

INCIDENT ACTION PLAN SRF LIGHTNING COMPLEX

CA-SRF-000620
P5PY38 (0510)

OPERATIONAL PERIOD

9/5/2022 0700
to
9/6/2022 0700

California Interagency

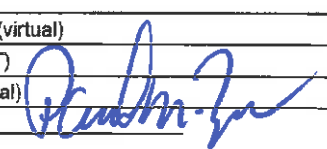

Incident Management Team

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">SRF LIGHTNING COMPLEX</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">9/5/2022</td> <td style="border: none;">Date To:</td> <td style="border: none;">9/6/2022</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0700</td> <td style="border: none;">Time To:</td> <td style="border: none;">0700</td> </tr> </table>	Date From:	9/5/2022	Date To:	9/6/2022	Time From:	0700	Time To:	0700												
Date From:	9/5/2022	Date To:	9/6/2022																		
Time From:	0700	Time To:	0700																		
<p>Strategic Framework The SRF Lightning Complex will be managed with a full suppression strategy. Firefighting resources will follow risk-based decision making. Resources will implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and protecting values.</p> <p>Values at risk include the safety of the public and firefighters; privately and Tribally held timberlands; the communities and outlying areas near Willow Creek, Hawkins Bar, Burnt Ranch, and Saylor; water and electrical infrastructure; and natural and cultural resources.</p>																					
<p>Leaders' Intent Everyone will work as a team to provide the highest level of service while assigned to the incident. All assigned resources will ensure transparent, timely and accurate communication at all levels of the incident while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding:</p> <ul style="list-style-type: none"> - Safety- including the identification and mitigation of hazards to yourself and others. - Timely and thoughtful risk-based decision making. - Manage fatigue by taking breaks and maintaining work/rest cycles. - Professional behavior, conduct, and timely/effective communication. - Manage health and well-being by following common sense, practicing good hygiene, and communicable disease mitigations. 																					
<p>Management Objectives</p> <ul style="list-style-type: none"> - Provide for firefighter and public safety through hazard recognition and application of the risk management process. - Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public. - Coordinate suppression and repair activities with READS to minimize impacts on natural and cultural resources. - Effectively manage and track costs for all incidents identified within the SRF Lightning Complex. 																					
<p>Control Objectives To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the SRF Lightning Complex fires:</p> <p>Branch I</p> <ul style="list-style-type: none"> - North of Salyer Heights and Trinity River - South of Lone Pine Ridge - East of Campbell Ridge Road, Seeley McIntosh Road, and Peach Tree Lane - West of Forest Road 07N26 <p>Branch X</p> <ul style="list-style-type: none"> - North of Ammon Ridge - South of Trinity Ridge - East of Friday Ridge - West of 06N06 Road 																					
<p>5. Site Safety Plan Required? No</p> <p>Approved Site Safety Plan(s) Located at:</p>

2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 28
PREDICTION FOR: 0700 Mon - 0700 Tue
SHIFT DATE: Sept 5th – Sept 6th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex
SHIFT UNIT: CA-SRF
SIGNED: Tom Lonka - IMET (910) 920-7865

FORECAST ISSUED: 1800 Sunday, September 4th, 2022

WEATHER DISCUSSION: Highs should reach well into the 80s to low 90s in the higher elevations above 3,000 ft, with 90s to around 100 expected in the lower terrain. Winds remain light out of the northwest, or upslope, with speeds of 5 to 7 mph, with some gusts 10 to 14 mph during peak heating in the later afternoon on the higher ridges and slopes. RH values will plummet into the teens to lower 20s. Very poor RH recoveries expected overnight with readings remaining in the 20's% or lower, especially for the higher slopes and ridges as a strong thermal belt develops. Record breaking heat is likely on Tuesday, with conditions remaining hot and dry through the rest of the week.

WEATHER FORECAST FOR TODAY (MONDAY):

WEATHER: Sunny, but areas of smoke early. Moderate smoke below 4000 ft, mainly on north and west side of the fire.

MAX TEMPERATURES: 87-92 degrees upper slopes and ridges. **24 HR Trend:** Up 4-6 degrees.
93-98 degrees lower slopes and drainages. **24 HR Trend:** Up 4-6 degrees.

MINIMUM HUMIDITY: 17 - 23% upper slopes and ridges. **24 HR Trend** Down 5-8%.
15 - 21% lower slopes and drainages. **24 HR Trend** Down 5-8%.

20-FOOT WIND:

SLOPE/VALLEY - Light east/downslope breeze, becoming NW or upslope 4-6 mph, gusts to 12 mph after 1400 PDT.

RIDGETOP- Light southeast wind early, becoming W to NW 5-7 mph with gusts to 15 mph after 1400 PDT.

INVERSIONS/STABILITY: Moderate inversion around 1500 feet eroding around 1400 hours.

SMOKE TRANSPORT WIND: Southwest around 9 mph.

WEATHER FORECAST FOR TONIGHT (MONDAY NIGHT):

WEATHER: Haze through sunset then smoke settling across the fire overnight and ICP toward morning.

MINIMUM TEMPERATURES: 65-70 thermal belts above 3500 ft. 59-64 lower slopes. **24 HR Trend:** Up 6-9 degrees.

MAXIMUM HUMIDITY: 19-29% mid and upper slopes. 50-70% lower slopes and along the river. **24 HR Trend:** Down 15–20%.

20-FOOT WIND:

SLOPE/VALLEY – West or upslope winds 7-10 mph along the slopes, diminishing to downslope 2-5 mph after 2100.

RIDGETOP - Northwest 5-7 mph with gusts up to 15 mph through 2300, diminishing to east 3-6 mph late.

INVERSIONS/STABILITY: Smoke settling over the fire and ICP with a moderate nighttime inversion around 1500 ft.

EXTENDED FORECAST TUESDAY - THURSDAY: The heat wave builds with record highs likely on Tuesday, along with continued very dry RH values in the teens. Northwest winds will increase somewhat, especially in gusts, along higher slopes and ridgetops. May see gusts around 20 mph or higher. The heatwave continues through the week with low RH vals both during the day and at night with poor recoveries expected. Winds may gust around 20 mph once again on Wednesday.

PORTABLE WEATHER STATIONS:

Division N/R near Denny Road: Frequency 163.350 DTMF Tone 0059

Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060

Division N/R/U east of Elbow Dip: Frequency 163.350 DTMF Tone 0002

Division G near Branch I Contingency Line: Frequency 163.350 DTMF Tone 0003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 30	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning CA-SRF-00620	OPERATIONAL PERIOD: 09/05/2022 (0700-0700)
DATE ISSUED: 09/04/2022	TIME ISSUED: 1800
UNIT: Six Rivers National Forest	SIGNED:  Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY: ** See Fire Weather Forecast**

Weather: The warming and drying trend continues, with poor overnight recoveries expected. Record breaking heat is likely on Tuesday, with conditions remaining hot and dry through the rest of the week.

Max Temp: 87^o-92^o (upper elevations), 93^o-98^o (lower slopes) **Min Temp:** 59^o-64^o

Min RH: 17%-23% (upper elevations), 15%-21% (lower slopes)

20 foot winds: Light southeast winds early, becoming west to northwest and increasing to 5-7 mph with gust to 12 mph around 1400

FUELS SUMMARY:

Fuels and Fire Behavior Advisory Issued for Geographic Area

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. Although the area has seen 50-75% of normal precipitation in the current rain year, the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fires. Current conditions are reflective of an additional month of drying with fuels and fire danger indices reaching the 97th percentile. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

A critical fire weather pattern is entering the northern part of the state, bringing record high temperatures and extreme fire danger. The hot and dry weather will cause any ignition near a fuel source to burn actively. The extreme heat will cause for high instability, meaning any new fire or a spot outside the control lines has the potential for active fire behavior. Expect more signs of heat across the fire area the next several days, especially along the eastern portion of the Campbell fire. Utilize aircraft early for any smokes that seem problematic and keep them from becoming established.

Fire Danger Indices – 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 97th

September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 90% (shaded), 90% (unshaded), 20% (overnight)

Spotting Distance of Torching Tree with 20 mph ridgetop winds: 0.3 miles

SPECIFIC:

Branch I: The next several operational periods will show weak spots in the control lines. Brief on areas of concern and plan for an increase in fire activity. Roll-out will be a continued threat on the mid-slope roads used as control lines. Increase your tactical patrols during the peak of the burn period. If a fire spots outside the control line, stop, think, talk, and act.

Branch X: Branch X will be in monitor/patrol status and implementing suppression repair. When working with heavy equipment, spin weather and evaluate the Probability of Ignition (IRPG -pg 44). You may need to shut down operations during the hottest and driest parts of the day.

AIR OPERATIONS:

Sunrise 0647, Sunset 1942 (Daylength: losing 2 min, 36 sec)

Smoke will impact the lower elevations early in the day. Conditions should be conducive for air operations in the afternoon.

SAFETY:

Think about your assignment the next couple of days in relation to the predicted weather forecast. Reevaluate your assignment and LCES as you enter the afternoon to ensure it is still valid.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current [North Ops Outlooks](#) and [national fuels and fire behavior advisories](#).

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

HEALTH AND SAFETY MESSAGE

For Day/Night Operations: September 5, 2022

INCIDENT: SRF Lightning Complex	Day: Monday Shift: Day/Night
--	------------------------------

Major Hazard and Risk:

- **Hazard Tree Safety:** Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards trees. **This includes your sleeping areas in camp!**
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. If road condition is an issue, contact your Division Supervisor to report.
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body. This applies to personnel working in ICP/camp as well.

Narrative: Firefighters naturally have the can-do attitude. This is what sets us apart from many other professions. It is also what can occasionally get us into a bad position and possibly cause an injury. **For example, if you are working around the chippers, you can take the materials up to the chipper but you cannot feed it into the chipper.** Please don't put yourself into a position where you could be seriously injured.

Heat Related Injury

Symptoms of heat injuries are many times easy.

- Profuse sweating with warm, cool, clammy skin leading to hot and dry skin.
- Muscle cramps, weakness and dizziness
- Vomiting, rapid and weak pulse
- Decreased mental status and unconsciousness

These are very serious conditions that can lead to rhabdomyolysis which is an acute medical problem.

- Immediately reduce work output seek shade
- Loosen clothing, move away from heat
- Seek medical attention from line medics\EMT

Demob

This is an exciting milestone during an incident. It not only means well deserved rest and comfort, it means time with family and friends. It means vacations, days on the beach or just relaxing at home with your favorite foods and beverage. So, before you embark on your journey home, please do the following:

- Make sure your vehicle is ready for the trip home
- Get plenty of rest the night before and make sure you're well fed.
- Drive safely, adhere to the posted speed limits and take rest breaks.

Remember people are counting on you arriving safely home.

Safety Officers:
Rick Bertram
Tom Zeulner
Brent Kaiser

Prepared: September 4, 2022

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference IRPG Post lookouts or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8-line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e., smoke inversions, rain, and high winds etc.) that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access.
All	Driving & Traffic	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques when traveling on all roads Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seatbelts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, etc.) and use the 3-second rule.
All	Air Operations	<ul style="list-style-type: none"> Establish and ensure communications are adequate with helibase aircraft. Ensure work/rest policies are being met for the flight crews. Involve aviation leadership with operational planning to avoid risk/exposure Follow policy on visibility, wind speed. Update load calculations. Establish trigger points to disengage aviation resources. Utilize the appropriate aircraft for the mission. Ensure performance planning is completed for environmental conditions. Conduct air operations in compliance with the NSHO. Ensure only mission critical personnel are on flights. Ensure drone operations are coordinated with air resources and report all UAS intrusions immediately. Ensure flight following procedures are followed.
Branch 1 Branch 10	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All	Fatigue / Heat Illness	<ul style="list-style-type: none"> Drink water and sports drinks throughout the day. Drink at a ratio of 2 waters to 1 sports drink. Eat well and get plenty of sleep. Take more breaks during the hottest part of the day.
All	Chipper / Chainsaw Operations	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference the IRPG. Follow "Procedural Felling Operations", reference the IRPG. Only chipper contractor can feed the chipper. Ensure all personal safety gear is worn to address mechanical hazards. Ensure personnel are spaced to ensure no one is accidentally pushed towards the chipper.

TRAINING SPECIALIST MESSAGE

- A Training Specialist is assigned to the incident.
 - It is to your advantage to complete the quick registration process sooner than later.
 - The TNSP Desk located at ICP. You can also contact the TNSP, Jesse Roach, at 530-966-3459 for training related questions.
-

FINANCE MESSAGE

Email address: 2022.lightningcomplex.finance@firenet.gov

INTERIM PAYMENTS

Any contract equipment that has been here at least 14 days and is not on the demob list must receive an interim payment. Please see the Equipment folks in the Finance yurt or send an email to the address above to begin that process.

TIME

Electronic CTRs, Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off in the Finance yurt. Please be sure to write legibly and print your name under your signature.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE ITEMS REPLACEMENT

Cache Items – Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take to Ordering. Any items that cannot be filled by Supply will need FSC, INBA or IC signature to approve replacement for cache equivalent of lost/damaged items.

-Non-cache items/Claims - For replacement of non-cache items or claims please submit a completed OF-213 and OF-289. A determination for replacement based on the documentation provided will be made by the FSC, IC, or INBA.

-Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds.

We would appreciate photos from the field: fire activity, people at work, etc. Please EMAIL these photos and include the location, date taken, involved crew, and photo credit. If the photo has people working, please make sure they are in full PPE.

Online Information For The Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

Miscellaneous Resources:

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- **SITES WITH YELLOW/BLACK FLAGGING:** *Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or the lead Resource Advisor to the fire.*
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.

Fences and Gates:

- Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Fireline slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

For repairs along 06N06 & 06N08 – See READ for specific vehicle washing procedures!

Fire and COVID-19 Briefing Checklist

SRF LIGHTNING COMPLEX

Self-Awareness / Screening

- **Notify** supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- **Immediately separate** yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least **SIX** feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- **Protect yourself, your crew, and your camp!**

Any questions contact:

MEDL Jim Emerson 805-570-9061

HUMAN RESOURCES MESSAGE

“A man should never neglect his family for business.”

-Walt Disney

Family comes in all forms and does not have to be related by blood. While working, we often spend as much time, if not more time with our work family than our home family. Take time after your shift to reach out to your at home family today.

Patrick Aceves, Human Resources Specialist

626-940-8076

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of incident within an incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
