

INCIDENT ACTION PLAN SRF LIGHTNING COMPLEX

CA-SRF-000620
P5PY38 (0510)

OPERATIONAL PERIOD

9/3/2022 0700
to
9/4/2022 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: SRF LIGHTNING COMPLEX	2. Operational Period:	Date From: 9/3/2022 Time From: 0700	Date To: 9/4/2022 Time To: 0700
---	-------------------------------	--	------------------------------------

Strategic Framework

- Implement a full suppression strategy on the SRF Lightning Complex.
- Values at risk include human safety, private timberlands, communities, critical infrastructure, and associated improvements.
- Apply strategies and tactics that offer the highest probability of success.

Leaders' Intent

- Provide the highest level of customer service to all involved with, or impacted by, the SRF Lightning Complex.
- Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators.
- All incident assigned personnel should be prepared to take appropriate actions regarding:
 - Personal safety and the safety of others, including driving slowly and defensively.
 - Manage fatigue by taking breaks and maintaining work/rest cycles.
 - Elevate awareness of current COVID-19 precautions and minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines.
 - Professional behavior, conduct, and timely/effective communication.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate all public information to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Effectively manage and track costs for all incidents identified within the SRF Lightning Complex.

Control Objectives

To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the SRF Lightning Complex fires:

Branch I

- North of Salyer Heights and Trinity River
- South of Lone Pine Ridge
- East of Campbell Ridge Road, Seeley McIntosh Road, and Peach Tree Lane
- West of Forest Road 07N26

Branch X

- North of Ammon Ridge
- South of Trinity Ridge
- East of Friday Ridge
- West of 06N06 Road

2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 26
PREDICTION FOR: 0700 Sat - 0700 Sun
SHIFT DATE: Sept 3rd – Sept 4th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex
SHIFT UNIT: CA-SRF
SIGNED: Jeff Tonkin - IMET (707) 672-3386
Rebecca Muessle IMET (T)

FORECAST ISSUED: 1800 Friday, September 2nd, 2022

WEATHER DISCUSSION: A weak trough, stemming from the Pacific, will move over the fire area overnight into Saturday bringing some increased humidity through the morning. Will see temperatures drop by a few degrees due to cooler nature of the system, but likely will stay in the mid-80s at the upper slopes and ridges, and more warming will continue at lower elevations. With persistent moderate to dense smoke intensifying through the afternoon below the inversion, set up around 2000 ft, could see some inhibition to daytime heating due to a lack of solar radiation. Will see a pattern change on Tuesday which will likely bring higher southwesterly winds along the ridges.

WEATHER FORECAST FOR TODAY (SATURDAY):

WEATHER: Sunny, but smoky. Moderate smoke below 2000 ft, mainly on north and west side of the fire.

MAX TEMPERATURES: 80-86 degrees upper slopes and ridges. **24 HR Trend:** minimal change.
89-94 degrees lower slopes and drainages. **24 HR Trend:** minimal change.

MINIMUM HUMIDITY: 21-25% upper slopes and ridges. **24 HR Trend:** minimal change.
19 - 25% lower slopes and drainages. **24 HR Trend:** minimal change.

20-FOOT WIND:

SLOPE/VALLEY - Light east wind early...becoming west or upslope 5-7 mph with gusts to 12 mph around 1200 PDT.

RIDGETOP- Light south and southeast wind early...becoming west to northwest 3-5 mph around 1200 PDT, increasing to 5-7 mph with gusts to 14 mph around 1200 PDT.

INVERSIONS/STABILITY: Moderate inversion around 2500 feet eroding around 1400 hours.

SMOKE TRANSPORT WIND: Northwest around 12 mph.

WEATHER FORECAST FOR TONIGHT (SATURDAY NIGHT):

WEATHER: Haze through sunset then smoke settling across the fire overnight and ICP toward morning.

MINIMUM TEMPERATURES: 58-63 thermal belts above 3500 ft. 55-60 lower slopes. **24 HR Trend:** minimal change.

MAXIMUM HUMIDITY: 48-58% mid and upper slopes. 70-80% lower slopes and along the river. **24 HR Trend:** up 1-2%.

20-FOOT WIND:

SLOPE/VALLEY – West-northwest winds 7-10 mph along the ridges, diminishing to southeast 2-5 mph after 2100.

RIDGETOP - Northwest 5-10 mph with gusts up to 15 mph through 2300, diminishing to east 3-6 mph late.

INVERSIONS/STABILITY: Smoke settling over the fire and ICP with a moderate nighttime inversion around 3000 ft.

EXTENDED FORECAST SUNDAY - TUESDAY: Minimal change through Monday with high pressure remaining nearly stationary. Overnight humidity recoveries remain favorable through Tuesday, with drier conditions through the day. Temperatures will see minimal change. There is a hint of a pattern shift on Tuesday where winds will become more steadily southwest and will increase along ridgetops. May see gusts around 20 mph, but confidence remains low at this time.

PORTABLE WEATHER STATIONS:

Division N/R near Denny Road: Frequency 163.350 DTMF Tone 0059
Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060
Division N/R/U east of Elbow Dip: Frequency 163.350 DTMF Tone 0002
Division G near Branch I Contingency Line: Frequency 163.350 DTMF Tone 0003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 28	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning CA-SRF-00620	OPERATIONAL PERIOD: 09/03/2022 (0700-0700)
DATE ISSUED: 09/02/2022	TIME ISSUED: 1800
UNIT: Six Rivers National Forest	SIGNED: 
	Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY: ** See Fire Weather Forecast**

Weather: A weak trough will move over the fire area today, bringing slightly lower temperatures and increase in humidity. A weather pattern change is anticipated to begin next Tuesday bringing breezy southwesterly winds along the ridges.

Max Temp: 80^o-86^o (upper elevations), 90^o-94^o (lower slopes) **Min Temp:** 58^o-63^o

Min RH: 21%-25% (upper elevations), 19%-25% (lower slopes)

20 foot winds: light easterly winds early, becoming west to northwest 5-7 mph with gusts of 14 mph after 1200

FUELS SUMMARY:

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. Although the area has seen 50-75% of normal precipitation in the current rain year, the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fires. Current conditions are reflective of an additional month of drying with all fuels and fire danger indices above the 90th percentile. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire is burning in a very complex fire environment, which includes steep slopes and rugged terrain limiting access, heavy ground fuel loads, and large drainages impacting winds speeds and direction. There are numerous microclimates across the fire area. Although the IMET and FBAN provide general forecasts, pay attention to the specific factors driving fire behavior in your work area. We should see less smoke over the fire in the coming days. Anticipate this to increase the amount of heat and calls from the public. Continue to assess the potential threat and act accordingly.

Fire Danger Indices – 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 97th

September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 50% (shaded), 80% (unshaded), 20% (overnight)

SPECIFIC:

Branch I: The main threat to the control lines appears to be along the mid-slope road control line above Trinity Village in Div. R. Tactical patrols will be especially important as the smoke clears to ensure there isn't any spot fires below the road. Seek out any remaining heat in Div. G/J along the Lone Pine Ridge as this area is expected to receive gusty, adverse winds early next week.

Branch X: There has been limited fire behavior on the Ammon fire for the last 10+ days. Heat remains above the Madden Creek in steep, inaccessible terrain. The overnight NIROPS flight has identified several isolated heat signatures near DP220 and DP230 in Div. W.

AIR OPERATIONS:

Sunrise 0645, Last Light 1945 (Daylength: losing 2 min, 36 sec)

Smoke will continue to impact air operations for most of the operational period, with potential clearing occurring after 1400.

SAFETY:

Scout your parking, work, and rest areas for hazard trees. If possible, mitigate the hazard. If not possible, flag and notify adjacent crews who may be impacted by the hazard during the shift.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current [North Ops Outlooks](#) and [national fuels and fire behavior advisories](#).

Mitigation Measures:

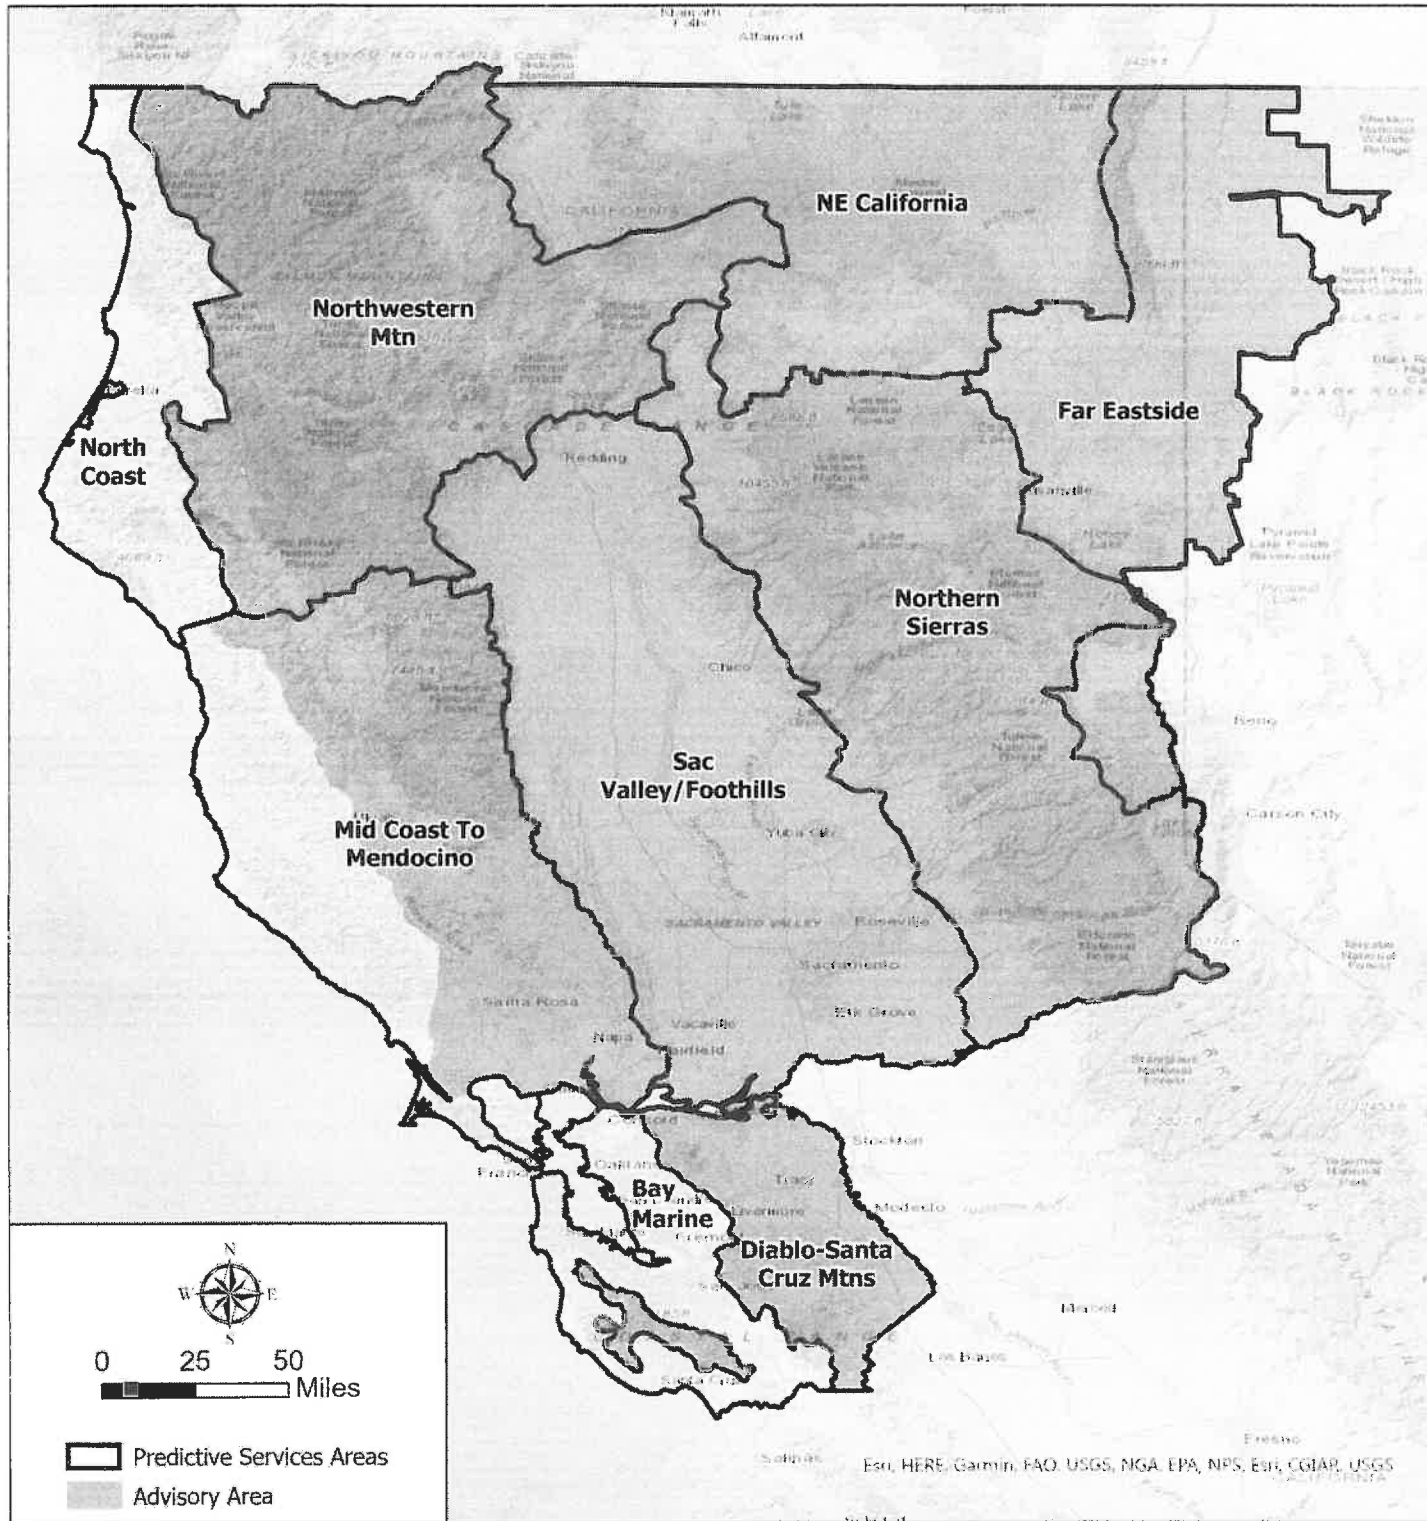

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

Fuels and Fire Behavior Advisory

Northern California

HEALTH AND SAFETY MESSAGE

For Day/Night Operations: September 3-4, 2022

INCIDENT: SRF Lightning Complex

Day: Saturday/Sunday Shift: Day/Night

Major Hazard and Risk:

- **Hazard Tree Safety:** Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards trees. **This includes your sleeping areas in camp!**
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. If road condition is an issue, contact your Division Supervisor to report.
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body. This applies to personnel working in ICP/camp as well.

Narrative: Today is the 30th day since this fire complex started with a very powerful lightning storm. For some of you, you are on your second assignment here on the Lightning Complex. It is also the beginning of September and some of you have been to many fires already this season. **Fatigue is cumulative** and can start to pile up about now. Resist the impulse to argue with your team mates or crew members. Try and keep a positive attitude even when it's hard to do. Treat others like you would want to be treated.

Fatigue and it's Effects

#1 – A lack of sleep reduces the capacity of our brains' neurons to communicate effectively.

Studies have shown that performance and vigilance after being awake for 17-19 hours tend to be equal or worse to the performance of individuals with an alcohol concentration of 0.05% in their blood, manage work rest to 2:1.

#2 – A lack of quality sleep reduces the effectiveness of the “process safety part of the brain.”

When being in a state of high fatigue, the brain tends to switch to a more energy efficient way of processing information. As a result, it switches from a conscious, analytical, rational, reflective and thoughtful – prefrontal cortex mode – of reasoning, to a more energy efficient way of processing information that produces automatic, pre-conscious, reactive, habitual and emotion-based actions.

#3 – Fatigue and lack of sleep may lead to risk-taking.

The prefrontal cortex, as explained above, also plays a crucial role in inhibiting certain behavioral impulsive acts and regions of the brain. Most sleep and fatigue research supports the hypothesis that sleep deprivation increases many aspects of risk-taking, including simple impairments in attention and judgment, greater willingness to accept risk, and a tendency to focus on short-term rather than long-term consequences.

Safety Officers Tom Zeulner and Rick Bertram

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference IRPG. Post lookouts or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e., smoke inversions, rain, and high winds etc.) that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access.
All	Driving & Traffic	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques traveling on all roads. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seatbelts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions, (eating, & cell phones etc.) and use the 3 second rule.
All	Air Operations	<ul style="list-style-type: none"> Establish and ensure communications are adequate with helibase aircraft. Ensure work/rest policies are being met for the flight crews. Involve aviation leadership with operational planning to avoid risk/exposure. Follow policy on visibility, wind speed. Update load calculations. Establish trigger points to disengage aviation resources. Utilize the appropriate aircraft for the mission. Ensure performance planning is completed for environmental conditions. Conduct air operations in compliance with the NSHO. Ensure only mission critical personnel are on flights. Ensure drone operations are coordinated with air resources and report all UAS intrusions immediately. Ensure flight following procedures are followed.
Branch 1 Branch 10	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All	Extreme Fire Behavior	<ul style="list-style-type: none"> Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging. Refer to "Common Denominators of Fire Behavior Tragedy Fires" IRPG.
All	Chainsaw Operations	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference IRPG. Follow "Procedural Felling Operations", reference IRPG. Look up, Look down, Look around for hazard tree indicators. Only fell and buck trees within your expertise, and training. Do not fall trees during high wind events.

TRAINING SPECIALIST MESSAGE

- A Training Specialist is assigned to the incident.
 - It is to your advantage to complete the quick registration process sooner than later.
 - The TNSP Desk located at ICP. You can also contact the TNSP, Jesse Roach, at 530-966-3459 for training related questions.
-

FINANCE MESSAGE

Email address: 2022.lightningcomplex.finance@firenet.gov

INTERIM PAYMENTS

Any contract equipment that has been here at least 14 days and is not on the demob list must receive an interim payment. Please see the Equipment folks in the Finance yurt or send an email to the address above to begin that process.

TIME

Electronic CTRs, Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off in the Finance yurt. Please be sure to write legibly and print your name under your signature.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE ITEMS REPLACEMENT

Cache Items – Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take to Ordering. Any items that cannot be filled by Supply will need FSC, INBA or IC signature to approve replacement for cache equivalent of lost/damaged items.

-Non-cache items/Claims - For replacement of non-cache items or claims please submit a completed OF-213 and OF-289. A determination for replacement based on the documentation provided will be made by the FSC, IC, or INBA.

-Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds.

We would appreciate photos from the field: fire activity, people at work, etc. Please EMAIL these photos and include the location, date taken, involved crew, and photo credit. If the photo has people working, please make sure they are in full PPE.

Online Information for the Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, only those impacts caused by the *suppression* of the fire.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

Miscellaneous Resources:

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- SITES WITH YELLOW/BLACK FLAGGING:** *Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or and the lead Resource Advisor to the fire.*
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.

Fences and Gates:

- Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Fireline slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

For repairs along 06N06 & 06N08 – See READ for specific vehicle washing procedures!

Fire and COVID-19 Briefing Checklist

SRF LIGHTNING COMPLEX

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- **Protect yourself, your crew, and your camp!**

Any questions contact:

MEDL Jim Emerson 805-570-9061

57

Self-Reflection

"I am a big believer in the 'mirror test'. All that matters is if you can look in the mirror and honestly tell the person you see there that you've done your best."

- John McKay

Head Coach, USC Trojans 1960 - 1975

Patrick Aceves

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>																										
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>																										
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>																										
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG page 106</p> <p>Treatment:</p>																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:</p> <p>Helispot / Extraction Site Size and Hazards:</p>																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">Function</th> <th style="width: 20%;">Channel Name/Number</th> <th style="width: 20%;">Receive (RX)</th> <th style="width: 10%;">Tone/NAC *</th> <th style="width: 20%;">Transmit (TX)</th> <th style="width: 10%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL
