#### Fire Weather Forecast Saturday AUG 6, 2022

FORECAST NO: PREDICTION FOR: ISSUED:

5 Saturday/Aug 6, 2022 2000. Aug 5, 2022 NAME OF FIRE:

McKINNEY/ALEX/YETI

UNIT: K
Incident Meteorologist: T

Klamath N.F. Tom Wright

\*\*\* HOT TODAY, SLIGHT CHANCE OF A THUNDERSTORM \*\*\*

**DISCUSSION:** Expect another hot day with afternoon west winds. There is just enough instability and moisture that a thunderstorm cannot be ruled out.

#### SATURDAY: HOT, WITH A SLIGHT CHANCE OF A THUNDERSTORM.

- WEATHER: Mostly sunny and hot, with a slight chance of a thunderstorm.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: East 2-4 mph through 1200 then west-northwest 4-8 mph with gusts to 15 mph.
- CHANCE OF WETTING RAIN: 10%.
- RAIN AMOUNTS: 0.10-0.25'
- MAX TEMPERATURES: 95-105 bottom and clear areas, 85-95 top and smoked in areas.
- MIN RH: 10-15% bottom and clear areas, 15-20% top and smoked in areas.
- INVERSION: Moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1500. Smoke inversion
  unlikely to mix out in smoked in areas.

#### SATURDAY NIGHT: DRY AND MOSTLY CLEAR.

- . WEATHER: Dry and mostly clear.
- WIND (20 FT): Sheltered areas: Downslope/down valley 2-4 mph. Ridges, unsheltered areas, wind-aligned drainages: Northwest 3-8 mph through 2200 then variable 2-4 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MIN TEMPERATURES: 55-60 bottom, 60-65 top.
- MAX RH: 25-35% top, 40-50% bottom.
- INVERSION: Moderate developing near mid-slope. Secondary inversion at 5,000 feet.

#### SUNDAY: HOT AND DRY.

- WEATHER: Mostly sunny. Hotter and drier.
- WIND (EYE LEVEL): Sheltered and smoked in areas: Downslope/down valley 1-3 mph through 1400 then upslope 2-6 mph. Ridges, unsheltered areas, wind-aligned drainages: Variable 3-6 mph through 1200 then south-southwest 4-8 mph with gusts to 20 mph.
- CHANCE OF WETTING RAIN: 0%.
- RAIN AMOUNTS: none.
- MAX TEMPERATURES: 97-107 bottom and clear areas, 87-97 top and smoked in areas.
- MIN RH: 8-13% bottom and clear areas, 15-20% top and smoked in areas.
- INVERSION: Moderate mid-slope inversion and secondary inversion at 5,000 feet mixes out by 1500. Smoke inversion
  unlikely to mix out in smoked in areas.

Extended outlook: Monday: Mostly sunny, hot, dry and breezy, slight chance thunderstorm.. Highs 85-105. Minimum humidity: 12-22%. Winds south-southwest 5-15 mph with gusts to 25 mph. Tuesday through Thursday: Hot, slight chance thunderstorms. Breezy. Highs 82-102. Minimum humidity: 12-24%. Winds south-southwest 5-15 mph with gusts to 20 mph.

Fire Bel	havior Forecast # 04
Name of Incident: Yeti and Alex Fires	Administrative Unit: USFS – Klamath NF
<b>Date &amp; Time Issued:</b> August 5, 2022 @ 1900	Operational Period: August 6, 2022 24hr.
FBAN: Steve Ziel	Signed: /Z/

Assumptions: "Broken Record" forecast - progressive pattern of "hot, dry, and breezy" conditions will be continuing for the next few days. Ample sunshine and critically low relative humidity will produce another day with very active fire behavior (early/late/more - both day/night). Very active surface fire spread on slopes may lead to flare ups and torching upslope runs in the afternoon. Primary spread mechanism continues to be active backing, and flanking with short head fire runs. Peak burn period (1300-1800) provides the best opportunity for increased fire activity. Klamath River wind influence produces up canyon daytime winds, and down canyon flow at night. Squirrelly winds often occur at intersecting drainages and bends in the Klamath River, as well as ridgetop locations. Cumulative effect of hot/dry conditions in all fuels has become apparent through increased fire behavior.

#### Weather Summary

#### See attached Fire Weather Forecast

#### Fire Behavior Summary

<u>Fuels in the fire area</u> are primarily composed of *Grass/Shrub*, *Timber Litter*, and *Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, ceonothus, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be "fluffy" with hardwood leaves and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas*.

Today's "Peak Period" fire behavior potential. Expect very active fire behavior with continued warming and drying. Fire behavior characteristics are likely to include sustained backing accelerated by rollout on slopes. Flanking will result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with fire with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day with drying. Fire has been burning for several days – snags are coming down, watch for rollers and bobsleds.

\* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance ¼ - ½ mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	
If your work area looks like -	(CH/HR = FPM)			
Mixed Shrub/Grass (GS2)	6-8 ch/hr.	1-3 feet	.5 FPM	
Timber with Understory (TU5)	8-10 ch/hr.	6-8 feet	1.0 FPM	* Flame length supports torching
Timber Litter (TL6) Leaves	5-6 ch/hr.	2-3 feet	1.0 FPM	*sustained backing
Timber Litter (TL8) Needles	5-7 ch/hr.	3-4 feet	1.0 FPM	*sustained backing

#### **Specific Assignments:**

- Div. GG Continued backing with flare-ups. Monitor river wind effects closely. Irregular backing and rollout may cause flare-ups.
- **Div. DD** Monitor fire activity with variable river winds. Expect continued backing to river watch for flare-ups low on slope.
- Div. ZZ Mid-level inversion may break earlier with increased fire activity. Expect interior and line flare-ups as fuels clean-up.
- Div. AA— Monitor lower Joe Miles Cr. for upslope runs, and increased activity from slope reversal or active flanking.
- Alex Div. Watch for increased westerly winds on ragged fire edge and spotty burn. High elevation firs torch easily.
- \*\*IA and Contingency Local fuels are very dry. Size-up situation before engaging. Fire behavior forecast applies to response area.

Air Operations: Smoke will likely impact the fire area, dense smoke will likely persist on lower slopes, mid-slopes may open late.

#### Safety

Sudden flare-ups are possible, multiple flare-ups may occur with winds. Multiple simultaneous fire situations become critical without LCES. Plan ahead for actions to take; foot travel takes time!! Review the Watch Out Situations with your resources—can you mitigate??

Not a day to drop your guard...... Unexpected flare-ups are possible, multiple flare-ups may occur with unburned fuel pockets and a little wind. Multiple simultaneous flare-ups become critical without LCES. Plan ahead for actions to take; travel takes time!! Review the Watch Out Situations with your resources— can you mitigate?? Lined to unlined only takes one ember.

#### INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	ONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE WEATHER/FIRE BEHAVIOR		<ul> <li>100-HOUR FUELS BELOW 8% ERC'S 90<sup>th</sup> PERCENTILE</li> <li>Warmer and drier.</li> <li>Monitor current weather conditions and forecast.</li> <li>Watch for spot fires.</li> <li>Establish and maintain LCES. Take weather observation and make known.</li> </ul>
ALL	DRIVING HAZARDS		<ul> <li>WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Especially from dawn to dusk.</li> <li>Drive defensively! Expect the unexpected around every curve.</li> <li>Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available.</li> </ul>
ALL	POINT PROTECTION		<ul> <li>Ensure LCES is in place</li> <li>Do not commit to stay on a structure unless you have an adequate safety zon</li> <li>Set trigger points to disengage and allow adequate time to relocate.</li> </ul>
ALL	COMMUNICATIONS		<ul> <li>Share your Situational Awareness and known hazards to others in your area.</li> <li>Ask for intel when you don't know the plan.</li> <li>Ensure all personnel are familiar with assignment and communication plan</li> <li>USE ASSIGNED CHANNELS ON RADIO PLAN, AVOID CREW NET'S.</li> </ul>
ALL	EXTREMELY STEEP TERRAIN AND MATERIAL	ROLLING	<ul> <li>Concentrate on your footing placement; take your time.</li> <li>Ensure adequate spacing between crewmembers so they can react to dislodged debris.</li> <li>Post lookouts to warn of rolling debris. SHOUT out to warn others.</li> <li>Look Up, Down and Around Frequently.</li> </ul>
ALL	HAZARD TREES		<ul> <li>Follow Hazard Tree Safety Guidelines (IRPG pg. 20).</li> <li>Be especially alert around snags during wind events or changing wind direction.</li> <li>Check for hazard trees &amp; "widow-makers" in sleeping areas.</li> </ul>
ALL	FIRING OPERATIONS		<ul> <li>Ensure briefing is given when using specialized firing equipment.</li> <li>Utilize Risk Mgmt. Process (IRPG pg. 1) for implementing the plan</li> <li>Ensure all effected divisions know about your burn operation.</li> </ul>
ALL	AIRCRAFT OPERATIONS		<ul> <li>Follow "Aviation-Watch Out" Situations (IRPG pg. 62).</li> <li>Do not plan on air resources for tactical support or medical transportation.</li> <li>When directing bucket drops, refer to (IRPG pg. 74)</li> </ul>
ALL	NIGHT OPERATIONS		<ul> <li>Have a purpose for where you drive, what you do and don't rush into assignments</li> <li>Use caution where you park/stage especially in steep timbered areas.</li> <li>Increase SA by trying to see the work areas during daylight hours</li> </ul>
ALL	INFECTIOUS DISEASE		<ul> <li>Maintain 6' foot distance whenever possible. Wear masks when appropriate Notify MEDL if any symptoms arise.</li> <li>Do frequent handwashing/sanitizing and disinfecting common surfaces.</li> </ul>
ALL	HEAVY EQUIPMENT/DOZERS		<ul> <li>Utilize appropriate PPE and other equipment safety mechanisms.</li> <li>Maintain safe working distances, Identify hazards.</li> <li>Utilize observer or spotter. Avoid moving parts</li> <li>Ensure the use of effective communication (radio, hand signals)</li> </ul>
ALL	INDIRECT LINE CONSTRUCTION		<ul> <li>Establish and maintain LCES.</li> <li>Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.</li> <li>If possible, burn out as line construction progresses.</li> </ul>
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE		<ul> <li>Drink 2: 1 water to sports drinks. Maintain 2:1 work rest ratio</li> <li>Take frequent breaks, minimum of 10 minutes every hour.</li> <li>Recognize symptoms of HEAT RELATED ILLNESS (IRPG PG.110)</li> </ul>
ALL	ENVIROMENTAL HAZARDS		<ul> <li>Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks.</li> <li>Personal hygiene is #1 when it comes to Poison Oak Prevention.</li> </ul>

# Lookouts Communications Escape Routes Safety Zones

#### YETI FIRE / ALEX FIRE

Operation Period: 08/06-07/2022 Day/Night Shift

#### **SAFETY MESSAGE**

#### IDENTIFICATION OF EFFECTIVE ESCAPE ROUTES AND SAFETY ZONES

- > 1. OBSERVE-Personally observe potential safety zones and escape routes in the work area.
- > 2. **VISUALIZE-** Build a mental picture of the fire behavior you would expect if conditions existed that would enable a crown fire to burn around your potential safety zone.
- > 3. **IDENTIFY-** Compare the fire behavior you visualize with the size and location of potential safety zones you observe in order to identify any true safety zones available.
- > 4. TIME- Have someone walk and time the route from the work location to the potential safety zone(s).
- > 5. **INFORM-** Communicate the location and path of travel to those who work for you and around you.
- > 6. **EVALUATE-** You must continually evaluate your escape and safety plan to ensure that it will still work.

#### **MAJOR HAZARDS AND RISKS**

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	BUCKET DROPS	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

### Steps To Protect Yourself From Illnesses

- Wash your hands often
- Avoid touching your eyes, nose, or mouth, <u>as</u> this will spread germs.
- Try to avoid close contact with sick people
- Practice good health habits. Get plenty of sleep drink plenty of fluids, and eat healthy food
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
- If you are sick with flu-like illness, separate that person from the rest of your crew and others, seek treatment at the medical unit.

#### **Hazard Tree Felling**

Felling a hazard tree requires accurate risk assessment and complexity analysis and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure
- Weakened sapwood resulting in loss of control when falling trees and limits solid wood for wedging.
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

California Team 10 Safety Officers Frank Pingiczer, Jason Danen

## COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19** and **maintain the health of all fire personnel**.

#### Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

#### **COVID-19 Testing availability**

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics**, **hours -0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.

#### Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

#### **Social Distancing and Mask Wearing**

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

## Klamath National Forest Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011
Noelle Graham-Wakoski, Peer Lead 858-735-7728
Fernando Estrada, Peer Support 530-250-7562
Estuardo Bojorquez, Peer Support 909-228-9479
Deana Kahle, Clinician, 951-232-2450

## Hu

#### **Human Resource Message**

#### **Mutual Respect**

• Mutual Respect is your responsibility to treat people with dignity and respect, it is also your right to receive the same treatment.

#### Some things to remember while on this incident:

- Be kind and considerate to everyone in camp. Interact with all your colleagues with courtesy, politeness, and kindness. Even co-workers who don't particularly like each other can be civil and respectful, even a simple "Good morning" goes a long way.
- Let's remember that not everyone on this incident has the same sleep schedule. At night when you are in the tent sleeping area outside of camp, keep the noise to a minimum.
- Lastly, lets ensure that we are treating our base camp support teams, i.e., CCC's, food service, etc., with the courteous and respect that they deserve. They, as well as everyone else are working tirelessly to ensure that you have the adequate support that you need so we all can accomplish our mission objectives.

Your HRSP will arrive in camp soon, if you need to speak to an HRSP before his arrival, please contact.

HRSP Coordinator for Northern/Southern California: Linda Overton 707-373-7631 <a href="mailto:linda.overton@usda.gov">linda.overton@usda.gov</a>

#### Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the <u>download button</u> to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

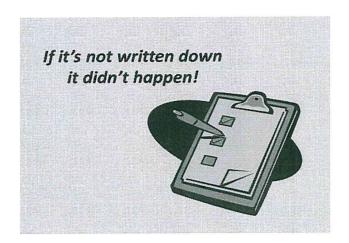

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at <a href="mailto:2022.yeti.finance@firenet.gov">2022.yeti.finance@firenet.gov</a>

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.yeti.finance@firenet.gov

#### TRAINING SPECIALIST BULLETIN

- ✓ Do not miss out on capturing your hard work.
- √ The amount of time wasted trying to recreate
  the event is huge compared to the time it takes
  to document it immediately after the event.
- ✓ Please DO NOT procrastinate until tomorrow what can be done today.
- ✓ If you need forms or have questions, please call the Training Specialist.

Tad Morelock TNSP(t)

#### MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

#### **Medical Incident Report**

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

2. INCIDENT	nunications, Div. Alpha. Si <b>STATUS:</b> Provide incide unications, I have a Red t	I DISPATCH (Verify correct free Stand-by for Emergency Traffic." Sent summary (including number of priority patient, unconscious, struct Smith is providing medical care."	natients) and comman	d structure	rest Road 1 at (Lat./Long.) This will be the Trout
