INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: 2. Operational Period: Date From: 9/8/2022 Date To: 9/8/2022 **SRF LIGHTNING COMPLEX** Time From: 0700 Time To: 1900 Strategic Direction The SRF Lightning Complex will be managed with a full suppression strategy. Firefighting resources will follow risk-based decision making. Implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and protecting values. Values at risk include the safety of the public and firefighters; privately and Tribally held timberlands; the communities and outlying areas near Willow Creek, Hawkins Bar, Burnt Ranch, and Salver; water and electrical infrastructure; and natural and cultural resources. Leaders' Intent Everyone will work as a team to provide the highest level of service while assigned to the incident. All assigned resources will ensure transparent, timely and accurate communication at all levels of the incident while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding: - Safety - including the identification and mitigation of hazards to yourself and others. - Timely and thoughtful risk-based decision making. - Manage fatigue by taking breaks and maintaining work/rest cycles. - Professional behavior, conduct, and timely/effective communication. - Manage health and wellbeing by following common sense, practicing good hygiene, and communicable disease mitigations. **Management Objectives** Provide for firefighter and public safety through hazard recognition and application of the risk management process. - Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public. - Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources. - Effectively manage and track costs for all incidents identified within the SRF Lightning Complex. **Control Objectives** To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the SRF Lightning Complex fires: Branch I North of Salyer Heights and Trinity River - South of Lone Pine Ridge - East of Campbell Ridge Road, Seeley McIntosh Road, and Peach Tree Lane - West of Forest Road 07N26 Branch X -Keep the fire within current control lines. 5. 2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 31

PREDICTION FOR: 0700 Thu - 0700 Fri

SHIFT DATE: Sept 8th - Sept 9th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex

SHIFT UNIT: CA-SRF

SIGNED: Tom Lonka - IMET (910) 920-7865

FORECAST ISSUED: 1800 Wednesday, September 7th, 2022

...HEAT ADVISORY FOR TODAY....

WEATHER DISCUSSION: The intense heat will continue today and through the rest of the week. Light easterly to southeasterly flow in the morning will become northwesterly after 1400, gusting to 10-15 mph on the higher slopes and ridges. RH values will drop into the upper teens to mid 20's. Poor RH recoveries expected overnight with readings 20-40% in the higher terrain, and 40-70% in the lower slopes below 3,500 ft.

WEATHER FORECAST FOR TODAY (THURSDAY):

WEATHER: Sunny, but areas of smoke early, partially mixing out after 1500.

MAX TEMPERATURES: 86-92 degrees upper slopes and ridges.

24 HR Trend: Up 2-4 degrees.

94-99 degrees lower slopes and drainages.

24 HR Trend: Up 2-4 degrees.

MINIMUM HUMIDITY: 18 - 24% upper slopes and ridges.

24 HR Trend Down 2-4%.

17 - 23% lower slopes and drainages. 24 HR Trend Down 2-4%.

20-FOOT WIND:

SLOPE/VALLEY - Light east/downslope breeze, becoming NW or upslope 4-6 mph, gusts to 10 mph after 1500 PDT.

RIDGETOP - Light southeast breeze, becoming NW 5-8 mph with gusts 10 to 14 mph after 1500 PDT.

INVERSIONS/STABILITY: Moderate inversion around 1500 feet partially mixing out around 1400 hours.

SMOKE TRANSPORT WIND: Northwest around 5 mph.

WEATHER FORECAST FOR TONIGHT (THURSDAY NIGHT):

WEATHER: Haze through sunset then smoke settling across the fire overnight and ICP toward morning.

MINIMUM TEMPERATURES: 70-75 thermal belts above 3500 ft. 63-68 lower slopes. 24 HR Trend: Up 2-4 degrees.

MAXIMUM HUMIDITY: 20-40% mid and upper slopes. 40-70% lower slopes. 24 HR Trend: Down 4-8%.

20-FOOT WIND:

SLOPE/VALLEY - NW to N or upslope winds 4-6 mph, diminishing to NE to E or downslope 2-4 mph after 2200.

RIDGETOP - NW to N 4-6 mph with gusts 10 to 15 mph through 2100, diminishing and becoming southeast 3-6 mph late.

INVERSIONS/STABILITY: Smoke settling over the fire and ICP with a moderate nighttime inversion around 2000 ft.

EXTENDED FORECAST FRIDAY - SUNDAY: The heatwave continues through the week with low RH values both during the day and at night with poor recoveries expected. Late Saturday through Sunday morning will bring an increase in clouds and maybe some light rain or sprinkles, but little if any measurable rain is expected. Cooler temperatures and higher humidities make a return for late in the weekend to early next week as a trough of low pressure replaces the ridge of high pressure that is in place.

PORTABLE WEATHER STATIONS:

Division N/R near Denny Road: Frequency 163.350 DTMF Tone 0059 Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060

Division N/R/U east of Elbow Dip: Frequency 163.350 DTMF Tone 0002

Division G near Branch I Contingency Line: Frequency 163.350 DTMF Tone 0003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 33 TYPE OF FIRE: Wildfire

FIRE NAME: SRF Lightning CA-SRF-00620 OPERATIONAL PERIOD: 09/08/2022 (0700-0700)

DATE ISSUED: 09/07/2022 TIME ISSUED: 1800

UNIT: Six Rivers National Forest

Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY:

** See Fire Weather Forecast**

Weather: Another hot and dry day is expected with less

Max Temp: 860-920 (upper elevations), 940-990 (lower slopes) Min Temp: 630-750

Min RH: 18%-24% (upper elevations), 17%-23% (lower slopes)

20 foot winds: Light southeast breeze, becoming northwest 5-8 mph with gust to 14 after 1500

FUELS SUMMARY:

Fuels and Fire Behavior Advisory Issued for Geographic Area

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. The area has seen 50-75% of normal precipitation in the current rain year and the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fire. Current conditions are reflective of an additional month of drying with fuels and fire danger indices at or above the 97th percentile. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Yesterday's clouds provided relief from the previous day's very hot temperatures. Overnight recovery improved so the window for active burning will be much smaller. Less internal burning and clear skies will improve visibility down into the drainages. There is no longer an aerial supervision platform, but several helicopters available for bucket work if needed.

Fire Danger Indices - 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 97th September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 80% (shaded), 90% (unshaded), 30% (overnight)
Spotting Distance of Torching Tree with 10 mph ridgetop winds: 0.20 miles

SPECIFIC:

Branch I: The hard work is paying off as fire behavior continues to diminish within the Campbell fire. The remaining activity is limited to backing fire within the interior unburned islands and isolated smoldering of dead ground fuel. Continue tactical patrols during the hottest part of the day that can look for roll-out and assess any new signs of heat near the lines.

Branch X: Keep posting lookouts who can assess smokes. When working with heavy equipment, spin weather and evaluate Probability of Ignition. You may need to shut down operations during the hottest and driest parts of the day.

AIR OPERATIONS:

Sunrise 0650, Sunset 1937 (Daylength: losing 2 min, 36 sec)

Smoke will impact the lower elevations early in the day with clearing beginning by early afternoon.

SAFETY:

Continue to match your operational tempo with the tempo of the fire. Slow is smooth and smooth is fast.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - o 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current North Ops Outlooks and national fuels and fire behavior advisories.

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates
- Fire managers should be aware of high use recreation and visitor sites in their area. The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

HEALTH AND SAFETY MESSAGE

"Safety isn't expensive, it's priceless." - Author Unknown

INCIDENT: SRF Lightning Complex

Date: September 8, 2022

Time: 0700-1900

Major Hazard and Risk:

- Hazard Tree Safety: Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fire line.
- Extended Extraction Times: Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely manner.
- Hazardous Roads: Narrow roads, steep drop-offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments.
- Heat Related Injuries: Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body.
- Dehydration: Ensure you and your personnel are staying hydrated. Fill up early.
- Fatigue: Watch your people today, look for signs of fatigue and mitigate them.
- Heavy Equipment: Be extremely careful around and below heavy equipment.

Narrative: Some of you are demobing and going home or leaving this complex and going to a new fire. Prepare for driving, make sure your vehicle is ready for the trip and get good rest before leaving. Don't drive over 10 hours and don't drive past 2200 hours at night. R.O.N. if you need to.

Helena Hot Shot - Sara Madsen Rest in Peace - Sept. 2, 2020

On Sept. 2, 2020 at approximately 0021 hours, Idaho State Police investigated a single-vehicle crash south of Ashton, in Fremont County Idaho. Sara (age 24) was returning home to Tetonia, Idaho after a fire assignment with the Helena Hot Shots.

She started her love of natural resources as a Youth Conservation Corp member, later moving into the fire program where she served as a crewmember on a Type 2 IA Hand Crew from 2017 to 2019. Year 2020 was her first year as part of the Helena Hot Shot crew.

<u>Lessons learned:</u> When tired, pull over and rest and always wear your seatbelt. Every firefighter **must** make it home.

Safety Officers: The Rick Bertram, Tom Zeulner, Brent Kaiser

Hazard Tree Safety

Hazard Tree Indicators:

- ✓ Trees that have burned
- √ Shallow tree root systems
- ✓ Dead & broken top trees
- ✓ Leaning or hung up trees

Prepared: September 7th, 2022

BR/DIV	HAZARDOI	JS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES				
All		Hazard Trees	 Follow "Hazard Tree Safety" guidelines, reference IRPG Post lookouts or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. 				
All	Extended Medical Extraction Times		 Identify helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e., smoke inversions, rain, and high winds etc.) that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively. 				
All	Steep Te	rrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. 				
All	D	riving & Traffic	 SCHOOL is back in session, watch for children there are lots of bus stops Practice "Defensive Driving" techniques traveling on all roads Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seatbelts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, etc.) and use the 3 second rule. 				
All	Air Operations		 Establish and ensure communications are adequate with helibase aircraft Ensure work/rest policies are being met for the flight crews. Involve aviation leadership with operational planning to avoid risk/exposure Establish trigger points to disengage aviation resources. Utilize the appropriate aircraft for the mission. Always consider pilot exposure: RISK VS GAIN 				
Branch 1 Branch 10	Heavy Equipment Operations		 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment. 				
All	Fatig	ue \ Overexertion	 Drink water and sports drinks throughout the day, before and after shift also Drink at a ratio of 2 waters to 1 sports drink Eat well and get plenty of sleep Stand down if needed during the heat of the day Come off the line and get into vehicle with A\C on Take more breaks during the hottest part of the day 				
All	Chipper \ Chainsaw Operations		 Follow "Hazard Tree Safety" guidelines, reference IRPG Follow "Procedural Felling Operations", reference IRPG Only Chipper contractor can Feed the Chipper Ensure all personal safety gear is worn to address mechanical hazards Ensure personnel are spaced to ensure no one is accidently pushed towards the chipper

TRAINING SPECIALIST MESSAGE

- -A Training Specialist is assigned to the incident.
- -It is to your advantage to complete the quick registration process sooner than later.
- -The TNSP Desk located at ICP. You can also contact the TNSP, Jesse Roach, at 530-966-3459 tor training related questions.

FINANCE MESSAGE

Email address: 2022.lightningcomplex.finance@firenet.gov

INTERIM PAYMENTS

Any contract equipment that has been here at least 14 days and is not on the demob list must receive an interim payment. Please see the Equipment folks in the Finance yurt or send an email to the address above to begin that process.

TIME

Electronic CTRs, Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off in the Finance yurt. Please be sure to write legibly and print your name under your signature.

For demobing resources: Finance does not sign CTRs or shift tickets, please make sure your supervisor signs them prior to submitting to Finance.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE ITEMS REPLACEMENT

<u>Cache Items</u> – Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take to Ordering. Any items that cannot be filled by Supply will need FSC, INBA or IC signature to approve replacement for cache equivalent of lost/damaged items.

- -Non-cache items/Claims For replacement of non-cache items or claims please submit a completed OF-213 and OF-289. A determination for replacement based on the documentation provided will be made by the FSC, IC, or INBA.
- -Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds.

We would appreciate photos from the field: fire activity, people at work, etc. Please EMAIL these photos and include the location, date taken, involved crew, and photo credit. If the photo has people working, please make sure they are in full PPE.

Online Information For The Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by <u>suppression activities</u>, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, <u>only those impacts caused by the suppression of the fire</u>.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

Miscellaneous Resources:

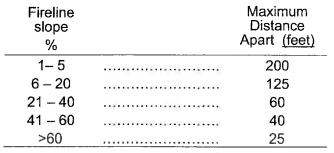

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- SITES WITH YELLOW/BLACK FLAGGING: Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or and the lead Resource Advisor to the fire.
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.

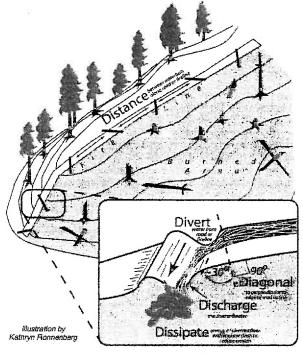

Fences and Gates:

Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

For repairs along 06N06 & 06N08 - See READ for specific vehicle washing procedures!

Fire and COVID-19 Briefing Checklist SRF LIGHTNING COMPLEX

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - Difficulty breathing
 - o Loss of taste or smell
 - o Fever
 - o Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Jim Emerson 805-570-9061

HUMAN RESOURCES MESSAGE

"Well, I'll tell you Stew, I did battle some humungous waves.

But like I told the guy on ABC, danger is my business."

- Jeff Spicoli, Fast Times at Ridgemont High

As you get closer to the end of your shift do not get complacent in how you operate. Injuries and accidents happen when we start to get too comfortable and take short cuts. Take care of yourself and your extended family while on assignment.

Patrick Aceves, HRSP(T) 626-940-8076

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

=	CONTACT	COMMUNICATIONS	DISPATCH	(Verify correct frequency prior to starting_report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Commun Meadow Medical, i	ications, I have a Red pr C is TFLD Jones. EMT S	riority patient, unconscious, struck i Smith is providing medical care."	by a falling tree. Requ	lesting air ambulance to I	Forest Road 1 at (Lat./Long.) This will be the Trout		
•	Beverity of Emergency / Transport Priority RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° bums more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° bums not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.						
	njury or lilness & sm of Injury				Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)		
Transpo	ort Request				Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patien	t Location				Descriptive Location & Lat. / Long. (WGS84)		
Incide	nt Name				Geographic Name + "Medical" (Ex: Trout Meadow Medical)		
On-Scene Inci	dent Commander				Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)		
Patie	nt Care				Name of Care Provider (Ex: EMT Smith)		
3. INITIAL PATI	ENT ASSESSMENT:	Complete this section for each patien	nt as applicable (start wil	th the most severe patient)			
Patient Assessment: See IRPG page 106
