# **Fire Weather Forecast**

# Friday AUG 12, 2022

FORECAST NO: PREDICTION FOR: ISSUED:

Friday/Aug 12, 2022 2000, Aug 11, 2022 NAME OF FIRE:

McKinney

UNIT:

Klamath N.F.

Incident Meteorologist:

Sam Roberts

\*\*\* DRY, WARM, LOW RH, WEST TO NORTHWEST AFTERNOON WINDS \*\*\*

**DISCUSSION:** Conditions will be very similar to yesterday. Mostly sunny, dry, low RH, and unstable in the afternoon. Winds will be out of the west to northwest during the afternoon hours.

#### FRIDAY: MOSTLY SUNNY, DRY, WARM, LOW RH, WEST NORTHWEST AFTERNOON WINDS

- WEATHER: Mostly sunny, warm and dry. Afternoon max temperatures similar to Thursday. We remain unstable.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: Easterly, ranging from southeast to northeast, 3-6 mph through 1200 then west to northwest 5 to 10 mph with gusts up to 18 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none
- MAX TEMPERATURES: 92-96 bottom and clear areas, 78-83 top and smoked in areas.
- MIN RH: 13-20% bottom and clear areas, 20-30% top and smoked in areas.
- INVERSION: Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1200. Smoke inversion unlikely to
  mix out across smoked in areas.

#### FRIDAY NIGHT: DRY, MOSTLY CLEAR, LIGHT EAST WINDS.

- · WEATHER: Dry and mostly clear.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: West 3-6 mph through 2200, then easterly 3 to 6 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MIN TEMPERATURES: 49-54 bottom, 54-59 top.
- MAX RH: 58-68% bottom, 38-48% top.
- INVERSION: Weak developing near mid-slope and secondary inversion at 5,000 feet.

#### SATURDAY: AFTERNOON WINDS NORTHWEST TO NORTH

- WEATHER: Mostly sunny, warm and dry. Afternoon max temperatures similar to Friday. We remain unstable.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: East to northeast 3-6 mph through 1200 then northwest to north 5 to 10 mph with gusts up to 15 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none
- MAX TEMPERATURES: 93-97 bottom and clear areas, 79-84 top and smoked in areas.
- MIN RH: 13-20% bottom and clear areas, 20-30% top and smoked in areas.
- INVERSION: Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1200. Smoke inversion unlikely to
  mix out across smoked in areas.

Extended outlook: Sunday: Mostly sunny, warmer, dry. Highs 83-99. Minimum humidity: 13-20%. Winds northwest-north 5-10 mph with gusts to 15 mph. Monday through Wednesday: Temperatures continue to warm through Wednesday. Highs 86-104. Minimum humidity: 14-25%. Winds northwest to north 5-10 mph with gusts to 15 mph. Clear skies Monday but becoming more cloudy and a slight chance for showers and storms by Tuesday and continuing into Wednesday.

#### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12 TYPE OF FIRE: Wildfire

FIRE NAME: McKinney Fire OPERATIONAL PERIOD: August 12, 2022 24hr

DATE ISSUED: 8/11/22 TIME ISSUED: 2000

UNIT: CA-KNF SIGNED: Dennis Burns and John W. Kern

#### **INPUTS**

WEATHER SUMMARY: Still Hot and Dry with NW Winds with Gusts to 18 mph

Temps: Day Valley 92-96; Day Ridges 78-83

Night Valley 49-54; Night Ridges 54-59

RH: Day Valley 13-20% Day Ridges 20-30% Night Valley 58-68%; Night Ridges 38-48% Winds: Day Ridges W to NW 5-10 Gusts to 18 mph Night Ridges W 3-6 then east 3-6 after 2200.

#### **OUTPUTS**

#### **FIRE BEHAVIOR**

#### **GENERAL:**

Winds similar to yesterday, but a few miles per hour stronger today. Fuels are still very dry, and the terrain is very steep. Winds will be out of the west to northwest. Interior islands may still burn but should not threaten most control lines. Divisions along the south and east sides will need to be very aware of the change in wind direction as it could push interior heat towards their lines. Make sure lookouts have a good view of the fire, especially since the residual smoke early in the day may limit visibility.

Should an interior green island or dirty burn area challenge the line, or a new start get started, with these dry fuels, spotting will be problematic and should be short range (100-300 ft) for the most part and from rollout. Spots from several torching trees on a ridgetop can spot 0.4 miles. The Probability of Ignition is 89%. There were numerous spot fires occurring during the IA of the George Fire yesterday.

Expect single and group tree torching and sustained short duration crown runs where slope and winds align especially outside our current perimeter or new starts.

At night: Expect the fire to remain active most of the period as Relative Humidity will not recover that well.

#### SPECIFIC:

**Branch I:** Most of Division W line has been mopped up well and will present little risk of escape today. Some portions of the branch did not burn cleanly so there is a possibility of reburn where shrubs were scorched but not consumed along the fire's edge.

**Branch V:** Portions Div Y and Z have small areas of near the line recently. If NW winds push fire over the line, expect Rates of Spread of 10-15 ch/hr and flame lengths of 5-10 feet in timber litter and timber with understory. At night, winds may switch from upslope to downslope and change fire intensity. Expect islands near the line to burn out and there is a potential for reburn; either of which will challenge existing lines.

Branch X: The NW winds will aid in pushing interior heat towards the center of the burned area and will not likely challenge their lines. Rollout will continue to be problematic and challenge any established lines. Flank fires could see rate of spread of 5-10 ch/hr and flames of 2-5 feet in timber litter with understory fuels. George Fire (new start 8/11/22) is on an east facing slope and will have its fuels heat up early in the day with early upslope winds.

Branch XX: NW winds will push fires downslope to the SE. North of the river there is a combination of grass fuels and heavy dead and down component from the 2014 Beaver Fire that will make the fire more resistant to control. Watch for slope and wind alignment on the Div P and the Smokey Fire (Div Q). Division T has areas that only recently lined and mopped and some areas may still hold heat. This can present an opportunity for fire to move uncontrolled with these NW winds. Rollout can challenge containment lines. There are areas of green islands near the line, if they begin to actively burn expect spot fires over established lines. Flank fires could see rate of spread of 5-10 ch/hr and flames of 2-5 feet in timber litter with understory fuels

IA: With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with the potential for crown runs where dense canopies are present.

AIR OPERATIONS: Smoke may limit air operations in the early morning but will clear out by 1500.

#### SAFETY

Keep lookouts posted in places where they can see fuels and fire below crews, even in smoky conditions.

# Lookouts Communications Escape Routes Safety Zones

# **McKinney Fire**

Operation Period: 8/12-13/2022 Shift: 0700-0700

# Safety Message

# **Cumulative Fatigue**

Maintaining peak performance requires that you take good care of your body.

Get the appropriate amount of rest. Manage your off time to get as much sleep as possible. Take frequent breaks when you have opportunities to do so.

Proper Nutrition and hydration are critical to managing fatigue.

"Fatigue can result in decreased productivity and compromised immune function."

#### MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
PUBLIC IN FIRE AREA	DEHYDRATION	HAZARD TREES
INITIAL ATTACK	COMPLACENCY	DRIVING

Be sure all elements of your safety plan are in place prior to engagement

# COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

There are four major common denominators of fire behavior on fatal and near-fatal fires. Such fires often occur:

- 1. On relatively small fires or deceptively quiet areas of large fires.
- 2. In relatively light fuels, such as grass, herbs, and light brush.
- 3. When there is an unexpected shift in wind direction or wind speed.
- 4. When fire responds to topographic conditions and runs uphill.

Alignment of topography and wind during the Burning Period should be considered a trigger point to re-evaluate tactics.

# **WUI Watch Outs During Mop Up**

- Increased and piloted traffic pattern along Highway 96 through burn area
- Fire weakened trees near structures or access routes.
- Poor access and narrow one-way roads
- Possibility of downed lines in work areas treat all lines as if energized
- Stump holes and ash pits in close proximity to structures
- Repopulation of public in the fire area
- Bridge load limits
- Utility workers in fire area

Be mindful of comments and respectful to those who may have lost their homes to the fire.

Prepared by: Freddie Espinoza SOF1

Date: 8/11/22

8. MEDICAL EMERGENCY PROCEDURES

#### LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
  - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Communications/Dispatch:
  - Division Supervisor or POC\* will run "Medical –Emergency" on the Command frequency.
  - Division Supervisor or POC\* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
  - Communication contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (Medical Emergencies Only).

POC\* (Point of Contact) and/or Operations

#### **LINE "NON-EMERGENCY INCIDENT" PLAN:**

- Crew Supervisor to contact Division Supervisor with:
  - Patient Complaint, Condition and Location via Tactical or Command frequency.
     Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI).
- Division Supervisor to contact Communications/dispatch:
  - Division Supervisor or POC\* will run "Non-Emergency Incident" on the Command frequency.
  - Division Supervisor or POC\* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
  - Communications contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (For medical related incidents only).

#### IN-CAMP - 24 HOUR MEDICAL

Yreka High School ICP and Montague Elementary Base Camp

Contact 911 and Medical Unit (747) 444-8149 with:

Patient Complaint, Condition and Location

Klamath River Spike Camp

Contact 911 and Klamath River Medical Unit (909) 921-8490 with:

#### Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
Requesting air ambulance to Forest Road 1 at (Lat./Long.)
This will be the Trout Meadow Medical Incident. IC is TFLD Jones. EMT Smith is pro

This will L	be the Trout Meadow Medical Incider	nt, IC is TPLD Jones. ENT Smill	n is providing medical care.				
Severity of Emergency	□RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE  Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.						
AND	☐YELLOW / PRIORITY 2 5	Serious Injury or illness. E	vacuation may be DELAYED	) if necessary.			
Transport Priority		ble to walk, 2° – 3° burns not mo		•			
(priority 1, 2, 3)	1	☐GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport  Ex: Sprains, strains, minor heat-related illness.					
Nature of Injury or Illness &		Brief Summary of Injury or Illness					
Mechanism of Injury		(Ex: Unconscious, Struck by Falling Tree)					
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other						
Patient Location	Descriptive Location & Lat. / Long. (WGS84)						
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)					
On-Scene Incident Commander				e IC of Incident within an Ex: TFLD Jones)			
Crew Patient Care			Name of	Care Provider			
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)							
Agency Affiliation: (NO PATIENT NA		Contractor	Local Governm	nent			
Patient Assessment: Age:	Weight:	Chief Complaint:					
(If pertinent to Injury) Skin Signs:	(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:						
Treatment:							
4. TRANSPORT PLAN:							
Evacuation Location (drop point, inter	section, helispot, Lat. / Long, ha	zards) Patient's ETA	A to Location:				
5. ADDITIONAL RESOURCES / EQU	IPMENT NEEDS:						
Paramedic / EMT - Crews - Immobilization	n Devices - AED - Oxygen - Trau	uma Bag - IV/Fluid(s) - Splints	- Rope rescue - Wheeled litter	- HAZMAT - Extrication			
6. COMMUNICATIONS: Identify Sta							
Function Channel Name/Num	nber Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *			
COMMAND							
AIR-TO-GRND							
TACTICAL							
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?  Be thinking ahead.							
B. ADDITIONAL INFORMATION: Upda	ates/Changes, etc.						
REMEMBER: Confirm ETA's of reso	urces ordered. Act according	to your level of training					
Be Alert - Keep Calm - Think Clearly - Act Decisively  *** Follow up with MEDL upon return to ICP ***							

ICS 206

#### **Got Blisters?**

The majority of us have had blisters and know, the longer the blister is allowed to fester, the worse it gets. However, with preventative measures – such as popping the blister and covering it with duct tape – we can mitigate the pain. Problems/Issues are like blisters – though we don't pop them or apply duct tape to our problems – if we are not proactive with taking steps to mitigate the problem and we let them fester, our problems turn into something we'd rather them not turn into.

Whether the problems involve a lack of mutual respect; inappropriate behavior; discourteous or disrespectful behavior; or harassment, we can all contribute to mitigating and resolving the problem.

Please be proactive and come visit your HRSP when a workrelated problem/issue first arises and I will gladly help you mitigate it so it won't become a painful blister!

Feel free to call/text or come by any time between 0530 and 2200 if you have questions, concerns, or just want to chat.

HRSP Location: Yreka High School rm.8

Ryan Voelkl, HRSP: 530-457-7276

Armando Vargas, HRSP-t: 707-980-2864

# The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: Distance, Diagonal, Divert, Discharge, and Dissipate.

**Distance**: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

**Diagonal**: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

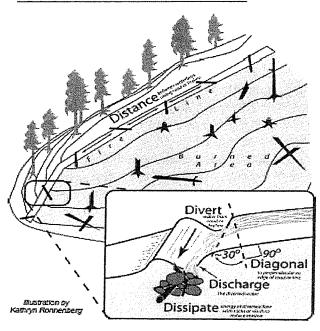

**Divert**: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

**Discharge**: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

**Dissipate**: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

	•	Maximum Distance Apart (feet)
•		300
	7-9	200
	10-14	150

Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook"

Reference: Hauge, C.J., M.J. Furniss and F.D. Euphrat. 1979. Soil erosion in Colifornia's Coast Forest District. California Geology. June, 1979

### Specifications for Piling Slash

#### Hand Pile Construction:

- All activity generated and pre-existing fuels with a diameter between 1" and 8" shall be bucked to 4' or less and included in the hand piles. Exceptions include single logs that exhibit at least 50% decomposition.
- Hand piles shall be symmetrical, constructed neatly and compactly.
- Hand pile base shall **not** be constructed with material over 4", 4"< material will be stacked in the upper half of the pile.
- Slash that causes large air spaces in piles shall be cut to a minimum of 8"x 8" air spaces greater than 8"x8" are unacceptable.
- Material in piles shall be cut <4' per individual piece.
- Maximum piles size 6' in diameter and 6' in height and minimum pile size shall be 4' in diameter and 4' in height.
- Piles shall be distinct and separate from each other allowing at least 6' between each pile
- Piles shall be placed to limit scorch potential to leave trees, not in contact with leave trees and built up slope from leave trees when possible
- At least 50% of material in the lower third of the piles shall be composed of small diameter material and attached fines to create a kindling core.
- All piles shall be covered with Kraft type wax paper (wax side up).
- Pile covering sheet shall be placed to cover the bottom 2/3 of the pile and cover 50% of the surface area of the pile at this level. The remaining 1/3 of the pile shall be placed over the cover sheeting anchoring all four corners and the middle of the cover sheeting securely.
- No piles shall be built on, or in contact with any tree stumps >10" diameter.
- Piles created on downed logs, the log in contact with any pile shall be bucked to create a 4' separation in the log (to break the continuity and limit fire spread if the log should be ignited).
- logs over 8" diameter generated from thinning shall be limbed with limb wood added to piles, cut to 4' lengths and dispersed a minimum of 6' separation from downed logs, leave trees and stumps.
- In some units specific pile placement will be required to avoid damage to sensitive plant colonies, maps with exclusion areas will be included, the exclusion areas will be clearly marked and defined by the COR before work takes place. Any piles constructed in exlusion areas will be moved by the contractor.

#### Training Specialist Message

#### To assure proper documentation for your assignment:

1. Scan the QR Code

2. Complete the Trainee Registration Form -

This is the link to sign up -

#### At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

#### Fire Friendly Finance Message

#### \*\*\*Yreka High School Rm 16\*\*\*

Team 2 Finance will accept electronic submission of documents, or paper copies. Please do not do both. Physical copies may be dropped off in the labeled boxes outside of classroom 16 at Yreka High School. Electronic copies may be emailed to 2022.mckinney.finance@firenet.gov

DEMOB- Is in person only- No virtual demobs- Please bring your shift ticket books or CTR's in case we are missing something. Only 1 person per demob (CRWB or Strike Team Leaders). To expedite the demob process, put a remark in your CTR or S/T with your demob date so we can prepare your draft OF-288 or OF-286 before you come.

# Please come see finance!!!!!

**DEMOB PHONE: 916-798-5238** 

# 20000 Block and ALL State Resources

Briefing, Feeding, Finance, Check-In, Demob, etc. are located at: YREKA FAIRGROUNDS
1712 Fairlane Rd, Yreka

#### **DEMOB MESSAGE**

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes "starting the walk."

 Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization Unit.

#### **FINANCE MESSAGE**

#### TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL- Make sure you have started your eFC-33's and update after each shift. Please make sure ePay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS- Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
  - o Reminder VIN numbers must match contracts exactly.

#### COMP / CLAIMS

- DAMAGE CLAIMS- For all damages during fire suppression activities to property or vehicle, complete an ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors should complete IIPP-15's and come to the COMP/CLAIMS
  Unit to enter into IAPS.

#### **DIVISION / GROUP - LINE SUPERVISORS**

Please turn in hired equipment shift tickets at the end of each shift.

#### FIRE SUPPRESSION REPAIR MESSAGE

Berms and push-piles should be spread to the extent feasible by back-blading with a tractor or with an excavator. Debris piled against standing timber should be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots, staging areas, and safety zones remove and/or breach berms so that runoff can be dissipated. Cross-drain these areas to effectively dissipate water as necessary.

Waterbreaks should be constructed at an approximately 45° angle at a minimum depth of 10" from the bottom of the cut to the top of the berm. Where possible, the discharge from the waterbreaks should be directed into vegetated areas to minimize erosive forces. Where dozerline or handline has crossed a watercourse, the channel should be cleared of soil and debris to re-establish the channel. Waterbreaks on handlines should be installed every 50' or closer as needed.

Waterbreak maximum spacing:	<u>Grade</u>	0-10%	11-25%	26-50%	>50%
	Spacing	0-200'	150'	100′	75'

Roads used in fire suppression activities should be left in at least as good a condition as they were found. Gravel and soil surface roads should be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips should be installed for drainage. Inside ditches damaged from suppression activities should be cleaned and left unobstructed.

If any archaeological resources are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.

MCKINNEY CA-KNF-006177
