2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 29

PREDICTION FOR: 0700 Tue - 0700 Wed

SHIFT DATE: Sept 6th - Sept 7th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex

SHIFT UNIT: CA-SRF

SIGNED: Tom Lonka - IMET (910) 920-7865

FORECAST ISSUED: 1800 Monday, September 5th, 2022

...HEAT ADVISORY FOR TODAY...

WEATHER DISCUSSION: Record-breaking heat is possible today, as highs soar into the 100's for the lower elevations. Even in the higher terrain above 3,000 ft, highs will top out well into the 90's. Light easterly winds in the morning will become westerly then northwesterly by mid to late afternoon, gusting to around 20 mph on the higher slopes and ridges. RH values will plummet well down into the teens for all locations. Very poor RH recoveries expected overnight with readings remaining in the 20's, especially for the higher slopes and ridges as a strong thermal belt develops. The hot and dry weather will continue through the rest of the week before a cooler and potentially wetter pattern develops later in the weekend or early next week.

WEATHER FORECAST FOR TODAY (TUESDAY):

WEATHER: Sunny, but areas of smoke early, mixing out after 1400.

MAX TEMPERATURES: 92-97 degrees upper slopes and ridges.

100-105 degrees lower slopes and drainages.

24 HR Trend: Up 3-6 degrees.

24 HR Trend: Up 3-6 degrees.

MINIMUM HUMIDITY: 13 - 19% upper slopes and ridges.

24 HR Trend Down 5-8%.

12 - 18% lower slopes and drainages. 24 HR Trend Down 5-8%.

20-FOOT WIND:

SLOPE/VALLEY - Light east/downslope breeze, becoming NW or upslope 4-6 mph, gusts to 12 mph after 1400 PDT.

RIDGETOP - Light southeast wind early, becoming W then NW 6-10 mph with gusts to 20 mph after 1400 PDT.

INVERSIONS/STABILITY: Moderate inversion around 1500 feet eroding around 1200 hours.

SMOKE TRANSPORT WIND: Southwest around 15 mph.

WEATHER FORECAST FOR TONIGHT (TUESDAY NIGHT):

WEATHER: Haze through sunset then smoke settling across the fire overnight and ICP toward morning.

MINIMUM TEMPERATURES: 71-76 thermal belts above 3500 ft. 61-66 lower slopes. 24 HR Trend: Up 4-7 degrees.

MAXIMUM HUMIDITY: 19-29% mid and upper slopes. 40-60% lower slopes and along the river. 24 HR Trend: Down 3-5%.

20-FOOT WIND:

SLOPE/VALLEY - NW to N or upslope winds 7-10 mph, diminishing to NE to E or downslope 3-6 mph after 2100.

RIDGETOP - NW to N 7-10 mph with gusts up to 20 mph through 2300, diminishing to east 3-6 mph late.

INVERSIONS/STABILITY: Smoke settling over the fire and ICP with a moderate nighttime inversion around 1500 ft.

EXTENDED FORECAST WEDNESDAY - FRIDAY: The heatwave continues through the week with low RH values both during the day and at night with poor recoveries expected. A slight chance (15%) of thunderstorms, especially for the eastern parts of the fire and points eastward into Trinity County, are possible Wednesday afternoon. Dry lightning with gusty and erratic winds are possible with any storms that develop. Cooler temperatures and higher humidities make a return for late in the weekend to early next week.

PORTABLE WEATHER STATIONS:

Division N/R near Denny Road: Frequency 163.350 DTMF Tone 0059 Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060 Division N/R/U east of Elbow Dip: Frequency 163.350 DTMF Tone 0002

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 31 TYPE OF FIRE: Wildfire

FIRE NAME: SRF Lightning CA-SRF-00620 OPERATIONAL PERIOD: 09/06/2022 (0700-0700)

DATE ISSUED: 09/05/2022 TIME ISSUED: 1800

UNIT: Six Rivers National Forest SIGNED:

Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY:

** See Fire Weather Forecast**

Weather: Heat advisory is in place today with record breaking temperatures possible. Humidity will plummet well down into the teens for all locations.

Max Temp: 90°-95° (upper elevations), 99°-103° (lower slopes) Min Temp: 59°-64°

Min RH: 13%-19% (upper elevations), 12%-18% (lower slopes)

20 foot winds: Light winds in the morning will become westerly then northwesterly by mid to late afternoon, gusting to around 20 mph on the higher slopes and ridges.

FUELS SUMMARY:

Fuels and Fire Behavior Advisory Issued for Geographic Area

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. The area has seen 50-75% of normal precipitation in the current rain year and the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fire. Current conditions are reflective of an additional month of drying with fuels and fire danger indices at or above the 97th percentile. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The hard work over the last 30+ days has the fires holding within the control lines with limited reports of heat near most of the perimeter. Today is forecasted to be the hottest and driest of the week. Any remaining areas of heat across the fire will likely show themselves. Spot fires or new fires will burn actively. Be proactive in your tactical patrols and don't hesitate to order aircraft if needed. Be alert, keep calm, think clearly, and act decisively.

Fire Danger Indices - 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 97+th

September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 80% (shaded), 90% (unshaded), 30% (overnight) Spotting Distance of Torching Tree with 20 mph ridgetop winds: 0.3 miles

SPECIFIC:

Branch I: The east side of the Campbell fire will get tested today by the hot, dry conditions and the increase in the afternoon northwesterly winds. The models show the strongest winds to be focused in the area between DP 152 to DP 155. The 2015 River Complex is directly adjacent to the east flank of the Campbell and should help with suppression efforts if a spot fire were to occur.

Branch X: Branch X will be in monitor/patrol status and implementing suppression repair. When working with heavy equipment, spin weather and evaluate the Probability of Ignition (IRPG -pg 44). You may need to shut down operations during the hottest and driest parts of the day.

AIR OPERATIONS:

Sunrise 0648, Sunset 1940 (Daylength: losing 2 min, 36 sec)

Smoke will impact the lower elevations early in the day with clearing beginning by 1200.

SAFETY:

There is a significant number of snag hazards and "widow makers" on and adjacent to the fire lines. Review Hazard Tree Safety with your crews (IRPG - page 20).

Fuels and Fire Behavior Advisory

Northern California September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - o 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - o Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current North Ops Outlooks and national fuels and fire behavior advisories.

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates
- Fire managers should be aware of high use recreation and visitor sites in their area. The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

HEALTH AND SAFETY MESSAGE

For Day Operations: September 6, 2022

INCIDENT: SRF Lightning Complex

Day: Monday Shift: Day

Major Hazard and Risk:

- Hazard Tree Safety: Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards trees. This includes your sleeping areas in camp!
- Extended Extraction Times: Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- Hazardous Roads: Narrow roads, steep drop-offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. If road condition is an issue, contact your Division Supervisor to report.
- ➤ Heat Related Injuries: Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body. This applies to personnel working in ICP/camp as well.

Narrative: Wearing safety gear can sometimes be uncomfortable. The reality is that it is there for a reason and it's usually because of past accidents. Please wear approved helmets when operating a UTV or ATV on this incident. It is the USFS policy and this a USFS incident.

Heat Related Injury

Symptoms of heat injuries are many times easy.

- Profuse sweating with warm, cool, clammy skin leading to hot and dry skin.
- Muscle cramps, weakness and dizziness
- Vomiting, rapid and weak pulse
- Decreased mental status and unconsciousness

These are very serious conditions that can lead to rhabdomyolysis which is an acute medical problem.

- Immediately reduce work output and seek shade
- Loosen clothing and move away from heat
- Seek medical attention from line medics\EMT

Multiple Days of Hot Weather

- Temps easily over 100 in some areas.
- Hi temps and low RH will start the dehydration process even when you're sitting still.
- Set temperature trigger points to stop work and shade up.
- May need to go to vehicles with AC turned on.
- Take more breaks throughout the day.
- Think about standing down for a couple of hours during the heat of the day.

Safety Officers: Rick Bertram Tom Zeulner Brent Kaiser Prepared: September 5th, 2022

TRAINING SPECIALIST MESSAGE

- -A Training Specialist is assigned to the incident.
- -It is to your advantage to complete the quick registration process sooner than later.
- -The TNSP Desk located at ICP. You can also contact the TNSP, Jesse Roach, at 530-966-3459 tor training related questions.

FINANCE MESSAGE

Email address: 2022.lightningcomplex.finance@firenet.gov

INTERIM PAYMENTS

Any contract equipment that has been here at least 14 days and is not on the demob list must receive an interim payment. Please see the Equipment folks in the Finance yurt or send an email to the address above to begin that process.

TIME

Electronic CTRs, Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off in the Finance yurt. Please be sure to write legibly and print your name under your signature.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE ITEMS REPLACEMENT

<u>Cache Items</u> – Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take to Ordering. Any items that cannot be filled by Supply will need FSC, INBA or IC signature to approve replacement for cache equivalent of lost/damaged items.

- -Non-cache items/Claims For replacement of non-cache items or claims please submit a completed OF-213 and OF-289. A determination for replacement based on the documentation provided will be made by the FSC, IC, or INBA.
- -Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds.

PUBLIC INFORMATION

Willow Creek, CA 95573

We would appreciate photos from the field: fire activity, people at work, etc. Please EMAIL these photos and include the location, date taken, involved crew, and photo credit. If the photo has people working, please make sure they are in full PPE.

Online Information For The Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by <u>suppression activities</u>, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, <u>only those impacts caused by the suppression of the fire</u>.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

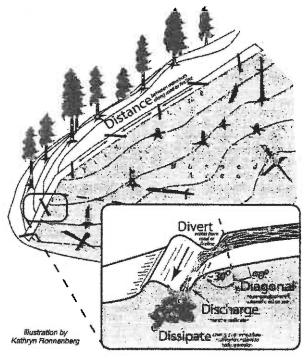

Miscellancous Resources:

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- SITES WITH YELLOW/BLACK FLAGGING: Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or and the lead Resource Advisor to the fire.
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.
 Fences and Gates:
 - Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Fireline Maximum Distance slope Apart (feet) % 1 - 5200 6 - 20125 21 - 4060 41 - 6040 >60 25

For repairs along 06N06 & 06N08 - See READ for specific vehicle washing procedures!

Fire and COVID-19 Briefing Checklist SRF LIGHTNING COMPLEX

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Difficulty breathing
 - Loss of taste or smell
 - o Fever
 - o Chills
 - Sore throat
 - Muscle pain
- <u>Immediately separate</u> yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Jim Emerson 805-570-9061

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." INCIDENT STATUS: Provide Incident summary (including number of patients) and command structure. Ex. *Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air embulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." ☐ RED / PRIORITY 1 Life or limb threatening injury or lilness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 pairs sizes, heat stroke, disoriented. Severity of Emergency / Transport YELLOW / PRIORITY 2 Serious Injury or Illness. Evacuation may be DELAYED if necessary. Priority Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness. Nature of Injury or Illness Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree) Mechanism of Injury Air Ambulance / Short Haul/Hoist Transport Request Ground Ambulance / Other Descriptive Location & Lat. / Long. (WGS84) **Patient Location** Geographic Name + "Medical" Incident Name (Ex: Trout Meadow Medical) Name of on-scene IC of Incident within an On-Scene Incident Commander Incident (Ex: TFLD Jones) Name of Care Provider Patient Care (Ex: EMT Smith) 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG page 106 Treatment:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Helispot / Extraction Site Size and Hazards:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable
Function Channel Name/Number Receive (RX) Tone/NAC * Transmit (TX) Tone/NAC *

COMMAND

AIR-TO-GRND

TACTICAL

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

B. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

4. TRANSPORT PLAN:
