INCID	ENI OBJECTI	VE3 (IC3 ≥	202)		
1. Incident Name:	2. Operational Period:	Date From:	8/15/2022	Date To:	8/16/2022
McKinney	- Company of the Comp	Time From:	0700	Time To:	0700
3. Objective(s):					
<u>Leaders Intent</u>					
Implement a full suppression strategy on the McKir critical infrastructure and associated improvements	nney Fire. Values at risk incl . Apply tactics that offer the	lude human safety, e highest probability	private timberlary of success.	ands, comm	iunities,
Management Objectives					
- Provide for firefighter and public safety through l	hazard recognition and appl	ication of the risk n	nanagement pr	ocess.	
 Coordinate all public information with CALFIRE affected agency partners, cooperators, and the partners. 		orest to provide tim	ely and continu	ious informa	ation to
- Coordinate with the Resource Advisors to imple	ment the fire suppression re	pair plan.			
- Provide initial attack capability for the Klamath N	lational Forest on the Oak k	Knoll and Scott Rive	er Ranger Distri	icts.	
Leaders Intent					
Provide the highest level of customer service to all accurate communication at all levels of the incident should be prepared to take appropriate actions reg	and strengthen relationship	y the McKinney Fire os with cooperators	e. Ensure trans . All incident as	sparent, tim ssigned pers	ely and sonnel
- Personal safety and the safety of others, including	ng driving slowly and defens	sively.			
- Manage fatigue by taking breaks and maintaining	g work/rest cycles.				
 Minimize risk and limit exposure to infectious dis Health, and agency guidelines. 	ease by implementing Cent	er of Disease Cont	rol, California D	Department	of Public
- Professional behavior, and timely/effective comm	nunication.				
Control Objectives	*				
 Keep the McKinney Fire contained to the current communities, and other values at risk. 	fire perimeter to prevent th	e fire from spreadir	ng to private pro	operty, surro	ounding

Fire Weather Forecast

Monday AUG 15, 2022

FORECAST NO: PREDICTION FOR: ISSUED:

14 Monday/Aug 15, 2022 2000, Aug 14, 2022

NAME OF FIRE:

McKinney Klamath N.F.

UNIT: Incident Meteorologist: Sam Roberts

*** HOT, DRY, LOW RH, VERY UNSTABLE, WEST-NORTHWEST AFTERNOON WINDS GUSTING TO 20 MPH ***

DISCUSSION: Conditions will be mostly sunny, hot, dry, low RH, and becoming very unstable in the afternoon hours along with breezy west-northwest winds.

MONDAY: HOT, DRY, LOW RH, VERY UNSTABLE, WEST-NORTHWEST AFTERNOON WINDS GUSTING TO 20 MPH

- WEATHER: Mostly sunny, hot and dry. Breezy afternoon winds and we become very unstable.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Most ridges, unsheltered areas, wind-aligned drainages: east 3-6 mph through 1200, then west 4 to 8 mph gusts to 15 mph through 1600, then west-northwest 5 to 10 mph gusts to 20 mph through 2000. Highest ridgetops (Collins Baldy): westnorthwest 10 to 15 mph gusts to 25 mph from 1600 through 2000.
- **CHANCE OF WETTING RAIN: 0%.**
- RAIN AMOUNTS: none.
- MAX TEMPERATURES: 96-100 bottom and clear areas, 83-87 highest ridgetops and smoked in areas.
- MIN RH: 10-20% bottom and clear areas, 15-25% top and smoked in areas.
- INVERSION: Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1300. Smoke inversion unlikely to mix out across smoked in areas.

MONDAY NIGHT: GUSTY WEST-NORTHWEST WINDS 20 MPH THROUGH LATE EVENING

- WEATHER: Dry and mostly clear, gusty west-northwest winds early, then becoming light and easterly after midnight. Poor to moderate RH recovery above 5000 feet.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Most ridges, unsheltered areas, wind-aligned drainages: west-northwest 5 to 10 mph gusts to 20 mph through 2200, then becoming easterly 3 to 6 mph after midnight. Highest ridgetops (Collins Baldy): west-northwest 10 to 15 mph gusts to 25 mph through 2200, then west-northwest 5 to 10 mph through 0300, then becoming easterly 3 to 6 mph rest of the night.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MIN TEMPERATURES: 52-57 bottom, 57-62 top.
- MAX RH: 48-58% bottom, 30-40% top.
- INVERSION: Weak developing near mid-slope and secondary inversion at 5,000 feet.

TUESDAY: HOT, DRY, VERY UNSTABLE, LOW RH, SLIGHT CHANCE AFTERNOON/EVENING STORMS

- WEATHER: Mostly sunny, hot, dry, and very unstable. Slight chance for an afternoon/evening thunderstorm.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 3-6 mph. Most ridges, unsheltered areas, wind-aligned drainages: east 3-6 mph through 1200, then west 4 to 8 mph gusts to 18 mph. Highest ridgetops (Collins Baldy): west-northwest 5 to 10 mph gusts to 20 mph from 1600 through 2000. Erratic wind gusts to 30 mph possible near any thunderstorms.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MAX TEMPERATURES: 99-104 bottom and clear areas, 87-92 highest ridgetops and smoked in areas.
- MIN RH: 10-20% bottom and clear areas, 15-25% top and smoked in areas.
- INVERSION: Weak mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1400. Smoke inversion unlikely to mix out across smoked in areas.

Extended outlook: Wednesday: Slight chance thunderstorms. Mostly sunny early, few clouds late, hot, low RH and very unstable. Highs 91-107. Minimum humidity: 10-20%. Winds west-northwest 5-10 mph with gusts to 18 mph. Thursday through Saturday: Slight chance thunderstorms. Mostly sunny, hot, dry, low RH. Highs from 87-105. Minimum humidity: 14-24%. Winds west-northwest 5-10 mph with gusts to 18 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 15	TYPE OF FIRE: Wildfire
FIRE NAME: McKinney Fire	OPERATIONAL PERIOD: August 15, 2022 24hr
DATE ISSUED: 8/14/22	TIME ISSUED: 2000
UNIT: CA-KNF	SIGNED: _John Kern_

INPUTS

WEATHER SUMMARY: Still Warm and Dry with NW Winds with Gusts to 20 mph

Temps: Day Valley 96-100; Day Ridges 83-8

RH: Day Valley 10-20% Day Ridges 15-20%

Night Valley 52-57; Night Ridges 57-62

Night Valley 48-58%; Night Ridges 30-40%

Winds: Day Ridges W to NW 5-10 G 20-25 mph Night Ridges Still strong WNW 10-15 G25 until 2000.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Winds similar to yesterday, NW with gusts to 25 on ridges but temps a little higher and RH a little lower (Hot and Dry). Fuels are still very dry (ERC 90th percentile), and the terrain is very steep. Winds will be out of the west to northwest. Interior islands may still burn but should not threaten most control lines. Some interior areas have had needles and leaves scorched and are starting to fall creating a risk of reburn. Make sure lookouts have a good view of the fire.

Should an interior green island or dirty burn area challenge the line, or a new start get started, with these dry fuels, spotting will be problematic and should be short range (100-300 ft) for the most part and from rollout. There were numerous spot fires occurring during the IA of the George Fire several days ago.

Expect single and group tree torching and sustained short duration crown runs where slope and winds align especially outside our current perimeter or new starts.

At night: Expect winds to continue to be strong until midnight. The fire may remain active most of the period as Relative Humidity will not recover that well on upper slopes.

SPECIFIC:

Branch V: No forward fire progression is expected. Portions of Div Y and Z have small areas of heat near the line several days ago but could still hold heat. Expect interior islands to burn out and there is a potential for reburn; either of which will challenge existing lines.

Branch X: No forward fire progression is expected. Rollout will continue to be problematic and challenge any established lines. The George Fire looks good, but rollout on steep terrain could pose a threat.

Branch XX: No forward fire progression is expected. Winds will push fires downslope to the SE.

IA: With the state of the fuels, expect any new start to be resistant to control. For fire aligned with slope and wind, expect rapid rates of spread with the potential for <u>crown runs</u> where dense canopies are present.

Timber with shrubs TU5 (165)	Rate of Spread 12-17 ch/hr	Flame Length 4-8 feet
Long-needle litter TL8 (188)	7-12 ch/hr	3-6 feet
Grass/Shrub GS2 (122	28-35 ch/hr	4-8 feet
Shrub SH7 (147)	50-60 ch/hr	14-19 feet

Probability of Ignition 91%

Spotting distance from torching trees on ridgetop 0.4 miles

AIR OPERATIONS: Conditions should be clear in the morning with no negative effect on air operations.

SAFETY

Crown fires can exhibit rapid rates of spread, great flame lengths and long-range spotting.

Health & Safety Message

Incident: McKinney Fire CA-KNF-006177 Date/Op Period: Day / Night Shift 08/15/22

Hazards & Risks

Transfer of Command: As we make the transfer of command from CA Team 2 to CA Team 12; maintain your situational awareness as new faces take over the fire. Share information and local fire knowledge. Review your IAP closely and share all the intel you've gathered over the last several shifts (weeks) with the new folks. Identify all the hazards and mitigation measures and reevaluate your tactics each shift to reflect the changing conditions on the fire line.

Tactical Pause: The coming transition in leadership will be a good time to review some of the basic safety tenants of firefighting. **LCES:** Is there a new set of eyes on the fire? Has the comm plan been changed? Is the Div/Branch you're assigned to the same or have things changed? Is that safety zone you had in your back pocket the last few shifts now miles away? Just a few thoughts to discuss with your crews.

<u>Public Interactions:</u> Be aware of public contacts while you're out in the field. Folks may wander into the Forest despite road and forest closures. Be firm but kind with your contacts and remind the public of the dangers that exist out in the fire area. A good time for some public education in fire suppression operations.

<u>Driving Safety:</u> Long drive times, narrow/winding roads, civilian traffic, reduced visibility, distracted drivers; all combine to make it a challenge just to get to the fire line safely! Slow down, focus on the road, pull off the road to check maps, phones, radios, etc.

Paul Tompkins/ Team 12 Safety Shop

L. Lookouts C. Communications E. Escape Routes S. Safety Zones
BE MINDFUL

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / COM	NDITIONS	MITIGATIONS / WARNINGS / REMEDIES				
ALL	FIRE WEATHER/FIRE BEH	AVIOR	 100-HOUR FUELS BELOW 4% ERC'S 97th PERCENTILE High Temperatures and low RH in the forecast. Monitor current weather conditions and forecasts. Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. 				
ALL	DRIVING HAZARDS		 WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. DO NOT SKIP AHEAD OF PILOT CAR. Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. 				
ALL	STRUCTURE / URBAN INT HAZARDS	ERMIX	 Survey burned out structures carefully. Avoid inhaling residue smoke and fumes. Watch for downed powerlines and exposed propane lines. Look for propane tanks and other hazardous materials 				
ALL	EXTREMELY STEEP TERRA ROLLING MATERIAL		 Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around frequently. 				
ALL	HAZARD TREES		 Follow Hazard Tree Safety Guidelines (IRPG p. 22). Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas. 				
ALL	SAFETY ZONES		 Follow safety zone guidelines (IRPG p. 6) Carefully evaluate burned areas before designation as safety zones due to spotty burning in numerous areas. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner. 				
ALL	NIGHT OPERATIONS	5	 Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours 				
ALL	INFECTIOUS DISEAS	E	 Maintain 6' foot distance whenever possible. Wear masks when appropriate. Do frequent handwashing/sanitizing and disinfecting common surfaces. Notify MEDL if any symptoms arise. 				
ALL	HEAVY EQUIPMENT/DOZ	ZERS	 Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotter. Avoid moving parts Ensure the use of effective communication (radio, hand signals). Identify hazards. 				
ALL	SUPPRESSION REPAI	R	 Scout out your work area and identify hazards prior to working. Watch for steep terrain and rolling materials that may be kicked loose by others working in the area. Avoid working in proximity to heavy equipment. Monitor personnel for heat related illness; stay hydrated and take frequent rest breaks. 				
ALL	LIGHT FLASHY FUELS/ SPOT	FIRES	 Live fuel moistures are at critical level. Expect rapid ROS when winds are present Ensure LCES is in place. Use caution when unburned fuels are between you and the fire. 				
ALL	HEAT RELATED ILLNE: (HRI) / DEHYDRATION&FA	Drink 2: 1 water to sports drinks. Maintain 2:1 work/rest ratio Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS (IRPG P.110)

6 Work Assignments:		ň:	225 - 217			

6. Work Assignments:

- Grid, patrol and mop-up all completed dozer and handline in Division A to the extent necessary to prevent escape.
- Coordinate with Repair Group 1 and Resource Advisors for suppression repair activities occurring within the division.
- Identify accountable property and backhaul all trash.

7. Special Instructions:

- Report to Klamath River Spike or Montague Base Camp for sleeping as directed by DIVS.
- READs will check in and out with DIVS.

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - o Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- · Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Gena Fowlkes @ (909) 762-9032

MEDL Nick Stepanian @ (909) 908-4778

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available at the **Montague Elementary School location** (430 E. Prather St.) from **Adventure Medics, hours -0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals but testing is also available to anyone with COVID exposure concerns.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees when the Community Levels are Medium or High.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

COVID-19 COMMUNITY LEVEL	MASKING DIRECTION (Federal Wildfire Incidents and within Federal Facilities)
HIGH	Individuals are required to wear masks around others while indoors, while sharing a vehicle, or when social distancing cannot be maintained.
MEDIUM and LOW	Individuals are not required to wear masks.

Community Levels are updated weekly by CDC and give direction for a Sun-Sat operation period.

McKinney Incident COVID Advisor - Robin Wall, (530) 410-1721

Prepared by Bill Sanders, Lead COVID Advisor (530) 721-3865

The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: Distance, Diagonal, Divert, Discharge, and Dissipate.

Distance: Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

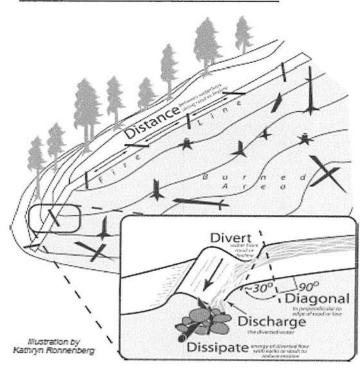

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

Discharge: Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

Dissipate: Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope %	Maximum Distance Apart (feet)
1-6	300
7-9	200
10-14	150
15-20	90
21-40	50
41-60	25

Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: UDSA-Forest Service, "Sale Administrator's Handbook"

Reference: Hauge, C.J., M.J. Furniss and F.D. Euphrat. 1979. Soil erozion in California's Coast Forest District. California Geology. June, 1979

Specifications for Piling Slash

Hand Pile Construction:

- All activity generated and pre-existing fuels with a diameter between 1" and 8" shall be bucked to 4' or less and included in the hand piles. Exceptions include single logs that exhibit at least 50% decomposition.
- Hand piles shall be symmetrical, constructed neatly and compactly.
- Hand pile base shall not be constructed with material over 4", 4"< material will be stacked in the upper half of the pile.
- Slash that causes large air spaces in piles shall be cut to a minimum of 8"x 8" air spaces greater than 8"x8" are unacceptable.
- Material in piles shall be cut <4' per individual piece.
- Maximum piles size 6' in diameter and 6' in height and minimum pile size shall be 4' in diameter and 4' in height.
- Piles shall be distinct and separate from each other allowing at least 6' between each pile
- Piles shall be placed to limit scorch potential to leave trees, not in contact with leave trees and built up slope from leave trees when possible
- At least 50% of material in the lower third of the piles shall be composed of small diameter material and attached fines to create a kindling core.
- All piles shall be covered with Kraft type wax paper (wax side up).
- Pile covering sheet shall be placed to cover the bottom 2/3 of the pile and cover 50% of the surface area of the pile at this level. The remaining 1/3 of the pile shall be placed over the cover sheeting anchoring all four corners and the middle of the cover sheeting securely.
- No piles shall be built on, or in contact with any tree stumps >10" diameter.
- Piles created on downed logs, the log in contact with any pile shall be bucked to create a 4' separation in the log (to break the continuity and limit fire spread if the log should be ignited).
- logs over 8" diameter generated from thinning shall be limbed with limb wood added to piles, cut to 4' lengths and dispersed a minimum of 6' separation from downed logs, leave trees and stumps.
- In some units specific pile placement will be required to avoid damage to sensitive plant colonies, maps with exclusion areas will be included, the exclusion areas will be clearly marked and defined by the COR before work takes place. Any piles constructed in exlusion areas will be moved by the contractor.

FINANCE MESSAGE

Fire Name: McKinney

Fire Number: CA-KNF-006177

Accounting Code: P5 PX2F (0505)

Email: 2022.mckinney.finance@firenet.gov

Finance Documents Needed upon "Check In" (If Not Already Submitted):

	& submit.
Contract Equipment/	Cooperator:
Contract Crews:AgreementManifestResource Order	Cooperative AgreementResource Order
	Contract Crews:AgreementManifest

When emailing finance:

- Overhead/FED: subject line: TIME, Resource #, Resource Name
- Equipment/Cooperator: subject line: EQTR, Resource #, Resource Name

Prior to your demob date, please contact Finance via email to expedite the demob process.

Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay documents for review and signature.

Local Government Resources on CFAA

If you are demobing and there is no OES AREP there:

- ➤ Have the FSC or IC review and sign your 42s
 - You give the incident the pink copy
 - > You keep the gold copy
- You mail the white and green (if it has a green) to OES Headquarters per the instructions on the 42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your OES Fire & Rescue Assistant Chief Patrick Titus 916-634-9225

Human Resource Message McKinney Fire

Greetings, my name is Adrian and I am the Human Resource Specialist (HRSP) assigned to the incident. As the HRSP, I am available to *all* incident personnel to provide assistance with a wide range of issues that may be impacting the work environment, such as conflict resolution and addressing any allegations of misconduct.

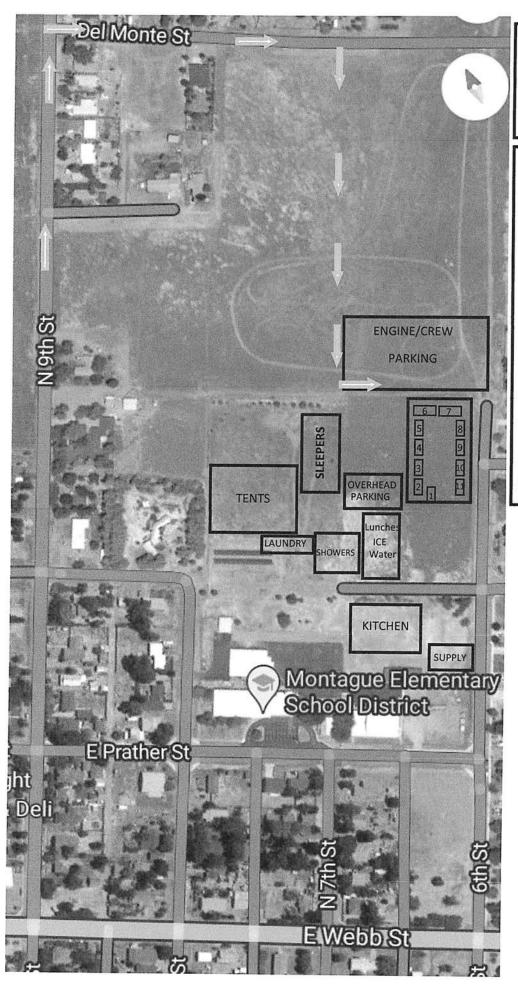

As a reminder, whether you are a federal, state, county or local government employee, contractor or AD, while assigned to the incident, we all must adhere to federal rules and laws regarding appropriate behavior. We have zero tolerance on this incident for illegal drugs (including marijuana), alcohol, and sexual harassment. Just don't do it.

Remember: Kilo, India, Sierra, Foxtrot, Whiskey... Keep it safe for work!

If I can be of any assistance to you, please text or call the below number or stop by my office, which is located on Main Street next to IT.

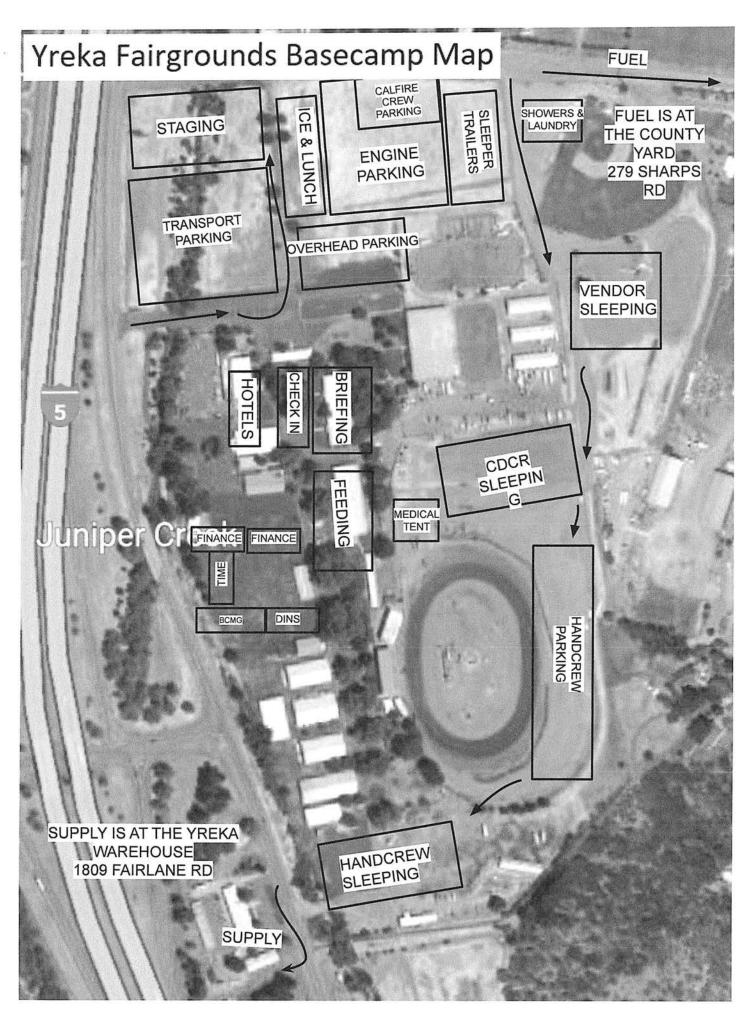

Hours are 0530 to 2200 Adrian Escobedo- (HRSP) – (530) 523-3804

Report to the Yreka Fairgrounds DEMOB Trailer at your scheduled time.

20000 Block and ALL State Resources

Briefing, Feeding, Finance, Check-In, Demob, etc. are located at: YREKA FAIRGROUNDS
1712 Fairlane Rd, Yreka

DEMOB MESSAGE

Check the DEMOB list each morning. Only report to DEMOB at your scheduled time. Early admittance will not be allowed, this includes "starting the walk."

 Vehicle Inspection: The DEMOB Unit will inform you if the vehicle needs to be inspected. A Vehicle Inspection time will be provided when you initially arrive to the Demobilization Unit.

FINANCE MESSAGE

TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL- Make sure you have started your eFC-33's and update after each shift. Please
 make sure ePay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS- Check in with the Time Unit and drop off your agreements.
- SHIFT TICKETS- Available for agency line supervisors only and are in the Time Unit.
 - Reminder VIN numbers must match contracts exactly.

COMP / CLAIMS

- DAMAGE CLAIMS- For all damages during fire suppression activities to property or vehicle, complete an ICS-213. We will need location, description of damages, and your contact information.
- WORKERS COMPENSATION- Supervisors should complete IIPP-15's and come to the COMP/CLAIMS
 Unit to enter into IAPS.

DIVISION / GROUP - LINE SUPERVISORS

Please turn in hired equipment shift tickets at the end of each shift.

FIRE SUPPRESSION REPAIR MESSAGE

Berms and push-piles should be spread to the extent feasible by back-blading with a tractor or with an excavator. Debris piled against standing timber should be pulled back while taking care not to damage growing stock with the tractor blade or an excavator bucket and thumb. At helispots, staging areas, and safety zones remove and/or breach berms so that runoff can be dissipated. Cross-drain these areas to effectively dissipate water as necessary.

Waterbreaks should be constructed at an approximately 45° angle at a minimum depth of 10" from the bottom of the cut to the top of the berm. Where possible, the discharge from the waterbreaks should be directed into vegetated areas to minimize erosive forces. Where dozerline or handline has crossed a watercourse, the channel should be cleared of soil and debris to re-establish the channel. Waterbreaks on handlines should be installed every 50' or closer as needed.

Waterbreak maximum spacing:	Grade	0-10%	11-25%	26-50%	>50%
	Spacing	0-200'	150'	100'	75'

Roads used in fire suppression activities should be left in at least as good a condition as they were found. Gravel and soil surface roads should be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips should be installed for drainage. Inside ditches damaged from suppression activities should be cleaned and left unobstructed.

If any archaeological resources are located during suppression repair activities, work will stop in that location and the Suppression Repair Lead will be notified.

Training Specialist Message

The Incident Training Specialist from Team 2 will be staying on to assist the incoming team. If you are departing the McKinney Fire, please complete your training record by following the instructions below.

If you are staying, its business as usual.

At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com
