Spot Forecast for McKinney...USFS

CWR..... percent.

LAL....2.

... EXCESSIVE HEAT WARNING IN EFFECT FROM NOON TUESDAY TO 11 PM PDT WEDNESDAY RED FLAG WARNING IN EFFECT FROM 1 PM TO 8 PM PDT TUESDAY... .DISCUSSION...High pressure will bring increasingly hot, dry and unstable conditions through midweek with the peak of the heat and the potential for plume dominated fire on Tuesday/Wednesday. A period of strong, gusty winds and low relative humidity is expected Tuesday afternoon and evening. Breezy to windy conditions could maintain critical fire weather thresholds on Wednesday too. There is a slight chance of thunderstorms with little or no rainfall on Wednesday afternoon. While slight cooling is possible Thursday, heat will likely return Friday and Saturday. Odds favor cooler weather by early next week with increasing chances for precipitation. .TUESDAY ... Sky/weather.....Sunny (0-10 percent). Haze and areas of smoke. Max temperature.....Top 94. Bottom 111. Min humidity.....7-12 percent. Eye level winds.....Top: South winds 1 to 3 mph becoming west 6 to 10 mph with gusts to 16 mph in the afternoon. Bottom; Down slope/down valley 1 to 3 mph becoming west 2 to 4 mph with gusts to around 8 mph, and west 3 to 6 mph with gusts to 9 mph in the Klamath river valley in the afternoon. CWR..... percent. LAL....1. .TUESDAY NIGHT... Sky/weather......Mostly clear (15-25 percent). Areas of smoke in the evening. Haze through the night. Patchy smoke overnight. Min temperature.....Top 74. Bottom 60. Max humidity......Top 26 percent Bottom 68 percent. Eye level winds.....Top; Northeast winds 6 to 10 mph with gusts to around $16\ \mathrm{mph}\ \mathrm{in}\ \mathrm{the}\ \mathrm{evening}\ \mathrm{becoming}\ \mathrm{southeast}\ 1\ \mathrm{to}\ 3$ mph after midnight. Bottom; West 2 to 4 mph with gusts to around 8 mph, and west 3 to 6 mph with gusts to 9 mph in the Klamath river valley in the afternoon. becoming downslope 1 to 3 mph towards sunrise. CWR..... percent. LAL....1. .WEDNESDAY... Sky/weather......Mostly sunny (30-40 percent). Slight chance of dry thunderstorms in the afternoon. Max temperature.....Top 90. Bottom 107. Min humidity......11-17 percent. Eye level winds.....Top: Southwest winds 1 to 3 mph becoming west 3 to 5 mph with gusts to around 12 mph in the afternoon. Bottom: Downslope/down valley 1 to 3 mph becoming west 2 to 4 mph and 2 to 5 mph along the Klamath in the afternoon.

Danger Tree Abatement Plan McKinney Fire

Klamath National Forest

Happy Camp/Oak Knoll Ranger District & Salmon-Scott River Ranger District

Fell danger trees in areas where suppression activities created hazard trees that would hit designated travel routes. Danger trees can be abated (felled) near designated features to provide for immediate firefighter and/or public safety. If after felling, downed trees pose a threat to firefighter and/or public safety, then remove and deck these trees in a location that does not pose a threat to firefighter and/or public safety. All work will be done only on National Forest System lands. Distances from the target feature are based on the following priorities:

Priority 1 Features

Size Class	Size Class Definition	Baseline Slope Distance (feet above/flat/below road)*	Maximum Slope Distance (feet above/flat/below road)*	Minimum Slope Distance (feet above/flat/below road)*
Small	Less than 14.0 inches stump diameter	100/100/75	200/200/150	75/75/50
Large	Greater than or equal to 14.0 inches stump diameter	200/150/150	250/250/200	125/125/75

^{*}Distances shown above are approximately 1 ½ times the tree height from the target feature that is at risk above the road and on flat ground and one times the tree height below the road.

Priority 2 Features

<u>Size</u> <u>Class</u>	Size Class Definition	Baseline Slope Distance (feet above/flat/below road)**	Maximum Slope Distance (feet above/flat/below road)**	Minimum Slope Distance (feet above/flat/below road)**
Small	Less than 14.0 inches stump diameter	75/100/75	200/200/150	75/75/50
Large	Greater than or equal to 14.0 inches stump diameter	150/100/100	200/200/150	100/100/75

^{**}Distances shown above are approximately one times the tree height above and below the Feature and in flat areas.

In addition, material meeting the following utilization and processing specifications will be skidded to, processed, and decked at pre-approved decking locations.

Utilization and Processing Specifications

	Merchan	table Tree		num Piece irements
Product and Species	Minimum DBH (inches)	Number of Minimum Pieces Per Tree	Length (Feet)	Diameter Inside Bark Small End (inches)
ALL	10.0	1	10	8.0

Slash:

- a.) Slash will be (in order of preference): chipped, lopped and scattered, or piled in a manner that will not impact man-made structures including but not limited to water tanks, water lines, irrigation ditches, roads, road borrow ditches, and water diversion structures.
- b.) Material extending three (3) feet or more outside the edge of a pile will be trimmed.
- c.) An eight (8) foot slash bay will be cleared of all but fine material around each machine pile and
- d.) When needed, an appropriate fire line will be cleared to mineral soil around the outer ring of the slash bay.
- e.) When lopped and scattered, all branches must be cut from main stem when main stem exceeds three (3) inches in diameter
- f.) Slash or chips must be spread to a height of not more than one (1) foot. Tree stems will be bucked, as necessary, to meet this height requirement and to avoid "jack-strawing" trees on top of one another.
- g.) All piles will be reasonably compact and free of soil to facilitate burning and will be constructed of such size and at such distance from trees so that burning will not result in unnecessary damage to residual timber.

Stump Height:

Stumps will be cut to a height of not more than <u>12 inches</u> from the high side of the stump, unless approved in writing by the Agency Administrator Representative or their designee.

Check-In and DEMOB MESSAGE

These are the check-in and demob phone numbers. Please call these numbers when checking-in or demobbing.

Check-in #: (530) 230-3364

DEMOB #: (480) 420-7735

When doing personnel substitutions scan the QR code on the front cover and fill out the personnel substitution form and tell your division.

FINANCE MESSAGE

Fire Nate: Mckinney

Fire Number: CA-KNF-006177

Accounting Code: P5 PX2F (0505)

Email: 2022.mckinney.finance@firenet.gov

Phone Number: (530) 572-1107

Finance Documents Needed upon "Check In" (If Not Already Submitted):

Please email	these documents or scan the		
FED Equipment/ Crews: Manifest - showing employment type (GS or WG) or AD rates if applicable	Overhead: AD/Casual Hire Form If regular Agency please ensure "GS" or "WG" is written on your first CTR	Contract Equipment/ Contract Crews: Agreement Manifest Resource Order Inspections	Cooperator: Cooperative Agreement Resource Orde

When emailing finance:

- Overhead/FED: subject line: TIME, Resource #, Resource Name
- Equipment/Cooperator: subject line: EQTR, Resource #, Resource Name

Per the IC's letter dated 8/28, lodging and per diem have been authorized since the fire is currently not providing a camp, food, water. Therefore, federal and cooperators are to follow their agency's travel guidelines. Contractors are to comply with their contract.

Please note, in Yreka, California, US General Service Administrations (GSA) locality rate is \$96 for lodging and per diem (includes food and water) is \$59.

For contractors, please note, the Government will pay actual lodging expenses or the per diem locality rate published by the GSA, whichever is less. Double occupancy of hotel rooms is required. Any associated lodging taxes are reimbursable as documented. Lodging receipts, as well as documentation by incident personnel that a campsite was not provided, shall be submitted as supporting documentation with payment documents.

Prior to your demob date, please contact Finance via email to expedite the demob process. Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay documents for review and signature.

Safety Message

L.C.E.S. (+ M.?)

The IHC crew I was on in 2015 was saying L.C.E.S. + M. It took me a little bit to catch on, but it made sense. We are engrained with L.C.E.S. (Lookouts, Communication, Escape Routes and Safety Zones) thanks to Paul Gleason, which he came up with after the Dude Fire fatality. So, by now you're scratching your head on the M right...well here you go!

The M stands for Medical. Often, we dive into fire operations with little consideration of who the medical folks are (at least on adjoining resources - EMT's if you're lucky), what medical gear they have and where it's located on which truck. The M at the end of L.C.E.S. makes you talk about the medical scenario before you have a medical on the incident. Often there are protocols on large incidents for an Incident Within an Incident (IWI). It's most times listed in the Incident Action Plan (IAP). If it's listed in the IAP make sure you review it. I say that because where and what you do will change depending on where you are, what the issue is, who's around to help, etc.

So, what will you do today where you're working if someone gets knackered up, falls down a cliff or has a vehicle accident? Think about the M before there is an M. Practice different scenario's, who will do what, say what to whom, even if it's just in your head. Practice in this arena will help when not if a situation occurs.

L.C.E.S. + M. Engage Thoughtfully.

McKinney Fire Safety Team

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	CHAIN SAW AND TREE FELLING OPERATIONS	 Follow "Hazard Tree Safety" guidelines in the IRPG. Look up, look down, look around for hazard tree indicators. Only fell and buck trees within your expertise and training. Follow "Procedural Felling Operations" Do not fall trees during high wind events. Ensure proper use of all required PPE.
ALL	DRIVING HAZARDS	 WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. DO NOT SKIP AHEAD OF PILOT CAR. Drive defensively! Expect the unexpected around every curve. Drive with headlights on, use chock blocks, keep windshields clean, look before backing, and use backers whenever available.
ALL	STRUCTURE / URBAN INTERMIX HAZARDS	 Survey burned out structures carefully. Avoid inhaling residue smoke and fumes. Watch for downed powerlines and exposed fiber optic lines. Look for propane tanks and other hazardous materials
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	 Concentrate on your footing placement, take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, down and around frequently.
ALL	HAZARD TREES	 Follow Hazard Tree Safety Guidelines (IRPG p. 22). Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in work/parking areas.
ALL	UTV / ATV OPERATIONS	 Operators must be certified by their agency to operate ATV's/UTV's. DOT approved helmets are required by USDA and DOI agencies. Operators must be trained in trailering and pulling ATV's and UTV's. Seatbelts must be worn at all times while driving UTV's.
ALL	INFECTIOUS DISEASE	 Maintain 6' foot distance whenever possible. Wear masks when appropriate. Do frequent handwashing/sanitizing and disinfecting common surfaces Notify MEDL/Hospital Liaison if any symptoms arise.
ALL	HEAVY EQUIPMENT DOZERS/EXCAVATORS	 Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotter. Avoid moving parts. Ensure the use of effective communication (radio, hand signals). Identify hazards.
ALL	SUPPRESSION REPAIR	 Scout out your work area and identify hazards prior to working. Watch for steep terrain and rolling materials that may be kicked loose by others working in the area. Avoid working in proximity to heavy equipment. Monitor personnel for heat related illness; stay hydrated and take frequent rest breaks.
ALL	TREE ABATEMENT OPERATIONS	 Establish clearly defined work zones. Establish traffic control plan as needed. Brief the medical evacuation plan. Coordinate heavy equipment with the operators for felling and decking logs.
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION & FATIGUE	 Drink 2:1 water to sports drinks. Maintain 2:1 work/rest ratio. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS (IRPG P.110)
ALL	CHIPPING	 Ensure JHA is reviewed/signed by personnel involved in chipping operations. Only qualified personnel will feed the chipper. Ensure appropriate PPE is used. Do not walk in front of chipper discharge.

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

Self-Awareness & Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough - more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

Siskiyou County Public Health - 1275 South Main St., Unit A, Yreka, CA; (530) 841-2134

Monday-Friday (excluding holidays), 12:30pm-4:30pm; No appointment needed, but can pre-register at www.simplereport.gov.

Self-test kits are also available from the COVID advisor. Priority will be given to those with symptoms or a COVID exposure.

If you test positive, isolate yourself and contact your supervisor and Judy Goodner (Hospital Liaison) at 580-306-3214.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Mask Wearing

Mask wearing will be required when the Siskiyou County community level is high. The Siskiyou County community level for the week of September 4 - September 10, 2022 is **Low**.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch

Ex: "Communic	cations, Div. Alpha. Stand-b ATUS: Provide incident su ations, I have a Red priority is TFLD Jones. EMT Smith	mmary (including number of p patient, unconscious, struck is providing medical care."	patients) and command by a falling tree. Requ	structure. esting air ambulance to Fore	st Road 1 at (Lat./Long.) This will be the Trout
	gency / Transport	□ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. □ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. □ GREEN / PRIORITY 3 Minor Injury or Illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.			
Nature of Inj & Mechanisi	3.				Brief Summary of Injury or Illness Ex: Unconscious, Struck by Falling Tree)
