INCIDENT ACTION PLAN YETI FIRE / ALEX FIRE

CA-KNF-006200 / CA-KNF-006290 P5 PX6X (0505) / P5 PX6W (0505)

OPERATIONAL PERIOD

8/5/2022

0600

to

8/6/2022

0600

Fire Information: (530) 237-4330

INCIDENT OBJECTIVES (ICS 202)

	. 0552011720 (1	CO LUL,									
1. Incident Name:	2. Operational Period:	Date From:	8/5/2022	Date To:	8/6/2022						
Yeti Fire / Alex Fire		Time From:	0600	Time To:	0600						
3. Objective(s):	December 1										
Management Objectives											
- Provide for the safety of incident responders and with the implementation of tactics that have a hi					s, along						
 Identify and provide appropriate protection to the timber, and recreation infrastructure. 	reatened values and impr	ovements including	dwellings, bus	inesses, util	ities,						
- Implement CDC and US Forest Service guidelines	to limit the spread of infe	ctious diseases.									
 Engage with assigned resource advisors and triba effects to cultural and natural resources. 	l leadership to aid in the c	evelopment of inci	dent activities	to minimize	adverse						
 Strengthen relationships through prompt, clear communication of incident information to agency administrators, cooperators, communities, and stakeholders. 											
- Provide timely communication and coordination	- Provide timely communication and coordination with adjacent Incident Management Team(s)										
- Develop plans and implement actions in fiscally r	esponsible manner.										
- Establish expectations and a climate where all ass harassment free environment and encourages me		conduct themselve	s in a means w	hich promo	tes a						
											
Control Objectives -											
- Keep the Yeti fire:											
- South of Fort Goff											
- East of Klamath River, below Cade mountain											
- North of Road 46N66											
- West of Grider Creek											
Keep the Alex fire within the current containment	ent lines										
General Situational Awareness:											
Steep and rugged terrain, critically dry and recept	ive fuel beds, active area f	or fire history and	drought stresse	ed trees.	ŝ						
5. Site Safety Plan Required?	Yes □ No										
Approved Site Safety Plan(s) Located at:

Fire Weather Forecast

FORECAST NO: PREDICTION FOR: ISSUED:

4 Friday/Aug 5, 2022 2000, Aug 4, 2022 NAME OF FIRE: UNIT: McKINNEY/ALEX/YETI

UNIT: Klamath N.F. Incident Meteorologist: Tom Wright

*** HOT AND DRY TODAY WITH GUSTY WEST WINDS AFTERNOON. SLIGHT CHANCE OF A THUNDERSTORM ***

DISCUSSION: Expect another hot and dry day with breezy afternoon west winds. There is just enough instability and moisture that a thunderstorm cannot be ruled out, but the greatest threat will be east of the McKinney fire.

FRIDAY: HOT AND DRY. BREEZY WEST WINDS AFTER NOON. SLIGHT CHANCE OF A THUNDERSTORM.

- WEATHER: Mostly sunny, hot and dry. Slight chance of a thunderstorm.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 2-6 mph. Ridges, unsheltered areas, wind-aligned drainages: East 3-6 mph through 1200 then west-northwest 6-12 mph with gusts to 20 mph. Erratic wind gusts to 30 mph possible near any thunderstorms.
- CHANCE OF WETTING RAIN: 10%.
- RAIN AMOUNTS: 0.10-0.25"
- MAX TEMPERATURES: 95-105 bottom and clear areas, 85-95 top and smoked in areas.
- MIN RH: 10-15% bottom and clear areas, 15-20% top and smoked in areas.
- INVERSION: Moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1500. Smoke inversion unlikely to mix out in smoked in areas.

FRIDAY NIGHT: SLIGHT CHANCE OF A THUNDERSTORM THROUGH 2200.

- WEATHER: Slight chance of an evening thunderstorm, otherwise, mostly clear.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages:
 Northwest 5-10 mph through 2200 then variable 2-5 mph. Erratic wind gusts to 30 mph possible near any thunderstorms.
- CHANCE OF WETTING RAIN: 10%.
- RAIN AMOUNTS: 0.10-0.25"
- MIN TEMPERATURES: 55-60 bottom, 60-65 top.
- MAX RH: 25-35% top, 40-50% bottom.
- INVERSION: Moderate developing near mid-slope. Secondary inversion at 5,000 feet.

SATURDAY: HOT AND DRY.

- · WEATHER: Mostly sunny. Hotter and drier.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 2-6 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then west-northwest 4-8 mph with gusts to 12 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MAX TEMPERATURES: 95-105 bottom and clear areas, 85-95 top and smoked in areas.
- MIN RH: 10-15% bottom and clear areas, 15-20% top and smoked in areas.
- **INVERSION:** Moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1500. Smoke inversion unlikely to mix out in smoked in areas.

Extended outlook: Sunday: Mostly sunny, very hot, dry and breezy. Highs 90-110. Minimum humidity: 7-17%. Southwest 10-20 mph with gusts to 25 mph. **Monday through Wednesday:** Hot, slight chance thunderstorms. Breezy. Highs 82-102. Minimum humidity: 12-22%. Winds south-southwest 5-15 mph with gusts to 20 mph.

Fire Behavior Forecast # 03								
Name of Incident: Yeti and Alex Fires Administrative Unit: USFS – Klamath NF								
Date & Time Issued: August 4, 2022 @ 1900	Operational Period: August 5, 2022 24hr.							
FBAN: Steve Ziel	Signed: /Z/ Str Zias							

Assumptions: DEJA'VU forecast - progressive pattern of "hot, dry, and breezy" conditions will be occurring over the next few days. Ample sunshine and critically low relative humidity will produce another day with an observable increase in fire behavior (earlier/later/more in the day/night). Very active surface fire spread on slopes may lead to flare ups and torching upslope runs in the afternoon. Primary spread mechanism will continue to be active backing, and flanking with short head fire runs. Peak burn period (1300-1800) provides the best opportunity for increased fire activity. Klamath River wind influence will produce up canyon daytime winds, and down canyon flow at night. Squirrelly winds often occur at intersecting drainages and bends in the Klamath River, as well as ridgetop locations. Cumulative effect of hot/dry conditions in all fuels is becoming apparent through increased fire behavior.

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

<u>Fuels in the fire area</u> are primarily composed of *Grass/Shrub*, *Timber Litter*, and *Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, ceonothus, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be "fluffy" with hardwood leaves and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas*.

Today's "Peak Period" fire behavior potential. Expect increased fire behavior due to continued warming and drying. Fire behavior characteristics are likely to include sustained backing accelerated by rollout on slopes. Flanking will result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to upslope runs with fire with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day with drying. Fire has been burning for several days – snags are coming down, watch for rollers and bobsleds.

* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance ¼ - ½ mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	
If your work area looks like -	(CH/HR = FPM)			
Mixed Shrub/Grass (GS2)	6-8 ch/hr.	1-3 feet	.5 FPM	
Timber with Understory (TU5)	8-10 ch/hr.	6-8 feet	1.0 FPM	* Flame length supports torching
Timber Litter (TL6) Leaves	5-6 ch/hr.	2-3 feet	1.0 FPM	*sustained backing
Timber Litter (TL8) Needles	5-7 ch/hr.	3-4 feet	1.0 FPM	*sustained backing

Specific Assignments:

- Div. GG Continued backing with flare-ups. Monitor river wind effects closely. Irregular backing and rollout may cause flare-ups.
- Div. DD Monitor increased activity with variable river winds. Expect continued backing to river watch for flare-ups low on slope.
- Div. ZZ Mid-level inversion may break earlier with increased fire activity. Expect flare-ups, active backing, and smokey conditions.
- Div. AA- Monitor lower Joe Miles Cr. for upslope runs, and increased activity from slope reversal or active flanking.
- Alex Div. Watch for increased westerly winds on ragged fire edge and spotty burn. High elevation firs torch easily.
- **IA and Contingency Local fuels are very dry. Size-up situation before engaging. Fire behavior forecast applies to response area.

Air Operations: Smoke will likely impact the fire area, dense smoke will likely persist on lower slopes, mid-slopes may open late.

Safety

Our fire will be getting larger for the next couple burn periods, larger fires release more energy; more energy released makes larger fires – this fire will get larger. Large fires get large slowly or quickly (take home message – observe fire behavior to determine your actions).

Review Watch Out Situations that apply to your operational period.......*Weather becoming hotter and drier*
Wind increases and/or changes direction*Getting frequent spot fires across the line* Terrain and fuels make
escape to safety zones difficult.......remind others to watch out. Heads up kind of day......

6 Work Assignments:								

6. Work Assignments:

Provide point protection around values at risk.

Monitor fire progression.

Be prepared to support IA with identified resources.

Keep the fire's edge in alignment with the identified control lines.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITI	ONS	MITIGATIONS / WARNINGS / REMEDIES				
ALL	FIRE WEATHER/FIRE BEHAVIOR		 100-HOUR FUELS BELOW 4% ERC'S 90th PERCENTILE HOT AND DRY, BREEZY WEST WINDS IN THE AFTERNOON Monitor current weather conditions and forecast. Establish and maintain LCES. Take weather observation and make known. Watch for spot fires, Up to.5 miles 				
ALL	DRIVING HAZARDS		 WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk. Use warning lights when working on roads or traveling in smoke. Dusty roads allow for adequate spacing between vehicles. Many roads are narrow and mid slope, use caution. 				
ALL	POINT PROTECTION		 Ensure LCES is in place. Do not commit to stay on a structure unless you have an adequate safety zone Set trigger points to disengage and allow adequate time to relocate. 				
ALL	COMMUNICATIONS		 Share your Situational Awareness and known hazards to others in your area. Ask for intel when you don't know the plan. Ensure all personnel are familiar with assignment and communication plan. USE ASSIGNED CHANNELS ON RADIO PLAN, AVOID CREW NET'S. 				
ALL	EXTREMELY STEEP TERRAIN AND MATERIAL	ROLLING	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access. 				
ALL	HAZARD TREES		 Follow Hazard Tree Safety Guidelines (IRPG pg. 20). Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas. 				
ALL	FIRING OPERATIONS		 Ensure briefing is given when using specialized firing equipment. Utilize Risk Mgmt. Process (IRPG pg. 1) for implementing the plan. Ensure all effected divisions know about your burn operation. 				
ALL	AIRCRAFT OPERATIONS		 Follow "Aviation-Watch Out" Situations (IRPG pg. 62). Do not plan on air resources for tactical support or medical transportation. When directing bucket drops, refer to (IRPG pg.74). 				
ALL	NIGHT OPERATIONS		 Have a purpose for where you drive, what you do and don't rush into assignments. Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours. 				
ALL	CHIPPING OPERATIONS		 Ensure JHA is provided and signed by operator and crew. Only qualified personnel will feed chipper. Wear proper PPE. 				
ALL	INFECTIOUS DISEASE		 Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise. Do frequent handwashing/sanitizing and disinfecting common surfaces. 				
ALL	HEAVY EQUIPMENT/DOZERS		Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances, Identify hazards. Utilize observer or spotter. Avoid moving parts. Ensure the use of effective communication (radio, hand signals)				
ALL	INDIRECT LINE CONSTRUCTION		 Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers. If possible, burn out as line construction progresses. 				
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE		 Drink 2: 1 water to sports drinks. Maintain 2:1 work rest ratio. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS (IRPG PG.110) 				
ALL	ENVIROMENTAL HAZARDS		 Keep alert for wildlife, rattlesnakes and insects. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.

Safety Zones

YETI FIRE / ALEX FIRE

Operation Period: 08/05-6/2022 Day/Night Shift

SAFETY MESSAGE

Crew Safety Is Dependent Upon Competent And Confident Leadership

Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known And Observed

- TAKE CHARGE of assigned resources
- MOTIVATE crew members with a "can do" safety attitude
- **DEMONSTRATE INITIATIVE** by taking appropriate action in the absence of orders
 - **COMMUNICATE** by giving specific instructions and asking for feedback
 - SUPERVISE at the scene of the action

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FIRE BEHAVIOR	DEHYDRATION	HAZARD TREES
SPOT FIRES	DRIVING	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

Watch for Rolling Material

Post lookout(s) to warn of rolling material and ignitions below the line.

Consider locating line in a defensible position.

Do you have two escape routes if rolling material ignites fuel below you.

Can you adequately trench the line based on steepness of slope and soil conditions?

Night Operations Hazards

Your ability to maintain your situational awareness at night is compromised by your inability to see hazards and other visual indicators in your work area.

Other challenges faced during night operations:

- Ability to maintain your orientation
- Difficulty seeing hazards beyond your headlamp
- Difficulty estimating distances
- Inability to use landmarks as reference
- Blowing smoke can increase visual difficulties
- Logistical support is limited

California Team 10 Safety Officers Frank Pingiczer, Jason Danen

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. Mask use, social distancing, and good hygiene will support the health of fire personnel and are important ways to prevent the spread of COVID-19 and maintain the health of all fire personnel.

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics, hours - 0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals but testing is also available to anyone with COVID exposure concerns.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

COVID-19 COMMUNITY LEVEL	MASKING DIRECTION (Federal Wildfire Incidents and within Federal Facilities)
HIGH	Individuals are required to wear masks around others while indoors, while sharing a vehicle, or when social distancing cannot be maintained.
MEDIUM and LOW	Individuals are not required to wear masks.

Community Levels are updated weekly by CDC and give direction for a Sun-Sat operation period.

<u>Klamath National Forest</u> <u>Peer Support/Critical Incident Stress Management</u>

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011
Noelle Graham-Wakoski, Peer Lead 858-735-7728
Fernando Estrada, Peer Support 530-250-7562
Estuardo Bojorquez, Peer Support 909-228-9479
Deana Kahle, Clinician, 951-232-2450

Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the <u>download button</u> to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

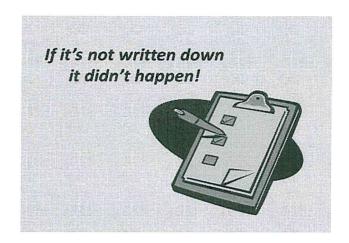

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at 2022.yeti.finance@firenet.gov

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.yeti.finance@firenet.gov

TRAINING SPECIALIST BULLETIN

- \checkmark Do not miss out on capturing your hard work.
- ✓ The amount of time wasted trying to recreate the event is huge compared to the time it takes to document it immediately after the event.
- ✓ Please DO NOT procrastinate until tomorrow what can be done today.
- ✓ If you need forms or have questions, please call the Training Specialist.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

2. INCIDENT S Ex: "Commu	unications, Div. Alpha. Stan STATUS: Provide incident Inications, I have a Red pric	ISPATCH (Verify correct fred od-by for Emergency Traffic." summary (including number of prify patient, unconscious, struck mith is providing medical care."	nationts) and commar	od etructure	rest Road 1 at (Lat./Long.)
