**FORECAST NO:** 16  
**PREDICTION FOR:** 0700 Wed - 0700 Thu  
**SHIFT DATE:** Aug 24-25<sup>th</sup>, 2022

**NAME OF FIRE:** 2022 SRF Lightning Complex  
**SHIFT UNIT:** CA-SRF  
**SIGNED:** Jeff Tonkin - IMET (707) 672-3386  
Rebecca Muessele IMET (T)

**FORECAST ISSUED:** 1800 Tuesday, Aug 23<sup>rd</sup>

**WEATHER DISCUSSION:** Weak high pressure will form this afternoon bringing drier and warmer conditions. Upper elevations could see temperatures in the mid to upper 80s while lower elevations will be closer to 100°. Humidity will continue to drop through the day. Smoke continues to be a challenge with the timing of dissipation due to the inversion layer lifting. Expecting minimal if any cloud cover overnight. The highest peaks may see more of a westerly wind until just near sunrise. Diurnally driven winds will increase in the afternoon from the Northwest.

**WEATHER FORECAST FOR WEDNESDAY:**

**WEATHER:** Moderate smoke in the morning, clearing Branch I by midday as West winds develop.

**MAX TEMPERATURES:** 84 - 89 degrees upper slopes and ridges. 24 HR Trend up 2-4 degrees.  
92 - 97 degrees lower slopes and drainages. 24 HR Trend up 3-5 degrees.

**MINIMUM HUMIDITY:** 37-45% upper slopes and ridges 24 HR Trend down 10%.  
30-36% lower slopes and drainages. 24 HR Trend down 2-4%.

**20-FOOT WIND:**

**SLOPE/VALLEY** - Downcanyon / Downslope 1-4 mph in the morning becoming Upcanyon / Upslope or west 5-10 mph with gusts 15 - 20 mph, stronger along the Trinity River near the Campbell fire.

**RIDGETOP-** Northeast 2-5 mph in the morning becoming West and Northwest 5-10 mph gusts to 15 mph during the afternoon hours.

**INVERSIONS/STABILITY:** Weak to moderate morning inversion around 3000 feet eroding by 1200-1300 hours.

**WEATHER FORECAST FOR WEDNESDAY NIGHT:**

**WEATHER:** Smoke and haze through sunset then smoke settling across the fire overnight and ICP toward morning.

**MINIMUM TEMPERATURES:** 58-64 thermal belts above 2000 ft. 52-56 lower slopes. 24 HR Trend: minimal change.

**MAXIMUM HUMIDITY:** 58-66% mid and upper slopes. 71-78% lower slopes and along the river. 24 HR Trend: 2-4% drier

**20-FOOT WIND:**

**SLOPE/VALLEY** - Upcanyon / Upslope 3-7 mph with gusts to 12 mph in the evening...becoming Downcanyon / Downslope 1 to 4 mph after 0000.

**RIDGETOP** - Northwest 5-10 mph, becoming North and Northeast 5 mph or less overnight.

**INVERSIONS/STABILITY:** Smoke settling over the fire with a moderate nighttime inversion.

**EXTENDED FORECAST THURSDAY - SATURDAY:** Minimal change through Friday as weak high pressure lingers over the region. Saturday will bring a weak disturbance which will increase onshore flow and a return of a marine layer. Uncertain how deep or intense this will be yet, but will see lower temperatures and higher RH through the day.

**PORTABLE WEATHER STATIONS:**

Division L near Denny Road: Frequency 163.350 DTMF Tone 0059

Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060

Division M and U south of Elbow Dip: Frequency 163.350 DTMF Tone 0002

Division K near Branch<sup>1</sup> Contingency Line: Frequency 163.350 DTMF Tone 0003

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

The inversion and humidity will keep the fire behavior suppressed. Overnight recovery will help delay the start to the burn period. Expect low to moderate fire behavior under the inversion. Once the inversion lifts fire behavior will increase with the addition of the solar radiation and pre-heating of the fuels. Moderate to active fire behavior above the inversion. Nighttime recovery will influence fire behavior in lower slope positions, with dry air above the inversion/marine influence producing potential for moderate overnight fire behavior in upper slopes. These concerns are strongest in Branch III. The fires are burning in areas with no recent fire history and significant dead and down, resulting in abundant surface fuels. The fires are situated near the confluence of the main stem Trinity River and the S. Fork of the Trinity River, which will influence wind channeling and subsequently fire behavior – watch for erratic and eddying winds near the confluence and large bends in the river canyons.

**Ignition Receptiveness:** Probability of Ignition 35% shaded 58% sunshine Night 16% Spotting ¼ - ½ mile

**Dryness:** Dead and down fuel moistures :1 hour – 6-9%, 10 hour– 12%, and 1000 hour– 11%.

#### SPECIFIC:

##### Branch I - Divisions K, L and M.

Interior fine fuels will continue to burn. In Division M and K control lines have sufficient depth to make interior activity unlikely to compromise control lines. In Div. L, fire will continue to move upslope towards Lone Pine Ridge. Spotting can be expected on top of the Lone Pine Ridge. The head will keep moving southeast into Prairie Creek.

##### Branch III – Divisions U, W

Fire in Div. W and U will continue to consume fuel between current perimeter and planned control lines. If portions are above the inversion or if the inversion weakens, increases in activity are possible and could challenge control lines. The high portions of these divisions are most likely to be impacted by NW winds and the dry air above the nighttime inversion. Afternoon winds from the NW will be favorable for the west side.

Night: Early on in the shift expect to see active fire behavior especially in the interior and in Division L area. Watch for any spotting that may have occurred throughout the day but went unnoticed in the Horse Range drainage. Activity should moderate around 2400 hours.

#### AIR OPERATIONS:

The inversion will limit air morning operations, during the afternoon hours air operations should not be limited.

## SAFETY

**To reduce the risk:** Post lookouts, check communications, back off if you have doubts about your escape routes or safety zones or if the situation becomes too complex.

## HEALTH AND SAFETY MESSAGE

**SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors  
For Day/Night Operations: August 24-25, 2022

INCIDENT: <b>SRF Lightning Complex</b>	Day: Wednesday/Thursday Shift: Day/Night
<b>Major Hazard and Risk:</b> <ul style="list-style-type: none"><li>➤ <b>Hazard Tree Safety:</b> Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards trees. <b>This includes your sleeping areas in camp! IRPG pg. 20</b></li><li>➤ <b>Extended Extraction Times:</b> Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.</li><li>➤ <b>Hazardous Roads:</b> Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!</li><li>➤ <b>Heat Related Injuries:</b> Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body.</li></ul>	

### **ASH PIT HAZARDS**

*Miscellaneous Fireline Hazards*

Ash pits are an inherent and hidden risk to wildland firefighters that can cause severe burns and injuries. Ash pits are created when a ground fire consumes underground fuels creating an empty space that is imperceptible from the surface.

#### Conduct Risk Assessment for New Activity or IA

- ❖ Identify Hazards
- ❖ Assess Hazards
- ❖ Develop controls & make risk decisions based on controls
- ❖ Implement Controls
- ❖ Supervise & continuously evaluate

*Ask: Is the risk worth the gain?*

**Thanks, from your Safety Team!!**

## LIGHTNING COMPLEX CA-SRF-000620

Team 14 appreciates your hard work during this incident and we want to make sure that you arrive to your home unit safely. Every morning, a tentative Demobilization List is posted in the IAP. Please stop by the Demobilization Trailer (located at the ICP) to see us if you are on that list to begin the demobilization process and/or help us make any necessary corrections. That being said, when beginning the demobilization process please adhere to the following:

- Stop by the trailer to pick up your 221 to begin the demobilization process.
- Notify the demobilization team for any flight requests no later than 72 hours before last work day. There is a "Air Travel Request" form that needs to fill out.
- We are no longer doing the "remote demobilization" process.

## SRF Lightning Complex Incident: Resource Advisor Message

### **Fish Screens: Coho Salmon Critical Habitat**

The Trinity River and tributaries are considered critical habitat for threatened Coho salmon, an anadromous fish (fish born in freshwater who spend most of their lives in saltwater and return to freshwater to spawn). Please ensure that any Mark 3 and Engine/Tender suction hoses have a fish screen attached when drafting. Fish screens are designed to minimize stress, injury or even death during the drawing and application process. Talk to a READ if you need a screen.

### **Port Orford Cedar Root Disease: NO DRAFTING East Fork and Boise Creek CGs!!!**

Some local drainages are infected with POC Root disease, which is a root rotting disease that spreads via water and mud. Infested waters within the fire perimeter include: the main stem of Willow Creek and small creeks to the north up to Hoopa, south side of Willow Creek (includes area in **Boise Creek Campground**) in East Fork of Willow Creek (includes area in **East Fork Campground**) and in most of the tributaries. **DO NOT DRAFT from East Fork Campground OR Boise Creek Campground.**

### **IMPORTANT: Yellow/Black Striped flagging indicates resource AVOIDANCE areas.**

- **Invasive Plant Species – PLEASE USE WEED WASH**

The area in and around the Lightning Complex, are home to many sensitive species. Infestations of highly invasive plant species, like yellow star thistle, are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid flagged areas. **Make sure to visit the WEED WASH at Check-In to the incident and demob.**

### **Cultural Resources:**

There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner. GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.
