MEDIA REQUESTS: 530-918-8729

Wednesday

INCIDENT OBJECTIVES	1. INCIDENT NAME McKinney	2. DATE 8/09/22	3. TIME 2200																				
4. OPERATIONAL PERIOD (DATE/TIME) 8/10-11/2022, 0700-0700																							
<p>5. GENERAL CONTROL OBJECTIVES</p> <p style="text-align: center;"><u>Strategic Framework</u></p> <p>Implement a full suppression strategy on the McKinney Fire. Values at risk include human safety, private timberlands, communities, critical infrastructure and associated improvements. Apply tactics that offer the highest probability of success.</p> <p style="text-align: center;"><u>Leaders Intent</u></p> <p>Provide the highest level of customer service to all involved with or impacted by the McKinney Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:</p> <ul style="list-style-type: none"> • Personal safety and the safety of others, including driving slowly and defensively. • Manage fatigue by taking breaks and maintaining work/rest cycles. • Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines. • Professional behavior, conduct, and timely/effective communication. <p style="text-align: center;"><u>Management Objectives</u></p> <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard recognition and application of the risk management process. • Coordinate all public information with CAL FIRE and CIIMT 10 to provide timely and continuous information to affected agency partners, cooperators, and to the public. • Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources. • Implement fire suppression activities in accordance with the suppression repair plan and Incident Resource Advisors. • Provide initial attack capability for the Klamath National Forest on the Oak Knoll and Scott River Ranger Districts. <p style="text-align: center;"><u>Control Objectives</u></p> <p>Keep the McKinney Fire:</p> <ul style="list-style-type: none"> • East of the Scott River Road to prevent further fire spread into the communities of Horse Creek, Steelhead and Scott Bar. • South of the current fire perimeter along Hwy 96 and within the Beaver Creek Fire scar. • West of Klamath River Road and Humbug Creek Road to prevent further fire spread into Yreka and the surrounding communities. • North of Russel Peak and Schoolhouse Gap to prevent further fire spread into privately owned timberlands and the community of Fort Jones.

Fire Weather Forecast

Wednesday AUG 10, 2022

FORECAST NO:	9	NAME OF FIRE:	McKINNEY/ALEX
PREDICTION FOR:	Wednesday/Aug 10, 2022	UNIT:	Klamath N.F.
ISSUED:	2000, Aug 9, 2022	Incident Meteorologist:	Sam Roberts

*** NOT AS HOT TODAY, STILL DRY. WIND SHIFT TO W. HIGHEST RIDGETOPS BREEZY THROUGH EARLY AFTERNOON. ***

DISCUSSION: Not as hot today, but we remain dry and unstable. The higher ridgetops will continue to be gusty through early afternoon with gusts up to 20 mph, then becoming less gusty later in the day. Winds will generally be out of the west.

WEDNESDAY: WIND SHIFT. NOT AS HOT, STILL DRY. WIND GUSTS UP TO 20 MPH ACROSS HIGHER RIDGETOPS.

- WEATHER: Mostly sunny and not as hot. Dry, unstable, winds not as gusty.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 2-4 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then west 4-8 mph with gusts up to 18 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none
- MAX TEMPERATURES: 87-93 bottom and clear areas, 75-80 top and smoked in areas.
- MIN RH: 15-25% bottom and clear areas, 25-35% top and smoked in areas.
- INVERSION: Weak mid-slope inversion mixes out by 1500. Smoke inversion unlikely to mix out across smoked in areas.

WEDNESDAY NIGHT: COOLER. WEST WINDS BECOMING NORTHWEST THROUGH LATE EVENING.

- WEATHER: Dry and mostly clear.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: Northwest 3-6 mph through 2200, then east to southeast 3 to 6 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MIN TEMPERATURES: 50-53 bottom, 53-58 top.
- MAX RH: 58-68% bottom, 43-53% top.
- INVERSION: Weak developing near mid-slope. Secondary inversion at 5,000 feet.

THURSDAY: SUNNY, DRY, SLIGHTLY WARMER.

- WEATHER: Mostly sunny and dry. Slightly warmer, remaining unstable.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then west to northwest 4 to 8 mph with gusts up to 15 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none
- MAX TEMPERATURES: 92-97 bottom and clear areas, 80-85 top and smoked in areas.
- MIN RH: 13-23% bottom and clear areas, 20-30% top and smoked in areas.
- INVERSION: Weak mid-slope inversion mixes out by 1500. Smoke inversion unlikely to mix out across smoked in areas.

Extended outlook: Friday: Mostly sunny, warmer, dry and breezy. Highs 82-98. Minimum humidity: 13-23%. Winds west-northwest 5-10 mph with gusts to 18 mph. Saturday through Monday: Gradually warming temperatures through Sunday. Highs 85-103. Minimum humidity: 14-24%. Winds west to northwest 5-10 mph with gusts to 15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 10	TYPE OF FIRE: Wildfire
FIRE NAME: McKinney Fire	OPERATIONAL PERIOD: August 10, 2022 24hr
DATE ISSUED: 8/9/22	TIME ISSUED: 2000
UNIT: CA-KNF	SIGNED: Dennis Burns/s/ John Kern

INPUTS

WEATHER SUMMARY: **Continued Hot and Dry**
Temps: Day Valley 87-93; Day Ridges 75-80 Night Valley 50-53; Night Ridges 53-58
RH: Day Valley 15-25% Day Ridges 25-35% Night Valley 58-68%; Night Ridges 43-53%
Winds: Day Ridges W-NW 4-8 Gusts to 18 mph Night Ridges NW 3-6
ERC above the 97th percentile

OUTPUTS

FIRE BEHAVIOR

GENERAL:

No forward fire progression is expected on the fire. Interior islands will continue to burn out most are well in the interior. Identify areas where there is a potential for reburn near containment lines. Expect large dust devils to develop on south and west facing slopes, these have the potential to carry hot embers across the lines. Make sure lookouts have a good view of the fire, especially since the smoke may limit visibility early in the day. With these dry fuels, spotting will be problematic and should be short range (100-300 ft) for the most part and from rollout. Several torching trees on a ridge top can spot up to 0.3 miles. The Probability of Ignition is 90%
Minimal fire activity is expected at night.

SPECIFIC:

Branch I: No forward progression is expected. With the deep mop up the chances of the fire becoming established outside of the lines has been greatly reduced.

Branch V: No forward fire progression is expected. There is some heat on the IR close to the lines mainly in Div. Z. Identify areas of continuous fuels near the lines as this would be the most likely avenue for an escape fire. With the wind direction any escape will be aligned with the wind

Branch X: No forward fire progression is expected. The potential for reburn is still present in Div. D however, with the predicted winds the fire should burn back on itself. With the abundant timber throughout the Branch torching trees near the line will continue to be problematic.

Branch XX: No forward fire progression is expected. Interior fuels will continue to burn out. With the wind alignment any fire that becomes established outside the lines will actively back and flank.

IA: With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with the potential for crown runs where dense canopies are present.

AIR OPERATIONS: Limited smoke production on the fire minimal impacts to air operations.

SAFETY

Have Lookouts posted in places where they can see fuels and fire below crews, even in smoky conditions. Do not become complacent because we are in mop up, fire behavior potential is bordering on extreme.

Escape Routes
Safety Zones

McKinney Fire
Operation Period: 8/10/22 to 8/11/22 Shift: 0700-0700

Safety Message

Complacency is a Hazardous Attitude... Don't go there!

With many portions of the fire reaching containment, some of our assignments and tactics are changing.

As we move from suppression > mop-up > patrol > suppression repair, we need to assure that we are adhering to the 10 and 18s!

- Pay specific attention to:
- Order #7- Maintain prompt communications with your forces, your supervisor, and adjoining forces.
 - Order #8- Give clear instructions and be sure they are understood.
 - Watch out #5- Uninformed on strategy, tactics, and hazards.
 - Watch out #6- Instructions and assignments not clear.
 - Watch out #17- Terrain and fuels make escape to safety zones difficult.

Incident Trends That Concern Us

Heat Related Illness (Dehydration) 24 hr down 5 IWI-2 IWI	Minor Vehicle Accidents (Backing and Parking Vehicle Damage) 24 hr down 2 incidents-1 incident	Environmental Hazards (Rattlesnakes/Scorpions) 24 hr Up (Coming out at night 12+)
--	---	--

Safely Working With Heavy Equipment

IRPG page 85

- Maintain your distance from active heavy equipment. *Stay at least 100 feet in front and 50 feet behind the equipment.*
- Only the operator can ride on the equipment.
- Never approach the equipment until you have eye contact with the operator, all implements have been lowered to the ground, and equipment has been idled down!
- Avoid working downhill from equipment where rolling material could jeopardize your safety.
- Night work is more dangerous due to reduced visibility. Use headlamps so operator can see you.
- Establish visual and radio communication methods prior to engaging.
- Communicate all hazards to the operator.
- Equipment operators have difficulty seeing ground personnel; take responsibility for your safety and all those around you.

Powerline Safety

IRPG page 22-23

- ✓ Communicate: Notify all responders of down electrical lines.
- ✓ Identify: Determine entire extent of hazard by visually tracking all lines; two poles in each direction, from the downed wire.
- ✓ Isolate: Flag and mark area around down wire hazards; post guards.
- ✓ Deny entry: Delay firefighting actions until hazard identification and flagging are complete, and/or confine actions to safe areas.
- ✓ Downed line on vehicle: Stay in vehicle until power company arrives. If vehicle is on fire, jump out with both feet together. Do not touch the vehicle. Keep feet together and shuffle or hop away.

There are many down and damaged power lines in the Highway 96 and Klamath River Corridor.

Always treat downed wires as energized!

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE WEATHER/FIRE BEHAVIOR	<ul style="list-style-type: none"> 100-HOUR FUELS BELOW 4% ERC'S 97th PERCENTILE Monitor current weather conditions and forecasts. Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. Be aware of current fire behavior potential in the event of new starts and initial attack
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. Keep speeds down and increase following distance, especially in dusty conditions.
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around Frequently.
ALL	HAZARD TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p. 22). Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas.
ALL	SAFETY ZONES	<ul style="list-style-type: none"> Follow safety zone guidelines (IRPG p. 6) Carefully evaluate burned areas before designation as safety zones due to spotty burning in numerous areas. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner.
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours Watch out for wildlife at night. Especially rattle snakes and scorpions
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> Maintain 6' foot distance whenever possible. Wear masks when appropriate. Do frequent handwashing/sanitizing and disinfecting common surfaces. Notify MEDL if any symptoms arise.
ALL	HEAVY EQUIPMENT / DOZERS SUPPRESSION REPAIR	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotter. Avoid moving parts Ensure the use of effective communication (radio, hand signals). Identify hazards. Review IRPG Pg 85 Provide for traffic control, as needed, when working near roadways.
ALL	MOP UP & PATROL	<ul style="list-style-type: none"> Establish and maintain LCES. Scout area thoroughly to identify hazards and communicate to others in area. Watch out for complacency. Review Common Denominators of Tragedy Fires.
ALL	LIGHT FLASHY FUELS/ SPOT FIRES	<ul style="list-style-type: none"> Live fuel moistures are at critical level. Expect rapid ROS when winds are present Ensure LCES is in place. Use caution when unburned fuels are between you and the fire.
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION & FATIGUE	<ul style="list-style-type: none"> Drink 2: 1 water to sports drinks. Maintain 2:1 work/rest ratio Take frequent breaks, minimum of 10 minutes every hour. CDC/NIOSH recommends 30/30 at 94 degrees in partial sunlight. Recognize symptoms of HEAT RELATED ILLNESS (IRPG P.110)

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Communications/Dispatch:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
 - Communication contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (Medical Emergencies Only).

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI).
- Division Supervisor to contact Communications/dispatch:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
 - Communications contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (For medical related incidents only).

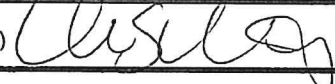

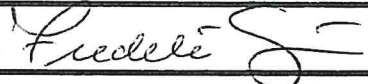

IN-CAMP - 24 HOUR MEDICAL

Yreka High School ICP and Montague Elementary Base Camp
Contact 911 and Medical Unit (747) 444-8149 with:

- Patient Complaint, Condition and Location

Klamath River Spike Camp
Contact 911 and Klamath River Medical Unit (909) 921-8490 with:

- Patient Complaint, Condition and Location

9. PREPARED BY Chris Schilling (MEDL) 	10. REVIEWED BY Safety Officer 
--	--

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*drop point, intersection, helispot, Lat. / Long, hazards*) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***

COVID-19 PREVENTION INFORMATION

MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability – (2) locations

McKinney Base Camp (430 E. Prather St.) - **Adventure Medics**

Klamath River Spike Camp (28017 Hwy 96) - **Mountain Medics.**

Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

McKinney Incident COVID Advisor – **Robin Wall, (530) 410-1721**

Prepared by COVID Advisor: **Bill Sanders, (530) 721-3865**

Human Resource Message

Check your Temperature Gauge

For a lot of you here on the McKinney, fire fatigue, heat exhaustion, and troubles sleeping may be starting to wear on you. With the hard work and the long hours, you've been putting in, it is easy to get on edge and "on the edge" with each other. Let's guard against that by recognizing when our temperature gauge is reaching a critical point and take a 15-minute cooldown before we do something that's out of character that might have lingering repercussions.

Feel free to call/text or come by any time if you have questions, concerns, or just want to chat.

HRSP Location: Yreka High School Rm. 8
HRSP: Ryan Voelkl, 530-457-7276,
HRSP(t): Armando Vargas, 707-980-2864,

The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: **Distance, Diagonal, Divert, Discharge, and Dissipate.**

Distance: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope %	Maximum Distance Apart (feet)
1-6.....	300
7-9.....	200
10-14.....	150
15-20.....	90
21-40.....	50
41-60.....	25

Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: USDA-Forest Service, "Sale Administrator's Handbook"

Reference: Hauge, C.J., M.J. Furniss and F.D. Euphrat. 1979. *Soil erosion in California's Coast Forest District*. California Geology. June, 1979

Specifications for Piling Slash

Hand Pile Construction:

- All activity generated and pre-existing fuels with a diameter between 1" and 8" shall be bucked to 4' or less and included in the hand piles. Exceptions include single logs that exhibit at least 50% decomposition.
- Hand piles shall be symmetrical, constructed neatly and **compactly**.
- Hand pile base shall **not** be constructed with material over 4", 4"< material will be stacked in the upper half of the pile.
- Slash that causes large air spaces in piles shall be cut to a minimum of 8"x 8" air spaces greater than 8"x8" are unacceptable.
- Material in piles shall be cut <4' per individual piece.
- Maximum piles size 6' in diameter and 6' in height and minimum pile size shall be 4' in diameter and 4' in height.
- Piles shall be distinct and separate from each other allowing at least 6' between each pile
- Piles shall be placed to limit scorch potential to leave trees, not in contact with leave trees and built up slope from leave trees when possible
- At least 50% of material in the lower third of the piles shall be composed of small diameter material and attached fines to create a kindling core.
- All piles shall be covered with Kraft type wax paper (wax side up).
- Pile covering sheet shall be placed to cover the bottom 2/3 of the pile and cover 50% of the surface area of the pile at this level. The remaining 1/3 of the pile shall be placed over the cover sheeting anchoring all four corners and the middle of the cover sheeting securely.
- No piles shall be built on, or in contact with any tree stumps >10" diameter.
- Piles created on downed logs, the log in contact with any pile shall be bucked to create a 4' separation in the log (to break the continuity and limit fire spread if the log should be ignited).
- logs over 8" diameter generated from thinning shall be limbed with limb wood added to piles, cut to 4' lengths and dispersed a minimum of 6' separation from downed logs, leave trees and stumps.
- In some units specific pile placement will be required to avoid damage to sensitive plant colonies, maps with exclusion areas will be included, the exclusion areas will be clearly marked and defined by the COR before work takes place. Any piles constructed in exlusion areas will be moved by the contractor.

Fire Friendly Finance Message

*****Yreka High School Rm 16*****

Team 2 Finance will accept electronic submission of documents, or paper copies. Please do not do both. Physical copies may be dropped off in the labeled boxes outside of classroom 16 at Yreka High School. Electronic copies may be emailed to 2022.mckinney.finance@firenet.gov

DEMOB- Is in person only- No virtual demobs- Please bring your shift ticket books or CTR's in case we are missing something. Only 1 person per demob (CRWB or Strike Team Leaders). To expedite the demob process, put a remark in your CTR or S/T with your demob date so we can prepare your draft OF-288 or OF-286 before you come.

Please come see finance!!!!

ALL CREWS WITH A "C-20XXX" RESOURCE ORDER NUMBER, PLEASE COME SEE FINANCE IN ROOM 16 AT THE HIGH SCHOOL- THESE ARE RESOURCES ORDER BY CAL-FIRE- BUT DEMOBING THROUGH US!

20000 Block and ALL State Resources

Briefing, Feeding, Finance, Check-In, Demob, etc. are located at:
YREKA FAIRGROUNDS
1712 Fairlane Rd, Yreka

DEMOB MESSAGE

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes "starting the walk."

- Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization Unit.

FINANCE MESSAGE

TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL- Make sure you have started your eFC-33's and update after each shift. Please make sure ePay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS- Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
 - o Reminder – VIN numbers must match contracts exactly.

COMP / CLAIMS

- DAMAGE CLAIMS- For all damages during fire suppression activities to property or vehicle, complete an ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors should complete IIPP-15's and come to the COMP/CLAIMS Unit to enter into IAPS.

DIVISION / GROUP - LINE SUPERVISORS

Please turn in hired equipment shift tickets at the end of each shift.

FIRE SUPPRESSION REPAIR MESSAGE

Berms and push-piles should be spread to the extent feasible by back-blading with a tractor or with an excavator. Debris piled against standing timber should be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots, staging areas, and safety zones remove and/or breach berms so that runoff can be dissipated. Cross-drain these areas to effectively dissipate water as necessary.

Waterbreaks should be constructed at an approximately 45° angle at a minimum depth of 10" from the bottom of the cut to the top of the berm. Where possible, the discharge from the waterbreaks should be directed into vegetated areas to minimize erosive forces. Where dozerline or handline has crossed a watercourse, the channel should be cleared of soil and debris to re-establish the channel. Waterbreaks on handlines should be installed every 50' or closer as needed.

Waterbreak maximum spacing:	Grade	0-10%	11-25%	26-50%	>50%
	Spacing	0-200'	150'	100'	75'

Roads used in fire suppression activities should be left in at least as good a condition as they were found. Gravel and soil surface roads should be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips should be installed for drainage. Inside ditches damaged from suppression activities should be cleaned and left unobstructed.

If any archaeological resources are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.

Training Specialist Message

To assure proper documentation for your assignment:

1. Scan the QR Code

2. Complete the Trainee Registration Form -

This is the link to sign up -

At the end of your assignment:

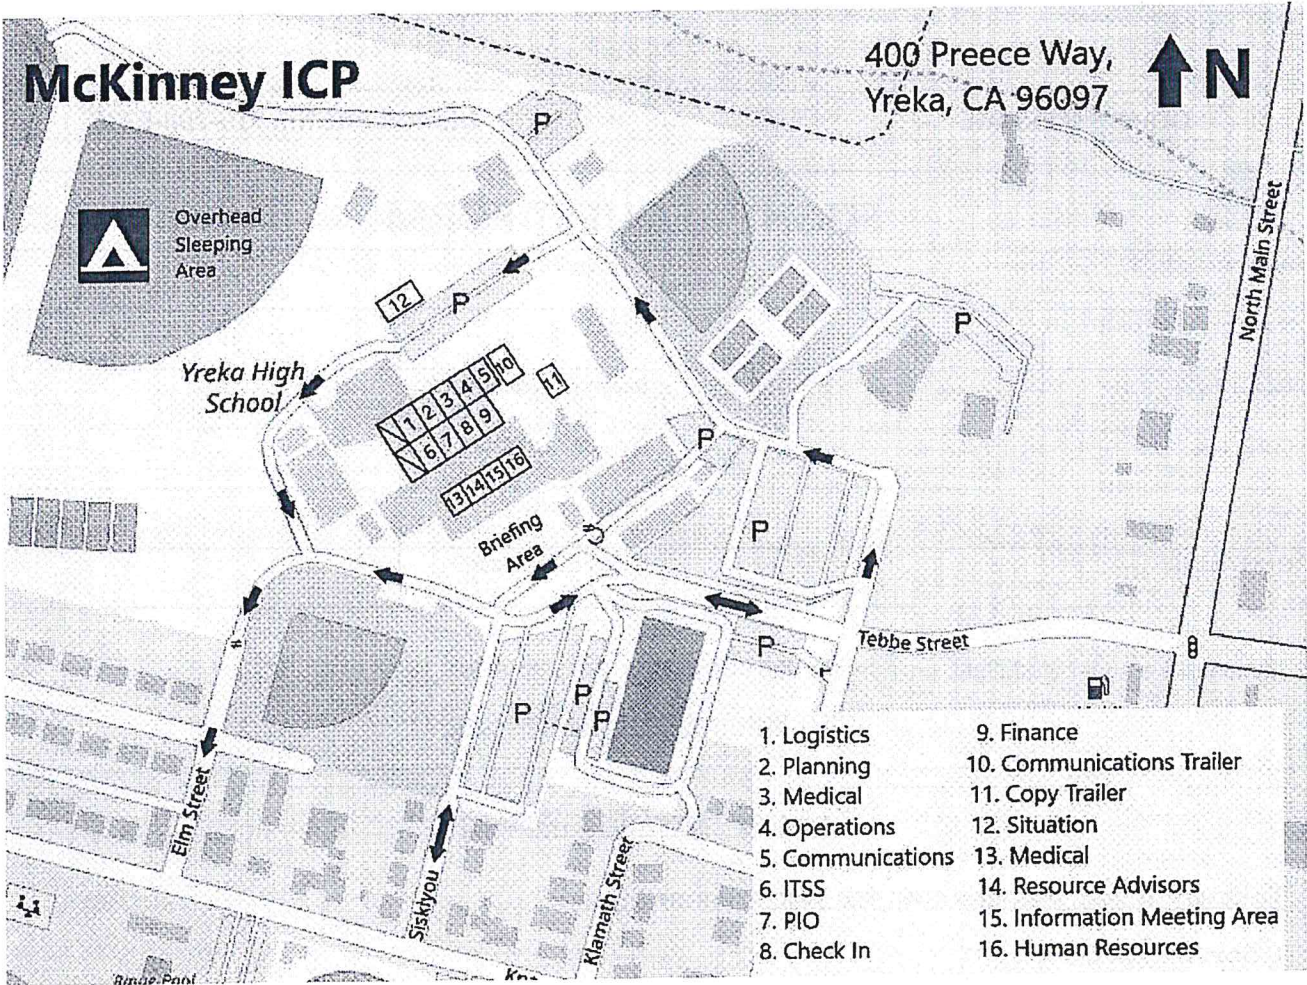

1. **Trainee:** Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

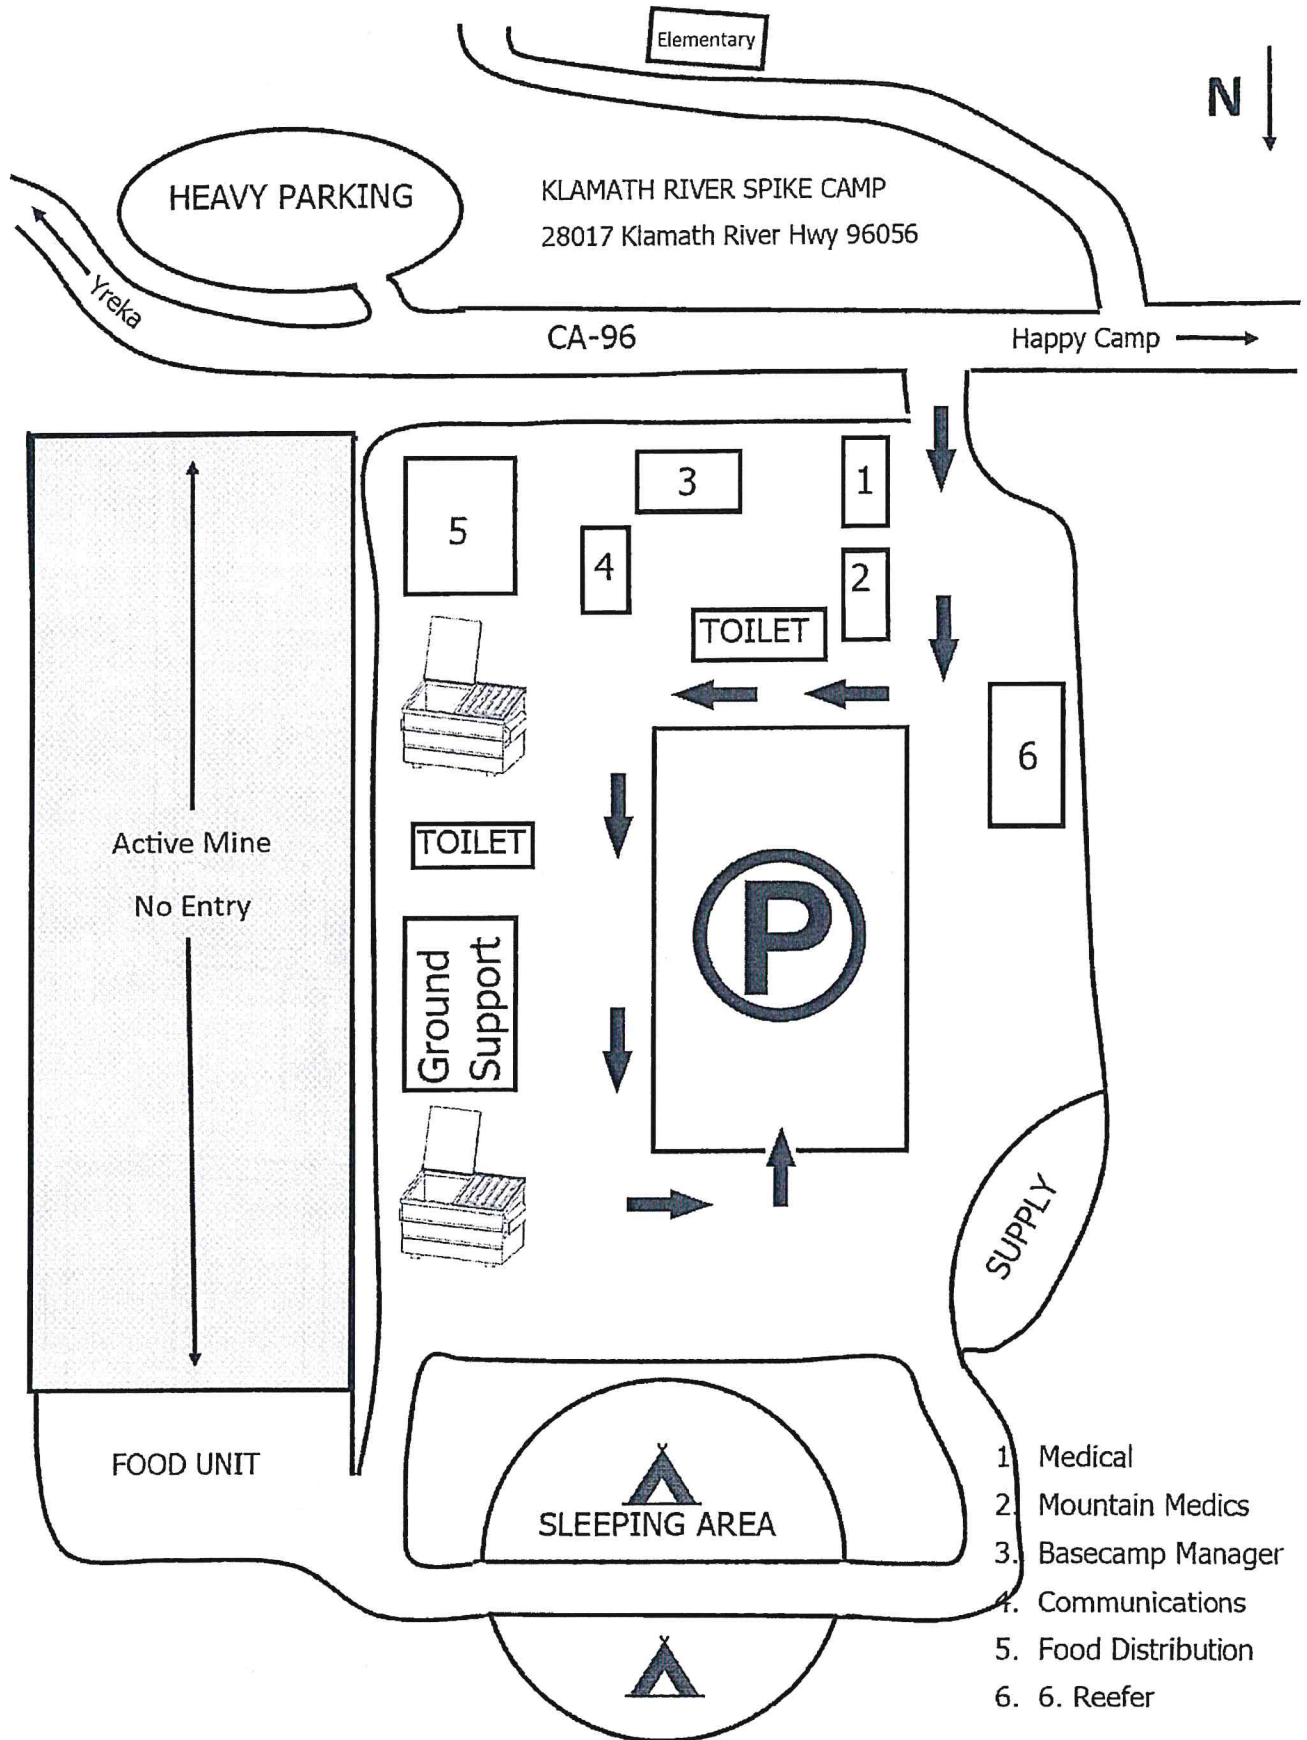

2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.
3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's **signed** by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com
