2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 13 NAME OF FIRE: 2022 SRF Lightning Complex

PREDICTION FOR: 0700 Sun - 0700 Mon SHIFT UNIT: CA-SRF

SHIFT DATE: Aug 21-22nd, 2022 SIGNED: /s/Ryan Walbrun-IMET

FORECAST ISSUED: 1800 Saturday Aug 20th

WEATHER DISCUSSION: No significant weather changes are forecast today across the fire. There is a weather system approaching but the impacts look subtle. The inversion should dissipate by early afternoon with highs back into the mid 80s to lower 90s. The biggest change for today will be slightly stronger westerly winds this afternoon, especially along the Trinity River. As the fire produces less smoke we are seeing more sunshine and a weaker afternoon inversion that will let some of the wind mix into the canopy. Division K and U will see mainly diurnally driven winds where work is continuing and the fire is showing the most lingering heat. Evening winds will ease after sunset as the nighttime inversion sets up with moderate humidity recovery overnight as onshore flow increases.

WEATHER FORECAST FOR SUNDAY:

WEATHER: Smoke in the morning, clearing Branch I by midday as west winds develop.

MAX TEMPERATURES: 79 - 85 degrees under smoke shading. 85-94 degrees full sunshine. 24 HR Trend little change.

MINIMUM HUMIDITY: 30-35% smoky areas but 25-30% outside of smoke under full sun. 24 HR Trend little change.

20-FOOT WIND:

SLOPE/VALLEY - Downcanyon / downslope 1-4 mph in the morning becoming Upcanyon / Upslope 5-10 mph with gusts to 18 mph, stronger along the Trinity River near the Campbell fire.

RIDGETOP- Northeast 2-5 mph in the morning becoming Northwest 5-10 mph gusts to 15 mph afternoon hours.

INVERSIONS/STABILITY: Weak to moderate morning inversion around 2000 feet eroding by 1200-1300 hours.

WEATHER FORECAST FOR SUNDAY NIGHT:

WEATHER: Smoke and haze through sunset then smoke settling across the fire overnight.

MINIMUM TEMPERATURES: 62-67 thermal belts above 2000 ft. 55-60 lower slopes. 24 HR Trend: 2-4 degrees cooler.

MAXIMUM HUMIDITY: 35-50% mid and upper slopes. 60-70% lower slopes and along the river. 24 HR Trend: 5-10% wetter Areas of little or no humidity recovery or nighttime drying trend possible above 2000 feet.

20-FOOT WIND:

SLOPE/VALLEY - Upcanyon / Upslope 3-7 mph with gusts to 12 mph in the evening...becoming Downcanyon / downslope 1 to 4 mph after 2200.

RIDGETOP - Northwest 5-10 mph, becoming North 5 mph or less overnight.

INVERSIONS/STABILITY: Smoke settling over the fire with a moderate nighttime inversion.

EXTENDED FORECAST: A slight cooling trend early next week with continued northwest winds. Less active burning and smoke will result in more sunshine in the afternoon hours. A ridge rebuilds Wednesday through Friday with a warming and drying trend as 90s return with humidity to around 25% and poor nighttime recovery. No rain or thunderstorms in the forecast at this time. Long range outlook through the end of the month calls for above normal temperatures with little or no rain.

PORTABLE WEATHER STATIONS:

Division L near Denny Road: Frequency 163.350 DTMF Tone 0059
Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060
Division M and U south of Elbow Dip: Frequency 163.350 DTMF Tone
Division K near Branch I Contingency Line: Frequency 163.350

INPUTS

WEATHER SUMMARY: ** See attached Weather Forecast for details/discussion **

	08/21/2022 Day	08/21/2022 Night
Sky Weather	Smoke in the morning, clearing Branch 1 by	Smoke and haze through sunset then smoke
Ony Troutino	midday as northwest winds develop.	settling across the fire overnight.
Temp	78 - 84F under smoke, 85-92F in full sun	62-67F above 2000ft, 55-60F below
RH %	30-35% smokey areas; 25-30% full sun	35%-50% above 2000 ft, 60%-70% below
20 ft. Winds	SLOPE/VALLEY Upslope 5 to 10 mph, gusts to 18mph strongest along the Trinity River RIDGETOP 2-5 NE, becoming NW late afternoon at 5-10 mph, gusts to 15 mph	scope/valley Upslope 3 to 7 mph, gusts to 12 mph in the eveningbecoming downcanyon/downslope 1 to 4 mph after 2200. RIDGETOP NW 5-10 mph then N 5 mph or less
Stability	Weak to moderate morning inversion around 2500 feet eroding by 1200-1300 hours.	Smoke settling over the fire with a moderate nighttime inversion.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Shading from the smoke inversion will dictate the fire behavior. High up above the inversion expect to see the most activity with moderate to active fire behavior. Under the inversion expect to see low to moderate fire behavior. Consistent northerly winds should lead to earliest clearing on northern and western portions of the fire. Nighttime marine influence will limit fire behavior in lower slope positions, with dry air above the inversion/marine influence producing potential for active overnight fire behavior and spotting in upper slopes. These concerns are strongest in Branch III.

The fires are burning in areas with no recent fire history and significant dead and down, resulting in abundant surface fuels. The fires are situated near the confluence of the main stem Trinity River and the S. Fork of the Trinity River, which will influence wind channeling and subsequently fire behavior – watch for erratic and eddying winds near the confluence and large bends in the river canyons.

Ignition Receptiveness: Probability of Ignition 42% shaded 65% sunshine

Dryness: Dead and down fuel moistures: 1 hour - 5-8%, 10 hour - 10%, and 1000 hour - 11%.

SPECIFIC:

Branch I - Divisions A, K, L and M.

Interior fine fuels will continue to burn. In Divisions A, M and L, control lines have sufficient depth to make interior activity unlikely to compromise control lines. In Div. K, residual heat in the Cedar Creek drainage will continue to pose a threat of spotting across the drainage.

Branch III - Divisions U, W, Y, and Z

Fire in Div. W and U will continue to consume fuel between current perimeter and planned control lines. The largest areas of remaining heat are from recent ignition operations. If portions of recent ignitions are above the inversion or if the inversion weakens, increases in activity are possible and could challenge control lines. Spotting distances of up to ¼ mile are possible. The high portions of these divisions are most likely to be impacted by NW winds and the dry air above the nighttime inversion. Afternoon winds from the NW will be favorable for Div. Y and Div. Z.

Control lines are gaining depth, making spotting the main concern, though spotting distances are not expected to be more than ½ mile.

AIR OPERATIONS:

The inversion will limit air morning operations, during the afternoon hours air operations should not be limited.

SAFETY

LCES is a self-triggering mechanism. **Lookouts** assess, and reassess, the fire environment and **Communicate** threats of safety to firefighters. Firefighters use **Escape routes** to move to **Safety zones**

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are <u>ALL</u> accountable for <u>SAFE</u> behaviors For Day/Night Operations: August 21-22, 2022

INCIDENT: SRF Lightning Fire

Day: Sunday/Monday Shift: Day/Night

Major Hazard and Risk:

- > Hazardous Roads: Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!
- ➤ Heat Related Injuries: Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body.
- Extended Extraction Times: Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- > Hazard Tree Safety: Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards trees. This includes your sleeping areas in camp!

Fire Order of the Day: Maintain prompt communications with your forces, your supervisor, and adjoining forces.

Watch Out Situation #5: Uninformed on strategy, tactics, and hazards.

Hazard tree indicators:

- 1. Trees have been burning for an extended period
- 2. High risk tree species (rot and shallow root system)
- 3. Numerous down trees
- 4. Dead or broken tips and limbs overhead
- 5. Accumulation of down limbs
- 6. Absence of needles, bark or limbs
- 7. Leaning of hung-up trees

Thanks from your Safety Team!!

Greg Marfil, Cougan Carothers, Mike Work (T)

8 line

Medical Incident Report (MIR)

This is on the last page of the IAP every day. Be familiar with it, train with it because you never know when you will need to use it.

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES					
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Post road guards when appropriate. 					
All	Steep Terrain & Rolling Debris	 Maintain 8-10' spacing when working and walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. 					
Contingency Branch 3	Chipping Operations	 Ensure all emergency shut-off devices are tested each day prior to use. Ensure workers are trained in the use of all emergency shut-off devices. Ensure workers hands and feet remain outside of hopper deck Wear loose fitting clothing, skid resistant footwear, and keep clothing tucked Use signs, or cones to alert traffic of work area, and use flaggers to stop traffic when work area is congested. 					
All	Driving & Traffic	 Practice "Defensive Driving" techniques traveling on roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seatbelts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, & cell phones etc.) and use the 3 second rule. 					
All	Air Operations	 Ensure positive communication with all air resources. Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-Out Situations" IRPG Pg. 46. Refer to "Directing Bucket or Retardant Drops" IRPG Pg. 58. 					
Branch 1 Branch 3	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment. 					
All	Extended Medical Extraction Times	 Identify helispots and communicate Lats/Longs to DIVS. Be familiar with the Medical Plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively. 					
All	Unplanned Public Interaction	 Be alert to non-fire personnel in areas with suppression personnel. All non-fire personnel will be escorted while on fireline. Post lookouts to in areas with public to avoid conflicts with mission tasks. Ensure sufficient security to restrict access to exclusion area. 					
All	Infectious Disease Control	Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently.

Human Resource Message

Rights and Responsibilities While On Assignment

You have a right to:

- A safe work environment
- Adequate information, food, sleep, equipment, and transportation
- Answers to your questions

But, it's not one-sided. Your help, cooperation and commitment are needed. In order for all fire personnel to be effective, here is an outline of your responsibilities:

Promote and Maintain Good Communications

Adequate and accurate communications and information flow are essential for efficient fire suppression efforts and effective interpersonal relations.

❖ Maintain an Attitude of Respect and Concern for your Colleagues. Fire suppression efforts can only be accomplished by accessing the skills and abilities of a wide variety of people. An attitude of mutual respect and appropriate behavior is essential for all personnel. Civil Rights violations will be dealt with promptly. If you have a concern, please report it to the Human Resource Specialist, your supervisor, or any member of the Management Team.

Fire camp will be a Drug and Alcohol Free workplace. Here are the rules:

From the Fire line Handbook, Chapter 6 – Common Responsibilities: Non-prescription unlawful drugs and alcohol are not permitted at the incident. Possession or use of these substances will result in disciplinary action.

Remember, **YOU** are responsible for your conduct and behavior.

Linda Overton, Human Resource Specialist, 707-562-8675

Our lives are not determined by what happens to us but by how we react to what happens, not by what life brings to us, but by the attitude we bring to life. A positive attitude causes a chain reaction of positive thoughts, events, and outcomes. It is a catalyst, a spark that creates extraordinary results.

Deputy IC Mike Strawhon 805-798-0187

SRF Lightning Complex Incident: Resource Advisor Message

Fish Screens: Coho Salmon Critical Habitat

The Trinity River and tributaries are considered critical habitat for threatened Coho salmon, an anadromous fish (fish born in freshwater who spend most of their lives in saltwater and return to freshwater to spawn). Please ensure that any Mark 3 and Engine/Tender suction hoses have a fish screen attached when drafting. Fish screens are designed to minimize stress, injury or

even death during the drawing and application process. Talk to a READ if you need a screen.

Port Orford Cedar Root Disease: NO DRAFTING East Fork and Boise Creek CGs!!!

Some local drainages are infected with POC Root disease, which is a root rotting disease that spreads via water and mud. Infested waters within the fire perimeter include: the main stem of Willow Creek and small creeks to the north up to Hoopa, south side of Willow Creek (includes area in **Boise Creek Campground**) in East Fork of Willow Creek (includes area in **East Fork Campground**) and in most of the tributaries. **DO NOT DRAFT** from **East Fork Campground OR Boise Creek Campground**.

<u>IMPORTANT</u>: Yellow/Black Striped flagging indicates resource <u>AVOIDANCE</u> areas.

Invasive Plant Species – PLEASE USE WEED WASH

The area in and around the Lightning Complex, are home to many sensitive species. Infestations of highly invasive plant species, like yellow star thistle, are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid flagged areas. Make sure to visit the WEED WASH at Check-In to the incident and demob. Located on Hwy 96 just past the Ranger Station.

• Cultural Resources:

There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.

FINANCE MESSAGE

Email address: 2022.lightningcomplex.finance@firenet.gov

TIME

Electronic CTRs, Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off in the Finance yurt. Please be sure to write legibly and print your name under your signature.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE REPLACEMENT

<u>Cache Items</u> – Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take to Ordering. Any items that cannot be filled by Supply will need FSC, INBA or IC signature to approve replacement for cache equivalent of lost/damaged items.

Non-cache items/Claims - For replacement of non-cache items or claims please submit a completed OF-213 and OF-289. A determination for replacement based on the documentation provided will be made by the FSC, IC, or INBA.

Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. See Finance for information on the latest information regarding lost or damage to Forest Service chainsaws and radios.

** Please do not wait until Demob to begin the replacement process **

8. MEDICAL EMERGENCY PROCEDURES.

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red-2/Yellow, life threatening emergencies trigger Incident within Incident (IW!).
- Division Supervisor/Operation contacts South Communications:
 - Division Supervisor or POC* will run "Medical -- Emergency" on the Command frequency.
 - All IWI's will go through Lightning Communications.
 - Division Supervisor of POC* to use "Medical Incident Report" worksheet on page 118-119 of the IRPG.

POC* (Point of Contact) and/or Operations

EMERGENCY DURING OPS. BRIEF 0700-0730:

If you have an emergency while briefing is going on over the command channel. Wait for a break and transmit your

emergency traffic.

facility.

Notify MEDL (Mike Lencioni 661-487-6323) (Blaine Heywood 661-330-0142)

worksheet on page 118-119 of the IRPG.

LINE "NON-EMERGENCY INCIDENT" PLAN:

Patient Complaint, Condition and Location via Tactical or

Command frequency. Priority 3/Green patient will trigger an

incident within an incident if they require transport to a medical

Division Supervisor or POC* will run "Non-Emergency Incident" on

Division Supervisor or POC* will use "Medical Incident Report"

- Crew Supervisor to contact Division Supervisor with:

- Division Supervisor contacts Communications:

the Command frequency.

Report to Frontline Medical for treatment

IN-CAMP – 24 HOUR MEDICAL

Blaine Heywood MEDL, Michael Lencioni MEDI

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications I have a Red priority patient, unconscious struck by a follow to

	Requesting air ai	mbulance to Forest Road:	ient, unconscious, struck by a falling 1 at (Lat./Long.) dent, IC is TFLD Jones. EMT Smith		edical care."	
Severity	of Emergency	Ex: Unconscious, d	Life or limb threatening injuitifficulty breathing, bleeding severely	ry or illness. r, 2° – 3° burns	Evacuation ned	ed is IMMEDIATE izes, heat stroke, disoriented.
	AND	□YELLOW / PRIORI	TY 2 Serious Injury or illness.	. Evacuation	n may be DELAY	ED if necessary.
	port Priority rity 1, 2, 3)	Ex: Significant traun	na, unable to walk, 2° – 3° burns not Y 3 Minor Injury or illness. No minor heat-related illness.	more than 1-3	palm sizes.	· · · · · · · · · · · · · · · · · · ·
