Fire Weather Forecast

Thursday AUG 11, 2022

FORECAST NO: PREDICTION FOR: ISSUED:

10 Thursday/Aug 11, 2022 2000, Aug 10, 2022

NAME OF FIRE: UNIT:

McKINNEY Klamath N.F.

Incident Meteorologist: Sam Roberts

*** SUNNY, DRY, SLIGHTLY WARMER. LOW RH ***

DISCUSSION: Sunny and slightly warmer today as high pressure slowly begins to build back in from the east. We will continue to see low RH values in the afternoons and remain unstable. Winds will be out of the west to northwest during the afternoon hours.

THURSDAY: SUNNY, DRY, SLIGHTLY WARMER. LOW RH

- WEATHER: Sunny and dry. Slightly warmer, remaining unstable.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: variable 3-6 mph through 1200 then west to northwest 4 to 8 mph with gusts up to 15 mph.
- **CHANCE OF WETTING RAIN: 0%.**
- **RAIN AMOUNTS: none**
- MAX TEMPERATURES: 87-95 bottom and clear areas, 78-87 top and smoked in areas.
- MIN RH: 13-20% bottom and clear areas, 20-30% top and smoked in areas.
- INVERSION: Weak mid-slope and secondary inversion at 5000 feet mixes out by 1500. Smoke inversion unlikely to mix out across smoked in areas.

THURSDAY NIGHT: DRY, CLEAR, LIGHT WINDS.

- WEATHER: Dry and mostly clear.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: West 3-6 mph through 2200, then variable 3 to 6 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MIN TEMPERATURES: 51-55 bottom, 55-60 top.
- MAX RH: 55-65% bottom, 45-55% top.
- INVERSION: Weak developing near mid-slope and secondary inversion at 5,000 feet.

FRIDAY: SUNNY, DRY, WARM. LOW RH.

- WEATHER: Mostly sunny, warm and dry. Afternoon max temperatures similar to Thursday. We remain unstable.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then west to northwest 5 to 10 mph with gusts up to 18 mph.
- CHANCE OF WETTING RAIN: 0%.
- **RAIN AMOUNTS: none**
- MAX TEMPERATURES: 92-97 bottom and clear areas, 80-85 top and smoked in areas.
- MIN RH: 13-20% bottom and clear areas, 20-30% top and smoked in areas.
- INVERSION: Weak mid-slope inversion mixes out by 1500. Smoke inversion unlikely to mix out across smoked in areas.

Extended outlook: Saturday: Mostly sunny, warmer, dry. Highs 82-98. Minimum humidity: 13-23%. Winds northwest-north 5-10 mph with gusts to 15 mph. Sunday through Tuesday: Gradually warming temperatures through Tuesday. Highs 85-103. Minimum humidity: 14-24%. Winds northwest to north 5-10 mph with gusts to 15 mph. Clear skies Sunday through Monday but becoming more cloudy and a slight chance for showers and storms by Tuesday.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 11	TYPE OF FIRE: Wildfire
FIRE NAME: McKinney Fire	OPERATIONAL PERIOD: August 11, 2022 24hr
DATE ISSUED: 810/22	TIME ISSUED: 2000
UNIT: CA-KNF	SIGNED: Dennis Burns and John W. Kern

INPUTS

WEATHER SUMMARY: Still Hot and Dry with Gusts to 15 mph

Temps: Day Valley 87-95; Day Ridges 78-87 Night Valley 51-55; Night Ridges 55-60 Night Valley 13-20% Day Ridges 20-30% Night Valley 55-65%; Night Ridges 45-55%

Winds: Day Ridges W to NW 4-8 Gusts to 15 mph Night Ridges W 3-6 then variable direction 3-6 after 2200.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Winds are not quite as strong today, but fuels are still very dry, and the terrain is very steep. Winds have shifted and will be out of the west to northwest. Interior islands may still burn but should not threaten most control lines. Divisions along the south and east sides will need to be very aware of the change in wind direction as it could push interior heat towards their lines. Make sure lookouts have a good view of the fire, especially since the residual smoke early in the day may limit visibility.

Should an interior green island or dirty burn area challenge the line, or a new start get started, with these dry fuels, spotting will be problematic and should be short range (100-300 ft) for the most part and from rollout. Spots from several torching trees on a ridgetop can spot 0.4 miles. The Probability of Ignition is 89%.

Expect single and group tree torching and sustained short duration crown runs where slope and winds align especially outside our current perimeter or new starts.

At night: Expect the fire to remain active most of the period as Relative Humidity will not recover that well.

SPECIFIC:

Branch I: Most of Division W line has been mopped up well and will present little risk of escape today. Some portions of the branch did not burn cleanly so there is a possibility of reburn where shrubs were scorched but not consumed along the fire's edge.

Branch V: Portions Division Y and Z have had heat near the line recently. If NW winds push fire over the line, expect Rates of Spread of 10-15 ch/hr and flame lengths of 5-10 feet in timber litter and timber with understory fuel models. Watch for slope reversals as the fire reaches drainage bottoms. At night, winds may switch from upslope to downslope and change fire intensity. Expect islands near the line to burn out and there is a potential for reburn; either of which will challenge existing lines.

Branch X: The NW winds will aid in pushing interior heat towards the center of the burned area and will not likely challenge their lines. Rollout will continue to be problematic and challenge any established lines. Flank fires could see rate of spread of 5-10 ch/hr and flames of 2-5 feet in timber litter with understory fuels.

Branch XX: NW winds will push fires downslope to the SE. North of the river there is a combination of grass fuels and heavy dead and down component from the 2014 Beaver Fire that will make the fire more resistant to control. Watch for slope and wind alignment on the Div P and the Smokey Fire (Div Q). Division T was only recently lined and some areas may still hold heat, this can present an opportunity for fire to move uncontrolled with these NW winds. Rollout can challenge containment lines. There are areas of green islands near the line, if they begin to actively burn expect spot fires over established lines.

IA: With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with the potential for crown runs where dense canopies are present.

AIR OPERATIONS: Smoke may limit air operations in the early morning but will clear out by 1500.

SAFETY

Keep lookouts posted in places where they can see fuels and fire below crews, even in smoky conditions.

Lookouts Communications Escape Routes Safety Zones

McKinney Fire

Operation Period: 8/11-12/2022 Shift: 0700-0700

Safety Message

Watch for Over Confidence During Mop Up

*Driving: As we become more familiar with the road systems, we tend to increase speeds. Please be aware of this and keep speeds down, watch for people and vehicles along the roads, and drive defensively.

*PPE: Please recognize that in low stress situations like mop up, it is easy to over-look the importance of wearing the appropriate PPE especially hardhats, gloves, and eye protection.

*Work Area: Familiarity with your work area can result in a lowering of awareness, especially as conditions change. Consider how public and utility workers in the fire area could impact your operation.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN DRIVING	ROLLING MATERIAL DEHYDRATION MOP UP	INITIAL ATTACK SNAGS WILDLIFE
HEAVY EQUIPMENT	MOP UP	WILDLIFE

Be sure all elements of your safety plan are in place prior to engagement

Snag Safety

S ize up snag hazards in work area.

N ever become complacent.

A lways look up.

G et weather reports.

S cout out parking, sleeping, and work areas and safety zones.

A dvise co-workers of known hazards.

F ace your hazard and take appropriate actions.

E xamine work area for other hazards.

T ake extra caution around heavy equipment.

Y ou are ultimately responsible for your own safety.

Prepared by: Freddie Espinoza SOF1

Steps To Protect Yourself From Illnesses

- Wash your hands often
- Avoid touching your eyes, nose, or mouth, germs spread this way
- Try to avoid close contact with sick people
- Practice good health habits. Get plenty of sleep drink plenty of fluids, and eat healthy food
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
- If you are experiencing flu-like symptoms, separate yourself from others and seek guidance from MEDL. 747-444-8149

Date: 8/10/22

6. Work Assignments:

In order to meet incident objectives, continue to grid, patrol and mop-up all completed dozer and handline in Division A. Assess and fall hazard trees in the fire area where firefighters are working and in public access areas.

Implement suppression repair according to the repair plan guidelines. Coordinate with Repair Group 1 for suppression repair activities occurring within the Division. Coordinate all activities with Resource Advisors.

7. Special Instructions:

Report to Klamath River Spike or Montague Base Camp for sleeping as directed by DIVS.

SOF2 Rob Hickok (775-335-9866), SOFR Troy Maguire, SOFR(t) Matthew Hutchinson, and SOFR(t) Jacob Bridges will be covering all divisions in Branch X.

REMS 2 will be covering all divisions in Branch X.

READs will check in and out with DIVS.

6. Work Assignments:

In order to meet incident objectives, continue to grid, patrol and mop-up all completed dozer and handline in Division D. Assess and fall hazard trees in the fire area where firefighters are working and in public access areas.

Implement suppression repair according to the repair plan guidelines. Coordinate with Repair Group 1 for suppression repair activities occurring within the Division. Coordinate all activities with Resource Advisors.

7. Special Instructions:

Report to Klamath River Spike or Montague Base Camp for sleeping as directed by DIVS.

SOF2 Rob Hickok (775-335-9866), SOFR Troy Maguire, SOFR(t) Matthew Hutchinson, and SOFR(t) Jacob Bridges will be covering all divisions in Branch X.

REMS 2 will be covering all divisions in Branch X.

READs will check in and out with DIVS.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Communications/Dispatch:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
 - Communication contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (Medical Emergencies Only).

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI).
- Division Supervisor to contact Communications/dispatch:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
 - Communications contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (For medical related incidents only).

IN-CAMP - 24 HOUR MEDICAL

Yreka High School ICP and Montague Elementary Base Camp

Contact 911 and Medical Unit (747) 444-8149 with:

Patient Complaint, Condition and Location

Klamath River Spike Camp

Contact 911 and Klamath River Medical Unit (909) 921-8490 with:

Patient Complaint, Condition and Location

9. PREPARED BY Chris Schilling (MEDL)

10. REVIEWED BY Safety Officer

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training Be Alert - Keep Calm - Think Clearly - Act Decisively

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

	of Emergency		breathing, bleeding severely, 2° -	r illness. Evacuation need - 3° burns more than 4 palm sizes	
N.	AND	□YELLOW / PRIORITY 2	Serious Injury or illness. Ev	acuation may be DELAYED	if necessary.

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability - (2) locations

McKinney Base Camp (430 E. Prather St.) - Adventure Medics

Klamath River Spike Camp (28017 Hwy 96) - Mountain Medics.

Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

McKinney Incident COVID Advisor – Robin Wall, (530) 410-1721
Prepared by COVID Advisor:
Bill Sanders, (530) 721-3865

The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: Distance, Diagonal, Divert, Discharge, and Dissipate.

Distance: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

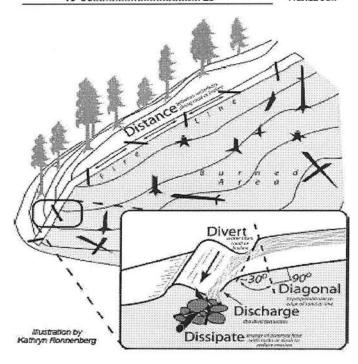

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope	Maximum Distance Apart (feet)
1-6	300
7-9	200
10-14	150
15-20	90
21-40	50
41-60	25

Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook"

Reference: Hauge, C.J., M.J. Furniss and F.D. Euphrat. 1979. Soil erosion in California's Coast Forest District. California Geology. June, 1979

Specifications for Piling Slash

Hand Pile Construction:

- All activity generated and pre-existing fuels with a diameter between 1" and 8" shall be bucked to 4' or less and included in the hand piles. Exceptions include single logs that exhibit at least 50% decomposition.
- Hand piles shall be symmetrical, constructed neatly and compactly.
- Hand pile base shall **not** be constructed with material over 4", 4"< material will be stacked in the upper half of the pile.
- Slash that causes large air spaces in piles shall be cut to a minimum of 8"x 8" air spaces greater than 8"x8" are unacceptable.
- Material in piles shall be cut <4' per individual piece.
- Maximum piles size 6' in diameter and 6' in height and minimum pile size shall be 4' in diameter and 4' in height.
- Piles shall be distinct and separate from each other allowing at least 6' between each pile
- Piles shall be placed to limit scorch potential to leave trees, not in contact with leave trees and built up slope from leave trees when possible
- At least 50% of material in the lower third of the piles shall be composed of small diameter material and attached fines to create a kindling core.
- All piles shall be covered with Kraft type wax paper (wax side up).
- Pile covering sheet shall be placed to cover the bottom 2/3 of the pile and cover 50% of the surface area of the pile at this level. The remaining 1/3 of the pile shall be placed over the cover sheeting anchoring all four corners and the middle of the cover sheeting securely.
- No piles shall be built on, or in contact with any tree stumps >10" diameter.
- Piles created on downed logs, the log in contact with any pile shall be bucked to create a 4' separation in the log (to break the continuity and limit fire spread if the log should be ignited).
- logs over 8" diameter generated from thinning shall be limbed with limb wood added to piles, cut to 4' lengths and dispersed a minimum of 6' separation from downed logs, leave trees and stumps.
- In some units specific pile placement will be required to avoid damage to sensitive plant colonies, maps with exclusion areas will be included, the exclusion areas will be clearly marked and defined by the COR before work takes place.
 Any piles constructed in exlusion areas will be moved by the contractor.

Human Resource Message

Teamwork

Teamwork is defined as: "co-operation between those who are working on a task." Commonly teamwork is understood as co-operation and willingness of a group of individuals to work together to achieve a set goal with best practice. As most of you are nearing the end of your assignment let's remember that we start as a team and we finish as a team! Some reminders regarding teamwork are:

- Teamwork is important because you and your fellow co-workers are there for one purpose, which is to carry out the goal(s) of the organization
- Believe in each other
- TRUST... your teammate
- Be RESPONSIBLE...make your team proud!
- Two people know more than one person
- Each person has different qualities that can complete and complement other people
- Working in a team can motivate a person to do more

DILBERT

HRSP: Ryan Voelkl, 530-457-7276, ryan.voelkl@usda.gov.

HRSP(t): Armando Vargas, 707-980-2864, armando.vargas@usda.gov.

Fire Friendly Finance Message

Finance is available 6am-10pm daily

Yreka High School Rm 16

Team 2 Finance will accept electronic submission of documents, or paper copies. Please do not do both. Physical copies may be dropped off in the labeled boxes outside of classroom 16 at Yreka High School. Electronic copies may be emailed to 2022.mckinney.finance@firenet.gov (We created a QR code below that will take you directly to the email)

"Genius Scan" and "Cam Scan" are free apps you can download and utilize to send in copies. They scan as a clear PDF. Please do not take pictures of documents straight from your phone. They are not as clear or readable as the above named applications.

WHEN EMAILING PLEASE USE THE FOLLOWING SUBJECT LINES

********Personnel- Write TIME in the Subject Line**********

******Equipment/COOP/CCC's - Write PROC in the subject line******

****Only FEDERAL Contracted Resources and Federal Personnel should send information to us. CAL FIRE Contracted Resources DO NOT follow the above instructions. You will need to contact CAL Fire Finance for further instructions.***

DEMOB- Is in person only- No virtual demobs- Please bring your shift ticket books or CTR's in case we are missing something. Only 1 person per demob (CRWB or Strike Team Leaders). To expedite the demob process, put a remark in your CTR with your demob date so we can prepare your draft OF-288 before you come.

Thanks for what you do, and be safe,
Team 2 Finance

Training Specialist Message

To assure proper documentation for your assignment:

1. Scan the QR Code

2. Complete the Trainee Registration Form -

This is the link to sign up -

At the end of your assignment:

 $1. \ \textbf{Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.}$

This is the link to the exit interview form -

- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

Briefing, Feeding, Finance, Check-In, Demob, etc. are located at: YREKA FAIRGROUNDS
1712 Fairlane Rd, Yreka

DEMOB MESSAGE

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes "starting the walk."

 Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization Unit.

FINANCE MESSAGE

TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL- Make sure you have started your eFC-33's and update after each shift. Please
 make sure ePay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS- Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
 - Reminder VIN numbers must match contracts exactly.

COMP / CLAIMS

- DAMAGE CLAIMS- For all damages during fire suppression activities to property or vehicle, complete an ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors should complete IIPP-15's and come to the COMP/CLAIMS
 Unit to enter into IAPS.

DIVISION / GROUP - LINE SUPERVISORS

Please turn in hired equipment shift tickets at the end of each shift.

FIRE SUPPRESSION REPAIR MESSAGE

Berms and push-piles should be spread to the extent feasible by back-blading with a tractor or with an excavator. Debris piled against standing timber should be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots, staging areas, and safety zones remove and/or breach berms so that runoff can be dissipated. Cross-drain these areas to effectively dissipate water as necessary.

Waterbreaks should be constructed at an approximately 45° angle at a minimum depth of 10" from the bottom of the cut to the top of the berm. Where possible, the discharge from the waterbreaks should be directed into vegetated areas to minimize erosive forces. Where dozerline or handline has crossed a watercourse, the channel should be cleared of soil and debris to re-establish the channel. Waterbreaks on handlines should be installed every 50' or closer as needed.

Waterbreak maximum spacing:	Grade	0-10%	11-25%	26-50%	>50%
	Spacing	0-200'	150'	100'	75′

Roads used in fire suppression activities should be left in at least as good a condition as they were found. Gravel and soil surface roads should be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips should be installed for drainage. Inside ditches damaged from suppression activities should be cleaned and left unobstructed.

If any archaeological resources are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.
