Yeti / Alex Fires Weather Forecast

Forecast Iteration: #3

Forecast For: Tuesday Aug 9, 2022

Forecast Produced: Aug 8, 2022

Name of the Fire(s): Yeti, Alex

Unit: CA-KNF

Incident Meteorologist: Jeff Tonkin

Cell: 707-672-3386 Signed: Jeff Tonkin

... Gustier South Winds This Afternoon and Evening...

WEATHER DISCUSSION: An increase in south winds this afternoon with speeds about 5 mph stronger than previous days. Heavier smoke from fires to our south may also be noticeable. Will continue with a very slight threat of an isolated shower or thunderstorm around the area both during the day and at nighttime periods.

Today (Tuesday):

Sky / Weather:

Sunny...less smoke.

Chance of showers:

Smoke / Stability:

Moderately Un-Stable, Inversion 2800 ft...weak, breaking around mid-morning.

LAL: 1

CWR: 0%.

Mixing Height: 6.5 K ft.

Transport Wind: W 15 mph

Upper Slopes / Ridges:

Max Temp: 83-88 F

Min RH: 22 - 26%.

Wind: S and SW 8 - 12 mph. Gust 20-25 mph in the

afternoon and evening.

Lower Slopes / Drainages:

Max Temp: 95 - 99 F

Min RH: 17 - 21%.

Wind: Light SE in the morning. Increasing to

W and SW 6 to 10 mph with Gusts to 20 mph after

1300 PDT.

Tonight (Tuesday Night – Early Wednesday Morning:

Sky / Weather:

Clear but increased smoke.

Chance of Rain: 0%.

Smoke / Stability:

Moderately Un-stable.

Mixing Height: 1000 ft.

Transport Wind: SE 5 mph.

Upper Slopes / Ridges:

Lower Slopes / Drainages:

Min Temp: 58 - 61 F Max RH:

63 - 70 %.

Wind:

Southwest 5 - 8 mph...gust 12 mph.

Min Temp: 53 - 58 F

80 - 90%. Max RH:

Wind: West and Southwest 3 - 6 mph.

OUTLOOK FOR WEDNESDAY: Sunny but smokey...slightly cooler. Southwest 5 to 10 mph...but southwest wind on ridges with gusts to 18 mph. Highs near 93. Min RHs 22 to 25%.

EXTENDED (THURSDAY THROUGH SATURDAY): Sunny and less smoke. Highs in the upper 90s. Min RH values near 25%. West winds 5 to 10 mph...gusts to 15 mph in the afternoon.

Fire Behavio	or Forecast # 07
Name of Incident: Yeti and Alex Fires	Administrative Unit: USFS – Klamath NF
Date & Time Issued: August 8, 2022 @ 1900	Operational Period; August 9, 2022 24hr.
FBAN: Steve Ziel	Signed: /Z/

Assumptions: Today's fire behavior focus includes the effects of increased wind, smoke (from SRF Lightning Complex), and a slight chance of light thundershowers. Current and forecast conditions provide a day with continuing "Potential" for very active fire behavior. In the event it occurs, expect very active surface fire spread on slopes with flare ups, torching upslope runs and spotting in the afternoon. Primary spread mechanism includes flare-ups from falling snags, rolling materials along fire lines and the river. Peak burn period (1300-1800) provides the best opportunity for potential fire activity. Klamath River wind influence produces up canyon daytime winds, and down canyon flow at night. Squirrelly winds occur at intersecting drainages and bends in the Klamath River, as well as ridgetop locations. Cumulative of dry fuels, with subtle weather changes say it's a "HEAD'S UP DAY".

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

<u>Fuels in the fire area</u> are primarily composed of *Grass/Shrub*, *Timber Litter*, and *Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, buckbrush, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be "fluffy" with hardwood leaves, and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas*.

Today's "Peak Period" fire behavior <u>potential</u> - Expect very active fire behavior with warming, drying AND sunshine. Fire behavior characteristics could include sustained backing accelerated by rollout on slopes. Flanking may result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day with drying. Fire has been burning for several days – snags are coming down, watch for rollers.

* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance 1/4 - 1/2 mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	
If your work area looks like -	(CH/HR = FPM)			
Mixed Shrub/Grass (GS2)	10-15 ch/hr.	4-6 feet	.5 FPM	
Timber with Understory (TU5)	12-16 ch/hr.	8-10 feet	1.0 FPM	* Flame length supports torching
Timber Litter (TL6) Leaves	7-9 ch/hr.	3-4 feet	1.0 FPM	*sustained backing
Timber Litter (TL8) Needles	8-10 ch/hr.	4-5 feet	1.0 FPM	*sustained backing

Specific Assignments:

- Div. GG Continued isolated hot pockets of backing with flare-ups. Monitor river wind effects for short range spotting potential.
- Div. DD Monitor fire activity with variable river winds. Expect active pockets of backing to river watch for flare-ups low on slope.
- Div. ZZ Increased winds may kindle smoldering to flame. Potential of interior and line flare-ups as fuels consume.
- Div. AA- Monitor China Cr. for interior and fire line flare ups, rollout, and falling snags. Winds in China Creek get breezy in afternoon.
- Alex Div. Watch for smoldering to kindle to flame with breezes on ragged fire edge and spotty burn. High elevation firs torch easily.
- **IA and Suppression Repair Complete a size-up before engaging. Fire behavior and weather forecast applies to response area.

Air Operations: Smoke should not disrupt aviation operations.

Safety

Not a day to drop your guard...... Unexpected flare-ups are possible, multiple flare-ups may occur in unburned fuel pockets with a little wind. Multiple simultaneous flare-ups become critical without LCES. Plan ahead for actions to take; travel takes time!! Review the Watch Out Situations with your resources—can you mitigate?? Lined to unlined only takes one ember.

Good opportunity to review and discuss some "what if's??...". Ensure all parties know what to do, where to go "IF" something happens....

Consider effects of pre-heated fuels, dry canopy, dead brush, and smoldering edges - that may kindle to flame with a little wind.

688 words in the forecast written for your situational awareness, 2-minute read for the average reader.

Mark Assignments								

6. Work Assignments:

Provide point protection around values at risk.

Continue to patrol and mop up the the extent necessary.

Be prepared to support IA with identified resources.

Backhaul excess equipment and trash.

7. Special Instructions:

Resource advisors will use red/white striped flagging to identify resource concerns and areas to avoid.

Operation Period: 08/09-10/2022 Day/Night Shift

SAFETY MESSAGE

Common Denominators of Fire Behavior on Tragedy Fires

- 1. On relatively small fires or deceptively quiet areas of large fires.
- 2. In relatively light fuels, such as grass, herbaceous fuels, and light brush.
- 3. When there is an unexpected shift in wind direction or in wind speed.
- 4. When fire responds to topographic conditions and runs uphill.
- 5. During critical burn period between 1400 and 1700. (IRPG Pg 3)

Are you in any of these situations now, or expected today? What have you done to mitigate the hazards?

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	ALLERGIC REACTION	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

Poison Oak - Urushiol Oil

- The oil contaminates your skin, gear and clothing. Traces can cause a severe reaction.
- Reaction time is 6 or 8 hrs. to 3 days before the rash occurs.
- That amount of time is your window of opportunity to get the oil off of your skin and clothes allowing a person to completely avoid a rash or dramatically cut down on the severity.
- Wash exposed area with Tecnu original as soon as possible. Rub it fairly aggressively and wipe or scrape it off. Follow up with Tecnu extreme scrub as soon as possible.
- Get it off your clothes by using the camp laundry every day.

Roadside Response Safety

- Conduct all operations as far from traffic lanes as possible.
- When not involved in firefighting, high visibility vests must be worn.
- Park on one side of the roadway.
- Exit vehicle away from the traffic lane when possible.
- Post lookouts to watch for and control traffic in both directions.
- Use cones or other warning signs.
- Operate pumps from the non-traffic side.
- Keep all hose, tools and equipment out of the traffic lane. (IRPG Pg 24)

California Team 10 Safety Officers: Frank Pingiczer, Jason Danen, Seth Williams (t)

COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19** and **maintain the health of all fire personnel**.

Self-Awareness / Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics**, **hours 0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

Klamath National Forest Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011 Noelle Graham-Wakoski, Peer Lead 858-735-7728 Fernando Estrada, Peer Support 530-250-7562 Estuardo Bojorquez, Peer Support 909-228-9479 Deana Kahle, Clinician, 951-232-2450

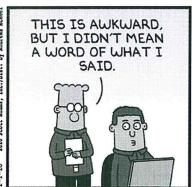

The Importance of Teamwork

Teamwork is defined as: "co-operation between those who are working on a task." Commonly teamwork is understood as co-operation and willingness of a group of individuals to work together to achieve a set goal with best practice.

- Teamwork is important because you and your fellow co-workers are there for one purpose, which is to carry out the objective of the mission
- Believe in each other
- TRUST... your teammate
- Be RESPONSIBLE...make your team proud!
- Two people know more than one person
- Each person has different qualities that can complete and complement other people
- Working in a team can motivate a person to do more

Adrian Escobedo – HRSP: 530-523-2804

Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the <u>download button</u> to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at 2022.yeti.finance@firenet.gov

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.yeti.finance@firenet.gov

TRAINING MESSAGE

The Training Specialist is here to help you. Please use the code listed below or call or stop by with any questions

Trainees please use the QR code below to check-in, close-out, download performance ratings and evaluation sheets. Additional resources including Task Books and reference guides are also available.

Any questions please feel free to give me a call or send me a text.

Tad Morelock Training Specialist (t) 760.973.9229

RESOURCE ADVISOR MESSAGE

Red/White Striped Flagging: Resource concerns present. Please avoid flagged area and contact a Resource Advisor for preferred mitigation.

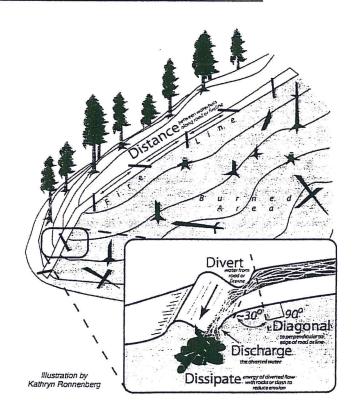

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %		Maximum Distance Apart <u>(feet)</u>
1– 5		200
6 - 20		125
21 - 40	***************************************	60
41 - 60		40
>60		25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.
