## Wednesday

### INCIDENT ACTION PLAN YETI FIRE / ALEX FIRE

CA-KNF-006200 / CA-KNF-006290 P5 PX6X (0505) / P5 PX6W (0505)

### **OPERATIONAL PERIOD**

8/10/2022 0600

to

8/11/2022 0600

Fire Information: (530) 237-4330

### **INCIDENT OBJECTIVES (ICS 202)**

INCIDEN	1 ODSECTIALS (I	CS ZUZJ			
1. Incident Name:	2. Operational Period:	Date From:	8/10/2022	Date To:	8/11/2022
Yeti Fire / Alex Fire		Time From:	0600	Time To:	0600
3. Objective(s):					
Management Objectives					
- Provide for the safety of incident responders and with the implementation of tactics that have a hi					es, along
- Implement CDC and US Forest Service guidelines	to limit the spread of infec	ctious diseases.			
<ul> <li>Identify and provide appropriate protection to th recreation infrastructure.</li> </ul>	reatened values and impro	ovements including	dwellings, bus	sinesses, uti	lities, and
- Implement strategies and tactics that minimize b					
- Engage with assigned Resource Advisors to aid in natural resources			nimize adverse	effects to c	ultural and
- Establish and strengthen cooperator, partner, and	i stakenolder relationships	•			
- Provide prompt communication of incident inform	mation to agency administ	rators, cooperators	, communities	, and stakel	olders.
- Develop plans and implement actions in fiscally re	esponsible manner.				
<ul> <li>Establish expectations and a climate where all ass harassment free environment and encourages me</li> </ul>	)=/	conduct themselve	s in a manner	which prom	otes a
- Utilize the Klamath National Forest Yeti fire suppr to implement suppression repair actions.	ession repair plan and coo	ordinate with resou	rce advisors ar	nd cultural s	pecialists
Control Objectives -	1.00				
- Yeti fire:					
- Maintain fire perimeter within the existing natu	ıral and constructed contai	nment lines.			
- Alex fire:					
- Keep the fire within the current containment li	nes.				
General Situational Awareness:					
Steep and rugged terrain, critically dry and recept	ive fuel hads active area f	for fire history and	drought stress	ed trees	
Steep and rugged terrain, critically dry and recept	live ruer beus, active area i	or me mistory and	arought stress	eu trees.

### Yeti / Alex Fires Weather Forecast

Forecast Iteration: #4

Forecast For: Wednesday Aug 10, 2022

Forecast Produced: Aug 9, 2022

Name of the Fire(s): Yeti, Alex

Unit: CA-KNF

Inci. Met.: Jeff Tonkin, James White (T)

Cell: 707-672-3386 Signed: Jeff Tonkin

**WEATHER DISCUSSION:** Increasing smoke from the south along with passing low pressure will allow for slightly cooler temperatures today. Otherwise similar quiet weather will continue with warmer and drier conditions later in the week.

### Today (Wednesday):

Sky / Weather:

Sunny...smoke aloft.

Chance of showers:

0 %

Smoke / Stability: LAL: 1

CWR: 0%.

Mixing Height: 6.0 K ft.

Weakly Un-Stable, Inversion 3200 ft...weak, breaking around mid-morning.

Transport Wind: SW 15 mph

### Upper Slopes / Ridges:

### Lower Slopes / Drainages:

Max Temp: 79 - 83 F

Min RH: 27 - 31%.

Wind: S 6 - 10 mph. Gust 15 - 20 mph in the

afternoon and evening.

Max Temp: 89 - 93 F Min RH: 19 - 23%.

Wind: Light SE in the morning. Increasing to

W and SW 7 to 9 mph with Gusts to 15 mph after

1400 PDT.

### Tonight (Wednesday Night - Early Thursday Morning):

Sky / Weather:

Light smoke aloft.

Chance of Rain:

0%.

Smoke / Stability:

Weakly Un-stable.

LAL:

CWR: 0%

Mixing Height: 700 ft.

Transport Wind: W 4 mph.

### **Upper Slopes / Ridges:**

### Lower Slopes / Drainages:

Min Temp: 56 - 60 F

Max RH:

55 - 60 %.

Wind:

NE 3 - 6 mph...gust 10 mph.

Min Temp: 51 - 55 F

76 - 83%. Max RH:

Wind: NE and E 2 - 5 mph.

OUTLOOK FOR THURSDAY: Sunny but light smoke...slightly warmer. Southwest 5 to 8 mph...but southwest wind on ridges with gusts to 15 mph. Highs near 96. Min RHs 17 to 22%.

EXTENDED (FRIDAY THROUGH SUNDAY): Sunny and less smoke. Highs in the upper 90s. Min RH values near 20%. West winds 5 to 10 mph...gusts to 15 mph in the afternoon.

Fire Behavior Forecast # 08									
Name of Incident: Yeti and Alex Fires	Administrative Unit: USFS – Klamath NF								
<b>Date &amp; Time Issued:</b> August 9, 2022 @ 1900	Operational Period: August 10, 2022 24hr.								
FBAN: Steve Ziel	Signed: /Z/								

Assumptions: Deja'Vu forecast all over again (similar conditions and characteristics). Forecast conditions provide a day with continuing "Potential" for very active fire behavior. In the event it occurs, expect very active surface fire spread on slopes from flare ups, torching upslope runs and spotting in the afternoon. Primary spread mechanism includes interior flare-ups, falling snags and rolling materials near fire lines and along the river. Peak burn period (1300-1800) provides best opportunity for increased fire activity. Klamath River winds produce up canyon daytime winds, and down canyon flow at night. Squirrelly winds occur at side drainages and bends in the river, as well as ridgetop locations. Cumulative effect of dry fuels, with subtle weather changes say it's another "HEAD'S UP DAY". (ERC >90<sup>th</sup> percentile, > 30-days since last precip., warm/dry peak of season conditions.

### Weather Summary

### See attached Fire Weather Forecast

### Fire Behavior Summary

<u>Fuels in the fire area</u> are primarily composed of *Grass/Shrub*, *Timber Litter*, and *Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, buckbrush, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be "fluffy" with hardwood leaves, and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas*.

Today's "Peak Period" fire behavior <u>potential</u> - Expect very active fire behavior with very warm/ dry, sunny day. Fire behavior characteristics could include sustained backing accelerated by rollout on slopes. Flanking may result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day. Fire has been burning for 14- days (preheated fuels, dry brush, snags are coming down, rollers are rolling).

\* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance 1/4 - 1/2 mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	
If your work area looks like -	(CH/HR = FPM)			
Mixed Shrub/Grass (GS2)	10-15 ch/hr.	4-6 feet	.5 FPM	
Timber with Understory (TU5)	12-16 ch/hr.	8-10 feet	1.0 FPM	* Flame length supports torching
Timber Litter (TL6) Leaves	7-9 ch/hr.	3-4 feet	1.0 FPM	*sustained backing
Timber Litter (TL8) Needles	8-10 ch/hr.	4-5 feet	1.0 FPM	*sustained backing

### **Specific Assignments:**

Div. GG/DD -Isolated hot pockets of backing with flare-ups. Monitor river wind effects for short range spotting potential.

Div. ZZ - Southerly winds may kindle smoldering to active spread. Potential of interior and line flare-ups as fuels consume.

Div. AA – Monitor China Cr. for interior and fire line flare ups, rollout, and falling snags. Winds at AA/ZZ get breezy in afternoon.

Alex Div. – Watch for smoldering to kindle to flame with breezes on ragged fire edge and spotty burn. High elevation firs torch easily.

\*\*IA and Repair Groups - Complete a size-up before engaging new starts. Fire behavior & weather forecast applies to response area.

**<u>Air Operations:</u>** Smoke should not disrupt aviation operations.

### Safety

**Fire behavior hazards include** ....threats to your feet, hands, airways, knees, shins, and eyes that continue to be challenged by smoke, ash, dirt, sharp things, pokey stuff, steam.....**be kind to your money making parts, lots of season left.** 

Isolated flare-up are possible in areas that have not shown activity for a couple days. Snags may fall into fresh fuel. Winds may kindle smoldering fuels to flame.......(review Common Denominators of Fire Behavior on Tragedy Fires).

642 words in the forecast written for your situational awareness, 2-minute read for the average reader.

## Lookouts Communications Escape Routes Safety Zones

### Yeti Fire / Alex Fire

Operation Period: 08/10/2022 Day & Night Shift

### SAFETY MESSAGE

### FATIGUE EFFECTS AND MANAGEMENT

- Cumulative fatigue is a contributing factor in many accidents.
- Fatigue effects your mental processing, your ability to access your short and long term memory, as well, your physical performance.
- The effect of 24 hours without sleep is equivalent to being legally drunk.
- The only remedy to fatigue is quality sleep. Manage your off-shift time to ensure you and your personnel get the rest needed.
   MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	PUBLIC TRAFFIC	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

### **Planning for Safety**

Have multiple plans and make them known

### P – Primary Plan (Offense)

Focused on firefighter safety and mission objectives

### A – Alternate Plan (Offense)

A fallback plan that closely supports the primary

C – Contingency Plan (Defense)

Entirely focused on firefighter safety

E – Emergency Plan (Defense)

Entirely focused on individual firefighter survival

### Watch for Over Confidence During Suppression Repair

\*Driving: As you become more familiar with the road systems, we tend to increase speeds. Please be aware of this and keep speeds down, watch for people and vehicles along the roads, and drive defensively.

\*PPE: Please recognize that in low stress situations like suppression repair, it is easy to over-look the importance of wearing the appropriate PPE include eye protection.

\*Work Area: Familiarity with your work area can result in a lowering of awareness, especially as conditions change.

California Team 10 Safety Officers: Frank Pingiczer, Jason Danen (T), Lorena Ochoa (T)

### COVID-19 PREVENTION INFORMATION MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19** and **maintain the health of all fire personnel**.

### Self-Awareness / Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

### **COVID-19 Testing availability**

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics**, **hours 0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the Screening Testing Program can also access the identified testing location to meet their testing requirements. Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.

### Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

### **Social Distancing and Mask Wearing**

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures**.

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

### Klamath National Forest Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011 Noelle Graham-Wakoski, Peer Lead 858-735-7728 Fernando Estrada, Peer Support 530-250-7562 Estuardo Bojorquez, Peer Support 909-228-9479 Deana Kahle, Clinician, 951-232-2450

### Human Resource Message

### COMMUNICATION

Effective communication requires a mutual exchange of both giving and receiving information. Making sure we provide and receive clear expectations is essential for successful communication. Consideration for the needs of both parties, will maintain effective working relationships. Effective communication prevents misunderstandings and injury.

"Behind the need to communicate is the need to share. Behind the need to share is the need to be understood."

Leo Rosten

Thank you!

Adrian Escobedo- HRSP-

If you have any questions or concerns, please contact me at adrian.escobedo@usda.gov or call me 530-523-3804.

### Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the <u>download button</u> to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at 2022.yeti.finance@firenet.gov

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.yeti.finance@firenet.gov

### TRAINING SPECIALIST MESSAGE

### **Trainees / Trainers:**

After 8/13/22 there will no longer be a Training Specialist assigned to this incident. If this changes you will be notified.

### TRAINEES:

To ensure your Training Documentation package is included in the Incident Document Archives, please register by 2000 on Wednesday 8/10.

- If you ARE <u>currently registered</u> with the Training Specialist, please CLOSE-OUT with the Training Specialist by Thursday 8/12.
- REGISTRATION, FORMS, EXIT SURVEY(CHECK-OUT) can be accessed using the QR code leading to the YETI Training Website.

Tad Morelock
Training Specialist(t)
(760)963-9229
TNSP.tad@gmail.com

### **RESOURCE ADVISOR MESSAGE**

**Red/White Striped Flagging:** Resource concerns present. Please avoid flagged area and contact a Resource Advisor for preferred mitigation.

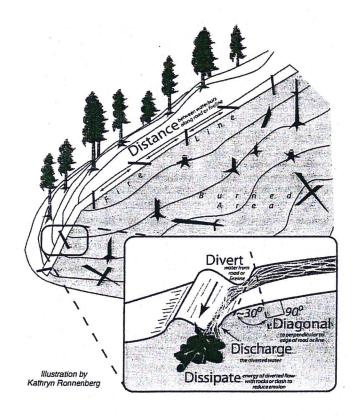

### **Effective Waterbars**

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart <u>(feet)</u>
1-5	 200
6 - 20	 125
21 - 40	 60
41 - 60	 40
>60	 25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.
