OPERATIONAL PERIOD

DRIVING – A SHARED RESPONSIBILITY

It is every vehicle operator's and supervisor's personal responsibility to ensure that drivers are adequately screened, trained, and experienced to operate the type of vehicles they may be required to drive. If assigning an operator to an unfamiliar vehicle, do not make assumptions about them knowing the handling features and characteristics of that vehicle. Coordinate to ensure the newly assigned vehicle operator receives needed practical training. Monitor the operator proficiency before final clearance to operate a vehicle is given by a qualified driving instructor. The clearance check ride of the potential vehicle operator should simulate actual as well as reasonably anticipated extraordinary conditions of use, such as on steep windy mountain roads. Whether practicing skills or responding to an incident, it is every operator's, passenger's, and supervisor's responsibility to eliminate distractions and ensure adequate rest prior to driving. Manage your attention by concentrating on the road and learn to recognize indicators for driving "watch out" situations. Know and abide by the driving standard including emergency driving limitations.

Flash Flood Safety

On average, more people are killed by flooding than by any other single severe weather hazard, including tornadoes, lightning, and hurricanes. Most of these deaths occur at night, when it is more difficult to recognize flood dangers, and when people are trapped in vehicles. Do you know what to do in case of a flash flood?

Remember...

- **DO NOT** drive onto a flooded roadway.
- **DO NOT** drive through flowing water.
- If you approach a roadway that is flooded, **TURN AROUND - DON'T DROWN**.
- Drive with extreme caution if roads are even just wet or it is raining. You can lose control of your vehicle if hydroplaning occurs, which is when a layer of water builds up between your tires and the road, causing there to be no direct contact between your vehicle and the road.

Unpaved roads may become very slippery when wet – drive with extreme caution.

Rocks and other debris may become dislodged and fall onto roads during/after rain.

- ✚ Generally about 50% of the accidents we have on incidents are driving accidents. Wear seatbelts. All drivers will drive with headlights on at all times. Drive defensively - Watch out for the other driver. Anticipate on-coming traffic. Watch Your Speed or Law Enforcement will watch it for you.
- ✚ All roads are prone to rocks and debris coming down in the event of rain. Use extreme caution after a storm for material in the roadway.
- ✚ Be alert for flooded roadways in all drainages after storms.
- ✚ All crews need to be ready for IA, if requested. Refer to page 33 of the IRPG. Maintain good situational awareness. Implement ADEQUATE L.C.E.S. before any incident.
- ✚ Please DONOT engage in Tom-Foolery, maintain our professionalism – The public may be watching.
