# Fire Weather Forecast

# Thursday AUG 18, 2022

FORECAST NO: PREDICTION FOR: ISSUED:

Thu Aug 18, 0700/Fri Aug 19, 0700

2000, Aug 17, 2022

NAME OF FIRE:

UNIT:

McKinney Klamath N.F.

Incident Meteorologist: Sam Roberts

\*\*\* RED FLAG WARNING (DRY LIGHTNING), CHANCE T'STORM, HEAT ADVISORY, VERY UNSTABLE, LOW RH\*\*\*

DISCUSSION: Red Flag Warning in effect through 2000 for dry lightning. Chance of isolated to scattered thunderstorms through the day. Dry lightning is a significant concern, but a chance of wetting rain is also possible directly under any stronger storm cells. Heat Advisory remains in effect through 2300. Cloud cover from nearby storms could limit heating to below heat advisory levels.

### THURSDAY: RED FLAG WARNING (DRY LIGHTNING), CHANCE T'STORM, HEAT ADVISORY, VERY UNSTABLE, LOW RH.

- WEATHER: Red Flag Warning and Heat Advisory in effect. Chance of iso/sct thunderstorms through the day with dry lightning and chance of wetting rain. Otherwise, mostly sunny to partly cloudy, dry, very hot and unstable, breezy afternoon winds.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: out of the east 3-6 mph through 1200, then out of the west-northwest 5 to 10 mph gusts to 15 mph through 2000. Erratic wind gusts to 50 mph possible near any thunderstorms.
- CHANCE OF WETTING RAIN: 15%. LAL (Lightning Activity Level): 6
- RAIN AMOUNTS: 0.10" to 0.25"
- MAX TEMPERATURES: 101-106 bottom and clear areas, 88-93 highest ridgetops and smoked in areas.
- MIN RH: 12-22% bottom and clear areas, 15-25% top and smoked in areas. RH minimums higher for areas that get rain.
- INVERSION: Weak to moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1300. Smoke inversion may mix out across smoked in areas.

### THURSDAY NIGHT: RED FLAG WARNING EXPIRES AT 2000, HEAT ADVISORY EXPIRES AT 2300.

- WEATHER: Red Flag Warning expires at 2000 and the Heat Advisory expires at 2300. Slight chance of an isolated thunderstorm until 2000 with dry lightning and chance of wetting rain. Otherwise, dry and partly cloudy, winds becoming light and easterly after midnight.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: out of the west-northwest 4 to 8 mph gusts to 15 mph through 2200, Then out of the east 3 to 6 mph late in the night. Erratic wind gusts to 50 mph possible near any thunderstorms.
- CHANCE OF WETTING RAIN: 15%, LAL (Lightning Activity Level): 6 (through 2000), then 1 through the rest of the night.
- RAIN AMOUNTS: 0.10" to 0.25"
- MIN TEMPERATURES: 59-63 bottom, 66-70 top.
- MAX RH: 55-65% bottom, 40-50% top.
- INVERSION: Weak to moderate developing near mid-slope and secondary inversion at 5,000 feet.

### FRIDAY: HOT, MOSTLY DRY, BREEZY AFTERNOON WINDS, UNSTABLE, LOW RH.

- WEATHER: Mostly sunny, hot, mostly dry, unstable, and breezy afternoon winds are expected. Chance of rain or isolated storm is 5%.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: east 3-6 mph through 1200, then west-northwest 5 to 10 mph gusts to 18 mph through 2000. Erratic wind gusts to 50 mph possible near any thunderstorms.
- CHANCE OF WETTING RAIN: 5%. LAL (Lightning Activity Level): 0
- RAIN AMOUNTS: 0.10" to 0.25"
- MAX TEMPERATURES: 97-102 bottom and clear areas, 83-88 highest ridgetops and smoked in areas.
- MIN RH: 14-24% bottom and clear areas, 20-30% top and smoked in areas.
- INVERSION: Weak to moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1300. Smoke inversion may mix out across smoked in areas.

Extended outlook: Saturday: Mostly dry, only a 5% chance for a shower or thunderstorm. Otherwise, mostly sunny, hot and dry. Breezy afternoon winds and we become unstable. Highs 86-103. Minimum humidity: 14-24%. Winds west-northwest 5-10 mph with gusts to 18 mph. Sunday through Tuesday: Mostly dry, only a 5% chance of a shower or thunderstorm. Otherwise, mostly sunny, hot, low RH. A few degrees cooler by Monday but still near 100. Highs from 85-104. Minimum humidity: 14-24%. Winds west-northwest 5-10 mph with gusts to 18 mph.

# FIRE BEHAVIOR FORECAST FORECAST NUMBER: 18 TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: 8/18-19/2022 (0700-0700) TIME ISSUED: 2000 UNIT: CA-KNF SIGNED: Typed/printed: Nic Elmquist (FBAN)

### **INPUTS**

**WEATHER SUMMARY:** 

\*\* See Fire Weather Forecast\*\*

A **Red Flag Warning** remains in place for the fire area until 2000 today for potential thunderstorms and dry lightning. Strong, erratic, outflow winds are possible near any thunderstorms. In addition, a **Heat Advisory** continues to be issued until 2300 for high temperatures.

### **FUELS SUMMARY:**

Several years of persistent drought and a water year which has received less than 50% of normal rainfall, has the fire footprint within an area identified as "Extreme Drought". These drought conditions had both the live and dead ground fuels at critically dry levels when the fire ignited on July 29<sup>th</sup>. The dry fuel conditions and strong erratic winds from nearby thunderstorms, caused extreme fire behavior on the McKinney fire with a high resistance to control during the first several operational periods. Fire conditions improved when a precipitation event occurred on August 2<sup>nd</sup>, mostly impacting the eastern portion of the fire. Resources have done a great job containing, mopping up, and rehabbing the fire, but critical fuel and weather conditions will persist as we remain in what is historically the peak of fire season for northern California.

### **OUTPUTS**

### **FIRE BEHAVIOR**

### **GENERAL**:

Heat remains isolated to mainly burning stumps well interior with limited threat to the control lines. Keep lookouts posted with eyes into the areas of the perimeter with unburned islands of vegetation. Continue to evaluate and utilize aircraft as needed for areas that can potentially threaten control lines if left unchecked and cannot be accessed by ground crews.

Fire Danger Indices – 2022 IRPG Page 39
Energy Release Component (Oak Knoll): 97<sup>th</sup>+
August Average ERC Percentile: 70<sup>th</sup>

Peak Burn Period (1400-1800) - Probability of Ignition (PIG): 90% (shaded), 90% (unshaded)

### SPECIFIC:

Branch V: There continues to be minimal signs of heat along the eastern flank of the fire.

**Branch X**: The fixed wing infrared aircraft, FireWatch 51, flew the fire yesterday morning. The heat signatures were minimal and concentrated around the Mill Creek area in Div. A and Div. D.

Branch XX: Minimal signs of fire activity have been noted for several days and this trend is expected to continue.

**Initial Attack:** The KNF and local area received multiple storms producing cloud to ground strikes yesterday. Be prepared for potential hold over fires to be detected today. Local knowledge is critical to navigate the network of roads to make access to any new fires. Lean on the local resources for information, including best travel routes.

### **AIR OPERATIONS:**

Sunrise 0622, Last Light 2035 (Daylength: losing 2 min, 30 sec)

Thunderstorms remain in the forecast, which can ground aircraft periodically throughout the operational period.

### SAFETY

Keep in mind thunderstorms can produce strong, erratic, outflow winds even if they don't produce lighting or rain. The IMETs will monitor the situation and provide timely updates but remember sometimes storms develop rapidly.

# Health & Safety Message

 Incident:
 McKinney Fire
 Date/Op Period:
 8/18 - 19/22

 CA-KNF-006177
 0700-0700

### Hazards & Risks

ATV/UTV Safety: UTV & ATV's are great fireline tools to expedite equipment and personnel movement around more remote areas of the fire, HOWEVER there are regulations that govern the operation and safety of the vehicles. Operators (drivers) must have had the appropriate level of training by their agency. Also, per Forest Service:

FS – UTV Helmet (for fire use) – must meet the policy within the Safety Handbook (6709.11), Chapter 70, 71.12; Exhibit 01 states "Specialized Equipment, such as ATVs, UTVs, Dirt Bikes, Snowmobiles (Department of Transportation-approved helmet)." Wearing hardhats while driving or riding on a UTV is not allowed. Forest Service policy provides no exception to the helmet requirement for low speeds, smooth travel surfaces, or administrative use. UTV Helmet (for fire use) requirements are the same as ATV use. Helmets must meet Snell, or DOT ANSI certification. A 3/4 face model meeting Snell or DOT certification is acceptable for use. Use of half "shorty" helmets requires a JHA/RA for fireline use approved by the Incident Commander or relevant Line Officer and must include justification for its use.

-Know your equipment

-Inspect your equipment

-Maintain your equipment

Use engineered safety features built into your equipment and wear all appropriate PPE when operating it. It just might come in handy......

KNF ECC	YICC DISPATCH	ON DUTY CAPTAIN	530-841-4300

- New starts within the McKinney TFR boundaries will be reported to the Yreka Interagency Command Center. YICC will determine jurisdiction and appropriate response.
- YICC will coordinate with AOBD and McKinney Air Attack for aviation response to new starts within the TFR regardless of agency. Aviation Frequencies will remain on McKinney frequencies for Air Tactics and TFR victor.
- If jurisdiction of the new start is determined to be under Siskiyou Unit Protection or within the Mutual Threat Zone (5 miles) the Air to Ground, Command and Ground Tactical frequency will be assigned as local IA frequencies. All other aviation frequencies will remain on TFR/ McKinney team frequencies.
  - AIR TACTICS 166.6000

# COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

# Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

### **COVID-19 Testing availability – (2) locations**

McKinney Base Camp (430 E. Prather St.) - Adventure Medics

Klamath River Spike Camp (28017 Hwy 96) - Mountain Medics

Priorities for testing will be for those with COVID-related symptoms and those with COVID exposure.

### Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

### **Mask Wearing**

Mask wearing will be required when Siskiyou County community level is high. The Siskiyou County community level for the week of August 15, 2022 – August 21, 2022 is **Medium**.

# Local Government Resources on CFAA If you are demobing and there is no OES AREP there:

➢ Have the FSC or IC review and sign your 42s
 ➢ You give the incident the pink copy
 ➢ You keep the gold copy
 ➢ You mail the white and green (if it has a green) to OES Headquarters per the instructions on the 42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your OES Fire & Rescue Assistant Chief Patrick Titus 916-634-9225

### Training Specialist Message

### To assure proper documentation for your assignment:

- 1. Scan the QR Code
- 2. Complete the Trainee Registration Form

### At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

Trainee Exit Interview

- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

# The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: Distance, Diagonal, Divert, Discharge, and Dissipate.

**Distance**: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

**Diagonal**: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

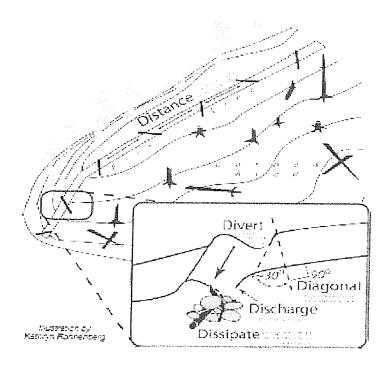

**Divert**: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

**Discharge**: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

**Dissipate**: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope	Maximum Distance Apart (feet)
1-6	330
7-9	200
10-14	150
15-20	90
21-40	50
41-60	

Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook".

Reference, Hauge, C.J., M.J. Famiss and F.D. Euphrat, 1979, Soil procion in California's Coast Forest District. California Geology, June, 1979

# **REQUEST ACCESS TO ARCGIS FIELD MAPS**

for interactive mobile maps and field data collection

# STEP 1

Request a NIFC ArcGIS Account if you do not already have one

NIFC Account Request Form https://bit.ly/3OLBG1W

## STEP 2

Request access to collect and/or view incident data

Email <u>Dawn\_Hutchinson@firenet.gov</u>
Subject: Request McKinney Access Include your name, position, and NIFC login in your email.

# STEP 3

Download ArcGIS Field Maps app

 Search "ArcGIS Field Maps" in the App Store for iPhone & on Google Play for Androids Sign into your NIFC ArcGIS account through the app once installed

For More Instructions on how to use Field Maps, scan code below:

- Equipment/Cooperator: subject line: EQTR, Resource #, Resource Name

Prior to your demob date, please contact Finance via email to expedite the demob process.

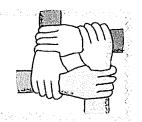

Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay

documents for review and signature.

# Human Resource Message

# Our time is getting shorter... How about our Tempers???

With the hard work and especially the changes taking place, it is easy to get on edge and "on the edge" with each other. Let's guard against that, and try to help each other out.

A quick temper will make a fool of you soon enough. ~Bruce Lee

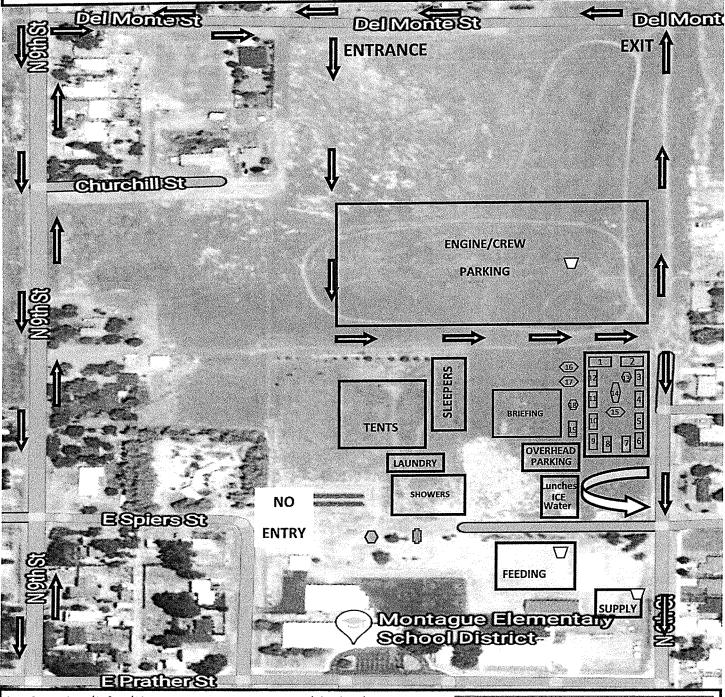

Have a great shift!

Adrian Escobedo, HRSP 530-523-3804

# MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH. Use the following items to communicate situation to communications/dispatch. 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." 2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care. □RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. ☐YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk,  $2^{\circ} - 3^{\circ}$  burns not more than 1-3 palm sizes. Severity of Emergency / Transport □GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Priority Ex: Sprains, strains, minor heat-related illness. Nature of Injury or Illness Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree) Mechanism of Injury Air Ambulance / Short Haul/Hoist Transport Request Ground Ambulance / Other Descriptive Location & Lat. / Long. Patient Location (WGS84) Geographic Name + "Medical" Incident Name (Ex: Trout Meadow Medical) Name of on-scene IC of Incident within an On-Scene Incident Commander Incident (Ex: TFLD Jones) Name of Care Provider Patient Care (Ex: EMT Smith) 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG PAGE 106 Treatment: 4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location: Helispot / Extraction Site Size and Hazards: 5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication: 6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Channel Name/Number Tone/NAC 1 Function Transmit (TX) Receive (RX) Tone/NAC \* COMMAND AIR-TO-GRND TACTICAL 7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. . 8. ADDITIONAL INFORMATION: Updates/Changes, etc. . REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively. .
