<b>NAME OF FIRE:</b>	McKINNEY/ALEX
<b>PREDICTION FOR:</b>	Monday/Aug 8, 2022	<b>UNIT:</b>	Klamath N.F.
<b>ISSUED:</b>	2000, Aug 7, 2022	<b>Incident Meteorologist:</b>	Sam Roberts

\*\*\* RED FLAG WARNING IN EFFECT TODAY FOR RH AND WIND \*\*\*

**DISCUSSION:** A very unstable environment will be in place today, along with hot and dry conditions. Afternoon south to southwest winds gusting up to 30 mph. These weather conditions may promote plume dominated fire should other factors align.

**MONDAY: RED FLAG WARNING IN EFFECT FOR RH AND WIND**

- **WEATHER:** Mostly sunny. Hot, dry, very unstable, and breezy afternoon winds.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-7 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then south-southwest 7-12 mph with gusts from 20 to 30 mph.
- **CHANCE OF WETTING RAIN:** 0%
- **RAIN AMOUNTS:** none
- **MAX TEMPERATURES:** 94-104 bottom and clear areas, 84-94 top and smoked in areas.
- **MIN RH:** 8-13% bottom and clear areas, 13-18% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion mixes out by 1500. Smoke inversion may mix out in smoked in areas due to gusty afternoon winds.

**MONDAY NIGHT: GUSTY WINDS UP TO 20 MPH FOR RIDGETOPS ABOVE THE NOCTURNAL INVERSION.**

- **WEATHER:** Dry and mostly clear.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: southeast 5-10 mph through 2200 then south to southeast 4-6 mph. Highest ridgetops above the nocturnal inversion, expect gusty winds through the night up to 20 mph.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MIN TEMPERATURES:** 60-65 bottom, 65-70 top.
- **MAX RH:** 25-35% top, 50-60% bottom.
- **INVERSION:** Weak developing near mid-slope.

**TUESDAY: RED FLAG WARNING IN EFFECT FOR RH AND WIND**

- **WEATHER:** Mostly sunny. Hot, dry, very unstable, and breezy afternoon winds.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-7 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then south-southwest 10-15 mph with gusts from 25 to 35 mph.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none
- **MAX TEMPERATURES:** 92-102 bottom and clear areas, 82-92 top and smoked in areas.
- **MIN RH:** 9-14% bottom and clear areas, 14-19% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion mixes out by 1500. Smoke inversion may mix out in smoked in areas due to gusty afternoon winds.

**Extended outlook: Wednesday: Wind shift.** Mostly sunny, dry, not as hot, and breezy. Highs 78-92. Minimum humidity: 14-24%. Winds west-northwest 4-8 mph with gusts to 20 mph. **Thursday through Saturday:** Gradually warming temperatures through Saturday. Highs 82-102. Minimum humidity: 14-24%. Winds west to northwest 5-10 mph with gusts to 15 mph.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 8	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> McKinney Fire	<b>OPERATIONAL PERIOD:</b> August 8, 2022 24hr
<b>DATE ISSUED:</b> 8/7/22	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> CA-KNF	<b>SIGNED:</b> Dennis Burns/s/ John Kern

### INPUTS

**WEATHER SUMMARY:** Red Flag Warning Hot, Dry, Windy with Instability  
**Temps:** Day Valley 94-104; Day Ridges 87-97      Night Valley 56-61; Night Ridges 61-65  
**RH:** Day Valley 8-13% Day Ridges 13-18%      Night Valley 45-55%; Night Ridges 35-45%  
**Winds:** Day Ridges SSW 7-12 Gusts to 30 mph      Night Ridges S-SE 5-10 becoming S to SE 4-6 mph  
**LAL 2**

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

Conditions are warmer and drier today with more wind: Expect another day of active fire in the interior. With southerly winds most of the south side divisions will see pushes towards the black. Divisions along the east and west and north sides will need to be very aware of these stronger winds, and drier conditions. Div. Q will need to monitor closely their north side especially. Areas of north/south drainages will funnel winds. South facing slopes will have strong up slope winds. Short duration intense head fire runs are very possible. Fire whirls are probable at intersecting drainages and when the winds transition from upslope to downslope. Make sure lookouts have a good view of the fire, especially since the smoke may limit visibility early in the day.  
 With these dry fuels, spotting will be problematic and should be short range (100-300ft) for the most part and from rollout. Spots from several torching trees on a ridgetop can spot 0.4 miles. The Probability of Ignition is 90%  
 Expect single and group tree torching and sustained short duration crown runs where slope and winds align.  
 At night, expect the fire to remain active until about 0300 to 0400 hrs with fair to poor RH recovery.

##### SPECIFIC:

**Branch I:** No forward fire progression is expected. Rollout will challenge containment lines. There are multiple green islands near the line, if they begin to actively burn expect spot fires over established lines. Much of the branch did not burn cleanly so there is a possibility of reburn where shrubs were scorched but not consumed along the fire's edge.

**Branch V:** No forward fire progression expected. Watch for slope reversals as the fire reaches drainage bottoms. At night winds may switch from upslope to downslope and change fire intensity. Expect islands near the line to burn out and there is a potential for reburn; either of which will challenge existing lines.

**Branch X:** No forward fire progression expected. Rollout will continue to be problematic and challenge any established lines. Skies will likely be clear and if a plume develops, spotting distances will increase, and the river and highway may be challenged. There are many areas on this Branch with north/south running drainages where south winds may be funneled. Head fires could see (8-40 ch/hr with 5-15 feet of flame length in timber litter with understory and in shrub fuels).

**Branch XX:** Expect any escapes to push to the NE. North of the river there is a combination of grass fuels and heavy dead and down component from the 2014 Beaver Fire that will make the fire more resistant to control. Watch for various slope and wind alignment on the Div P, Div T and the Smokey Fire (Div Q). Roll out will continue

**IA:** With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with the potential for crown runs where dense canopies are present.

**AIR OPERATIONS:** Smoke will limit air operations or until the inversion mixes out about 0900.

### SAFETY

Be sure to brief all personnel of the Red Flag Warning and what that means. Have Lookouts posted in places where they can see fuels and fire below crews, even in smoky conditions.

# McKinney Fire

Operation Period: 8/8/22 to 8/9/22 0700 - 0700

## SAFETY MESSAGE

### IDENTIFY HAZARDS AND MITIGATE RISKS:

If you see a hazardous condition (ex. bee nest, down powerlines, hazard tree) ...

- 1) Use flagging or signs to mark the hazard for others and label the flagging to describe the hazard, location, and date.
- 2) Report the hazard to your supervisor and Division.
- 3) Assure the Safety Officer is aware of the hazard for reporting purposes.
- 4) If it can be done safely, mitigate the risk by removing the hazard or restricting access to the area. If you cannot mitigate a hazard and the risk, then re-evaluate your plan.

Keep an eye on other personnel; it is **EVERYONE'S** responsibility to stop an unsafe act.

### THINK ABOUT IT... ARE YOU READY FOR AN IWI?

- Review the *Medical Incident Report* "8-line" found in the IAP.
- Can you effectively report your location over the radio in case of an emergency?
- Are you an effective radio operator in an emergency?
- Have you trained for an IWI recently?

### HEAT RELATED ILLNESSES ARE ON THE RISE!

Everybody has a <b>live fuel moisture</b> .	Is your live fuel moisture reaching a critical and unsafe level?	Rehydrate now, before, and during your shift... <b>DRINK UP!</b>
---	--	---

*Be sure all elements of your safety plan are in place prior to engagement*

**8. MEDICAL EMERGENCY PROCEDURES**

**LINE "MEDICAL-EMERGENCY" PLAN:**

- Crew Supervisor to contact Division Supervisor/Operations with:
  - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Communications/Dispatch:
  - Division Supervisor or POC\* will run "Medical -Emergency" on the Command frequency.
  - Division Supervisor or POC\* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
  - Communication contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (Medical Emergencies Only).

POC\* (Point of Contact) and/or Operations

**LINE "NON-EMERGENCY INCIDENT" PLAN:**

- Crew Supervisor to contact Division Supervisor with:
  - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI).
- Division Supervisor to contact Communications/dispatch:
  - Division Supervisor or POC\* will run "Non-Emergency Incident" on the Command frequency.
  - Division Supervisor or POC\* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
  - Communications contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (For medical related incidents only).

**IN-CAMP - 24 HOUR MEDICAL**

Yreka High School ICP and Montague Elementary Base Camp  
Contact 911 and Medical Unit (747) 444-8149 with:

- Patient Complaint, Condition and Location

Klamath River Spike Camp  
Contact 911 and Klamath River Medical Unit (909) 921-8490 with:

- Patient Complaint, Condition and Location

9. PREPARED BY  
Scott Mohlenbrok (MEDL) 

10. REVIEWED BY  
Safety Officer 

**Medical Incident Report**

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

**Use the following items to communicate situation to communications/dispatch.**

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)  
 "This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Crew Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES)                      Federal                      Contractor                      Local Government

Patient Assessment:                      Age:                      Weight:                      Chief Complaint:

(If pertinent to Injury)      Skin Signs: (color/moisture/temp)                      Level of Consciousness:                      BP:                      HR:                      Respirations:

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards)                      Patient's ETA to Location:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method?  
*Be thinking ahead.*

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training  
 Be Alert - Keep Calm - Think Clearly - Act Decisively

\*\*\* Follow up with MEDL upon return to ICP \*\*\*

# **COVID-19 PREVENTION INFORMATION**

## **MAINTAINING A HEALTHY WORKFORCE**

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

### **Self-Awareness/ Daily Health Screening**

**Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms** (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

### **COVID-19 Testing availability – (2) locations**

**McKinney Base Camp** (430 E. Prather St.) - **Adventure Medics**

**Klamath River Spike Camp** (28017 Hwy 96) - **Mountain Medics.**

Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

**Federal employees** enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

### **Sanitary and Personal Hygiene Practices**

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

### **Social Distancing and Mask Wearing**

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

**Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained.** Community Levels are updated weekly by CDC.

McKinney Incident COVID Advisor – **Robin Wall, (530) 410-1721**  
Prepared by COVID Advisor: **Bill Sanders, (530) 721-3865**

# Human Resource Message

## Signs of Stress

Some signs of stress include anxiety, increased heart rate, increased muscle tone, digestive complaints, inability to sleep well, headaches and increased irritability.

## Coping with Stress

1. Track your stressors- Identify which situations create the most stress and how you respond to them. Did you raise your voice? Did you talk to someone about it? Did you take a walk?
2. Develop healthy responses- Instead of attempting to fight the stress, do your best to make healthy choices when you feel the tension rise.
3. Learn how to relax- Techniques such as meditation, breathing exercises, and mindfulness can help melt away stress. You can start by going for a walk in high stressful situations or doing a simple deep breathing exercise while walking to get your next meal. Learn to relax and joke with your team (workplace appropriate), laughter is one of the biggest coping mechanisms to relieve stress.
4. Recharge- When available take the time to recharge and avoid the chronic stress and burnout. During your off time, take the time to unwind so when your next shift comes up, you can come back able to perform your best.
5. Talk to your supervisor- Employee health is a major contribution to the success of the workplace. Start by having a conversation with your supervisor, the purpose of this is not to lay out all of your complaints, but rather to come up with an effective plan to manage the stressors you have identified, so you can perform at your best while on the job.

# The Five-D System for Effective Fireline Waterbars

Michael J. Furniss  
USDA Forest Service  
Pacific Northwest Research Station  
Corvallis, Oregon

---

To make effective waterbars on firelines, just remember the 5-D System. The five D's are: **Distance, Diagonal, Divert, Discharge, and Dissipate.**

Most forest values depend on healthy soils; clean water, streams full of fish, diverse wildlife habitats, productive timberlands, beautiful places, and so on. Firefighters strive to protect our soils by suppressing the wildfires that can damage them.

Methods used to fight fires, especially firelines, can cause erosion and soil degradation, and need to be treated to properly maintain forest values. Fireline surfaces usually cause runoff during heavy rainfall and snowmelt. Without waterbars, excessive runoff will concentrate and cause rills and gullies to form. Effective waterbars can prevent this from happening.

**Distance:** To be effective, waterbars must break up drainage areas and runoff on the fireline so that there's not enough erosive energy available in runoff to erode the soil. To ensure that excess runoff cannot accumulate, waterbars must be placed the proper distance apart, based on the slope of the fireline. This breaks up the area that accumulates runoff, keeping it small enough to prevent damage. Erosion potential depends on slope and a table is provided on the next page that gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

**Diagonal:** After deciding where you will put each waterbar, the next decision is how to build them. An important principle in working with flowing water is: don't bully the flow, lead it. Waterbars built directly across a fireline oppose the water's energy and tend to fail. Waterbars built diagonal to the fireline lead the water off and work much better. A diagonal waterbar has a gentle slope along its base that leads the water off. A simple rule is to add 5 to the slope of the road, in percent, and build the waterbar at that many degrees from perpendicular. Or simpler yet, just build them at 30 degrees off perpendicular (see the illustration on the next page).

**Divert:** A good waterbar will divert the water off the fireline. To do this the waterbar must be sufficiently deep to handle all the flow for as long as it's needed. Excavation is much more effective than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

**Discharge:** Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam – it must have an open outlet.

**Dissipate:** Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet, or fudging a bit on distance to take advantage of natural features that will dissipate the water's erosive energy.

So remember, when locating and building waterbars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable.

Fireline slope %	Maximum Distance Apart (feet)
1-6.....	300
7-9.....	200
10-14.....	150
15-20.....	90
21-40.....	50
41-60.....	25

**Recommended spacing for waterbars on firelines.**  
 Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: USDA-Forest Service, "Sale Administrator's Handbook"

RE: McKINNEY Incident Fire Suppression Repair

Fire Suppression Repair with the State Direct Protection Area will occur on dozer lines, handlines roads, and other areas utilized by fire suppression resources. The purpose of the repair is to mitigate possible adverse effects to resources resulting from fire suppression activities.

**Dozerlines**

Approximately 75% of the fire perimeter and contingency line is dozerline. Dozerline constructed on this incident varies between single blade width to five blade widths (approximately 12-50 feet). The following measures shall be implemented for constructed dozerline:

- 1) Berms and push-piles shall be spread to the extent feasible. This is generally accomplished by back-blading with a tractor or with an excavator. Debris piled against standing timber shall be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots/staging areas and safety zones, remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water if necessary.
- 2) Waterbreaks shall be installed at a spacing which corresponds to a moderate erosion hazard rating in the California Forest Practice Rules. Maximum spacing shall be as follows:

<u>Line Gradient</u>	<u>Maximum Waterbreak Spacing</u>
0-10%	200 Feet
11-25%	150 Feet
26-50%	100 Feet
>50%	75 Feet

*NOTE: The preceding waterbreak spacing information is a general guide for maximum spacing, actual location of waterbreaks should be tailored to the topography and placement should be suited to the best dispersal of water flow.*

- 3) Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 10 inches from the bottom of the cut to the top of the berm. Where possible

the discharge from the waterbreaks shall be directed into vegetated areas to minimize erosive forces.

Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with handtools.

Where dozerline has crossed watercourses, the channel of the watercourse will be cleared of soil and debris to re-establish the watercourse channel.

### **Hand Constructed Fireline**

- 1) Hand constructed fireline shall have water breaks installed with hand tools. The waterbreaks shall be approximately 10 inches in depth from the bottom of the cut area to the top of the berm. Waterbreaks shall be angled at least 45 degrees to the fireline. The interval between waterbreaks shall be approximately 50 feet with closer spacing as needed on steep pitches. No waterbreaks shall be required where the fireline traverses a side hill, however if the line is cup trenched the berm shall be breached periodically to prevent channelization of runoff.
- 2) Where hand constructed fireline crosses a watercourse, any soil material deposited in the channel shall be removed and placed in a location where it will not wash back into the watercourse. Waterbreaks shall be installed on the approaches to the crossing to prevent sediment from eroding from the fireline into the watercourse.

### **Fire Roads**

- 1) Roads used in fire suppression activities shall be left in at least as good a condition as they were found. Gravel and soil surface roads shall be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips shall be installed for drainage.
- 2) Where suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.

### **Archaeological Resources**

If any sites are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.

If you have any questions, please contact Forester I, Peter Feller at 530-841-3219.

Peter Feller

*Training Specialist Message*

To assure proper documentation for your assignment:

1. Scan the QR Code

2. Complete the Trainee Registration Form -

This is the link to sign up -

At the end of your assignment:

1. **Trainee:** Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.

3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's **signed** by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to [imt2training@gmail.com](mailto:imt2training@gmail.com)

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- [imt2training@gmail.com](mailto:imt2training@gmail.com)

# 20000 Block and ALL State Resources

Briefing, Feeding, Finance, Check-In, DEMOB, Etc. Is located at:

YREKA FAIRGROUNDS

1712 Fairlane Rd, Yreka

## DEMOB MESSAGE

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes "starting the walk".

- Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization unit.

## FINANCE MESSAGE

\*\*End of Work Period 447 is Sunday 8/7/22\*\*

### TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL -Make sure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS - Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
  - Reminder – VIN numbers must match contracts exactly

### COMP / CLAIMS

- DAMAGE CLAIMS- (suppression, property, vehicle), ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors complete IIPP-15's and come to the COMP/CLAIMS Unit to enter into IAPS

### DIVISION / GROUP - LINE SUPERVISORS

Please turn in hired equipment shift tickets at the end of each shift.
