**ISSUED:** 1800, Aug 24, 2022

**NAME OF FIRE:** McKinney  
**UNIT:** Klamath N.F.  
**Incident Meteorologist:** Terry Lebo

## Weather Summary

Temperatures continue to warm Thursday ahead of a dry cold front expected to cross the area later Friday. Gusty winds will develop ahead of the front on Friday and continue into Saturday. Temperatures briefly cool for the weekend with well above normal temperatures returning by the middle of next week.

### THURSDAY:

- **WEATHER:** Mostly sunny.
- **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1100 then upslope 4-7 mph with gusts around 10 mph. Ridges, unsheltered areas, wind-aligned drainages: From the east 3-6 mph through 1200 then from the west-northwest 7-10 mph gusts around 20 mph through 2000.
- **CHANCE OF WETTING RAIN:** 0%
- **RAIN AMOUNTS:** none.
- **LAL (Lightning Activity Level):** 1
- **MAX TEMPERATURES:** 97-103 lower elevations, 84-90 highest ridgetops.
- **MIN RH:** 11-21% lower elevations, 20-30% ridgetops.
- **INVERSION:** Moderate to strong mid-slope inversion mixing out around 1300.

### THURSDAY NIGHT:

- **WEATHER:** Clear. Moderate to excellent RH recovery.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages above mid-slope: from the northwest 7-10 mph gusts 15-20 mph through 2000, then becoming east-northeast 4 to 7 mph.
- **CHANCE OF WETTING RAIN:** 0%
- **RAIN AMOUNTS:** none.
- **LAL (Lightning Activity Level):** 1
- **MIN TEMPERATURES:** 60-64 lower elevations, 63-67 in the thermal belt.
- **MAX RH:** 50-70%.
- **INVERSION:** Moderate to strong inversion developing near mid-slope.

### FRIDAY:

- **WEATHER:** Sunny with increasing clouds late.
- **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1100 then upslope 4-7 mph with gusts around 12 mph. Ridges, unsheltered areas, wind-aligned drainages: From the east 3-6 mph through 1200 then from the west 8-12 mph gusts 20-25 mph through 2100.

### FIRE BEHAVIOR

**GENERAL:**  
Heat remains isolated to mainly burning stumps and heavy ground fuel well interior with limited threat to the control lines. Be heads up with forecasted increase in winds this afternoon, low RH's and fuels that are returning to critical dryness. Several years of persistent drought and a water year which has received less than 50% of normal rainfall, has the fire footprint within an area identified as "Extreme Drought."

Energy Release Component (Oak Knoll): is **above the 90<sup>th</sup>** percentile at 62 (Fuel Model Y 90<sup>th</sup> percentile is 61)

***\*\*Percentiles and thresholds are used to help us measure the significance of NFDRS outputs as they relate to level of fire risk, fuels conditions and fire danger.***

***Percentiles*** are based on a scale of 0-100. We use percentiles to sort and rank a collection of data. At 90<sup>th</sup> percentile, there are only 10 % of recorded weather that occurs above that value.

***Thresholds*** are the actual values of NFDRS indices (ERC, BI) weather observations (RH, windspeed) or fuel moistures (1-hr, 1000 hr) that mark the change from one category to another.

Predicted fuel conditions:

**1HR fuel moisture:** 7% (+1)      **10HR moisture:** 9%(-1)      **100 HR moisture** 9%(same)      **1000 HR:** 10% (same)  
**Energy Release Component:** 62      **Burning Index:** 39      **Probability of Ignition (PIG)** <82%

**Expected Surface Fire Behavior:** (assumes 4 mph eye level wind and 50% slope)

Timber Understory (TU5) Timber with branches, shrubs:      Flame length 6-9' and ROS 10-13 ch/hr head  
Grass, Brush (2,SH7)      Flame length 5-14' and ROS 28-46 ch/hr (GS2/SH7)

**SPECIFIC:**

**McKinney Fire:** The fire has not experienced perimeter growth for several weeks with the control lines being tested by hot, dry, and windy conditions during that timeframe. Infrared showing the amount of interior heat is diminishing but still present.

**Initial Attack:** Temperatures have warmed back-up to where any new starts have will likely pose suppression difficulty. Local knowledge is critical to navigate the network of roads to make access to any new fires and links to local pocket cards are provided below. Fuels, Weather and Topography are aligning to support rapid large fire growth on any new starts.

Expected flame lengths and rates of spread could mean direct attack with ground resources will not be effective, don't hesitate to order the resources that can be effective. Look for indirect options early.

**AIR OPERATIONS:**

Weak mid-slope inversion mixing out by 1200.  
Sunrise: 0628    Sunset: 1956

Know your local thresholds, forecasted weather, and see how they relate to local pocket cards.

### **Hazards & Risks**

#### **Communication Responsibilities:**

All firefighters have five communication responsibilities:

1. Brief others as needed.
2. Debrief your actions.
3. Communicate hazards to others.
4. Acknowledge messages.
5. Ask if you don't know.

**Leader's Intent:** All leaders of firefighters have the responsibility to provide complete briefings and ensure that their subordinates have a clear understanding of their intent for the assignments:

- Task = What is to be done
- Purpose = Why is it to be done
- End State = How it should look when done.

Effective communications between all personnel on the fire is a key element of fire line safety and addressed in the 10 Standard Fire Orders and the 18 Watch Out Situations. Learn and embrace them.

**Travel Home:** You've survived the fire, now survive the drive home. If you are demobing, get plenty of rest time prior to your departure, especially those of you with long drives. Take rest stops as needed and don't sacrifice your safety in a rush to get back home. Use seat belts and ARRIVE ALIVE!

# **COVID-19 PREVENTION INFORMATION** **MAINTAINING A HEALTHY WORKFORCE**

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19** and maintain the health of all fire personnel.

## **Self-Awareness/ Daily Health Screening**

**Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms** (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

## **COVID-19 Testing availability – (2) locations**

**McKinney Base Camp** (430 E. Prather St.) - **Adventure Medics**

**Klamath River Spike Camp** (28017 Hwy 96) - **Mountain Medics**

Priorities for testing will be for those with COVID-related symptoms and those with COVID exposure.

## **Sanitary and Personal Hygiene Practices**

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

## **Mask Wearing**

Mask wearing will be required when Siskiyou County community level is high. The Siskiyou County community level for the week of August 22, 2022 – August 28, 2022 is **Medium**.

## **Local Government Resources on CFAA**

If you are demobing and there is no OES AREP there:

- Have the FSC or IC review and sign your 42s
  - You give the incident the pink copy
  - You keep the gold copy
- You mail the white and green (if it has a green) to OES Headquarters per the instructions on the 42

## The Five-D System for Effective Fireline Waterbars

To make effective waterbars, use the 5-D System: **Distance**, **Diagonal**, **Divert**, **Discharge**, and **Dissipate**.

**Distance:** Waterbars must be placed the proper distance apart, based on slope. This keeps the area that accumulates runoff small enough to prevent damage. The table below gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

**Diagonal:** Don't bully the flow, lead it. Waterbars built directly across a fireline tend to fail. Waterbars built diagonal to the fireline lead the water off and work better. A simple rule is to build them at 30 degrees off perpendicular (see the illustration below).

**Divert:** A good waterbar will divert the water off the fireline. To do this the waterbar must be deep enough to handle all the flow for as long as it's needed. Excavation is much better than fill in making a durable and effective waterbar (a ditch or a dip beats a dike).

**Discharge:** Another feature of a good waterbar is that it will discharge the flow. A good waterbar is not a dam, it must have an open outlet.

**Dissipate:** Finally, a good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet.

Fireline slope %	Maximum Distance Apart (feet)	<i>Recommended spacing for waterbars on firelines. Waterbars should be no further apart than this, but they may be closer. When in doubt, put in more. From: USDA-Forest Service, "Sale Administrator's Handbook"</i>

# Training Specialist Message

The Training Specialist is closing all training records.

Here's how:

**At the end of your assignment:**

1. **Trainee:** Complete the exit interview form. Use the exit interview QR code to access the document.

Trainee Exit Interview

2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.

3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's **signed** by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to [imt2training@gmail.com](mailto:imt2training@gmail.com)

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email-[imt2training@gmail.com](mailto:imt2training@gmail.com).

## Human Resources Message

It is much better to accept mistakes, learn from them, and move on. Look forward and base decisions on the future not the past.

**Principles to Remember**

Do:

- Accept responsibility for your role in the mistake
- Show that you've learned and will behave differently going forward
- Demonstrate that you can be trusted with equally important decisions in the future

Don't:

- Be defensive or blame others
- Make mistakes that violate people's trust — these are the toughest to recover from
- Stop experimenting or hold back because of a misstep

Our job is not done until we are all home. Maintain your focus and professionalism all the way through.

Adrian Escobedo— HRSP: 530-523-3804

Medical Incident Report					
<b>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</b>					
<b>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</b>					
<b>Use the following items to communicate situation to communications/dispatch.</b>					
<b>1. CONTACT COMMUNICATIONS / DISPATCH</b> (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
<b>2. INCIDENT STATUS:</b> Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>
