

# INCIDENT ACTION PLAN

## YETI FIRE / ALEX FIRE

CA-KNF-006200 / CA-KNF-006290

P5 PX6X (0505) / P5 PX6W (0505)

Thursday

### OPERATIONAL PERIOD

8/11/2022 0600

to

8/12/2022 0600

Fire Information: (530) 237-4330

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <p style="text-align: center;">Yeti Fire / Alex Fire</p>	<b>2. Operational Period:</b> <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">8/11/2022</td> <td style="border: none;">Date To:</td> <td style="border: none;">8/12/2022</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0600</td> <td style="border: none;">Time To:</td> <td style="border: none;">0600</td> </tr> </table>	Date From:	8/11/2022	Date To:	8/12/2022	Time From:	0600	Time To:	0600												
Date From:	8/11/2022	Date To:	8/12/2022																		
Time From:	0600	Time To:	0600																		
<b>3. Objective(s):</b>  <u>Management Objectives</u> <ul style="list-style-type: none"> <li>- Provide for the safety of incident responders and the public through the application of sound risk management principles, along with the implementation of tactics that have a high probability of success with the least amount of exposure.</li> <li>- Implement CDC and US Forest Service guidelines to limit the spread of infectious diseases.</li> <li>- Identify and provide appropriate protection to threatened values and improvements including dwellings, businesses, utilities, and recreation infrastructure.</li> <li>- Implement strategies and tactics that minimize burned area to limit negative impacts to commercial timberlands.</li> <li>- Engage with assigned Resource Advisors to aid in the development of incident activities to minimize adverse effects to cultural and natural resources</li> <li>- Establish and strengthen cooperator, partner, and stakeholder relationships.</li> <li>- Provide prompt communication of incident information to agency administrators, cooperators, communities, and stakeholders.</li> <li>- Develop plans and implement actions in fiscally responsible manner.</li> <li>- Establish expectations and a climate where all assigned incident personnel conduct themselves in a manner which promotes a harassment free environment and encourages mutual respect.</li> <li>- Utilize the Klamath National Forest Yeti fire suppression repair plan and coordinate with resource advisors and cultural specialists to implement suppression repair actions.</li> </ul>																					
<b>Control Objectives -</b> <ul style="list-style-type: none"> <li>- <b>Yeti fire:</b> <ul style="list-style-type: none"> <li>- Maintain fire perimeter within the existing natural and constructed containment lines.</li> </ul> </li> <li>- <b>Alex fire:</b> <ul style="list-style-type: none"> <li>- Keep the fire within the current containment lines.</li> </ul> </li> </ul>																					
<b>General Situational Awareness:</b> <ul style="list-style-type: none"> <li>- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.</li> </ul>

# Yeti / Alex Fires Weather Forecast

**Forecast Iteration: #5**  
**Forecast For: Thursday Aug 11, 2022**  
**Forecast Produced: Aug 10, 2022**

**Unit: CA-KNF**  
**Incident Meteorologist: Jeff Tonkin**  
**James White (T)**

**Cell: 707-672-3386**

**Signed: *Jeff Tonkin***

**Weather Discussion:** Slightly warmer weather is expected today and tomorrow. Gentle terrain driven afternoon winds are expected to return with less smoke aloft. With high pressure building, a gradual warming and drying trend is expected through the weekend.

### Today (Thursday):

**Sky / Weather:** Sunny...less smoke  
**Inversion / Stability:** Weak Instability...Inversion around 3000 ft, breaking after 10 am  
**LAL:** 1  
**Mixing Height:** 7.0 K Ft  
**CWR:** 0%  
**Transport Wind:** SW 8 mph

#### Upper slopes / Ridges:

#### Lower Slopes / Drainages:

**Max Temp:** 81 – 84 F  
**Min RH:** 23 – 27%  
**Wind:** SW 6 – 9 mph... afternoon gusts up to 15 mph  
**Max Temp:** 91 – 95 F  
**Min RH:** 19 – 23%  
**Wind:** Light SE in morning... NW 5 – 8 mph in afternoon gusts to 13 mph

### Tonight (Thursday night – Early Friday Morning):

**Sky / Weather:** Clear  
**Inversion / Stability:** Stable...Weak inversion around 2500 ft forming after 11 pm  
**LAL:** 1  
**Mixing Height:** 500 Ft  
**CWR:** 0%  
**Transport Wind:** Light SE

#### Upper slopes / Ridges:

#### Lower Slopes / Drainages:

**Min Temp:** 59 - 63 F  
**Max RH:** 61 - 65%  
**Wind:** SE 3 – 5 mph... gusts to 8 mph  
**Min Temp:** 52 – 55 F  
**Max RH:** 80 – 84%  
**Wind:** ESE 2 – 4 mph

**Outlook for Friday:** Sunny... warmer and drier conditions. Terrain driven SW winds 5 – 8 mph. Low elevation highs near 98 with min RH just below 20%.

**Extended (Saturday through Monday):** Gradual warming and drying through the weekend. Strengthened nighttime inversion and diurnal easterly flow bringing poorer RH recoveries. Highs in near 100 with gentle terrain driven winds.

## Fire Behavior Forecast # 09

<b>Name of Incident:</b> Yeti and Alex Fires	<b>Administrative Unit:</b> USFS – Klamath NF
<b>Date &amp; Time Issued:</b> August 10, 2022 @ 1900	<b>Operational Period:</b> August 11, 2022 24hr.
<b>FBAN:</b> Steve Ziel	<b>Signed:</b> /Z/

**Assumptions:** Forecast conditions provide a day with the continued “Potential” for very active fire behavior. If fire activity occurs - you can expect very active surface fire spread on slopes with flare ups, torching upslope runs, and spotting in the afternoon. Primary spread mechanism includes in/exterior flare-ups, falling snags and rolling materials near fire lines and along the river. Peak burn period (1300-1800) provides best opportunity for increased fire activity. Klamath River winds produce up canyon daytime winds, and down canyon flow at night. Squirrely winds occur at side drainages and bends in the river, as well as ridgetop locations. Cumulative effect of dry fuels, with subtle weather changes may provide enhanced fire behavior due to preheated furls. (ERC >90<sup>th</sup> percentile, > 30-days since last precip., pre-heated fuels, warm/dry peak of season conditions.

### Weather Summary

See attached Fire Weather Forecast

### Fire Behavior Summary

**Fuels in the fire area** are primarily composed of *Grass/Shrub*, *Timber Litter*, and *Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, buckbrush, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be “fluffy” with hardwood leaves, and needle draped shrubs. **Numerous snags and heavy fuel concentrations are common throughout all areas.**

**Today’s “Peak Period” fire behavior potential** - Expect very active fire behavior with a very warm/ dry, sunny day. Fire behavior characteristics could include sustained backing accelerated by rollout on slopes. Flanking may result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day. Fire has been burning for 14-days (preheated fuels, dry brush, snags are coming down, rollers are rolling).

\* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance ¼ - ½ mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	
If your work area looks like -	(CH/HR = FPM)			
Mixed Shrub/Grass (GS2)	10-15 ch/hr.	4-6 feet	.5 FPM	
Timber with Understory (TU5)	12-16 ch/hr.	8-10 feet	1.0 FPM	* Flame length supports torching
Timber Litter (TL6) Leaves	7-9 ch/hr.	3-4 feet	1.0 FPM	*sustained backing
Timber Litter (TL8) Needles	8-10 ch/hr.	4-5 feet	1.0 FPM	*sustained backing

### Specific Assignments:

**Div. GG/DD** – Monitor river wind effects for short range spotting potential in the event of torching or flare-ups near river.

**Div. ZZ** – Potential of interior and line flare-ups as fuels consume, or heat encounters unburned fuels.

**Div. AA**– Monitor China Cr. for interior and fire line flare ups, rollout, and falling snags. Winds at AA/ZZ get breezy in afternoon.

**Alex Div.** – Watch for smoldering to kindle to flame with breezes on ragged fire edge and spotty burn. High elevation firs torch easily!.

**\*\*IA and Repair Groups** – Complete a size-up before engaging new starts. Fire behavior & weather forecast applies to response area.

**Air Operations:** Smoke should not disrupt aviation operations.

### Safety

**Be alert to changing conditions** – don’t be lulled into the “same old/same old”.....fire behavior and weather processes are dynamic and ever changing throughout the day, week, season...

We will be experiencing continued “warming and drying” over the next several days. Due to the variety of aspects, elevations, fuel types, and local influences.....it is important to monitor the rate and effect of drying in your area. Subtle changes in temperature and humidity will contribute to increased fire behavior – good opportunity to observe and anticipate fire behavior (be a student of fire).

\* 659 words (+14 from previous) in the forecast, written for your situational awareness (2-minute read for the average reader).

---

**Emphasis on Attention to Detail**

**The Small Things Make a Difference**

- **Stay focused on the small things that can compromise your safety**
- **Small issues may seem inconsequential when viewed alone**
- **Sometimes multiple small issues can develop into a major problem**
- **Mitigate small issues so they do not snowball into a major issue**
- **Communicate minor problems so everyone is aware**

**MAJOR HAZARDS AND RISKS**

<b>STEEP TERRAIN CHIPPING OPS FATIGUE</b>	<b>ROLLING MATERIAL DRIVING ASH PITS</b>	<b>HEAVY EQUIPMENT HAZARD TREES COMPLACENCY</b>
---	--	---

***Be sure all elements of your safety plan are in place prior to engagement***

<p align="center"><b>Mop Up Hazards</b></p> <p>Wear proper PPE including eye protection.</p> <p>Watch for stump holes and spray nozzle ash.</p> <p>Don't forget to look up while work around trees.</p> <p>Stay focused on the environment, do not be complacent.</p>	<p align="center"><b>Symptoms &amp; Signs of Heat Illness</b></p> <p><b>Heat Exhaustion:</b> Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.</p> <p>Treatment – Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.</p> <p><b>Heat Stroke: <i>This is a life-threatening medical emergency!!</i></b></p> <p>Victims generally have hot, dry, red skin, and possible convulsions. (In some cases they may sweat profusely, so an altered consciousness mimicking intoxication may be the defining symptom). These symptoms can progress to unconsciousness and death!</p> <p>Treatment – Initiate emergency medical procedures outlined in incident Med Plan. Immediately cool individual's body by pouring water over them, especially the head and upper body. Monitor the victim</p>

United States Department of Agriculture  
Forest Service

# Safety Alert

**August 10, 2022**

**SUBJECT:** CHAIN SAW CUTS TO SWAMPERS

**AREA OF CONCERN:** Chain Saw Operations

**DISTRIBUTION:** All Agency Chain Saw Operators, Module Leaders, Fire Safety Officers, Forest Safety Managers

**DISCUSSION:** There has been a marked increase in injuries to swampers involving chain saw strikes and struck-by incidents (i.e., when the swamper is hit by the tree or parts of the tree being felled) this 2022 fire and field season.

During saw operations involving saw teams the sawyer may need to operate the chain saw in close proximity to the swamper. This presents unique safety considerations.

Each year, there are swampers who receive lacerations to their hands, arms, or legs by working too close to a running chain saw. Chain saw cuts are not simple cuts like that made by a knife; they are significant and complex wounds that happen extremely quickly. Chain saws shred flesh and can quickly remove muscles, tendons, and bone.

The sawyer and the swamper have a shared responsibility to each other's safety, as well as that of other firefighters in the area.

**MITIGATION MEASURES:** To reduce risk of injuries due to chain saw strikes, the sawyer and swamper need to be aware of and avoid the strike zone. The strike zone is a 360-degree radius around a sawyer at a distance equivalent to the sawyer's arm length plus the length of the chain saw and bar. This is a minimum, and may need to be expanded due to other factors such as fatigue, experience, etc.

During tree felling operations, the sawyer is responsible for cutting area control. This means not allowing anyone within a distance of 2 1/2 the height of the tree being felled - including the swamper.

**POINT OF CONTACT:** Pete Duncan, USFS National Saw Program Manager  
[Peter.Duncan@USDA.GOV](mailto:Peter.Duncan@USDA.GOV) 530.394.8100  
or Regional Saw Program Managers

# **COVID-19 PREVENTION INFORMATION**

## **MAINTAINING A HEALTHY WORKFORCE**

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

### **Self-Awareness / Daily Health Screening**

**Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms** (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

### **COVID-19 Testing availability**

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics, hours 0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

**Federal employees** enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

### **Sanitary and Personal Hygiene Practices**

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

### **Social Distancing and Mask Wearing**

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

**Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained.** Community Levels are updated weekly by CDC.

Klamath National Forest  
Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011  
Noelle Graham-Wakoski, Peer Lead 858-735-7728  
Fernando Estrada, Peer Support 530-250-7562  
Estuardo Bojorquez, Peer Support 909-228-9479  
Deana Kahle, Clinician, 951-232-2450

## Human Resource Message

# CHARACTER

When wealth is lost,  
nothing is lost; when  
health is lost, something  
is lost; when character  
is lost, *all* is lost.

Billy Graham

WWW.VERYBESTQUOTES.COM

**It was**  
**CHARACTER**  
that got us out of bed,  
**COMMITMENT**  
that moved us into action, &  
**DISCIPLINE**  
that enabled us to follow through  
--Zig Ziglar

## Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the download button to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at [2022.yeti.finance@firenet.gov](mailto:2022.yeti.finance@firenet.gov)

**Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to [2022.yeti.finance@firenet.gov](mailto:2022.yeti.finance@firenet.gov)**

# TRAINING SPECIALIST MESSAGE

## Trainees / Trainers:

After **8/13/22** there will no longer be a Training Specialist assigned to this incident. If this changes you will be notified.

### TRAINEES:

*To ensure your Training Documentation package is included in the Incident Document Archives, please **register by 2000 on Wednesday 8/10.***

- *If you **ARE** currently registered with the Training Specialist, please **CLOSE-OUT with the Training Specialist by Thursday 8/12.***
- ***REGISTRATION, FORMS, EXIT SURVEY(CHECK-OUT)** can be accessed using the QR code leading to the **YETI Training Website.***

**Tad Morelock**  
Training Specialist(t)  
(760)963-9229  
TNSP.tad@gmail.com

## RESOURCE ADVISOR MESSAGE

**Red/White Striped Flagging:** Resource concerns present. Please avoid flagged area and contact a Resource Advisor for preferred mitigation.

### Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

**Recommended spacing for waterbars on firelines.**

Fireline slope %	Maximum Distance Apart (feet)	<i>Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.</i>
1-5	200	
6-20	125	
21-40	60	
41-60	40	
>60	25

Controlled Unclassified Information//Basic

## Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY:** *Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

**8. ADDITIONAL INFORMATION:** *Updates/Changes, etc.*

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
