

INCIDENT ACTION PLAN

YETI FIRE / ALEX FIRE

CA-KNF-006200 / CA-KNF-006290

P5 PX6X (0505) / P5 PX6W (0505)

Friday

OPERATIONAL PERIOD

8/12/2022 0600

to

8/13/2022 0600

Fire Information: (530) 237-4330

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Yeti Fire / Alex Fire</p>	2. Operational Period:	Date From: 8/12/2022 Time From: 0600	Date To: 8/13/2022 Time To: 0600																				
3. Objective(s):																							
<u>Management Objectives</u> <ul style="list-style-type: none"> - Provide for the safety of incident responders and the public through the application of sound risk management principles while mop up and repair continues. Maintain readiness for initial attack. - Implement CDC and US Forest Service guidelines to limit the spread of infectious diseases. - Engage with assigned Resource Advisors to aid in the development of incident activities to minimize adverse effects to cultural and natural resources. - Maintain and strengthen cooperators, partner, and stakeholder relationships. - Provide prompt communication of incident information to agency administrators, cooperators, communities, and stakeholders. - Establish expectations and a climate where all assigned incident personnel conduct themselves in a manner which promotes a harassment free environment and encourages mutual respect. 																							
Control Objectives - <ul style="list-style-type: none"> - Yeti fire: <ul style="list-style-type: none"> - Maintain fire perimeter within the existing natural and constructed containment lines. - Alex fire: <ul style="list-style-type: none"> - Keep the fire within the current containment lines. 																							
General Situational Awareness: <ul style="list-style-type: none"> - Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees. 																							
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input type="checkbox"/>																							
Approved Site Safety Plan(s) Located at:

Yeti / Alex Fires Weather Forecast

Forecast Iteration: #6
Forecast For: Friday Aug 12, 2022
Forecast Produced: Aug 11, 2022

Unit: CA-KNF
Incident Meteorologist: Jeff Tonkin
James White (T)
Cell: 707-672-3386
Signed: Jeff Tonkin

Weather Discussion: With high pressure building aloft, a warming and drying trend will continue into the weekend. Temperatures will be slightly warmer today with low elevation RH hitting the teens. A light afternoon push of smoke is likely again from the south. Much drier RH recoveries are expected on ridges tonight along with light easterly winds.

Today (Friday):

Sky / Weather: Sunny...light smoke in the afternoon
Inversion / Stability: Weak instability...inversion around 2500 ft, lifting after 10 am

LAL: 1 **CWR:** 0%
Mixing Height: 7.0 K Ft **Transport Wind:** W 10 mph

Upper slopes / Ridges:

Max Temp: 82 – 85 F
Min RH: 23 – 27%
Wind: SW 7 – 10 mph... afternoon gusts
up to 16 mph

Lower Slopes / Drainages:

Max Temp: 91 – 95 F
Min RH: 16 – 21%
Wind: Light SE in morning... NW 6 – 9
mph in afternoon, gusts to 13 mph

Tonight (Friday Night – Early Saturday Morning):

Sky / Weather: Clear
Inversion / Stability: Stable... inversion around 2000 ft forming after 12 am

LAL: 1 **CWR:** 0%
Mixing Height: 500 Ft **Transport Wind:** Light SE

Upper slopes / Ridges:

Min Temp: 61 – 65 F
Max RH: 47 – 52%
Wind: NE 4 – 6 mph... gusts to 9 mph

Lower Slopes / Drainages:

Min Temp: 53 – 56 F
Max RH: 80 – 84%
Wind: ESE 2 – 4 mph

Outlook for Saturday: Sunny... warmer and drier conditions. Terrain driven NW winds 5 – 8 mph. Low elevation highs near 98 with min RH just below 20%.

Extended (Sunday through Tuesday): Gradual warming and drying through the weekend. Strengthened nighttime inversion and diurnal easterly flow bringing poorer RH recoveries. Highs in near 100 with gentle terrain driven winds. Slight chance of thunderstorms starting Tuesday.

Fire Behavior Forecast # 10

Name of Incident: Yeti and Alex Fires	Administrative Unit: USFS – Klamath NF
Date & Time Issued: August 11, 2022 @ 1900	Operational Period: August 12, 2022 DAY
FBAN: Steve Ziel	Signed: /Z/

Assumptions: *No substantiative changes to the weather or fire conditions, so... continued "Potential" for very active fire behavior. If fire activity occurs - you can expect very active surface fire spread on slopes with flare ups, torching upslope runs, and spotting in the afternoon. Primary spread mechanism includes in/exterior flare-ups, falling snags and rolling materials near fire lines and along the river. Peak burn period (1400-1800) provides opportunity for increased fire activity. Klamath River winds produce up canyon daytime winds, and down canyon flow at night. Squirrelly winds occur at side drainages and bends in the river, as well as ridgetop locations. Cumulative effect of dry fuels, with subtle weather changes may provide enhanced fire behavior due to preheated fuels. (ERC >90th percentile, > 30-days since last precip., pre-heated fuels, warm/dry peak of season conditions.*

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area are primarily composed of *Grass/Shrub, Timber Litter, and Timber with Understory models*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir, and cedar. Brush and understory species include Ocean Spray, buckbrush, madrone, poison oak, other shrub-form hardwoods, along with dog-hair conifer thickets. Local timber litter may be "fluffy" with hardwood leaves, and needle draped shrubs. *Numerous snags and heavy fuel concentrations are common throughout all areas.*

Today's "Peak Period" fire behavior potential - *Expect very active fire behavior with a very warm/ dry, sunny day. Fire behavior characteristics could include sustained backing accelerated by rollout on slopes. Flanking may result in short upslope group torching and lee-side spotting on ridges. Slope reversals may transition from backing fire to aggressive upslope runs with wind/slope alignment. Heavy fuel concentrations will provide energy high intensity flare-ups with spotting to .5 mi. Monitor fine fuel moisture throughout the day. Fire has been burning for 14-days (preheated fuels, dry brush, snags are coming down, rollers are rolling).*

* Fine fuel moisture= 3% (exposed). Probability of Ignition 70%-90% (exposed). Group torching Spotting distance ¼ - ½ mile.

Fuel Type/Model	Rate of Spread	Flame Length	Backing Rate	
If your work area looks like -	(CH/HR = FPM)			
Mixed Shrub/Grass (GS2)	10-15 ch/hr.	4-6 feet	.5 FPM	
Timber with Understory (TU5)	12-16 ch/hr.	8-10 feet	1.0 FPM	* Flame length supports torching
Timber Litter (TL6) Leaves	7-9 ch/hr.	3-4 feet	1.0 FPM	*sustained backing
Timber Litter (TL8) Needles	8-10 ch/hr.	4-5 feet	1.0 FPM	*sustained backing

Specific Assignments:

- Div. GG/DD – Monitor river wind effects for short range spotting potential in the event of torching or flare-ups near river.
- Div. ZZ – Potential of interior and line flare-ups as fuels consume, or heat encounters unburned fuels.
- Div. AA– Monitor for interior and fire line flare ups, rollout, and falling snags. Winds at AA/ZZ get breezy in afternoon.
- Alex Div. – Patrol for smoldering to kindle to flame with breezes on ragged fire edge and spotty burn. High elevation firs torch easily!.
- **IA – Complete a size-up before engaging new starts. Fire behavior & weather forecast applies to response area.

Air Operations: Smoke should not disrupt aviation operations.

Safety

Lack of..... visibility, travel speed, steep slopes, heavy fuels, numerous snags, thick brush, jackpots of fuel, potential high intensity fire activity.....all contribute to the need to review Standard Fire Orders, and the Watchout Situations.....and to ensure LCES is in place.

Anticipate and be aware of changing conditions during the period – plan ahead, better to be out an hour early than a minute too late. Flare-ups are likely to transition to torching, which leads to spotting which results in.....think ahead and plan ahead!!.

* 649 words (-10 from previous) in the forecast, written for your situational awareness (2-minute read for the average reader).

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES	
ALL	FIRE WEATHER/FIRE BEHAVIOR	<ul style="list-style-type: none"> 100-HOUR FUELS BELOW 9% ERC'S 90th PERCENTILE Weather trending warmer and drier. Establish and maintain LCES. Take weather observation and make known. 	
ALL	HAZARD TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG pg. 20). Be especially alert around snags during wind events or changing wind Fire weakened trees from multiple burn periods 	
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> HWY 96 is open for public travel with a pilot car. Dusty roads maintain spacing. Watch for deteriorating roads. Drive defensively! Expect the unexpected around every curve. Drive with headlights on, use backers whenever available. 	
ALL	MOP UP	<ul style="list-style-type: none"> Use all required PPE, including eye protection. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air. Evaluate unburned islands/Increase situational awareness. 	
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Monitor resources for level of fatigue. Repeated assignments in the same area can lead to complacency. 	
ALL	POINT PROTECTION	<ul style="list-style-type: none"> Ensure LCES is in place Do not commit to stay on a structure unless you have an adequate safety zone Set trigger points to disengage and allow adequate time to relocate. 	
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness and known hazards to others in your area. Ask for intel when you don't know the plan. Ensure all personnel are familiar with assignment and communication plan. USE ASSIGNED CHANNELS ON RADIO PLAN, AVOID CREW NET'S. 	
ALL	CHIPPER OPERATIONS	<ul style="list-style-type: none"> Ensure JHA is provided and signed by operators and crew members. Only qualified personnel will feed chipper. Wear proper PPE. 	
ALL	ATV/UTV USE	<ul style="list-style-type: none"> Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/Agency standards 	
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> Follow "Aviation-Watch Out" Situations (IRPG pg. 62). Do not plan on air resources for tactical support or medical transportation. When directing bucket drops, refer to (IRPG pg. 74) 	
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do and don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours 	
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise. Do frequent handwashing/sanitizing and disinfecting common surfaces. 	
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances, Identify hazards. Utilize observer or spotter. Avoid moving parts Ensure the use of effective communication (radio, hand signals) 	
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION.	<ul style="list-style-type: none"> Drink 2: 1 water to sports drinks. Maintain 2:1 work rest ratio Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS (IRPG PG.110) 	
ALL	ENVIROMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.

SAFETY MESSAGE

COMPLACENCY

- Defined= A feeling of being satisfied and not wanting to make it better.
- Your goal is to NEVER be satisfied with your safety.
- **Keep your edge by asking these 3 questions;**
 1. What could go wrong?
 2. What more can I do to ensure our safety?
 3. What may I be unaware of that could compromise our safety?
- Look up, Look down, Look all around to maintain your awareness.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION POISON OAK	HEAVY EQUIPMENT HAZARD TREES CHIPPING
---	--	--

Be sure all elements of your safety plan are in place prior to engagement

DRIVING RESPONSIBILITIES

- Ensure seatbelts are used by all personnel
- Drive Defensively!
- Keep headlights on
- Use wheel chocks
- Use a back-up person when necessary
- Reduce speed when visibility is poor
- Reduce speed in populated areas and at incident base
- Adhere to agency driving regulations

COMMUNICATIONS RESPONSIBILITIES

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated "Leader's Intent."

Task = What is to be done
Purpose = Why it is to be done
End State = How it should look when done

California Team 10 Safety Officers: Frank Pingiczer and Seth Williams (t)

COVID-19 PREVENTION INFORMATION

MAINTAINING A HEALTHY WORKFORCE

from the COVID Advisor Team

All fire personnel are susceptible to contracting COVID-19. The health and well-being of all personnel must be a priority throughout the fire season. **Mask use, social distancing, and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19** and **maintain the health of all fire personnel**.

Self-Awareness / Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough – more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea). Supervisors will use COVID precautions and facilitate COVID testing at the identified COVID testing locations.

COVID-19 Testing availability

COVID-19 Testing is available within the **Happy Camp** (315 Park Way) from **Mountain Medics, hours 0600-2000**. Priorities for testing will be for those with COVID-related symptoms and potential exposures to COVID-positive individuals.

Federal employees enrolled in the **Screening Testing Program** can also access the identified testing location to meet their testing requirements. **Screening Testing is required weekly for federal employees in the program when the Community Levels are Medium or High.**

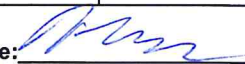

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after using the restroom, and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

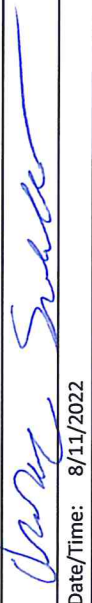

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, masks use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

Current Community Level for Siskiyou County is Medium so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly by CDC.

Klamath National Forest
Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. The Klamath NF has had too much devastation because of wildfire. We manage; however, stress is cumulative. And 2022 is proving to be another year that has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Rest when you can
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Shalyn Whitson, Deputy CISM/CAP Manager 541-915-1011
Noelle Graham-Wakoski, Peer Lead 858-735-7728
Fernando Estrada, Peer Support 530-250-7562
Estuardo Bojorquez, Peer Support 909-228-9479
Deana Kahle, Clinician, 951-232-2450

Human Resource Message

Mutual Respect

- Mutual Respect is your responsibility to treat people with dignity and respect, it is also your right to receive the same treatment.

Some things to remember while on this incident:

- Be kind and considerate to everyone in camp. Interact with all your colleagues with courtesy, politeness, and kindness. Even co-workers who don't particularly like each other can be civil and respectful, even a simple "Good morning" goes a long way.
- Let's remember that not everyone on this incident has the same sleep schedule. At night when you are in the tent sleeping area outside of camp, keep the noise to a minimum.
- Lastly, let's ensure that we are treating our base camp support teams, i.e., CCC's, food service, etc., with the courteous and respect that they deserve. They, as well as everyone else are working tirelessly to ensure that you have the adequate support that you need so we all can accomplish our mission objectives.

If you have any issues feel free to email, call or text.

HRSP: Adrian Escobedo, 530-523-3804, adrian.escobedo@usda.gov.

Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the download button to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at 2022.yeti.finance@firenet.gov

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.yeti.finance@firenet.gov

RESOURCE ADVISOR MESSAGE

Red/White Striped Flagging: Resource concerns present. Please avoid flagged area and contact a Resource Advisor for preferred mitigation.

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart (feet)	<i>Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.</i>
1 – 5	200	
6 – 20	125	
21 – 40	60	
41 – 60	40

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
