INCIDENT ACTION PLAN YETI FIRE / ALEX FIRE

CA-KNF-006200 / CA-KNF-006290 P5 PX6X (0505) / P5 PX6W (0505)

OPERATIONAL PERIOD

8/7/2022

0600

to

8/8/2022

0600

Fire Information: (530) 237-4330

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Op	erational Period:	Date From	n: 8/7/2022	Date To:	8/8/2022		
Yeti Fire / Alex Fire	e		Time From	n: 0600	Time To:	0600		
3. Objective(s):								
Management Objectives								
- Provide for the safety of incide with the implementation of tac						, along		
- Identify and provide appropriation timber, and recreation infrastru	••	ned values and improv	ements incl	luding dwellings, bus	inesses, utili	ties,		
- Implement CDC and US Forest	Service guidelines to lin	nit the spread of infect	ious disease	es.				
- Engage with assigned resource advisors and tribal leadership to aid in the development of incident activities to minimize adverse effects to cultural and natural resources.								
- Strengthen relationships throug communities, and stakeholders		unication of incident in	nformation t	o agency administra	tors, coopera	ators,		
- Provide timely communication	and coordination with a	adjacent Incident Man	agement Tea	am(s)				
- Develop plans and implement a	actions in fiscally respor	nsible manner.						
- Establish expectations and a climate where all assigned incident personnel conduct themselves in a means which promotes a harassment free environment and encourages mutual respect.								
Control Objectives -								
- Keep the Yeti fire:								
- South of Fort Goff	0.1							
- East of Klamath River, below	w Cade mountain							
- North of Road 46N66								
- West of Grider Creek								
Keep the Alex fire within the o	current containment li	nes						
General Situational Awareness:								
Steep and rugged terrain, critical	ally dry and receptive fu	uel beds, active area fo	r fire history	and drought stresse	ed trees.

Yeti / Alex Fires Weather Forecast

Forecast Iteration: #1

Forecast For: Sunday Aug 7, 2022

Forecast Produced: Aug 6, 2022

Name of the Fire(s): Yeti, Alex

Unit: KNF

Incident Meteorologist: Jeff Tonkin

Cell: 707-672-3386 Signed: Jeff Tonkin

WEATHER DISCUSSION; Yeti Fire sits in between a low pressure system to the west and high pressure ridge to the east. Today will be the final day of very hot and dry conditions before a subtle cooling trend begins. Airmass instability is also waning thus isolated thunderstorm activity will be sparse. Stronger south winds will prompt Red Flag Warnings for the McKinney Fire area but these winds are not expected to impact the Yeti Fire.

Today (Sunday):

Sky / Weather:

Sunny but smoky. Thunderstorms not expected

Chance of showers:

Smoke / Stability:

Moderately Un-Stable, Inversion 2800 ft...weak, breaking around mid morning.

LAL: 1

CWR: 0%.

Mixing Height: 6.5 K ft.

Transport Wind: NW 20 mph

Upper Slopes / Ridges:

Lower Slopes / Drainages:

Max Temp: 82-87 F Min RH:

25 - 32%.

Wind:

West 6 - 10 mph. Gust 16 mph.

Max Temp: 93 - 99 F Min RH: 19 - 24%.

Wind: West - Northwest 3 - 6 mph. Gust 12

during the late afternoon and evening.

Tonight (Sunday Night - Early Monday Morning:

Sky / Weather:

Smoky.

Chance of Rain: Smoke / Stability: 0%.

East Northeast 3 - 6 mph.

Moderately Un-stable.

0%

LAL: 1

Wind:

CWR:

Mixing Height: 1500 ft.

Transport Wind: NW 15 mph.

Upper Slopes / Ridges:

Lower Slopes / Drainages:

Min Temp: 63 - 66 F Max RH:

32 - 38%...and locally as low as 25%.

Min Temp: 59 - 63 F

Max RH:

75 - 85%.

Wind: East - Southeast 1 - 4 mph.

OUTLOOK FOR MONDAY: Sunny and smoky. Slight increase of south wind on ridge tops. Isolated thunderstorms possible. Northwest 5 to 10 mph...but southwest wind on ridges with gusts to 18 mph. Highs near 95. Min RHs 23 to 28%.

EXTENDED (TUESDAY THROUGH THURSDAY): Sunny but smoky...and slightly cooler and more stable. Afternoon temperatures near 80. RH...25 - 30%. Light west or terrain driven winds 6 to 10 mph.

Fire Behavior Forecast # 05								
Name of Incident: Yeti and Alex Fires Administrative Unit: USFS – Klamath NF								
Date & Time Issued: August 6, 2022 @ 1900	Operational Period: August 7, 2022 24hr.							
FBAN: Steve Ziel	Signed: /Z/							

Assumptions: Pattern of "hot, dry, and breezy" weather continues for the next few days. Muted sunshine and low relative humidity will produce another day with "Potential" for very active fire behavior (early/late - both day/night). In the event it occurs -very active surface fire spread on slopes may lead to flare ups and torching upslope runs in the afternoon. Primary spread mechanism includes falling snags, rolling materials, and flare ups along fire lines and the river. Peak burn period (1300-1800) provides the best opportunity for potential fire activity. Klamath River wind influence produces up canyon daytime winds, and down canyon flow at night. Squirrelly winds often occur at intersecting drainages and bends in the Klamath River, as well as ridgetop locations. Cumulative effect of hot/dry conditions in all fuels has become apparent through increased fire behavior. Key word "Potential"

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

<u>Fuels in the fire area</u> are primarily composed of *Grass/Shrub*, *Timber Litter*, and *Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, ceonothus, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be "fluffy" with hardwood leaves and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas*.

Today's "Peak Period" fire behavior <u>potential</u> - Expect very active fire behavior with continued warming and drying. Fire behavior characteristics could include sustained backing accelerated by rollout on slopes. Flanking may result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day with drying. Fire has been burning for several days – snags are coming down, watch for rollers and bobsleds.

* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance ¼ - ½ mile.

Fuel	Type/Model	Rate of Spread	Flame Length	Backing Rate	
If	your work area looks like -	(CH/HR = FPM)			
	Mixed Shrub/Grass (GS2)	6-8 ch/hr.	1-3 feet	.5 FPM	
	Timber with Understory (TU5)	8-10 ch/hr.	6-8 feet	1.0 FPM	* Flame length supports torching
	Timber Litter (TL6) Leaves	5-6 ch/hr.	2-3 feet	1.0 FPM	*sustained backing
	Timber Litter (TL8) Needles	5-7 ch/hr.	3-4 feet	1.0 FPM	*sustained backing

Specific Assignments:

- Div. GG Continued pockets of backing with flare-ups. Monitor river wind effects for short range spotting potential.
- Div. DD Monitor fire activity with variable river winds. Expect pockets of backing to river watch for flare-ups low on slope.
- Div. ZZ Mid-level inversion may break earlier with increased fire activity. Potential of interior and line flare-ups as fuels consume.
- Div. AA- Monitor China Cr. for interior and fire line flare ups, rollout, and falling snags. Winds in China Creek get breezy in afternoon.
- Alex Div. Watch for increased westerly winds on ragged fire edge and spotty burn. High elevation firs torch easily.
- **IA and Contingency Local fuels are very dry. Complete size-up before engaging. Fire behavior forecast applies to response area.

Air Operations: Smoke will likely impact the fire area, dense smoke will likely persist on lower slopes, mid-slopes may open late.

Safety

At all times.....Keep informed on fire weather conditions and forecasts (read the Fire and Weather forecasts, observe weather changes throughout the day, listen to radio). Know what your fire is doing at all times (observe smoke, flames, direction, note changing conditions). Base all actions on current and expected behavior of the fire (evaluate your situation and the fire activity – anticipate rate of change, consider "what-if's", establish trigger points).

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	DNS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE WEATHER/FIRE BEHAVIOR		 100-HOUR FUELS BELOW 8% ERC'S 90th PERCENTILE Warmer and drier, RH'S 25% Monitor current weather conditions and forecast. Establish and maintain LCES. Take weather observation and make known.
ALL	DRIVING HAZARDS		 WATCH FOR ROCKS AND WILDLIFE ON HWY 96. Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; use backers whenever available.
ALL	COMMUNICATIONS		 Share your Situational Awareness and known hazards to others in your area. Ask for intel when you don't know the plan. Ensure all personnel are familiar with assignment and communication plan. USE ASSIGNED CHANNELS ON RADIO PLAN, AVOID CREW NET'S.
ALL	EXTREMELY STEEP TERRAIN AND MATERIAL	ROLLING	 Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others
ALL	AIRCRAFT OPERATIONS		 Follow "Aviation-Watch Out" Situations (IRPG pg. 62). Do not plan on air resources for tactical support or medical transportation. When directing bucket drops, refer to (IRPG pg. 74)
ALL	HAZARD TREES		 Follow Hazard Tree Safety Guidelines (IRPG pg. 20). Be especially alert around snags during wind events or changing wind Fire weakened trees from multiple burn periods
ALL	FIRING OPERATIONS		 Ensure briefing is given when using specialized firing equipment. Utilize Risk Mgmt. Process (IRPG pg. 1) for implementing the plan Ensure all effected divisions know about your burn operation.
ALL	MOP UP		 Use all required PPE, including eye protection. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air. Evaluate unburned islands/Increase situational awareness.
ALL	NIGHT OPERATIONS		 Have a purpose for where you drive, what you do and don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours
ALL	INFECTIOUS DISEASE		 Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise. Do frequent handwashing/sanitizing and disinfecting common surfaces.
ALL	HEAVY EQUIPMENT/DOZERS		 Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances, Identify hazards. Utilize observer or spotter. Avoid moving parts Ensure the use of effective communication (radio, hand signals)
ALL	ATV/UTV USE		 Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/Agency standards
ALL	INDIRECT LINE CONSTRUCTION		 Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers. If possible, burn out as line construction progresses.
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE		 Drink 2: 1 water to sports drinks. Maintain 2:1 work rest ratio Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS (IRPG PG.110)
ALL	ENVIROMENTAL HAZARDS		 Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.

Operation Period: 08/07-08/2022 Day/Night Shift

SAFETY MESSAGE

Mop Up is Hazardous Work!

- Injury and accidents are common during the mop up phase.
- Gather situational awareness in your work area and communicate it.
- Reduce risk by identifying and mitigating hazards.
- Stay focused on task, don't let the routine nature of the assignment allow your mind to wander resulting in a loss of situational awareness.
- Take frequent breaks, stay hydrated, and manage fatigue.

MAJOR HAZARDS AND RISKS

LOW RH'S	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
ASH PITS	STUMP HOLES	CHIPPER OPS

Be sure all elements of your safety plan are in place prior to engagement

Stay Hydrated

Drink fluids before, during, and after the shifts.

For every 2 bottles of water, drink 1 bottle of Gatorade.

At 2% dehydration, performance will fall off by 10-20% and is the #1 trigger of fatigue.

Risk Management

- Keep risks commensurate with the benefit.
- Utilize the Risk Management Process found on page 1 of the IRPG.
- Recognize that no injury is worth the ground you are working.
- Everyone is entitled to a round trip ticket. Bring them home healthy.

California Team 10 Safety Officers Frank Pingiczer, Jason Danen (t)

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19** and **maintain the health of all fire personnel**.

Self-Awareness / Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics**, **hours 0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

Klamath National Forest Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011
Noelle Graham-Wakoski, Peer Lead 858-735-7728
Fernando Estrada, Peer Support 530-250-7562
Estuardo Bojorquez, Peer Support 909-228-9479
Deana Kahle, Clinician, 951-232-2450

STUDAL RESPECT

Human Resource Message

Mutual Respect

• Mutual Respect is your responsibility to treat people with dignity and respect, it is also your right to receive the same treatment.

Some things to remember while on this incident:

- Be kind and considerate to everyone in camp. Interact with all your colleagues with courtesy, politeness, and kindness. Even co-workers who don't particularly like each other can be civil and respectful, even a simple "Good morning" goes a long way.
- Let's remember that not everyone on this incident has the same sleep schedule. At night when you are in the tent sleeping area outside of camp, keep the noise to a minimum.
- Lastly, lets ensure that we are treating our base camp support teams, i.e., CCC's, food service, etc., with the courteous and respect that they deserve. They, as well as everyone else are working tirelessly to ensure that you have the adequate support that you need so we all can accomplish our mission objectives.

Your HRSP will arrive in camp soon, if you need to speak to an HRSP before his arrival, please contact.

HRSP Coordinator for Northern/Southern California: Linda Overton 707-373-7631 linda.overton@usda.gov

Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the <u>download button</u> to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at 2022.yeti.finance@firenet.gov

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.yeti.finance@firenet.gov

TRAINING MESSAGE

Trainee Exit Interview

TOPIC: WRITING EFFECTIVE PERFORMANCE EVALUATIONS

- ✓ Provide CONSTRUCTIVE FEEDBACK for trainee and make your words valuable for the person or people responsible for reviewing the evaluation.
- ✓ Describe what the trainee did on the assignment to justify their rating. PAINT THE PICTURE to the reviewing officials on the complexity of the assignment!
- ✓ Be HONEST enough to let the trainee know what their strengths and weaknesses are, how they performed and if they met, did not meet, or exceeded your expectations.
- ✓ DOCUMENT what skills or tasks the trainee should work on next if recommending continuing assignments.
- ✓ If recommending certification, **BE SPECIFIC** in the performance evaluation that you are recommending them for certification.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

Ex: "Communications, Div. Alpha. 2. INCIDENT STATUS: Provide inc	d priority patient unconscious struc	natients) and comma	ad structure	orest Road 1 at (Lat./Long.) This will be the Trout					
RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° bums more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° bums not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.									
Nature of Injury or Illness & Mechanism of Injury				Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)					
Transport Request				Air Ambulance / Short Haul/Hoist Ground Ambulance / Other					
Patient Location			-	Descriptive Location & Lat. / Long. (WGS84)					
Incident Name				Geographic Name + "Medical" (Ex: Trout Meadow Medical)					
On-Scene Incident Commander				Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)					
Patient Care				Name of Care Provider (Ex: EMT Smith)					
3. INITIAL PATIENT ASSESSMEN	T: Complete this section for each patie	nt as applicable (start w	ith the most severe patient)						
Patient Assessment: See IRPG pag	e 106								
Treatment:									
I. TRANSPORT PLAN:
