

# INCIDENT ACTION PLAN

## YETI FIRE

CA-KNF-006200

P5 PX6X (0505)

3 Day IAP

### OPERATIONAL PERIOD

8/14/2022 0700

to

8/17/2022 0700

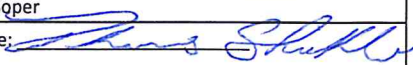

Fire Information: (530) 237-4330

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>  <p style="text-align: center;">Yeti Fire</p>	<b>2. Operational Period:</b>	Date From: 8/14/2022 Time From: 0700	Date To: 8/17/2022 Time To: 0700																				
<b>3. Objective(s):</b>  <u>Management Objectives</u> <ul style="list-style-type: none"> <li>- Provide for the safety of incident responders and the public through the application of sound risk management principles while mop up and repair continues. Maintain readiness for initial attack.</li> <li>- Implement CDC and US Forest Service guidelines to limit the spread of infectious diseases.</li> <li>- Engage with assigned Resource Advisors to aid in the development of incident activities to minimize adverse effects to cultural and natural resources.</li> <li>- Maintain and strengthen cooperator, partner, and stakeholder relationships.</li> <li>- Provide prompt communication of incident information to agency administrators, cooperators, communities, and stakeholders.</li> <li>- Establish expectations and a climate where all assigned incident personnel conduct themselves in a manner which promotes a harassment free environment and encourages mutual respect.</li> </ul>																							
<b>Control Objectives -</b> <ul style="list-style-type: none"> <li>- <b>Yeti fire:</b> <ul style="list-style-type: none"> <li>- Maintain fire perimeter within the existing natural and constructed containment lines.</li> </ul> </li> </ul>																							
<b>General Situational Awareness:</b>  <ul style="list-style-type: none"> <li>- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.</li> </ul>																							
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input type="checkbox"/>																							
<b>Approved Site Safety Plan(s) Located at:</b>

\*\*\*For Updated Weather – Request a SPOT Forecast: <https://www.weather.gov/spot/request/> OR call the Medford NWS at: 541-773-1067\*\*\*

**Discussion:** A warming and drying trend will continue through mid-week with low elevation temperatures over 100 and RH below 20%. Winds will be gentle and terrain driven. Easterly flow will contribute to poor ridgetop recoveries. A chance of thunderstorms starts on Tuesday with chances increasing Wednesday.

### Sunday August 14:

**Inversion / Stability:** Weak Instability...Inversion around 1800 ft, lifting after 10 am  
**LAL:** 1 **CWR:** 0%  
**Mixing Height:** 8.0 K Ft **Transport Wind:** NW 9 mph

### Sunday Daytime

**Sky / Weather** Sunny  
**Max Temp:** Drainage...96 – 100F, Ridge...87 – 90F  
**Min RH:** Drainage...15 – 18%, Ridge...18 – 22%  
**Wind:** NE 3 – 6 mph in morning... NW 7 – 9 gusts to 15 mph in afternoon

### Sunday Night

**Sky / Weather** Clear  
**Min Temp:** Drainage...54 – 57F, Ridge...64 – 67F  
**Max RH:** Drainage...78 – 81%, Ridge...27 – 32%  
**Wind:** NE 3 – 6 mph gusts to 10 mph on ridges

### Monday August 15:

**Inversion / Stability:** Weak Instability...Inversion around 1400 ft, lifting after 10 am  
**LAL:** 1 **CWR:** 0%  
**Mixing Height:** 8.0 K Ft **Transport Wind:** NE 7 mph

### Monday Daytime

**Sky / Weather** Sunny  
**Max Temp:** Drainage...98 – 102F, Ridge...90 – 93F  
**Min RH:** Drainage...13 – 16%, Ridge...15 – 19%  
**Wind:** NE 2 – 5 mph in morning... N 6 – 8 gusts to 15 mph in afternoon

### Monday Night

**Sky / Weather** Clear  
**Min Temp:** Drainage...56 – 60F, Ridge...66 – 70F  
**Max RH:** Drainage...77 – 80%, Ridge...30 – 35%  
**Wind:** NE 1 – 4 mph gusts to 7 mph on ridges

### Tuesday August 16:

**Inversion / Stability:** Moderate Instability...Inversion around 1800 ft, lifting after 10 am  
**LAL:** 1 **CWR:** 5%  
**Mixing Height:** 9.0 K Ft **Transport Wind:** NW 8 mph

### Tuesday Daytime

**Sky / Weather** Sunny...10% chance of afternoon thunderstorm  
**Max Temp:** Drainage...99 – 104F, Ridge...91 – 95F  
**Min RH:** Drainage...11 – 14%, Ridge...14 – 18%  
**Wind:** NE 2 – 4 mph in morning... NW 4 – 8 gusts to 10 mph in afternoon

### Tuesday Night

**Sky / Weather** Clear  
**Min Temp:** Drainage...58 – 61F, Ridge...66 – 71F  
**Max RH:** Drainage...76 – 80%, Ridge...29 – 34%  
**Wind:** W 2 – 5 mph gusts to 10 mph on ridges

## Fire Behavior Forecast # 12 - Final

<b>Name of Incident:</b> Yeti	<b>Administrative Unit:</b> USFS – Klamath NF
<b>Date &amp; Time Issued:</b> August 13, 2022 @ 1500	<b>Operational Period:</b> August 14, 15, 16, 2022 DAY
<b>FBAN:</b> Steve Ziel	<b>Signed:</b> /Z/ <i>[Signature]</i>

**Assumptions:** *The next several days provide “Potential” for very active fire behavior... If fire activity occurs - you can expect very active surface fire spread on slopes with flare ups, torching upslope runs, and spotting especially in the afternoon. Primary spread mechanism includes in/exterior spot fires, local initial attack, flare-ups, falling snags and rolling materials near fire lines and along the river. Peak burn period (1400-1800) provides likelihood for increased fire activity with peak heating and wind. Klamath River winds produce up canyon daytime winds, and down canyon flow at night. Squirrely winds occur at side drainages and bends in the river, as well as exposed ridgetop locations. Cumulative effect of dry fuels, with subtle weather changes may provide enhanced fire behavior with preheated fuels. ERC >90<sup>th</sup> percentile, > 30+ days since last rain., heat sources, peak of season conditions, low RH.*

### Weather Summary

See attached Fire Weather Forecast

### Fire Behavior Summary

**Fuels in the fire area** are primarily composed of *Grass/Shrub, Timber Litter, and Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, buckbrush, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be “fluffy” with hardwood leaves, and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas.*

**“Peak Period” fire behavior potential** - *Expect very active fire behavior with very warm/dry, sunny skies. Fire behavior characteristics could include sustained backing accelerated by rollout on slopes. Flanking may result in upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day. Our fire has been burning for 14+days (preheated fuels, dry brush, snags are coming down, rollers are rolling).*

\* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching spotting distance ¼ - ½ mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	Acres in 1 <sup>st</sup> hour from ignition
If your work area looks like -	(CH/HR = FPM)			(IA or Spot or Slopover)
Mixed Shrub/Grass (GS2)	10-15 ch/hr.	4-6 feet	.5 FPM	25+ acres ( *cured grass)
Timber with Understory (TU5)	12-15 ch/hr.	8-10 feet	1.0 FPM	4-6 acres
Timber Litter (TL6) Leaves	7-10 ch/hr.	3-4 feet	1.0 FPM	2-4 acres
Timber Litter (TL8) Needles	9-11 ch/hr.	4-5 feet	1.0 FPM	3-6 acres

### Specific Assignments:

Div. ZZ – Monitor river wind/slope effects for short range spotting potential in the event of torching or flare-ups near river.

Div. AA – Potential of interior and/or line flare-ups as fuels consume, or heat encounters unburned fuels.

IA Group – Do a complete size-up before engaging new starts. Fire behavior & weather forecast applies to response area.

**Air Operations:** Smoke should not disrupt aviation operations.

### Safety

**FINE FUELS** are VERY responsive to the effects of temperature and humidity...monitor your conditions. Anticipate current conditions to continue for the next several days.....anticipate fire behavior before you observe it, anticipate your actions before need to act. **Remember :** *fine fuels + wind = rapid rate of spread ; timber litter + wind = high intensity fire with torching and spotting; moss + ladder fuels= torching and spotting.*

Critically low Relative Humidity may be the trigger for rapidly escalating fire behavior today. **Think of Probability of Ignition as if you were standing in the woods and dropped 100 matches.....80% means 80 matches would ignite the surface fuels....how many “matches” fall out of a torching of tree??.**

## Definition of potential

**1:** existing in possibility: capable of development into actuality.

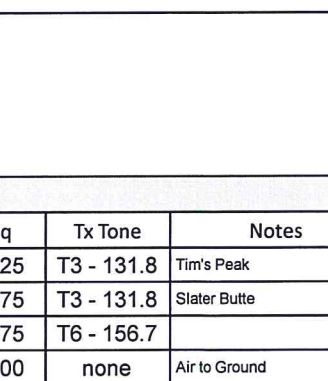

\* 672 words (+29 from previous) in the forecast, written for your situational awareness (2-minute read for the average reader).

REMARKS

When was the first year the Smokey balloon flew?

## INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> <li>HWY 96 is open for public travel.</li> <li>Dusty roads maintain spacing. Watch for deteriorating roads.</li> <li>Drive defensively! Expect the unexpected around every curve.</li> <li>Drive with headlights on, use backers whenever available.</li> </ul>
ALL	HAZARD TREES	<ul style="list-style-type: none"> <li>Follow Hazard Tree Safety Guidelines (IRPG pg. 20).</li> <li>Be especially alert around snags during wind events or changing wind</li> <li><b>Fire weakened trees from multiple burn periods</b></li> </ul>
ALL	FATIGUE	<ul style="list-style-type: none"> <li>Be alert for signs of fatigue and take breaks as necessary.</li> <li>Monitor resources for level of fatigue.</li> <li><b>Repeated assignments in the same area can lead to complacency.</b></li> </ul>
ALL	FIRE WEATHER/FIRE BEHAVIOR	<ul style="list-style-type: none"> <li><b>100-HOUR FUELS BELOW 9% ERC'S 90<sup>th</sup> PERCENTILE</b></li> <li>Weather trending warmer and drier.</li> <li>Establish and maintain LCES. Take weather observation and make known.</li> </ul>
ALL	MOP UP	<ul style="list-style-type: none"> <li>Use all required PPE, including eye protection.</li> <li>Be alert for stump holes and root cavities.</li> <li>Minimize exposure to smoke, and rotate personnel into clean air.</li> <li>Evaluate unburned islands/increase situational awareness.</li> </ul>
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> <li>Evaluate necessity to send personnel in areas with limited access.</li> <li>Concentrate on your footing placement, take your time.</li> <li>Ensure adequate spacing between crewmembers so they can react to dislodged debris.</li> <li>Post lookouts to warn of rolling debris. <b>SHOUT out to warn others</b></li> </ul>
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION.	<ul style="list-style-type: none"> <li>Drink 2: 1 water to sports drinks. Maintain 2:1 work rest ratio</li> <li>Take frequent breaks, minimum of 10 minutes every hour.</li> <li><b>Recognize symptoms of HEAT RELATED ILLNESS (IRPG PG.110)</b></li> </ul>
ALL	POINT PROTECTION	<ul style="list-style-type: none"> <li>Ensure LCES is in place</li> <li>Do not commit to stay on a structure unless you have an adequate safety zone</li> <li>Set trigger points to disengage and allow adequate time to relocate.</li> </ul>
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> <li>Share your Situational Awareness and known hazards to others in your area.</li> <li>Ask for intel when you don't know the plan.</li> <li><b>Ensure all personnel are familiar with assignment and communication plan.</b></li> <li><b>USE ASSIGNED CHANNELS ON RADIO PLAN, AVOID CREW NET'S.</b></li> </ul>
ALL	CHIPPER OPERATIONS	<ul style="list-style-type: none"> <li>Ensure JHA is provided and signed by operators and crew members.</li> <li>Only qualified personnel will feed chipper. Wear proper PPE.</li> </ul>
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> <li>Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise.</li> <li>Do frequent handwashing/sanitizing and disinfecting common surfaces.</li> </ul>
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> <li>Utilize appropriate PPE and other equipment safety mechanisms.</li> <li>Maintain safe working distances, Identify hazards.</li> <li>Utilize observer or spotter. Avoid moving parts</li> <li>Ensure the use of effective communication (radio, hand signals)</li> </ul>
ALL	ENVIROMENTAL HAZARDS	<ul style="list-style-type: none"> <li>Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks.</li> <li><b>Personal hygiene is #1 when it comes to Poison Oak Prevention.</b></li> </ul>
INCIDENT NAME:  YETI FIRE ICS 215a		DATE PREPARED: 8/13/2022  TIME PREPARED: 18:19:04
		OPERATIONAL PERIOD 8/14-16/2022 Prepared by: Seth Williams SOF3

**Lookouts  
Communications  
Escape Routes  
Safety Zones**

**Yeti Fire**  
**Operation Period: 08/14-16/2022 Day Shift**

**SAFETY MESSAGE**

**Stay focused on the safety aspects of your assignment**

- Ensure LCES is in place prior to engagement.
- Establish decision points when conditions can deteriorate.
- Take weather observations.
- Monitor the fire environment for changes in the fuel, topographic and weather elements. Forecast the fire behavior.
- Evaluate the work area for hazards, communicate hazards, mitigate or avoid the hazards.

***MAJOR HAZARDS AND RISKS***

<b>STEEP TERRAIN FATIGUE CHIPPERS</b>	<b>ROLLING MATERIAL DEHYDRATION POISON OAK</b>	<b>HEAVY EQUIPMENT HAZARD TREES COMPLACENCY</b>
---	--	---

***Be sure all elements of your safety plan are in place prior to engagement***

**Planning for Safety**

Have multiple plans and make them known

**P – Primary Plan (Offense)**

*Focused on firefighter safety and mission objectives*

**A – Alternate Plan (Offense)**

*A fallback plan that closely supports the primary mission*

**C- Contingency Plan (Defense)**

*Entirely focused on firefighter safety*

**E – Emergency Plan (Defense)**

*Entirely focused on individual firefighter survival*

**Planning for Medical Emergencies**

Ask and be able to answer 3 questions

1. What are we going to do if someone gets hurt?
2. How will we get them out of here?
3. How long will it take to get them to a hospital?

All operational activities should be based on answers to these questions. See page 2 of the IRPG for more information.

**Type 3 Safety Officer: Seth Williams**

# **COVID-19 PREVENTION INFORMATION**

## **MAINTAINING A HEALTHY WORKFORCE**

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

### **Self-Awareness / Daily Health Screening**

**Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms** (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

### **COVID-19 Testing availability**

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics, hours 0600-2000.** Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

**Federal employees** enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

### **Sanitary and Personal Hygiene Practices**

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

### **Social Distancing and Mask Wearing**

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

**Current Community Level for Siskiyou County is Medium so mask wearing is optional** unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

# Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the download button to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at [2022.yeti.finance@firenet.gov](mailto:2022.yeti.finance@firenet.gov)

**Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to [2022.yeti.finance@firenet.gov](mailto:2022.yeti.finance@firenet.gov)**

## RESOURCE ADVISOR MESSAGE

**Red/White Striped Flagging:** Resource concerns present. Please avoid flagged area and contact a Resource Advisor for preferred mitigation.

### Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

**Recommended spacing for waterbars on firelines.**

Fireline slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

*Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.*

# MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

## Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic;"*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
