INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">McKinney</p>	2. Operational Period:	Date From: 8/24/2022 Time From: 0700	Date To: 8/25/2022 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Leaders Intent

Implement a full suppression strategy on the McKinney Fire. Values at risk include human safety, private timberlands, communities, critical infrastructure and associated improvements. Apply tactics that offer the highest probability of success.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate all public information with CALFIRE and the Klamath National Forest to provide timely and continuous information to affected agency partners, cooperators, and the public.
- Work with Resource Advisors to implement the fire suppression repair plan.
- Provide initial attack capability for the Klamath National Forest on the Oak Knoll and Scott River Ranger Districts.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the McKinney Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Personal safety and the safety of others, including driving slowly and defensively.
- Fatigue management by taking breaks and maintaining work/rest cycles.
- Limiting exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines.
- Professional behavior, and timely/effective communication.

Control Objectives

- Keep the McKinney Fire contained to the current fire perimeter to prevent the fire from spreading to private property, surrounding communities, and other values at risk.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

McKinney Fire Weather Forecast

FORECAST NO: 23
 PREDICTION FOR: 0700 Wed Aug 24 - 0700 Thu Aug 25
 ISSUED: 1800, Aug 23, 2022

NAME OF FIRE: McKinney
 UNIT: Klamath N.F.
 Incident Meteorologist: Terry Lebo

Weather Summary

High pressure aloft will strengthen over the area Wednesday and Thursday. Temperatures will rise well above normal while afternoon wind gusts will decrease slightly in strength. A dry cold front will move across northern California late Friday or Saturday. Cooler temperatures will arrive on Saturday. Gusty winds are expected with the cold front as well as an abundance of dry air.

WEDNESDAY:

- **WEATHER:** Sunny.
- **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1100 then upslope 4-6 mph with occasional gusts 10-15 mph. Ridges, unsheltered areas, wind-aligned drainages: From the east 3-6 mph through 1200 then from the northwest 7-10 mph gusts 15-20 mph through 2000.
- **CHANCE OF WETTING RAIN:** 0%
- **RAIN AMOUNTS:** none.
- **LAL (Lightning Activity Level):** 1
- **MAX TEMPERATURES:** 96-102 lower elevations, 80-87 highest ridgetops.
- **MIN RH:** 14-24% lower elevations, 20-30% ridgetops.
- **INVERSION:** Moderate mid-slope inversion mixing out around 1200.

WEDNESDAY NIGHT:

- **WEATHER:** Clear. Moderate to excellent RH recovery.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages above mid-slope: from the northwest 7-10 mph gusts 15-20 mph through 2000, then becoming east-northeast 5 to 8 mph with an occasional gust to 12 mph.
- **CHANCE OF WETTING RAIN:** 0%
- **RAIN AMOUNTS:** none.
- **LAL (Lightning Activity Level):** 1
- **MIN TEMPERATURES:** 57-62 lower elevations, 61-66 in the thermal belt.
- **MAX RH:** 60-80% lower elevations, 40-60% in the thermal belt.
- **INVERSION:** Moderate to strong inversion developing near mid-slope.

THURSDAY:

- **WEATHER:** Mostly sunny.
- **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1100 then upslope 3-6 mph with occasional gusts to 12 mph. Ridges, unsheltered areas, wind-aligned drainages: From the east 3-6 mph through 1200 then from the northwest 5-10 mph gusts around 15 mph through 2000.
- **CHANCE OF WETTING RAIN:** 0%
- **RAIN AMOUNTS:** none.
- **LAL (Lightning Activity Level):** 1
- **MAX TEMPERATURES:** 98-104 lower elevations, 84-90 highest ridgetops.
- **MIN RH:** 11-21% lower elevations, 20-30% ridgetops.
- **INVERSION:** Moderate to strong mid-slope inversion mixing out around 1300.

Extended Outlook

Friday: Mostly sunny. Highs 81-101. Minimum humidity: 15-30%. Winds west 10-15 mph with gusts 20-30 mph.
Saturday: Mostly sunny. Highs 71-91. Minimum humidity: 20-35%. Winds northwest 8-12 mph with 20-25 mph.
Sunday: Sunny. Highs 79-99. Minimum humidity: 10-25%. Winds west-north 7-10 mph with around 20 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 24	TYPE OF FIRE: Wildfire
FIRE NAME: McKinney	OPERATIONAL PERIOD: 8/24-25/2022 (0700-0700)
DATE ISSUED: 8/23/2022	TIME ISSUED: 1830
UNIT: CA-KNF	SIGNED: <i>Lauren Blake</i>
	Typed/printed: Lauren Blake (FBANT)

WEATHER SUMMARY: **Hot and Dry**
Temp: Day 96-102 (lower) 80-87(higher) Night 57-63 deg **RH:** Day 14-24% (lower) 20-30% (upper) Night: Max 60-80%
Winds: Day: E 3-6mph <1200, 7-10mph w Gust 15-20 in afternoon Night: NW 2-4 mph Sheltered, ENE 5-8mph G <12

FIRE BEHAVIOR

GENERAL:
Heat remains isolated to mainly burning stumps and heavy ground fuel well interior with limited threat to the control lines. Be heads up with forecasted increase in winds this afternoon, low RH's and fuels that are returning to critical dryness.

Fuels: Several years of persistent drought and a water year which has received less than 50% of normal rainfall, has the fire footprint within an area identified as "Extreme Drought." Fuels and fire danger are moving toward critical levels as we remain in what is historically the peak of fire season for northern California.

Energy Release Component (Oak Knoll): is **above the 90th** percentile at 62 (Fuel Model Y 90th percentile is 61)

Predicted fuel conditions:
1HR fuel moisture: 6% (-2) **10HR moisture:** 10%(-3) **100 HR moisture** 9%(-2) **1000 HR:** 10% (+1)
Energy Release Component: 62 **Burning Index:** 38 **Probability of Ignition (PIG)** <81%

Local Watchout Thresholds: 20' winds: >4 mph RH: <40% Temp: 75+ deg 1000hr moisture: <13%

Expected Surface Fire Behavior: (assumes 4 mph eye level wind and 50% slope)
Timber Understory (TU5) Timber with branches, shrubs: Flame length 6-9' and ROS 10-13 ch/hr head
Grass, Brush (2,SH7) Flame length 6-15' and ROS 30-50 ch/hr (GS2/SH7)

SPECIFIC:
McKinney Fire: The fire has not experienced perimeter growth for several weeks with the control lines being tested by hot, dry, and windy conditions during that timeframe. Infrared showing the amount of interior heat is diminishing but still present.

Initial Attack: Temperatures have warmed back-up to where any new starts have will likely pose suppression difficulty. Local knowledge is critical to navigate the network of roads to make access to any new fires and links to local pocket cards are provided below. Fuels, Weather and Topography are aligning to support rapid large fire growth on any new starts.

Expected flame lengths and rates of spread could mean direct attack with ground resources will not be effective, don't hesitate to order the resources that can be effective. Look for indirect options early.

AIR OPERATIONS:
Weak mid-slope inversion mixing out by 1200.
Sunrise: 0628 Sunset: 1956

Know your local thresholds, forecasted weather, and see how they relate to local pocket cards.

Health & Safety Message

Incident: McKinney Fire CA-KNF-006177	Date/Op Period: 08/24-25/22 0700-0700
---	---

Hazards & Risks

Fire Camp Safety: We usually don't think of Fire Camp as a dangerous place but camp has a few hazards to look out for:

- Trip hazards such as stairs, tent stakes, cables and wires are abundant.
 - Vehicle traffic in and around parking areas and driving through camp.
 - Electrical shock from all the power cords and power strips plugged in our tents, kitchen area, hand wash stations and shower unit.
 - Wildlife and insects.
 - Walking and talking or texting on our cell phones.
 - Sharp objects such as scissors, tacks, saws and nails.
 - Adverse weather; to name just a few Fire Camp Watch Outs.
- Sooooo pay attention to your surroundings and avoid distractions!

Power line & Gas line Safety: When working around powerlines, avoid parking or working under or near them. Communicate powerline hazards to all resources. Seek out power company advisers for information on specific hazards. ***Treat all powerlines and downed wires as energized!*** The same with high-pressure gas lines and propane tanks. Watch for buried or hidden lines, especially around structures. Sections of the gas line may be exposed above ground or buried in shallow ground. Consult with gas company representatives for guidance.

Safety Reporting: Safety Officers can't be everywhere or see every safety problem. It is incumbent upon every individual to make safety a priority in their daily work assignments. Please bring concerns or issues to the attention of a safety officer in order to maintain a safe working environment for all personnel.

Safety Alert

August 10, 2022

SUBJECT: CHAIN SAW CUTS TO SWAMPERS

AREA OF CONCERN: Chain Saw Operations

DISTRIBUTION: All Agency Chain Saw Operators, Module Leaders, Fire Safety Officers, Forest Safety Managers

DISCUSSION: There has been a marked increase in injuries to swampers involving chain saw strikes and struck-by incidents (i.e., when the swamper is hit by the tree or parts of the tree being felled) this 2022 fire and field season.

During saw operations involving saw teams the sawyer may need to operate the chain saw in close proximity to the swamper. This presents unique safety considerations.

Each year, there are swampers who receive lacerations to their hands, arms, or legs by working too close to a running chain saw. Chain saw cuts are not simple cuts like that made by a knife; they are significant and complex wounds that happen extremely quickly. Chain saws shred flesh and can quickly remove muscles, tendons, and bone.

The sawyer and the swamper have a shared responsibility to each other's safety, as well as that of other firefighters in the area.

MITIGATION MEASURES: To reduce risk of injuries due to chain saw strikes, the sawyer and swamper need to be aware of and avoid the strike zone. The strike zone is a 360-degree radius around a sawyer at a distance equivalent to the sawyer's arm length plus the length of the chain saw and bar. This is a minimum, and may need to be expanded due to other factors such as fatigue, experience, etc.

During tree felling operations, the sawyer is responsible for cutting area control. This means not allowing anyone within a distance of 2 1/2 the height of the tree being felled - including the swamper.

POINT OF CONTACT: Pete Duncan, USFS National Saw Program Manager

KNF ECC	YICC DISPATCH	ON DUTY CAPTAIN	530-841-4300

- New starts within the McKinney TFR boundaries will be reported to the Yreka Interagency Command Center. YICC will determine jurisdiction and appropriate response.
- YICC will coordinate with AOBD and McKinney Air Attack for aviation response to new starts within the TFR regardless of agency. Aviation Frequencies will remain on McKinney frequencies for Air Tactics and TFR victor.
- If jurisdiction of the new start is determined to be under Siskiyou Unit Protection or within the Mutual Threat Zone (5 miles) the Air to Ground, Command and Ground Tactical frequency will be assigned as local IA frequencies. All other aviation frequencies will remain on TFR/ McKinney team frequencies.
 - o AIR TACTICS – 166.6000
 - o VICTOR- TFR: 118.7250, ROTOR: 127.0250
 - o AIR TO GROUND CMD – CDF A/G 1 – 151.2200 (T16 TX AND RX)
 - o COMMAND– SKU LOCAL: RX-151.3250 TX-159.3600
 - o GROUND TACTICAL – CDF TAC (MULTIPLE)
- If jurisdiction of the new fire start is on the Klamath National Forest– Federal Protection Area (MTZ is the exception) the team will take action and all radio frequencies will remain the same.
 - o AIR TACTICS – 166.6000
 - o VICTOR- TFR: 118.7250, ROTOR: 127.0250
 - o AIR TO GROUND CMD – 166.9375
 - o AIR TO GROUND TAC –167.0625

COVID-19 PREVENTION INFORMATION **MAINTAINING A HEALTHY WORKFORCE**

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability – (2) locations

McKinney Base Camp (430 E. Prather St.) - Adventure Medics

Klamath River Spike Camp (28017 Hwy 96) - Mountain Medics

Priorities for testing will be for those with COVID-related symptoms and those with COVID exposure.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Mask Wearing

Mask wearing will be required when Siskiyou County community level is high. The Siskiyou County community level for the week of August 22, 2022 – August 28, 2022 is **Medium.**

McKinney Incident COVID Advisor – Patrick Yamnick (505) 427-3361

Local Government Resources on CFAA

If you are demobing and there is no OES AREP there:

- Have the FSC or IC review and sign your 42s
 - You give the incident the pink copy
 - You keep the gold copy
- You mail the white and green (if it has a green) to OES Headquarters per the instructions on the 42

**OES JOB AIDS, FORMS, F-42 SAMPLES AND
CFAA AGREEMENT**

**Your OES Fire & Rescue Assistant Chief
Patrick Titus
916-634-9225**

The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: **D**istance, **D**iagonal, **D**ivert, **D**ischarge, and **D**issipate.

Distance: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope %	Maximum Distance Apart (feet)	<i>Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UD SA-Forest Service, "Sale Administrator's Handbook"</i>

Training Specialist Message

The Training Specialist is closing all training records

Here's how:

At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

Trainee Exit Interview

2. Trainer: Fill in the Position Task Book as completely as possible for this incident.

3. Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's signed by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email-imt2training@gmail.com.

If you haven't registered yet, use this

Human Resource Message

5 Seconds

5 seconds, the amount of time it generally takes for one to sneeze (depending on the sneezer), for normally outstanding employees, to "let their guard down" and say or do something that has a negative effect on their time here on the incident.

After being on an incident for a few days, a week, or whatever amount of time it takes, we begin to become more relaxed with those who we work close with. When we become more relaxed with our communication because we feel we're "tight" with someone or our crew and they are "cool," we may feel its okay to tell a dirty joke or make a comment about how a coworker looks or (insert any other inappropriate comments not safe for work (NSFW)). However, when we say or do something NSFW, we open ourselves up to a complaint being filed, and possibly as a result, being released from the incident and our employer being notified. It's never a good thing when that happens.

So, let's prevent the above from happening, and ensure we maintain good situational awareness by remembering where we are at. Regardless if you're federal, state, local, AD, or a contractor, we all must remain professional, courteous, and sanitize the words we use and modify our behavior to conform to appropriate incident behavior.

Adrian Escobedo – HRSP: 530-523-3804

FINANCE MESSAGE

Fire Name: McKinney
Fire Number: CA-KNF-006177
Accounting Code: P5 PX2F (0505)
Email: 2022.mckinney.finance@firenet.gov

Finance Documents Needed upon "Check In" (If Not Already Submitted):

Please email these documents or scan the QR Code below, attach & submit.			
FED Equipment/ Crews: <ul style="list-style-type: none"> • Manifest - showing employment type (GS or WG) or AD rates if applicable 	Overhead: <ul style="list-style-type: none"> • AD/Casual Hire Form • If regular Agency please ensure "GS" or "WG" is written on your first CTR 	Contract Equipment/ Contract Crews: <ul style="list-style-type: none"> • Agreement • Manifest • Resource Order • Inspections 	Cooperator: <ul style="list-style-type: none"> • Cooperative Agreement • Resource Order

When emailing finance:

- Overhead/FED: *subject line:* TIME, Resource #, Resource Name
- Equipment/Cooperator: *subject line:* EQTR, Resource #, Resource Name

Prior to your demob date, please contact Finance *via email* to expedite the demob process.

Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay documents for review and signature.

REQUEST ACCESS TO ARCGIS FIELD MAPS

for interactive mobile maps and field data collection

STEP 1

Request a NIFC ArcGIS Account if you do not already have one

NIFC Account Request Form
<https://bit.ly/3OLBG1W>

STEP 2

Request access to collect and/or view incident data

Email Dawn_Hutchinson@firenet.gov
Subject: Request McKinney Access Include your name, position, and NIFC login in your email.

STEP 3

Download ArcGIS Field Maps app

- Search “ArcGIS Field Maps” in the App Store for iPhone & on Google Play for Androids Sign into your NIFC ArcGIS account through the app once installed

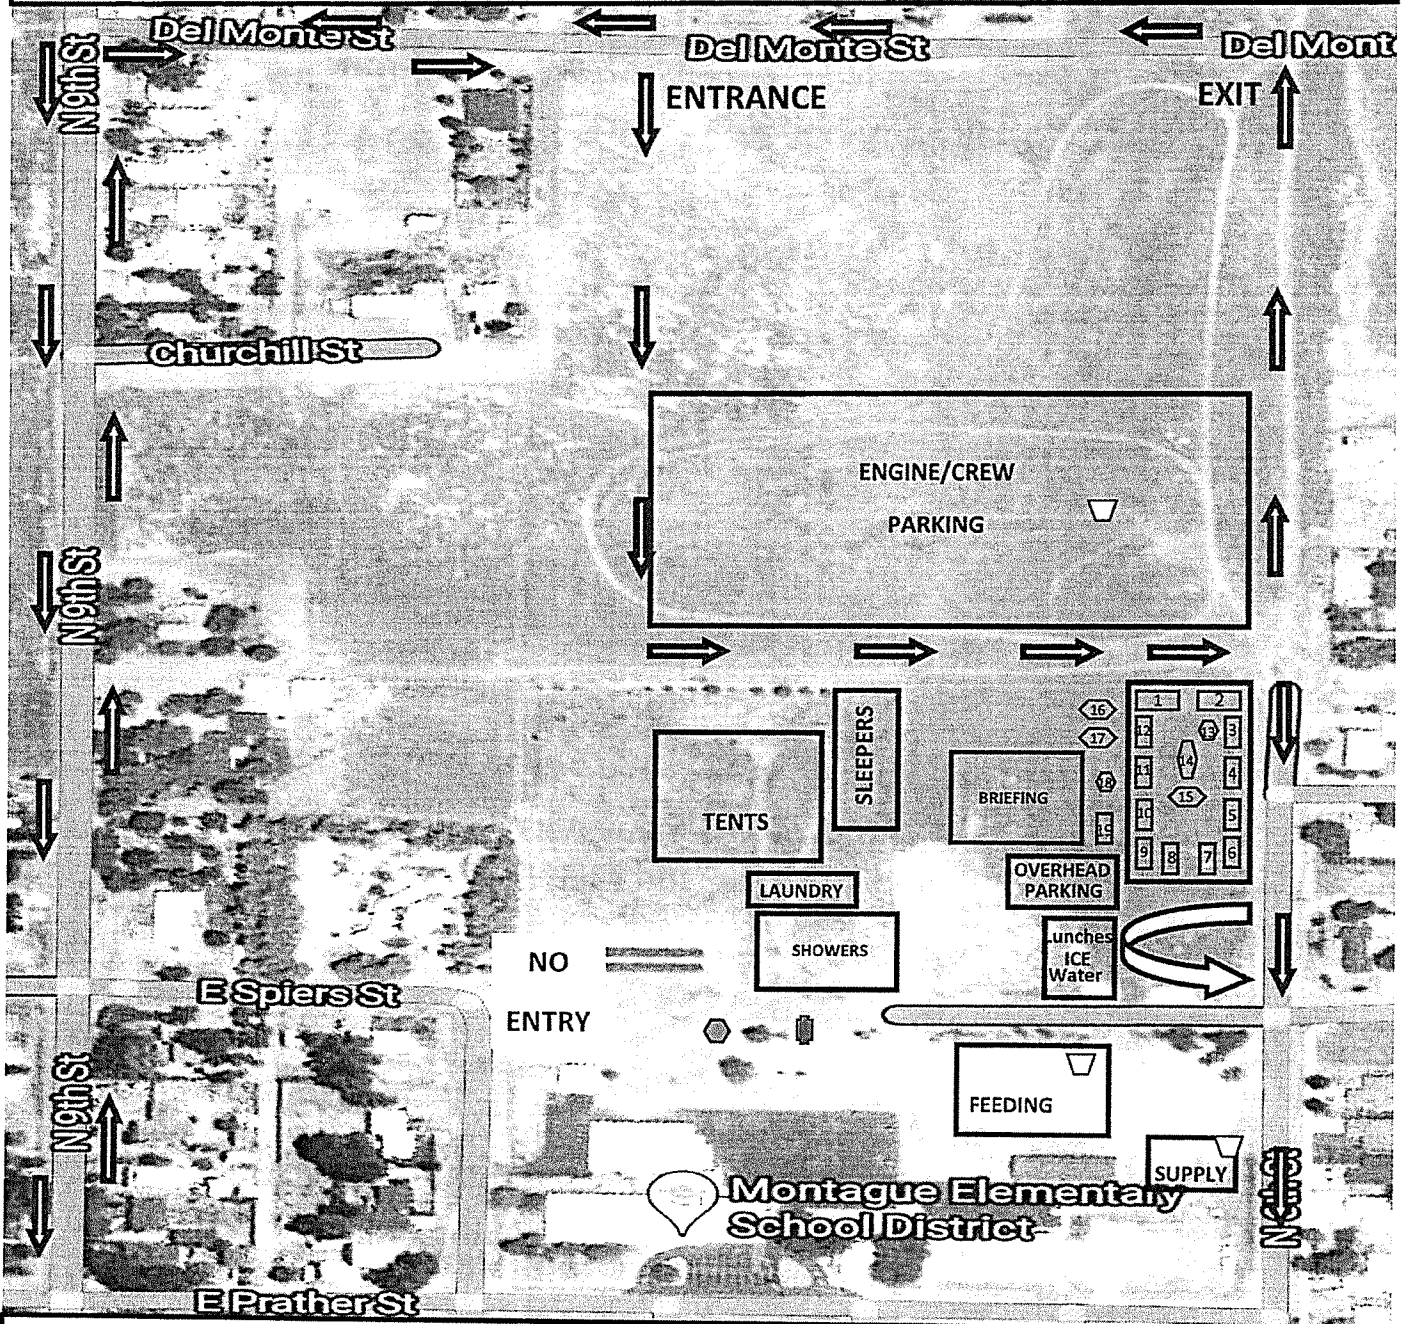

For More Instructions on how to use Field Maps, scan code below:
