| 4. OPERATIONAL PERIOD (DATE/TIME) 8/13-14/2022, 0700-0700 | | | | | | | | | | | | | | | | | | | | | | | |
| <p>5. GENERAL CONTROL OBJECTIVES</p> <p style="text-align: center;"><u>Strategic Framework</u></p> <p>Implement a full suppression strategy on the McKinney Fire. Values at risk include human safety, private timberlands, communities, critical infrastructure and associated improvements. Apply tactics that offer the highest probability of success.</p> <p style="text-align: center;"><u>Leaders Intent</u></p> <p>Provide the highest level of customer service to all involved with or impacted by the McKinney Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:</p> <ul style="list-style-type: none"> • Personal safety and the safety of others, including driving slowly and defensively. • Manage fatigue by taking breaks and maintaining work/rest cycles. • Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines. • Professional behavior, conduct, and timely/effective communication. <p style="text-align: center;"><u>Management Objectives</u></p> <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard recognition and application of the risk management process. • Coordinate all public information with CAL FIRE and CIIMT 10 to provide timely and continuous information to affected agency partners, cooperators, and to the public. • Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources. • Implement fire suppression activities in accordance with the suppression repair plan and Incident Resource Advisors. • Provide initial attack capability for the Klamath National Forest on the Oak Knoll and Scott River Ranger Districts. <p style="text-align: center;"><u>Control Objectives</u></p> <p>Keep the McKinney Fire:</p> <ul style="list-style-type: none"> • East of the Scott River Road to prevent further fire spread into the communities of Horse Creek, Steelhead and Scott Bar. • South of the current fire perimeter along Hwy 96 and within the Beaver Creek Fire scar. • West of Klamath River Road and Humbug Creek Road to prevent further fire spread into Yreka and the surrounding communities. • North of Russel Peak and Schoolhouse Gap to prevent further fire spread into privately owned timberlands and the community of Fort Jones. <p>Keep the George Fire:</p> <ul style="list-style-type: none"> • East of McCarthy Creek. • South of road 45N72. • West of McGuffy Creek. • North of Scott River. | | | | | | | | | | | | | | | | | | | | | | | |

Fire Weather Forecast

Saturday AUG 13, 2022

| | | | |
|------------------------|-----------------------|--------------------------------|--------------|
| FORECAST NO: | 12 | NAME OF FIRE: | McKinney |
| PREDICTION FOR: | Saturday/Aug 13, 2022 | UNIT: | Klamath N.F. |
| ISSUED: | 2000, Aug 12, 2022 | Incident Meteorologist: | Sam Roberts |

***** DRY, WARM, LOW RH, WEST TO NORTHWEST AFTERNOON WINDS GUSTING TO 18 MPH *****

DISCUSSION: Conditions will be similar to yesterday but a degree or two warmer. Otherwise, mostly sunny, dry, low RH, and unstable in the afternoon.

SATURDAY: DRY, WARM, LOW RH, WEST TO NORTHWEST AFTERNOON WINDS GUSTING TO 18 MPH

- **WEATHER:** Mostly sunny, warm and dry. Max temperatures a degree or two warmer than Friday. We remain unstable.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: East to northeast 3-6 mph through 1100 then west to northwest 5 to 10 mph with gusts up to 18 mph.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MAX TEMPERATURES:** 92-96 bottom and clear areas, 78-83 highest ridgetops and smoked in areas.
- **MIN RH:** 13-20% bottom and clear areas, 20-30% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1200. Smoke inversion unlikely to mix out across smoked in areas.

SATURDAY NIGHT: DRY, MOSTLY CLEAR, LIGHT EAST WINDS.

- **WEATHER:** Dry and mostly clear.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: West to northwest 4-8 mph gusts to 15 mph through 2200, then becoming easterly 3 to 6 mph after midnight.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MIN TEMPERATURES:** 50-55 bottom, 55-60 top.
- **MAX RH:** 58-68% bottom, 35-45% top.
- **INVERSION:** Weak developing near mid-slope and secondary inversion at 5,000 feet.

SUNDAY: WARMER, DRY, AFTERNOON WINDS MORE NORTHWESTERLY

- **WEATHER:** Mostly sunny, warmer and dry. Afternoon max temperatures slightly warmer than Saturday. We remain unstable.
- **WIND (EYE LEVEL):** Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Ridges, unsheltered areas, wind-aligned drainages: East to northeast 3-6 mph through 1100 then northwest to north 5 to 10 mph with gusts up to 15 mph.
- **CHANCE OF WETTING RAIN:** 0%.
- **RAIN AMOUNTS:** none.
- **MAX TEMPERATURES:** 94-98 bottom and clear areas, 80-85 highest ridgetops and smoked in areas.
- **MIN RH:** 13-20% bottom and clear areas, 20-30% top and smoked in areas.
- **INVERSION:** Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1200. Smoke inversion unlikely to mix out across smoked in areas.

Extended outlook: Monday: Mostly sunny, dry and warmer. Highs 83-102. Minimum humidity: 13-20%. Winds northwest-north 5-10 mph with gusts to 15 mph. **Tuesday through Thursday:** Temperatures continue to warm with highs from 87-104. Minimum humidity: 14-25%. Winds northwest to north 5-10 mph with gusts to 15 mph. Clouds will be on the increase. A slight chance for showers and storms throughout this period.

FIRE BEHAVIOR FORECAST

| | |
|---------------------------------|--|
| FORECAST NUMBER: 13 | TYPE OF FIRE: Wildfire |
| FIRE NAME: McKinney Fire | OPERATIONAL PERIOD: August 13, 2022 24hr |
| DATE ISSUED: 8/12/22 | TIME ISSUED: 2000 |
| UNIT: CA-KNF | SIGNED: /s/ Dennis Burns /s/ John W. Kern |

INPUTS

WEATHER SUMMARY: Continued Hot and Dry with Gusty NW Winds
Temps: Day Valley 92-96; Day Ridges 78-83 Night Valley 50-55; Night Ridges 55-60
RH: Day Valley 13-20% Day Ridges 20-30% Night Valley 58-68%; Night Ridges 38-48%
Winds: Day Ridges W to NW 5-10 Gusts to 18 mph Night Ridges W-NW 4-8 then east 3-6mph after 2200.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Winds similar to yesterday, but a few miles per hour stronger today. Fuels are still very dry, and the terrain is very steep. Winds will be out of the west to northwest. Interior islands will still burn but should not threaten most control lines. Divisions along the south and east sides will need to be very aware of the change in wind direction as it could push interior heat towards their lines. Make sure lookouts have a good view of the fire, especially since the residual smoke early in the day may limit visibility.

Should an interior green island or dirty burn area challenge the line, or a new start occurs, with these dry fuels, spotting will be problematic and should be short range (100-300 ft) rollout is possible. Spots from several torching trees on a ridgetop can spot 0.4 miles. The Probability of Ignition is 89%.

Expect single and group tree torching and sustained short duration crown runs where slope and winds align especially outside our current perimeter or new starts.

At night: Expect the fire to remain active until about midnight when the RH begins to recover.

SPECIFIC:

Branch V: No forward fire progression is expected. Portions Div Y and Z have had small areas of near the line recently. Expect islands near the line to burn out and there is a potential for reburn; either of which will challenge existing lines.

Branch X: No forward fire progression expected. Rollout will continue to be problematic and challenge any established lines.

Branch XX: No forward fire progression expected. North of the river there is a combination of grass fuels and heavy dead and down component from the 2014 Beaver Fire that will make any escape fire more resistant to control. Watch for slope and wind alignment on the Div P.

IA: With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with a high potential for crown runs where dense canopies are present.

AIR OPERATIONS: Smoke may limit air operations in the early morning but will clear out by 0900.

SAFETY

Keep lookouts posted in places where they can see fuels and fire below crews, even in smoky conditions.

McKinney Fire
Operation Period: 8/13/22 to 8/14/22 Shift: 0700-0700

Safety Message

Driving remains an extremely high hazard with a high risk outcome!

- Highway 96 still has a pilot car through the Klamath River community. Wait for the pilot car except in emergencies.
- Assure there is sufficient room to safely turn your vehicle around within the solid road base.
- Use a backer when available otherwise walk the area that you plan to back-up in.
- Keep tires off soft edges of roadways.
- Drive with your lights. This makes your vehicle more visible to on coming traffic.
- Use a pilot vehicle when transporting with a lowboy and far enough ahead for others to react.
- For narrow bridges wait for oncoming traffic to clear the bridge, be patient and wait your turn.
- Drive times to get around the incident are excessive. If you are feeling tired or sleepy, please pull over and take a **SAFETY BREAK!**

Rest your drivers prior to travel, especially at the end of shift ...Your Life Depends On It!

Heavy equipment usage is evolving as our mission shifts from suppression to repair!

- We are now using different machinery on the incident, requiring different safety actions near them. Know the safe distances to maintain, know the operators visual and hearing limits for that equipment and know how to safely approach and communicate with the operator.
- There will be an increase in the need to transport heavy equipment on lowboys to new work sites.
- We are seeing an increase in loaded transports traveling through our travel routes to and from neighboring incidents as well as for Initial Attack.
- There are still chipping operations and falling operations on the incident. Use road guards as appropriate.

Incident Trends That Concern Us

| Heat Related Illness (Dehydration) | Minor Vehicle Accidents (Backing and Parking Vehicle Damage) | Trips and Fall Injuries Ankles/Knees |
|--|--|--|
| 24 hr down to no heat related IWI | 24 hr up 2 incidents-3 incidents | 24 hr. Up with 2 |

KEEP A CLEAN FIRE LINE AND A CLEAN CAMP!

Wildlife are watching us and are waiting for the opportunity to come check out what we have left behind. Bears, skunks, ravens and raccoons are especially prone to inspecting our drop points and tents when we are not around. Don't give them an invitation... clean up and back haul your food waste.

Prepared by: Rob Hickok, SOF2

Date: 8/13/22

INCIDENT RISK ANALYSIS (ICS 215a)

| DIV | HAZARDOUS ACTIONS / CONDITIONS | MITIGATIONS / WARNINGS / REMEDIES | |
|--|--|--|--|
| ALL | FIRE WEATHER/FIRE BEHAVIOR | <ul style="list-style-type: none"> • 100-HOUR FUELS BELOW 4% ERC'S 97th PERCENTILE • RED FLAG WARNING IN AFFECT FOR ABUNDANT LIGHTNING WITH DRY RECEPTIVE FUEL BEDS. • Monitor current weather conditions and forecasts. • Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. | |
| ALL | DRIVING HAZARDS | <ul style="list-style-type: none"> • WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. DO NOT SKIP AHEAD OF PIOLET CAR. • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. | |
| ALL | POINT PROTECTION | <ul style="list-style-type: none"> • Ensure LCES is in place • Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone • Set trigger points to disengage and allow adequate time to relocate. • Look for propane tanks and other hazardous materials | |
| ALL | EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL | <ul style="list-style-type: none"> • Concentrate on your footing placement; take your time. • Ensure adequate spacing between crewmembers so they can react to dislodged debris. • Post lookouts to warn of rolling debris. SHOUT out to warn others. • Look Up, Down and Around Frequently. | |
| ALL | HAZARD TREES | <ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p. 22). • Be especially alert around snags during wind events or changing wind direction. • Check for hazard trees & "widow-makers" in sleeping areas. | |
| ALL | SAFETY ZONES | <ul style="list-style-type: none"> • Follow safety zone guidelines (IRPG p. 6) • Carefully evaluate burned areas before designation as safety zones due to spotty burning in numerous areas. • When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner. | |
| ALL | NIGHT OPERATIONS | <ul style="list-style-type: none"> • Have a purpose for where you drive, what you do, don't rush into assignments • Use caution where you park/stage especially in steep timbered areas. • Increase SA by trying to see the work areas during daylight hours | |
| ALL | INFECTIOUS DISEASE | <ul style="list-style-type: none"> • Maintain 6' foot distance whenever possible. Wear masks when appropriate. • Do frequent handwashing/sanitizing and disinfecting common surfaces. • Notify MEDL if any symptoms arise. | |
| ALL | HEAVY EQUIPMENT/DOZERS | <ul style="list-style-type: none"> • Utilize appropriate PPE and other equipment safety mechanisms. • Maintain safe working distances. • Utilize observer or spotter. Avoid moving parts • Ensure the use of effective communication (radio, hand signals). • Identify hazards. | |
| ALL | INDIRECT LINE CONSTRUCTION | <ul style="list-style-type: none"> • Establish and maintain LCES. • Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers. • If possible, burn out as line construction progresses. | |
| ALL | LIGHT FLASHY FUELS/ SPOT FIRES | <ul style="list-style-type: none"> • Live fuel moistures are at critical level. • Expect rapid ROS when winds are present • Ensure LCES is in place. • Use caution when unburned fuels are between you and the fire. | |
| ALL | HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE | <ul style="list-style-type: none"> • Drink 2: 1 water to sports drinks. • Maintain 2:1 work/rest ratio • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS (IRPG P.110) | |

6. Work Assignments:
Mop-up, contain and control the George Fire.
Grid, patrol and mop-up all completed dozer and handline in Division A.
Complete chipping along Mill Creek Road.
Coordinate with Repair Group 1 and Resource Advisors for suppression repair activities occurring within the Division.

7. Special Instructions:
Report to Klamath River Spike or Montague Base Camp for sleeping as directed by DIVS.
SOF2 Rob Hickok (775-335-9866), SOF2(t) Shannon Banks (707-275-2361), SOFR Troy Maguire, SOFR(t) Matthew Hutchinson, and SOFR(t) Jacob Bridges will be covering all divisions in Branch X.
REMS 2 will be covering all divisions in Branch X.
READs will check in and out with DIVS.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- **Crew Supervisor** to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- **Division Supervisor/Operation** contacts Communications/Dispatch:
 - Division Supervisor or POC* will run "**Medical -Emergency**" on the Command frequency.
 - Division Supervisor or POC* to use "**Medical Incident Report**" worksheet on back of this page or back of IRPG.
 - Communication contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (Medical Emergencies Only).

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- **Crew Supervisor** to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 3/Green, (Minor) Patients do not** trigger Incident within Incident (IWI).
- **Division Supervisor** to contact Communications/dispatch:
 - Division Supervisor or POC* will run "**Non-Emergency Incident**" on the Command frequency.
 - Division Supervisor or POC* will use "**Medical Incident Report**" worksheet on the back of this page or back of IRPG.
 - Communications contacts Medical Unit Leader on the Command frequency or cell phone (747) 444-8149 (For medical related incidents only).

IN-CAMP – 24 HOUR MEDICAL

Yreka High School ICP and Montague Elementary Base Camp
Contact 911 and Medical Unit (747) 444-8149 with:

- Patient Complaint, Condition and Location

Klamath River Spike Camp
Contact 911 and Klamath River Medical Unit (909) 921-8490 with:

- Patient Complaint, Condition and Location

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

| | | |
|--|---|---|
| Severity of Emergency AND Transport Priority (priority 1, 2, 3) | <input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> | |
| | <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> | |
| | <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i> | |
| Nature of Injury or Illness & Mechanism of Injury | | <i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i> |
| Transport Request | | <i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i> |
| Patient Location | | <i>Descriptive Location & Lat. / Long. (WGS84)</i> |
| Incident Name | | <i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i> |
| On-Scene Incident Commander | | <i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i> |
| Crew Patient Care | | <i>Name of Care Provider (Ex: EMT Smith)</i> |

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*drop point, intersection, helispot, Lat. / Long, hazards*) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

| Function | Channel Name/Number | Receive (RX) | Tone/NAC * | Transmit (TX) | Tone/NAC * |
|-------------|---------------------|--------------|------------|---------------|------------|
| COMMAND | | | | | |
| AIR-TO-GRND | | | | | |
| TACTICAL | | | | | |

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***

COVID-19 PREVENTION INFORMATION

MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability – (2) locations

McKinney Base Camp (430 E. Prather St.) - **Adventure Medics**

Klamath River Spike Camp (28017 Hwy 96) - **Mountain Medics.**

Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

McKinney Incident COVID Advisor – **Robin Wall, (530) 410-1721**

Prepared by COVID Advisor: **Bill Sanders, (530) 721-3865**

The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: **D**istance, **D**iagonal, **D**ivert, **D**ischarge, and **D**issipate.

Distance: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

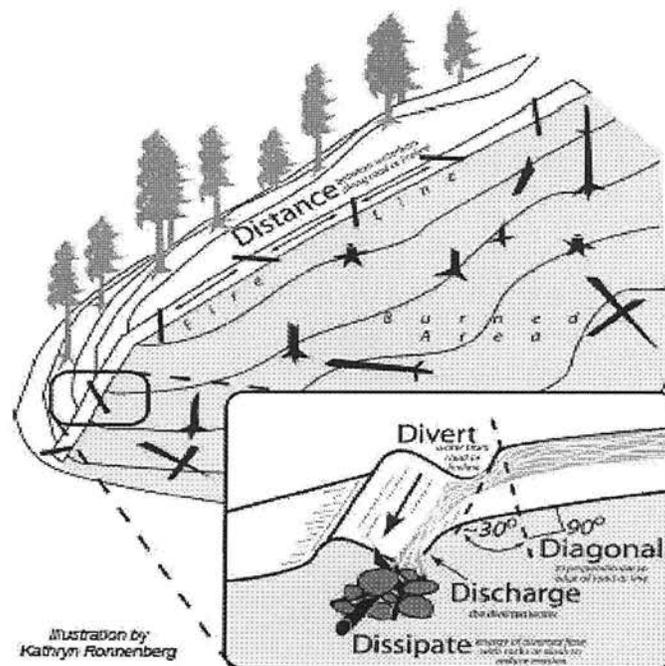

Diagonal: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

| Fireline slope % | Maximum Distance Apart (feet) | <i>Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook"</i> |

Specifications for Piling Slash

Hand Pile Construction:

- All activity generated and pre-existing fuels with a diameter between 1" and 8" shall be bucked to 4' or less and included in the hand piles. Exceptions include single logs that exhibit at least 50% decomposition.
- Hand piles shall be symmetrical, constructed neatly and **compactly**.
- Hand pile base shall **not** be constructed with material over 4", 4"< material will be stacked in the upper half of the pile.
- Slash that causes large air spaces in piles shall be cut to a minimum of 8"x 8" air spaces greater than 8"x8" are unacceptable.
- Material in piles shall be cut <4' per individual piece.
- Maximum piles size 6' in diameter and 6' in height and minimum pile size shall be 4' in diameter and 4' in height.
- Piles shall be distinct and separate from each other allowing at least 6' between each pile
- Piles shall be placed to limit scorch potential to leave trees, not in contact with leave trees and built up slope from leave trees when possible
- At least 50% of material in the lower third of the piles shall be composed of small diameter material and attached fines to create a kindling core.
- All piles shall be covered with Kraft type wax paper (wax side up).
- Pile covering sheet shall be placed to cover the bottom 2/3 of the pile and cover 50% of the surface area of the pile at this level. The remaining 1/3 of the pile shall be placed over the cover sheeting anchoring all four corners and the middle of the cover sheeting securely.
- No piles shall be built on, or in contact with any tree stumps >10" diameter.
- Piles created on downed logs, the log in contact with any pile shall be bucked to create a 4' separation in the log (to break the continuity and limit fire spread if the log should be ignited).
- logs over 8" diameter generated from thinning shall be limbed with limb wood added to piles, cut to 4' lengths and dispersed a minimum of 6' separation from downed logs, leave trees and stumps.
- In some units specific pile placement will be required to avoid damage to sensitive plant colonies, maps with exclusion areas will be included, the exclusion areas will be clearly marked and defined by the COR before work takes place. Any piles constructed in exclusion areas will be moved by the contractor.

Human Resource Message

The following are some tips for a slow, safe withdrawal from fire line life.

- Your first evening at home, start a roaring fire in the fireplace, turn off all the lights, and read a comic book by flashlight. Partially shut the flue damper and have a little smoke back up into the house, enough that it stings your eyes a little bit.
- When it's time for bed, turn on all the lights in your room. Leave them on all night. Sprinkle some dirt and pine needles on your sheets. Put some rocks and your dirty socks beneath your pillow. When you get into bed, be sure you've still got your boots or shoes on. Wear the same clothes you've had on all day. If your bed is too comfortable, sleep in an old, dirty sleeping bag near the fireplace and/or as close to the kitchen as possible.
- Have a friend come over, have him use a bullhorn outside your bedroom all night, using phrases such as "Will the crew boss from San Carlos #6 report to plans?", "Ground Support report to the Logistics Chief immediately", and the perfunctory "Ops Chief to Communications ASAP!" Have him blow into the bullhorn at least two times before making each announcement.
- Have a couple of people who don't know you and have not been in your house before, wander in between 2 and 3 a.m. with huge red packs, pull out their sleeping bags, and sleep on the floor. Have them leave a radio on, switched on to one of the incident's tac channels all night.
- Lock the bathroom door. Arrange to have a porta-potty placed in your driveway. Have it delivered full, after being used by at least a couple of hundred people. Make sure the latch on the door doesn't work. Have someone open the door a couple times while you are using it. Make sure the porta-potty is placed somewhere very dark, and forget to bring your flashlight when you use it.
- Ask the person who delivers your paper to honk the car horn for you as early as possible – preferably around 4 a.m.
- Acquire a taste for half melted 'energy bars', made mostly from sawdust.
- Wear a stuffed backpack all day at work; if it is too comfortable, put some rocks in it.
- At lunch time, take your sandwich outside and drop it in a flower bed. Retrieve it and stand beside a full garbage can while you eat it. Wash it down with a drink that's been in the car trunk all morning.
- Several times during the day, hit yourself in the shins with a hammer.
- During the day take a break by lying down in the dirt outside; if it is too comfortable, lay on a few rocks. Use your hard hat as a pillow by putting it in the crook of your neck, below the back of your head. It is preferable if you find a steep slope in the sun to lie down, steep enough that you have to plant your feet on some downhill boulders to keep from slipping down the slope.

Ryan Voelkl - HRSP: 530-457-7276

Armando Vargas - HRSP(t): 707-980-2864

FLIGHT REQUEST FORM

| | | | |

Training Specialist Message

To assure proper documentation for your assignment:

1. Scan the QR Code

2. Complete the Trainee Registration Form -

This is the link to sign up -

At the end of your assignment:

1. **Trainee:** Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.

3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's **signed** by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

Fire Friendly Finance Message

*****Yreka High School Rm 16*****

Team 2 Finance will accept electronic submission of documents, or paper copies. Please do not do both. Physical copies may be dropped off in the labeled boxes outside of classroom 16 at Yreka High School. Electronic copies may be emailed to 2022.mckinney.finance@firenet.gov

DEMOB- Is in person only- No virtual demobs- Please bring your shift ticket books or CTR's in case we are missing something. Only 1 person per demob (CRWB or Strike Team Leaders). To expedite the demob process, put a remark in your CTR or S/T with your demob date so we can prepare your draft OF-288 or OF-286 before you come.

Please come see finance!!!!

Resources report to McKinney ICP at the time noted.

DEMOB PHONE: 916-798-5238

20000 Block and ALL State Resources

Briefing, Feeding, Finance, Check-In, Demob, etc. are located at:
YREKA FAIRGROUNDS
1712 Fairlane Rd, Yreka

DEMOB MESSAGE

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes “starting the walk.”

- Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization Unit.

FINANCE MESSAGE

TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL- Make sure you have started your eFC-33's and update after each shift. Please make sure ePay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS- Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
 - Reminder – VIN numbers must match contracts exactly.

COMP / CLAIMS

- DAMAGE CLAIMS- For all damages during fire suppression activities to property or vehicle, complete an ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors should complete IIPP-15's and come to the COMP/CLAIMS Unit to enter into IAPS.

DIVISION / GROUP - LINE SUPERVISORS

Please turn in hired equipment shift tickets at the end of each shift.

FIRE SUPPRESSION REPAIR MESSAGE

Berms and push-piles should be spread to the extent feasible by back-blading with a tractor or with an excavator. Debris piled against standing timber should be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots, staging areas, and safety zones remove and/or breach berms so that runoff can be dissipated. Cross-drain these areas to effectively dissipate water as necessary.

Waterbreaks should be constructed at an approximately 45° angle at a minimum depth of 10" from the bottom of the cut to the top of the berm. Where possible, the discharge from the waterbreaks should be directed into vegetated areas to minimize erosive forces. Where dozerline or handline has crossed a watercourse, the channel should be cleared of soil and debris to re-establish the channel. Waterbreaks on handlines should be installed every 50' or closer as needed.

| | | | | | |
|-----------------------------|---------|--------|--------|--------|------|
| Waterbreak maximum spacing: | Grade | 0-10% | 11-25% | 26-50% | >50% |
| | Spacing | 0-200' | 150' | 100' | 75' |

Roads used in fire suppression activities should be left in at least as good a condition as they were found. Gravel and soil surface roads should be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips should be installed for drainage. Inside ditches damaged from suppression activities should be cleaned and left unobstructed.

If any archaeological resources are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.
