INCIDENT ACTION PLAN MCKINNEY INCIDENT

CA-KNF-006177
P5PX2F (0505)

FIRE INFORMATION: 530-289-8920

2022.mckinney@firenet.gov

MEDIA REQUESTS: 530-918-8729

OPERATIONAL PERIOD

8/16/2022 0700

to

8/17/2022 0700

Tuesday

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">McKinney</p>	2. Operational Period:	Date From: 8/16/2022 Time From: 0700	Date To: 8/17/2022 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Leaders Intent

Implement a full suppression strategy on the McKinney Fire. Values at risk include human safety, private timberlands, communities, critical infrastructure and associated improvements. Apply tactics that offer the highest probability of success.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate all public information with CALFIRE and the Klamath National Forest to provide timely and continuous information to affected agency partners, cooperators, and the public.
- Work with Resource Advisors to implement the fire suppression repair plan.
- Provide initial attack capability for the Klamath National Forest on the Oak Knoll and Scott River Ranger Districts.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the McKinney Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Personal safety and the safety of others, including driving slowly and defensively.
- Fatigue management by taking breaks and maintaining work/rest cycles.
- Limiting exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines.
- Professional behavior, and timely/effective communication.

Control Objectives

- Keep the McKinney Fire contained to the current fire perimeter to prevent the fire from spreading to private property, surrounding communities, and other values at risk.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire Weather Forecast

Tuesday AUG 16, 2022

FORECAST NO: 15
 PREDICTION FOR: Tuesday/Aug 16, 2022
 ISSUED: 2000, Aug 15, 2022

NAME OF FIRE: McKinney
 UNIT: Klamath N.F.
 Incident Meteorologist: Sam Roberts

***** HEAT ADVISORY, SLIGHT CHANCE T'STORM (DRY LIGHTNING), VERY HOT AND UNSTABLE, LOW RH, BREEZY *****

DISCUSSION: A heat advisory is in place today due to hot afternoon temperatures. Moisture begins to increase today from out of the south. If we see enough moisture, an isolated thunderstorm with dry lightning is possible, mainly during the afternoon through late evening. Otherwise, mostly sunny, dry, very hot and unstable, low RH, and breezy afternoon west-northwest winds.

TUESDAY: HEAT ADVISORY. SLIGHT CHANCE T'STORM (DRY LIGHTNING), VERY HOT AND UNSTABLE, LOW RH, BREEZY.

- **WEATHER:** Slight chance afternoon/evening thunderstorm (dry lightning). Otherwise, mostly sunny, dry, very hot and unstable, and breezy afternoon winds.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: east 3-6 mph through 1200, then west-northwest 5 to 10 mph gusts to 18 mph through 2000. **Erratic wind gusts to 50 mph possible near any thunderstorms.**
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MAX TEMPERATURES:** 100-105 bottom and clear areas, 87-92 highest ridgetops and smoked in areas.
- **MIN RH:** 10-20% bottom and clear areas, 15-25% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1300. Smoke inversion unlikely to mix out across smoked in areas.

TUESDAY NIGHT: SLIGHT CHANCE T'STORM (DRY LIGHTNING), WEST-NORTHWEST WIND GUST 18 MPH.

- **WEATHER:** Slight chance thunderstorm through late evening. Otherwise, dry and mostly clear, gusty west-northwest winds early, then becoming light and easterly after midnight. Poor to moderate RH recovery above 5000 feet.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: west-northwest 5 to 10 mph gusts to 18 mph through 2200, then becoming easterly 3 to 6 mph after midnight. **Erratic wind gusts to 50 mph possible near any thunderstorms.**
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MIN TEMPERATURES:** 58-63 bottom, 65-70 top.
- **MAX RH:** 50-60% bottom, 33-43% top.
- **INVERSION:** Weak developing near mid-slope and secondary inversion at 5,000 feet.

WEDNESDAY: FIRE WEATHER WATCH. HEAT ADVISORY, SLIGHT CHANCE T'STORM (DRY LIGHTNING), VERY HOT AND UNSTABLE, LOW RH.

- **WEATHER:** Slight chance thunderstorm through the day (possible dry lightning). Otherwise, mostly sunny to partly cloudy, dry, very hot and unstable, and breezy afternoon winds.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: east 3-6 mph through 1200, then west-northwest 5 to 10 mph gusts to 18 mph through 2000. **Erratic wind gusts to 50 mph possible near any thunderstorms.**
- **CHANCE OF WETTING RAIN:** 15%.
- **RAIN AMOUNTS:** 0.10" to 0.25"
- **MAX TEMPERATURES:** 103-107 bottom and clear areas, 89-94 highest ridgetops and smoked in areas.
- **MIN RH:** 10-20% bottom and clear areas, 15-25% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1300. Smoke inversion unlikely to mix out across smoked in areas.

Extended outlook: **Thursday:** Slight chance thunderstorms (possible dry lightning). Otherwise, mostly sunny to partly cloudy, very hot and dry. Breezy afternoon winds and we become very unstable. Highs 90-105. Minimum humidity: 14-24%. Winds west-northwest 5-10 mph with gusts to 18 mph. **Friday through Sunday:** Mostly dry, but will keep mention of a slight chance for a thunderstorm due to model uncertainty. Otherwise, mostly sunny, hot, low RH. Highs from 85-104. Minimum humidity: 14-24%. Winds west-northwest 5-10 mph with gusts to 18 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 16

TYPE OF FIRE: Wildfire

FIRE NAME: McKinney

OPERATIONAL PERIOD: 08/16/2022 24 hr

DATE ISSUED: 08/15/2022

TIME ISSUED: 1800

UNIT: CA-KNF

SIGNED: 

Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY:

**** See Fire Weather Forecast****

Weather will be hot and dry with afternoon breezy west-northwest winds. A heat advisory is in place due to forecasted afternoon temperatures. These conditions combined with the predicted unstable atmosphere will provide critical fire weather. Potential for thunderstorms will be in the forecast for the next several days.

FUELS SUMMARY:

Several years of persistent drought and a water year which has received less than 50% of normal rainfall, has the fire footprint within an area identified as "Extreme Drought". These drought conditions had both the live and dead ground fuels at critically dry levels when the fire ignited on July 29th. The dry fuel conditions and strong erratic winds from nearby thunderstorms, caused extreme fire behavior on the McKinney fire with a high resistance to control during the first several operational periods. Fire conditions improved when a precipitation event occurred on August 2nd, mostly impacting the eastern portion of the fire. Resources have done a great job controlling the fire, but critical fuel and weather conditions will persist as we remain in what is historically the peak of fire season for northern California.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The extreme conditions during the first several burn periods caused most of the McKinney fire to burn with high intensity. The burn intensity, precipitation event, and hard work has little signs of noticeable heat occurring across the fire. Given the next several operational periods predicted weather, anticipate smokes to pop-up each afternoon. Place lookouts who can access the potential and act accordingly.

Fire Danger Indices – 2022 IRPG Page 39
Energy Release Component (Oak Knoll): 97th+
August Average ERC Percentile: 70th

Peak Burn Period (1400-1800) - Probability of Ignition (PIG): 80% (shaded), 100% (unshaded)

SPECIFIC:

Branch I: Expect adverse afternoon winds to impact the upper elevations of the eastern flank, but there is minimal concern as crews have reported little signs of heat on these divisions for multiple operational periods.

Branch X: Most heat signatures showing on the overnight National Infrared Operations (NIROPS) is on the west side of the fire, which makes sense as this was the portion receiving little to no rain. The heat appears to be well interior and not accessible from ground crews. Continue to utilize aircraft to secure any heat that has potential to threaten control lines.

Branch XX: The fuels along the north side of the fire were lighter due to the 2014 Beaver fire and post fire thinning treatments. Minimal activity is expected.

Initial Attack: The potential for new ignitions will be high the next several days. Stay heads up and ensure LCES.

AIR OPERATIONS:

Sunrise 0620, Last Light 2038 (Daylength: losing 2 min, 30 sec)

Light smoke from the fires to the west will continue to linger in the area, but minimal impacts to aircraft is expected.

SAFETY

Scout your work and rest areas, identify hazards, and make them known. Limit the time spent around any snag, but especially those within the burn. Take time to become familiar with the Medical Emergency Plan and practice it.

Health & Safety Message

Incident: McKinney Fire CA-KNF-006177	Date/Op Period: Day/Night Shift 8/16-17/22
---	--

Hazards & Risks

Distracted Firefighting: Radios, cell phones, texting, conversations, eating, drinking, reading maps, looking at the fire.....the list goes on. It is easy to get distracted from the very task you are supposed to be focused on. Make every attempt to avoid these distractions whether you're driving or engaged in the fire fight; a brief nano-second of distraction can have disastrous results.

Wildlife & Livestock Encounters: Watch for wildlife and livestock within the fire area and along roadways. Bears are in the area. Avoid leaving food and trash in sleeping areas, along the fireline or at drop points. Secure your vehicles with windows up when parked in the field. Animals tend to be most active during the dawn and dusk hours when visibility is reduced on the road. Drive at "deer speed".

Air Operations: With air operations over the fire there comes a unique set of hazards and risks. Reference the blue pages in your IRPG. Consider mission need and aviation risk factors. Establish good communications with the aircraft and ensure ground personnel are aware of sling loads (and sites), retardant and water dropping operations.

Review Aviation Watch Out Situations!

Firefighter Health: With multiple days of working on the fireline; cuts, abrasions, rashes and blisters are accumulating on your body. Prevent infections by washing your hands often, take daily showers, wash or change your clothes frequently and care for minor wounds each shift. Treatment early-on will help prevent larger medical problems later!

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE WEATHER/FIRE BEHAVIOR	<ul style="list-style-type: none"> 100-HOUR FUELS BELOW 4% ERC'S 97th PERCENTILE High Temperatures and low RH in the forecast. Monitor current weather conditions and forecasts. Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. DO NOT SKIP AHEAD OF PILOT CAR. Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available.
ALL	STRUCTURE / URBAN INTERMIX HAZARDS	<ul style="list-style-type: none"> Survey burned out structures carefully. Avoid inhaling residue smoke and fumes. Watch for downed powerlines and exposed propane lines. Look for propane tanks and other hazardous materials
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around frequently.
ALL	HAZARD TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p. 22). Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas.
ALL	SAFETY ZONES	<ul style="list-style-type: none"> Follow safety zone guidelines (IRPG p. 6) Carefully evaluate burned areas before designation as safety zones due to spotty burning in numerous areas. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner.
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> Maintain 6' foot distance whenever possible. Wear masks when appropriate. Do frequent handwashing/sanitizing and disinfecting common surfaces. Notify MEDL if any symptoms arise.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotter. Avoid moving parts Ensure the use of effective communication (radio, hand signals). Identify hazards.
ALL	SUPPRESSION REPAIR	<ul style="list-style-type: none"> Scout out your work area and identify hazards prior to working. Watch for steep terrain and rolling materials that may be kicked loose by others working in the area. Avoid working in proximity to heavy equipment. Monitor personnel for heat related illness; stay hydrated and take frequent rest breaks.
ALL	LIGHT FLASHY FUELS/ SPOT FIRES	<ul style="list-style-type: none"> Live fuel moistures are at critical level. Expect rapid ROS when winds are present Ensure LCES is in place. Use caution when unburned fuels are between you and the fire.
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE	<ul style="list-style-type: none"> Drink 2: 1 water to sports drinks. Maintain 2:1 work/rest ratio Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS (IRPG P.110)

COVID-19 PREVENTION INFORMATION

MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available at the **Montague Elementary School location** (430 E. Prather St.) from **Adventure Medics, hours -0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals but testing is also available to anyone with COVID exposure concerns.

Federal employees enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees when the Community Levels are Medium or High.**

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

COVID-19 COMMUNITY LEVEL	MASKING DIRECTION (Federal Wildfire Incidents and within Federal Facilities)
HIGH	Individuals are required to wear masks around others while indoors, while sharing a vehicle, or when social distancing cannot be maintained.
MEDIUM and LOW	Individuals are not required to wear masks.

Community Levels are updated weekly by CDC and give direction for a Sun-Sat operation period.

McKinney Incident COVID Advisor – **Robin Wall, (530) 410-1721**

Prepared by **Bill Sanders, Lead COVID Advisor (530) 721-3865**

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Gena Fowlkes @ (909) 762-9032

MEDL Nick Stepanian @ (909) 908-4778

The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: **D**istance, **D**iagonal, **D**ivert, **D**ischarge, and **D**issipate.

Distance: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope %	Maximum Distance Apart (feet)	<i>Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Site Administrator's Handbook"</i>
1-6.....	300	
7-9.....	200	
10-14.....	150	
15-20.....	90	
21-40.....	50	
41-60.....	25

Specifications for Piling Slash

Hand Pile Construction:

- All activity generated and pre-existing fuels with a diameter between 1" and 8" shall be bucked to 4' or less and included in the hand piles. Exceptions include single logs that exhibit at least 50% decomposition.
- Hand piles shall be symmetrical, constructed neatly and **compactly**.
- Hand pile base shall **not** be constructed with material over 4", 4"< material will be stacked in the upper half of the pile.
- Slash that causes large air spaces in piles shall be cut to a minimum of 8"x 8" air spaces greater than 8"x8" are unacceptable.
- Material in piles shall be cut <4' per individual piece.
- Maximum piles size 6' in diameter and 6' in height and minimum pile size shall be 4' in diameter and 4' in height.
- Piles shall be distinct and separate from each other allowing at least 6' between each pile
- Piles shall be placed to limit scorch potential to leave trees, not in contact with leave trees and built up slope from leave trees when possible
- At least 50% of material in the lower third of the piles shall be composed of small diameter material and attached fines to create a kindling core.
- All piles shall be covered with Kraft type wax paper (wax side up).
- Pile covering sheet shall be placed to cover the bottom 2/3 of the pile and cover 50% of the surface area of the pile at this level. The remaining 1/3 of the pile shall be placed over the cover sheeting anchoring all four corners and the middle of the cover sheeting securely.
- No piles shall be built on, or in contact with any tree stumps >10" diameter.
- Piles created on downed logs, the log in contact with any pile shall be bucked to create a 4' separation in the log (to break the continuity and limit fire spread if the log should be ignited).
- logs over 8" diameter generated from thinning shall be limbed with limb wood added to piles, cut to 4' lengths and dispersed a minimum of 6' separation from downed logs, leave trees and stumps.
- In some units specific pile placement will be required to avoid damage to sensitive plant colonies, maps with exclusion areas will be included, the exclusion areas will be clearly marked and defined by the COR before work takes place. Any piles constructed in exclusion areas will be moved by the contractor.

FINANCE MESSAGE

Fire Name: McKinney
Fire Number: CA-KNF-006177
Accounting Code: P5 PX2F (0505)
Email: 2022.mckinney.finance@firenet.gov

Finance Documents Needed upon “Check In” (If Not Already Submitted):

Please email these documents or scan the QR Code below, attach & submit.			
FED Equipment/ Crews: <ul style="list-style-type: none"> • Manifest - showing employment type (GS or WG) or AD rates if applicable 	Overhead: <ul style="list-style-type: none"> • AD/Casual Hire Form • If regular Agency please ensure “GS” or “WG” is written on your first CTR 	Contract Equipment/ Contract Crews: <ul style="list-style-type: none"> • Agreement • Manifest • Resource Order • Inspections 	Cooperator: <ul style="list-style-type: none"> • Cooperative Agreement • Resource Order

When emailing finance:

- Overhead/FED: *subject line:* TIME, Resource #, Resource Name
- Equipment/Cooperator: *subject line:* EQTR, Resource #, Resource Name

Prior to your demob date, please contact Finance *via email* to expedite the demob process. Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay documents for review and signature.

Local Government Resources on CFAA

If you are demobing and there is no OES AREP there:

- Have the FSC or IC review and sign your 42s
 - You give the incident the pink copy
 - You keep the gold copy
- You mail the white and green (if it has a green) to OES Headquarters per the instructions on the 42

**OES JOB AIDS, FORMS, F-42 SAMPLES AND
CFAA AGREEMENT**

**Your OES Fire & Rescue Assistant Chief
Patrick Titus
916-634-9225**

Training Specialist Message

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

To assure proper documentation for your assignment:

1. Scan the QR Code
2. Complete the Trainee Registration Form

This is the link to sign up -

At the end of your assignment:

1. **Trainee:** Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.
3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's signed by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

Human Resource Message

COMMUNICATION

Effective communication requires a mutual exchange of both giving and receiving information. Making sure we provide and receive clear expectations is essential for successful communication. Consideration for the needs of both parties, will maintain effective working relationships. Effective communication prevents misunderstandings and injury.

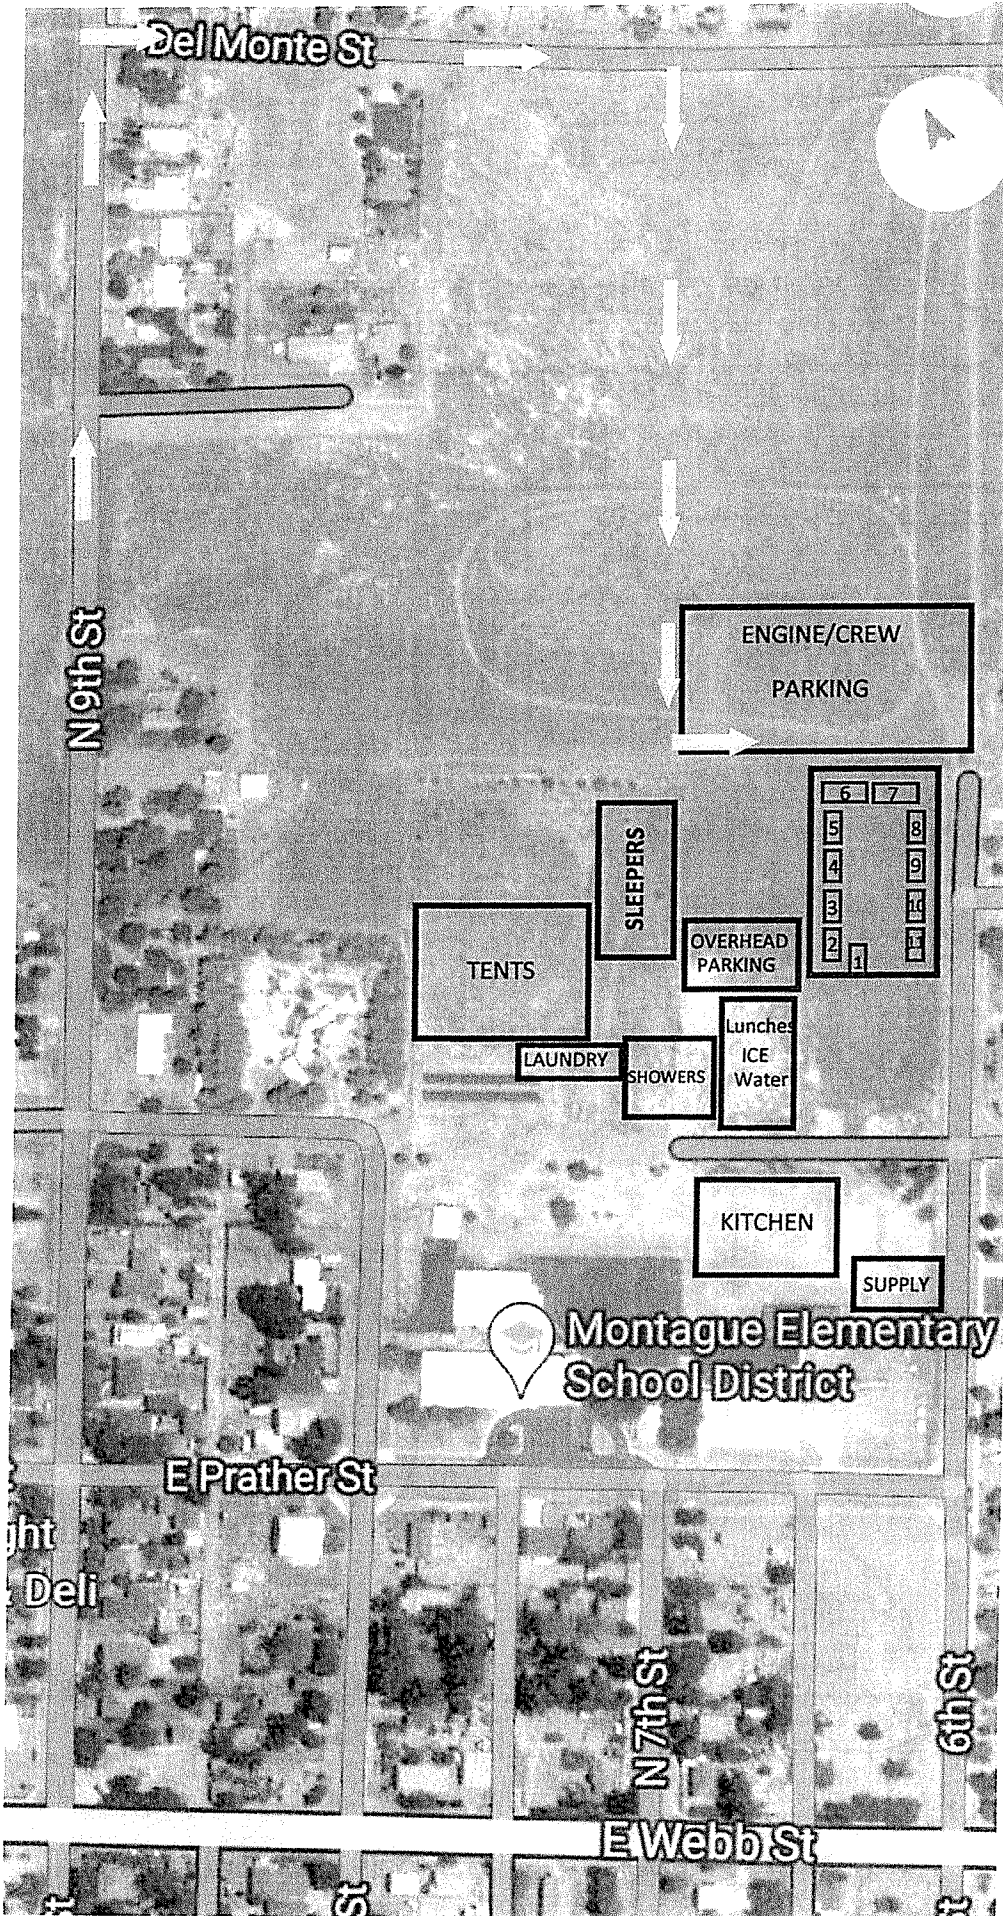

**“Behind the need
to communicate
is the need to
share. Behind
the need to share
is the need to be
understood.”**

Leo Rosten

Thank you!

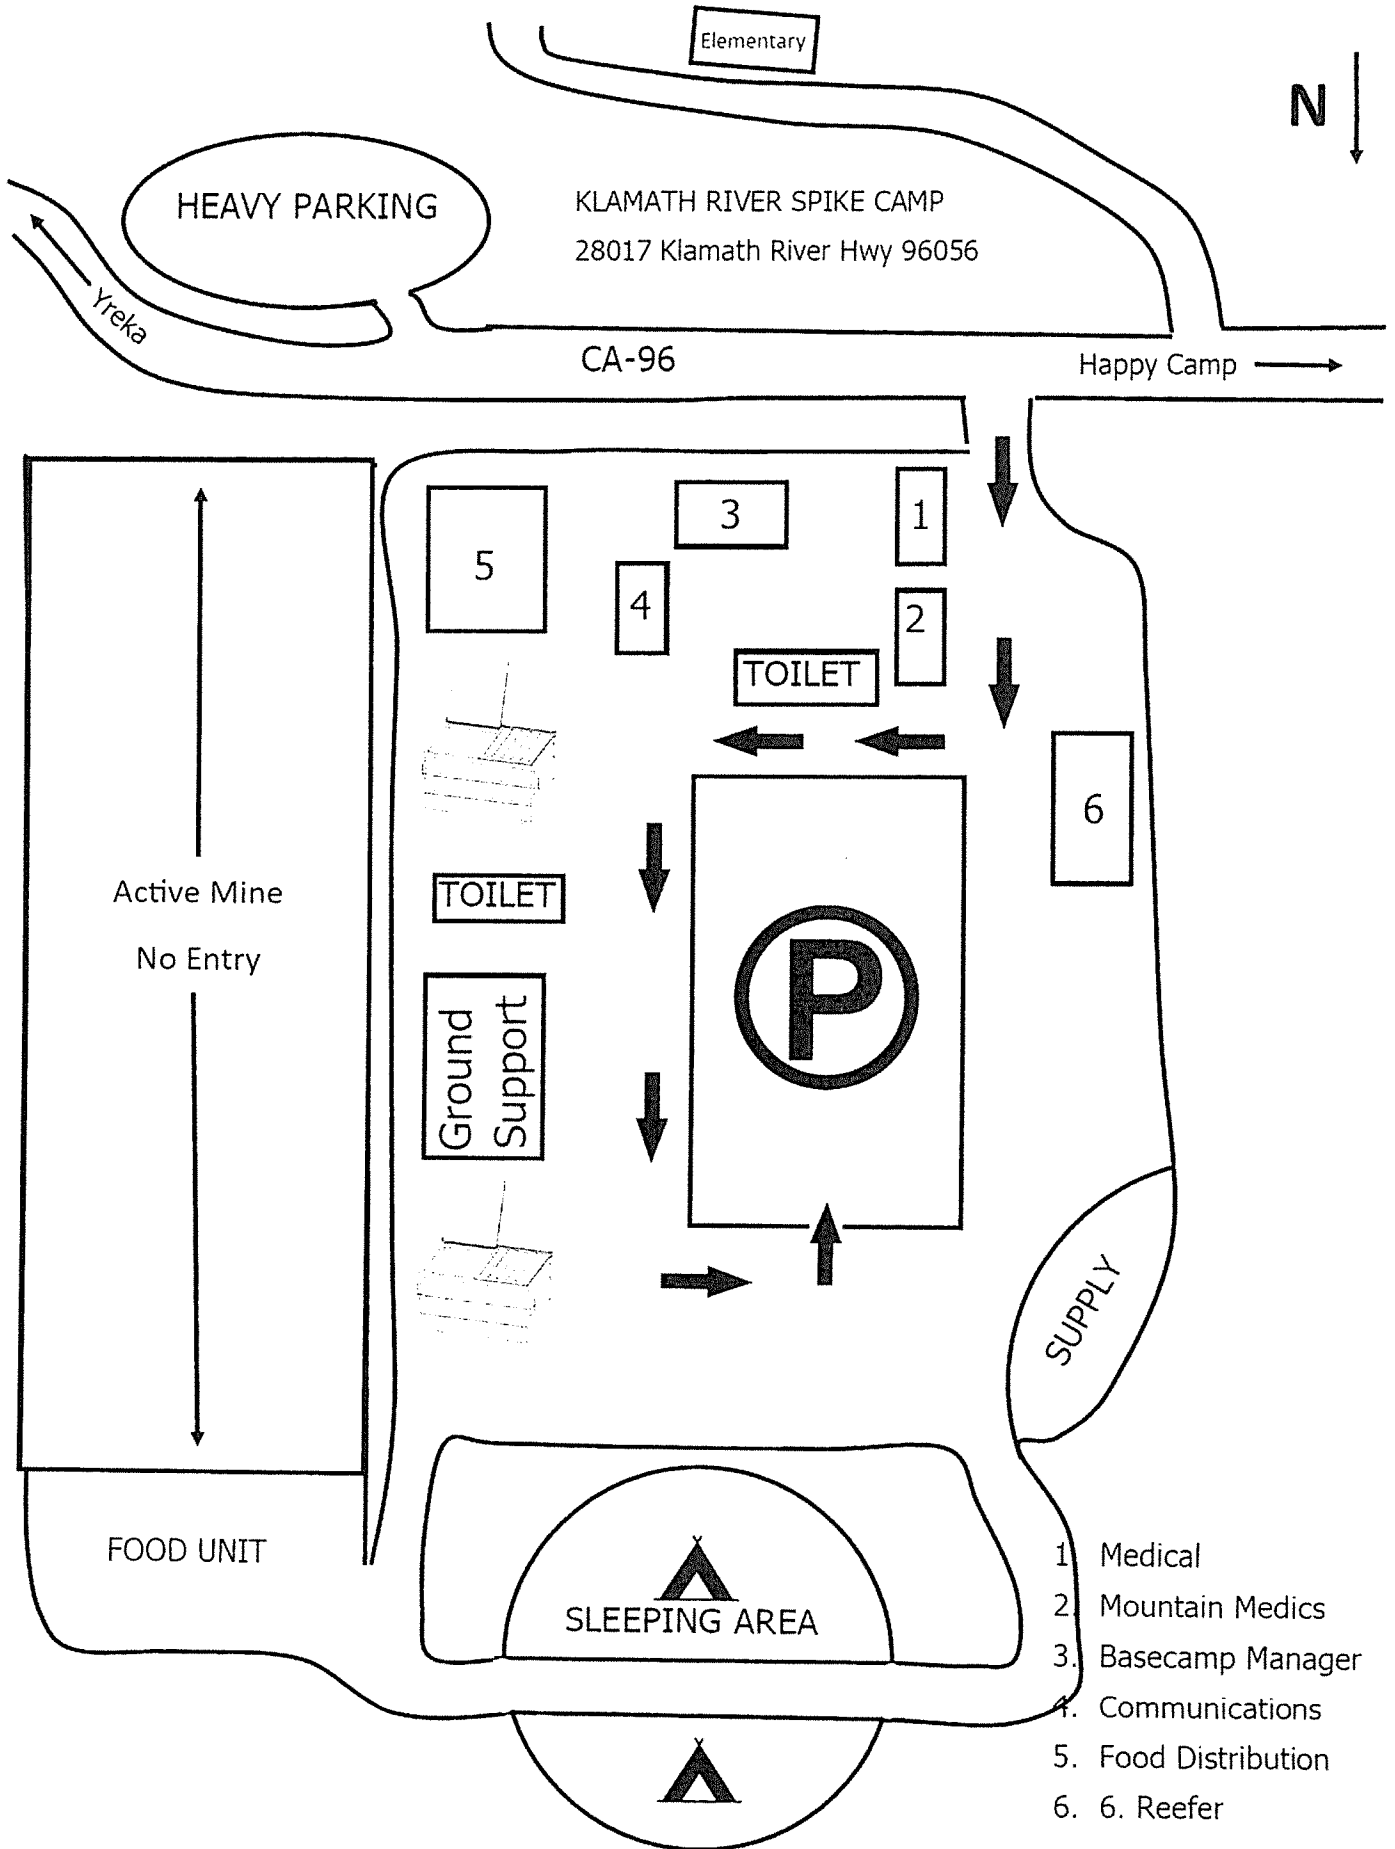

Adrian Escobedo- HRSP-

If you have any questions or concerns, please contact me at adrian.escobedo@usda.gov or call me 530-523-3804.

E-20199	STF XTB 4229F	0830

Report to the Yreka Fairgrounds DEMOB Trailer at your scheduled time.

20000 Block and ALL State Resources

Briefing, Feeding, Finance, Check-In, Demob, etc. are located at:

YREKA FAIRGROUNDS
1712 Fairlane Rd, Yreka

DEMOB MESSAGE

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes “starting the walk.”

- Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization Unit.

FINANCE MESSAGE

TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL- Make sure you have started your eFC-33’s and update after each shift. Please make sure ePay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS- Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
 - Reminder – VIN numbers must match contracts exactly.

COMP / CLAIMS

- DAMAGE CLAIMS- For all damages during fire suppression activities to property or vehicle, complete an ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors should complete IIPP-15’s and come to the COMP/CLAIMS Unit to enter into IAPS.

DIVISION / GROUP - LINE SUPERVISORS

Please turn in hired equipment shift tickets at the end of each shift.

FIRE SUPPRESSION REPAIR MESSAGE

Berms and push-piles should be spread to the extent feasible by back-blading with a tractor or with an excavator. Debris piled against standing timber should be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots, staging areas, and safety zones remove and/or breach berms so that runoff can be dissipated. Cross-drain these areas to effectively dissipate water as necessary.

Waterbreaks should be constructed at an approximately 45° angle at a minimum depth of 10” from the bottom of the cut to the top of the berm. Where possible, the discharge from the waterbreaks should be directed into vegetated areas to minimize erosive forces. Where dozerline or handline has crossed a watercourse, the channel should be cleared of soil and debris to re-establish the channel. Waterbreaks on handlines should be installed every 50’ or closer as needed.

Waterbreak maximum spacing:	<u>Grade</u>	<u>0-10%</u>	<u>11-25%</u>	<u>26-50%</u>	<u>>50%</u>
	Spacing	0-200’	150’	100’	75’

Roads used in fire suppression activities should be left in at least as good a condition as they were found. Gravel and soil surface roads should be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips should be installed for drainage. Inside ditches damaged from suppression activities should be cleaned and left unobstructed.

If any archaeological resources are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p>																													
<p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other																										
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>																										
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>																										
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG PAGE 106</p>																													
Treatment:																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location (if different): <i>(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:</p>																													
Helispot / Extraction Site Size and Hazards:																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication :</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">Function</th> <th style="width: 20%;">Channel Name/Number</th> <th style="width: 15%;">Receive (RX)</th> <th style="width: 15%;">Tone/NAC *</th> <th style="width: 15%;">Transmit (TX)</th> <th style="width: 15%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL
